The Delaine breeders were conspicuous not in point of numbers, but in quality of the twenty-six sheep exhibited. A. E. Green, of Orchard Lake, Mich., brought out ten head that embraced considerable quality and it was no surprise when the judge, Professor Shaw, directed the blue ribbons to his win-ners: First on yearling ram, first on aged ewe, first on yearling ewe, as well as aged flock, also sweepstakes on aged ewe and ram. E. M. Moore, of Orchard Lake, Mich., won first and second on aged ram, first on ram lamb and breeder's flock, besides several seconds. W. S. Dixon, of Brandon, Wis., ex-hibited seven head. While this flock took third in most classes, it is one that reflects credit on the breeder; lack of show-yard condition was the chief obstacle. To say that the Delaine show was very creditable is putting it mildly, and the quality of animals exhibited throws a bright reflection on the prominent place this breed occupies among American sheep breeders. Owing to the plan in getting out catalog for the sheep exhibit it was found impossible to give name and registration number of many important prize winners. This is seriously regretted and it is hoped that the association will adopt the plan of giving these important details before another show season, yet in all cases possible these were obtained from the ex-hibitor. The awards are as follows:

AWARDS.

Aged Ram—First and second, E. M. Moore; third, W. S. Dixon.
Ram One Year Old—First, A. E. Green; second, Moore; third, Dixon.
Ram Lamb—First, Moore; second and third, Green.
Aged Ewe—First, Green; second, Moore; third, Dixon.
Ewe One Year Old—First, Green; second, Dixon.
Breeder's Flock—First, Moore; second, Green.
Aged Flock—First, Green; second, Moore.
Sweepstakes Ewe—Green.
Sweepstakes Ram—Moore.

SHROPSHIRE.

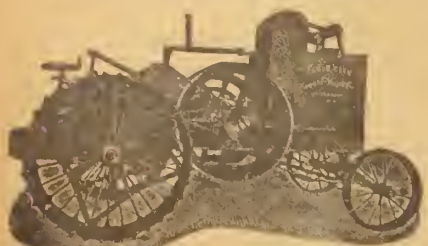

This cosmopolitan breed made an excel-lent showing. The most important of these were recently imported and exhibited at the Royal and other important shows throughout England and Scotland. Imported animals in every class except Minnesota specials were good individuals, well fitted, and among them some of the best ever brought to Minnesota. W. R. Weaver, Canton, Ill., had a diffi-cult task to place the awards. Exhibitors of this breed were: Geo. McKerrrow & Sons, Pewaukee, Wis.; W. J. Boynton, Viola, Minn.; Chandler Bros., Kellerton, Iowa; W. Woodard, Bloomer, Wis.; Renk Bros., Sun Prairie, Wis.; Peter Lees, Excelsior, Minn.; F. W. Harding, Waukesha, Wis. Minne-sota breeders were outclassed in open com-petition, but in several cases their sheep lacked fitting and they could not expect to get inside the money in competition with imported animals.

Aged Ram—A grand, imported, Gwyne, 300-pound ram shown by McKerrrow & Sons was placed first in class—a strong masculine sheep carrying an excellent fleece. Chandler Bros. followed with a Minton ram. In the yearling class the typical Shropshire Corbett ram that won second at the Royal. This sheep is completely covered with wool. He was first and champion at Des Moines. The Bratherwick ram owned by McKerrrow & Sons ran him a close second—a rather different type, more growthy, not as well covered. Renk Bros. brought in a second prize ram at Royal costing \$225, but was placed be-low a Butter ram owned by McKerrrow & Sons. Three imported ram lambs won the honors in their class. First on Everal ram owned by McKerrrow & Sons; second, a Walford lamb owned by Harding; third, a Nock ram, owned by McKerrrow & Sons, who also won first and third with aged ewes—the first a Pulley ewe, the other an Everal.

Harding's yearling imported ewe won first in class and championship. She has lots of scale, plenty of wool, and is an excellent handler. McKerrrow followed with a pair of Pulley ewes. Plenty of imported ewe lambs to win in the remaining classes, and set a difficult task before the judge. The flocks went, first to McKerrrow & Sons, head-ed by his aged Gwyne ram; second to Hard-

The Flour City

GASOLINE ENGINES
TRACTION, PORTABLE, STATIONARY

KINNARD-HAINES CO.
MINNEAPOLIS, MINNESOTA

Miss Allerton 6528 and eight of her fall litter go in Messrs. W. T. Garrett & Sons' sale at Maryville, Mo., on Sept. 25, 1906. She is a full sister to Blain's Tecumseh (bred by Messrs. Garrett & Sons), one of the great hogs of the breed. Miss Allerton was got by the great breeding boar, Allerton's Tecumseh, and was out of Miss Doyle 2d by Butler's Hadley. As a brood sow she ranks among the best. Her litter of two boars and six sows that go in the sale were got by I Am Sunshine (now dead), one of the greatest boars Messrs. Garrett & Sons ever owned.

ing, headed by Corbett yearling ram, Hard-lung was barred in breeder's flock and the honors went to McKerrrow. Championship ribbon was laid across Hardlung's Corbett ram. Some took exception to this, claiming him lacking in style, but he has many good qualities and conceded one of the best sheep ever exhibited in Minnesota.

Whilo Renk Bros.' winnings were small their flock is worthy of special comment, having recently imported fifty head out of the Buttar, Blatherwick, Farmer, and other noted flocks of England. Chandler Bros.' showing was excellent and it was to be regretted that some of their excellent individuals were sent out without a ribbon. As a whole imported sheep were well covered, while many of the American flocks were lacking in this respect.

OXFORD DOWNS.

Twenty-four head represented the Oxfords, fourteen of these belonging to the far-famed flock of Geo. McKerrrow & Son, of Pewaukee, Wis., who won in all classes where entries were made. The remaining ten were exhibited by W. E. Oliver, of Worthington, Minn. Here again were imported animals placed in competition with American-bred sheep. W. R. Weaver acted as judge and his only difficulty was in satisfying himself in placing individuals of the McKerrrow flock. Strong, massive and heavy-boned, well covered even to the extremities. Had the flock of the Canadian breeder, Henry Arkell, who won honors for himself at St. Louis, been exhibited here the judge would have had a hard piece of work cut out for him, but as the Oliver flock were not prepared to meet such competition, the list of awards will appear one-sided, yet justly so. Judge Weaver placed the awards as follows:

AWARDS.

Aged Ram—First and second, Geo. McKerrrow & Son; third, W. E. Oliver.
 Ram One Year Old—First, second and third, McKerrrow & Son.
 Ram Lamb—First and second, McKerrrow & Son; third, Oliver.
 Aged Ewe—First and second, McKerrrow & Son; third, Oliver.
 Ewe One Year Old—First and second, McKerrrow & Son; third, Oliver.
 Ewe Lamb—First and second, McKerrrow & Son; third, Oliver.
 Flock—First and second, McKerrrow & Son. Breeder's Flock—First, Oliver.
 Special to Minnesota breeders by American Oxford Down Record Association:
 Ewe One Year Old—First, Oliver.
 Pen of Four Animals, Either Sex—First, Oliver.

RAMBOUILLET.

The Rambouillet exhibit was passed upon by Professor Shaw. The veteran judge expressed his delight in seeing such creditable flocks. They numbered twenty-seven head in all, there being but one imported sheep among the number. Professor Shaw paid special importance to the character of the fleece, as well as the general usefulness of the individual, and in some instances consumed considerable time before placing the awards. The flock exhibited by W. S. Dixon, Brandon, Wis., comprising ten head, won several important places. Other exhibitors were F. W. Harding, Waukesha, Wis., who exhibited ten head, showing typical Rambouillet characteristics; E. M. Moore, Orchard Lake, Mich., exhibited in connection with his Delaines seven head. Sweepstakes award went to Wm. Dixon on his aged ram and sweepstakes ewe owned by E. M. Moore. Moore's yearling ram, winning second place at Des Moines and first at Hamline, is sold for export trade to South Africa. This ram promises to figure well in show competition in the future, should he have an opportunity. Moore's aged ewe, awarded first, was champion everywhere shown in 1905 and is considered one of the best in America. Professor Shaw placed the awards as follows:

Ram Any Age—First, Dixon; second, Moore; third, Harding.
 Ram One Year Old—First, Moore; second and third, Harding.
 Ram Lamb—First, Dixon; second, Harding; third, Moore.
 Aged Ewe—First, Moore; second, Dixon; third, Harding.
 Ewe One Year Old—First, Dixon, second, Moore; third, Harding.
 Ewe Lamb—First, Dixon; second, Moore; third, Dixon.
 Flock—First, Dixon; second, Moore.
 Breeder's Flock—First, Moore; all others barred.
 Champion Ram—Arnold.
 Champion Ewe—Arnold.

HAMPSHIRE.

Renk Bros., of Sun Prairie, Wis., exhibited

the only flock of Hampshires, consisting of nine head. This was extremely regretted by Judge W. R. Weaver, of Canton, Ill., as they were ready for strong competition, winning at Des Moines the week preceding championship on aged ewe and aged ram. The entire flock were imported and were typical and excellent representatives. The improvement in type and mutton conformation of this breed was marked in these few individuals. The coarseness of the breed that was previously objected to could not be applied to this particular flock. They are a thick, shapely and fleshy lot, good handlers, standing well on their legs. In point of numbers the Hampshires were the most insignificant of all the breeds, but their quality reflected credit to their breeder and present owners.

LINCOLNS.

The association received entries from three breeders of Lincolns. A. A. Arnold & Son made twenty-four entries; Wm. Malcolm, Bigelow, Minn., entered six, and Wm. Young, Havana, Minn., two. This long-wooled type was not as well represented as was expected. The Arnold flock were in fair show condition and having just come from Des Moines were in higher flesh than other flocks. Mr. Young's sheep were not brought into the ring, consequently the remaining two absorbed all the ribbons with classes in which they were entered, Arnold winning the greater majority of these, capturing all the blue and in several classes all the ribbons. This flock also won everything at Des Moines, and go from here to Milwaukee.

SOUTHDOWNS.

The Southdowns, though few in numbers, comprised some typical and modern individuals. McKerrrow & Son, having just imported a few select ones, brought them along with their Shropshires and Rambouillet and were ready for good competition. His yearling imported ram won championship, but championship in ewe class went to McKerrrow's American-bred ewe, also winning first over her in class. Although this breed is not as popular as it was, the individuals shown here lead us to believe that McKerrrow & Son are still partial to some extent to these aristocrats. They also won the honors at Des Moines and winning in all classes at Hamline except a third, which went to Wm. Dixon, Brandon, Wis.

CHEVIOTS.

Lewis Bros. exhibited a nice flock of Cheviots for G. W. Parnell, Wingate, Ind., in connection with their exhibit of Cotswolds. The flock consisted of ten head, comprising imported and American-bred animals. In most classes the distinction between imported and American bred was very marked, but this flock of Cheviots was the exception. These sheep were excellent specimens, heavy boned and well covered, and in a free-for-all class would have won their share. This, however, was not offered. Wm. Young, breeder of Leicesters, also had a small flock, but were not fitted.

LEICESTERS.

Only one flock of Leicesters represented this breed, owned by Wm. Young, Havana, Minn. These are all American bred and chiefly his own breeding. This weak showing was extremely regretted by the management and as the flock exhibited were not in show condition, gave the breed an insignificant appearance, when compared with other well-fitted animals of other breeds. W. R. Weaver acted as judge.

DORSETS.

W. J. Boynton exhibited the only flock of Horned Dorsets. These were not fitted, but having no opposition received all the awards.

GOATS.

Two flocks of Angora goats were exhibited, owned by K. E. Lathrop, Hugo, Minn., and J. McD. Randles, in all twenty-two head. Owing to a disappointment in securing a judge it was necessary to defer judgment on these until Thursday. These Angoras were a well-bred lot and some excellent specimens were among them.

NEBRASKA STATE FAIR

With most perfect fair weather, a record breaking attendance and the largest exhibit ever assembled on the state fair grounds Nebraska held her annual state fair. The crowds began coming early and seemed to want to stay until every exhibit had been seen and examined. On Wednesday all previous records were broken and 43,000 passed through the gates which was 15,000 more than the best day heretofore. On that day the crowds were so dense that it was next to impossible to see the exhibits in buildings and many abandoned an attempt to see the live stock.

In the live stock department every cattle stall was filled and two herds had to be quartered in temporary quarters on the outside of the regular barns and one herd was placed in stalls in the live stock pavilion. The association had built three new hog barns and even then the number of available pens was wholly inadequate to the demands, something like three hundred having been turned away for want of room.

The new stock pavilion built last year is all right but it is now seen to be far too small and seemed to be a favorite place for thousands of people to sit and watch the judging of cattle and horses.

In the agricultural hall where all the products of garden and farm were displayed was to be seen the best exhibit ever seen on the Nebraska grounds and was even better than similar display at other larger and more pretentious fairs. A lively rivalry existed between county displays which were of the highest excellence and so close was the competition in this line that the judges did not make the awards until the last day of the fair.

The fruit exhibit was most excellent in both character and size. Nebraska grown fruits filled all the space available, and on one day hundreds of bushels of apples and a like number of baskets of grapes were given away to fair visitors. This was done under the auspices of the State Horticultural Society and seemed to be a nice feature of the fair. The writer had a basket of fruit given him that would make a Missouri apple look pale and California grapes could not approach the Nebraska variety in flavor.

One of the exhibits found on the Nebraska fair grounds was from the State Hatchery. This building is always crowded with visitors and this year the crush was so great that the efforts of a bunch of police were necessary to handle the crowds at that place.

The state fair in Nebraska has grown

so much in recent years that it will be necessary to rearrange the buildings and to make arrangement for the annexation of additional grounds. This will probably be a perplexing question for the board to solve. In addition to the necessity for more grounds the transportation question will have to be given some consideration. The arrangement for handling great crowds is simply inexcusable, for which the state fair association, of course, is not responsible.

The implement display at the Nebraska fair was as large as the facilities at hand would justify. Every available space was taken for implements and they were to be found in all parts by the acre. The visitor in looking around would get lost in the sea of red paint and bright steel, and the odor of gasoline was everywhere noticeable.

CATTLE.

SHORT-HORNS.

There was a good showing in this class and competition was lively. The following exhibitors were present: Branson Bros., Waverly, Neb. (10 head); J. R. Mansfield & Sons, Wisner, Neb. (1 head); Jno. O'Kane, Wisner, Neb. (1 head); C. F. Behlers, Wisner, Neb. (1 head); C. L. Laurie, Emerald, Neb. (5 head); C. G. Nootz, Raymond, Neb. (11 head); J. G. Brenizer, Broken Bow, Neb. (11 head); E. F. Baker, Cheney, Neb. (2 head); S. E. Shellenbarger, Alma, Neb. (11 head); Wm. Ernest & Son, Graf, Neb. (8 head); G. F. Hart, Summerfield, Kan. (8 head); G. H. White, Emerson, Iowa (5 head); H. Philipson, Hickman, Neb. (8 head); Thos. Andrews, Cambridge, Neb. (11 head); Wm. Smiley, Albany, Wis. (10 head); C. Graff, Bancroft, Neb. (11 head); Retzlaff Bros., Burnett, Neb. (9 head); C. A. Saunders, Manilla, Iowa (6 head); T. K. Tomson & Sons, Dover, Kan. (10 head); T. J. Wornall & Son, Liberty, Mo. (10 head); Geo. Dailey, Kearney, Neb. (6 head). The awards in this class were placed by C. M. Stannard, of Emporia, Kan., as follows:

AWARDS.

Bull Three Years or Over (7 in class)—First, Hart, on Secret Prince; second, Branson Bros., on Happy Hampton; third, Saunders, on King Cumberland; fourth, Retzlaff Bros., on Orange Chief; fifth, Tomson & Sons, on Silvery Knight; sixth, Shellenbarger, on Diamond Prince.

Bull Two Years and Under Three (5 in class)—First, Wornall & Son, on The Conqueror; second, Andrews, on Scotty; third, Retzlaff Bros., on Secret President; fourth, Laune & Sons, on Canadian Prince; fifth, Brenizer, on Charm Bear.

Bull One Year and Under Two (11 in class)—First, Wornall & Son, on Careless Conqueror; second, White, on Contractor's Banner Bearer; third, O'Kane, on American Flag; fourth, Hart, on Roan Secret; fifth, Tomson & Sons, on Gallant Lavender; sixth, Nootz, on King Rodney.

Senior Bull Calf (12 in class)—First, Tomson & Sons, on Victor Archer; second, Wornall & Son, on Oakwood Conqueror; third, Stewart Bros., on Evening Star; fourth, Mansfield & Son, on Nonpareil Count; fifth, Brenizer, on Missie's Gloster King; sixth, Branson Bros., on calf by Nonpareil Victor 2d.

Junior Bull Calf (10 in class)—First, Retzlaff Bros., on Gallant Chief; second, Hart, on Gold Medal; third, Shellenbarger, on Diamond Jr.; fourth, Hart, on Gold Cola; fifth, Branson Bros., on calf by Happy Hampton; sixth, Nootz, on calf by Meadow Light.

Cow Three Years or Over (13 in class)—First, Wornall & Son, on Glosterina; second, Andrews, on Dora A.; third, Tomson & Sons, on Elder Lawn Victoria 3d; fourth, Behlers, on Pluma; fifth, Shellenbarger, on Dora's Best; sixth, White, on Rosedale 4th.

Heifer Two Years and Under Three (13 in class)—First, Tomson & Sons, on Cherry Lass; second, Andrews, on White Rose; third, Saunders, on Velvet Eyes; fourth, Wornall & Son, on Choice Violet 2d; fifth, Tomson & Sons, on Thorny Bud; sixth, Shellenbarger, on Iole.

Heifer One Year and Under Two (13 in class)—First, Saunders, on Independence Lady; second, Shellenbarger, on Lancaster Maid; third, Tomson & Sons, on Lavana; fourth, Brenizer, on Dorothy; fifth, Tomson & Sons, on 5th Elder Lawn Victoria; sixth, Wornall & Son, on Sweet Tone.

Senior Heifer Calf (10 in class)—First, Tomson & Sons, on Delightful; second, Andrews, on Roan Isabell; third, Wornall & Son, on Sweet Tone 2d; fourth, Wornall & Son, on Meadow Breebe; fifth, Saunders, on Rose Champion; sixth, Shellenbarger, on Maud Thiscus.

Junior Heifer Calf (8 in class)—First, Saunders, on Cumberland's Princess; second, Tomson & Sons, on Rose Archer; third, Andrews, on Dora B.; fourth, Bailey, on Matilda's Maid; fifth, Brenizer, on Lady Wal-laby; sixth, Nootz, on Red Empress.

Exhibitor's Herd (6 in class)—First, Tomson & Sons; second, Wornall & Son; third, Saunders; fourth, Andrews; fifth, Shellenbarger; sixth, White.

Breeder's Young Herd (5 in class)—First, Tomson & Sons; second, Wornall & Son; third, Andrews; fourth, Nootz; fifth, Brenizer.

Get of Sire (5 entries)—First, Tomson & Sons, on get of Gallant Knight; second, Wornall & Son, on get of Imp. Conqueror; third, Andrews, on get of Bar None; fourth, Hart, on get of Secret Prince; fifth, Brenizer, on get of Crimson Scott; sixth, Nootz, on get of Meadow Light.

Produce of Cow (6 in class)—First, Tom-

There are two good features in the above illustration. In the first place, the feeder represented is one that has contributed to the welfare of many a herd. It is manufactured by C. A. Wright, of Rosendale, Mo., and sells at \$10 with freight prepaid to nearest railway station of buyer. The feeder is usually made to accommodate from twenty-six to thirty hogs, though any size may be ordered. It is designed to absolutely prevent contamination of feed while it is in the trough and it does the work perfectly. It accommodates a small pig as well as a large hog and prevents crowding and tussling, causing hogs to eat their food in a normal manner. The hogs in the illustration constitute the second important factor to which attention was ones that Mr. Wright showed at the Iowa Fair, class and also a number of other premiums. These pigs go into his Duroc sale which will be held October 18th. Upon application, Mr. Wright will send testimonials from hundreds of successful swine breeders who have used this feeder. Address C. A. Wright, Rosendale, Mo. See advertisement on page 14.

Your Advantage in Advance Fence

We give thirty days' free trial on your own farm—money back if not entirely satisfactory—and allow you the wholesale maker's price if you decide to keep it. Now, Advance is the strongest fence made because we don't cut the stay wire but weave it right into the top and bottom strand wires, thus saving all the strength and making the fence solid as a rock. Our catalogue tells all about it and gives wholesale delivered prices.

ADVANCE FENCE CO., 3482 Old St., Peoria, Ill.

FENCE Strongest Made

Made of High Carbon coiled wire. We have no agents. Sell direct to user at factory prices on 30 days free trial. We pay all freight. Catalog shows 37 styles and heights of farm and poultry fence. It's free. Buy direct. Write today.

COILED SPRING FENCE CO.
 Box 20, WINCHESTER, INDIANA.

WE HAVE CORNERED the greatest money making proposition in this country; secret divulged to first applicant from each city, town or village. Agents should secure territory immediately before too late.

D. L. SHERMAN, 21 Dover St., New York.

son & Sons, on produce of Victoria of Maple Mill; second, Wornall & Son, on produce of Nonpareil of Meadow Lawn 5th; third, Andrews, on produce of Fannie 8th; fourth, Hart, on produce of Fairy Belle; fifth, Brenizer, on produce of Missie 10th; sixth, Nootz, on produce of Saraphine Belle.

Junior Champion Bull—Wornall & Son, on Careless Conqueror.

Senior Champion Bull—Wornall & Son, on The Conqueror.

Junior Champion Female—Saunders, on Velvet Eyes.

Senior Champion Female—Tomson & Sons, on Cherry Lass.

HEREFORDS.

There was the usual good display of Hereford cattle on exhibition, the following exhibitors being present: W. N. Rogers, McCook, Neb. (10 head); Mousel Bros., Cambridge, Neb. (14 head); E. H. Morgan, Blue Rapids, Kan. (9 head); D. W. Ohl, Iowa City, Iowa (6 head); G. G. Clement, Ord, Neb. (5 head); A. J. Firkins, Ord, Neb. (6 head); W. B. Hunt, Blue Rapids, Kan. (2 head). The awards were made by T. J. Wornall, of Liberty, Mo., as follows:

AWARDS.

Bull Three Years or Over (4 in class)—First, Morgan, on Onward 18th; second, Rogers, on Beau Donald 28th; third, Firkins, on Onward 16th; fourth, Ohl, on Rustler 7th.

Bull Two Years and Under Three (2 in class)—First, Mousel Bros., on Principles Dictator; second, Firkins, on Fast Freight.

Bull One Year and Under Two (6 in class)—First, Rogers, on Beau of Shadland 19th; second, Mousel Bros., on Lloyd's Bully Boy; third, Clement, on Victor; fourth, Firkins, on Ord Donald; fifth, Morgan, on Dale; sixth, Hunt, on Conductor.

Senior Bull Calf (7 in class)—First, Ohl, on Woodland Chief; second, Rogers, on Beau of Shadland 26th; third, Mousel Bros., on Principles 1 Am; fourth, Ohl, on Burley; fifth, Mousel Bros., on Principles Lad; sixth, Morgan, on Dauntless.

Junior Bull Calf (3 in class)—First, Mousel Bros., on Alto Hesiod; second, Rogers, on Beau of Shadland 27th; third, Morgan, on Lord Primrose.

Cow Three Years or Over (4 entries)—First, Rogers, on Shadland's Maid 4th; second, Mousel Bros., on Mary Helwig; third, Ohl, on Dora Thorne; fourth, Morgan, on Primrose.

Cow Two Years and Under Three (5 entries)—First, Rogers, on Shadland's Maid 28th; second, Mousel Bros., on Principles Lassic; third, Ohl, on Amelia; fourth, Clement, on Lady Schleylight; fifth, Ohl, on Stella May.

Heifer One Year and Under Two (10 in class)—First, Morgan, on Dorothy; second, Mousel Bros., on Principles Flossie; third, Rogers, on Shadland's Maid 34th; fourth, Rogers, on Shadland's Maid 33d; fifth, Morgan, on Miss Bountiful; sixth, Morgan, on Miss Armour Maid.

Senior Heifer Calf (8 in class)—First, Rogers, on Shadland's Maid 39th; second, Mousel Bros., on Principles 4th; third, Clement, on Golden Lass; fourth, Ohl, on Bonnie Wilton; fifth, Morgan, on Pearl Dauntless; sixth, Firkins, on Onward Maid 5th.

Junior Heifer Calf (4 in class)—First, Mousel Bros., on Principles Lady; second, Mousel Bros., on Principles Queen; third, Rogers, on Shadland's Maid 41st; fourth, Hunt, on Lady H.

Exhibitor's Herd (3 in class)—First, Rogers, second, Mousel Bros.; third, Ohl.

Breeder's Young Herd (3 in class)—First, Mousel Bros.; second, Rogers; third, Firkins.

Get of Sire (3 in class)—First, Rogers, on get of Beau Donald 28th; second, Mousel Bros., on get of Principles 4th; third, Ohl, on get of Bovick 3d.

Produce of Cow (4 in class)—First, Mousel Bros., on produce of Eugenia; second, Rogers, on produce of Dolly Rogers; third, Rogers, on produce of Dolly Rogers 3d; fourth, Philip Unit.

Senior Champion Bull—Morgan, on Onward 18th.

Junior Champion Bull—Mousel Bros., on Alto Hesiod.

Senior Champion Female—Rogers, on Shadland's Maid 28th.

Junior Champion Female—Morgan, on Dorothy.

HOLSTEINS.

The awards were made by the same judge in this class. The following exhibitors were represented: Alex Sneddon, Eagle, Neb. (16 head); John C. Doubt, Ilavelock, Neb. (14 head); H. C. Glissman, Omaha, Neb. (20 head); C. P. Stone, Peabody, Kan. (12 head). The following are the awards:

AWARDS.

Bull Three Years and Over (4 in class)—First, Stone, on Ethel Alexandra 2d's Sir Netherland; second, Glissman, on Jessie Clothilde's Lad; third, Sneddon, on Lida Lad; fourth, Doubt, on Gerben Hengerveld Sir De Kol.

Bull One Year and Under Two (4 in class)—First, Doubt, on Sharon Gerben De Kol; second, Glissman, on Sunny Jim; third, Sneddon, on Genesee Prince Alcarra; fourth, Glissman, on Shady Brook Gerben, American Lad.

Bull Two Years and Under Three (1 in class)—First, Glissman, on Anna V's Lad.

Senior Bull Calf (9 in class)—First, Stone, Lady Truth's Pride, Sir Netherland; second, Glissman, Bonzellas Gerben; third, Doubt, on Gerben Tengerbelt Sir De Kol (unregistered); fourth, Sneddon, on Violet V's Lad; fifth, Doubt, on Sir Patrie Gerben Hengerveld; sixth, Glissman, on Sir Gerben.

Junior Bull Calf (6 in class)—First, Glissman, on Banquo's Sir Gerben; second, Karoline's Sir Gerben; third, Sneddon, on Fannie B's Lad; fourth, Glissman, on Shady-

brook Sir Karoline; fifth, Anna Parthena's Lad; sixth, Doubt, on calf by Gerben Hengerveld Sir De Kol.

Cow Three Years and Over (10 in class)—First, Stone, on Maryke 3d's Gerben 4th; second, Stone, on Wayne's Partheula; third, Stone, on Lady Wayne's McChildie; fourth, Glissman, on Lilly Henry; fifth, Sneddon, on Margaret V.; sixth, Sneddon, on Fannie B.

Heifer Two and Under Three Years (7 in class)—First, Stone, on Princess Pel De Kol; second, Sneddon, on Lulo Parthena Leda; third, Doubt, on Francis Gerben Hengerveld; fourth, Stone, on Wayne's Mercedes; fifth, Sneddon, on Margaret Prince S. Leda; sixth, Sneddon, on Petry's Leda.

Heifer One Year and Under Two (8 in class)—First, Stone, on Queen Josephine's De Kol; second, Stone, on Queen Josephine's De Kol; third, Doubt, on Charlotte Gerben De Kol; fourth, Doubt, on Marion Gerben De Kol; fifth, Glissman, on Banquo Soldene; sixth, Sneddon, on Violet Parthena Princess.

Senior Heifer (7 in class)—First, Stone, on Queen Josephine's Netherland; second, Stone, on Sissie Baker's Netherland; third, Sneddon, on Margaret Parthena Wane; fourth, Glissman, on Premier Wayne's Gerben; fifth, Doubt, on Maid Gerben De Kol; sixth, Glissman, on Chapple McThilde Gerben.

Junior Heifer Calf (4 in class)—First, Glissman; second and third, Sneddon.

Exhibitor's Herd (4 in class)—First, Stone; second, Glissman; third, Sneddon; fourth, Doubt.

Breeder's Young Herd (4 in class)—First, Stone; second, Doubt; third, Sneddon; fourth, Glissman.

Get of Sire (3 in class)—First, Stone; second, Doubt; third, Sneddon.

Produce of Cow (4 in class)—First, Stone; second, Doubt; third, Sneddon; fourth, Glissman.

Sweepstakes Heifer Under Two Years (3 in class)—Stone.

Sweepstakes Aged Bull (2 in class)—Stone.

Sweepstakes Cow Over Two Years—Stone.

Sweepstakes Bull Under Two Years (3 in class)—Stone.

ABERDEEN-ANGUS.

The doddies are always attractive, but did not show up in the usual numbers at this exhibition. The following exhibitors were present: Paul Thompson & Sons, Benson, Neb. (12 head); P. M. Culver, Edgerton, Mo. (5 head); Geo. Kitchen, Jr., Gowry, Mo. (8 head); Christian & Lang, York, Neb. (5 head). The following are the awards:

AWARDS.

Bull One Year and Under Two (6 in class)—First, Culver, on Royal Hyperion; second, Kitchen, on Melbert 2d; third, Culver, on Don of Viewpoint; fourth, Culver, on Questor Lad; fifth, Thompson & Son, on Prince Adne; sixth, Thompson & Son, on Refreshment.

Bull Calf Under One Year (4 in class)—First, Kitchen, on Intensified; second, Culver, on Mindon of Viewpoint; third, Thompson & Son, on Prince of Irvington.

Junior Bull Calf (2 in class)—First, Kitchen, on Helmet A.; second, Christian & Lang, on York Hero.

Heifer One Year and Under (4 in class)—First, Kitchen, on Ula Brown; second, Thompson & Son, on Barbara of Irvington; third, Christian & Lang, on York Blossom; fourth, Thompson & Son, on Pride of Irvington.

Heifer Two Years and Under Three (3 in class)—First, Kitchen, on Driftwood Rose; second, Thompson & Son, on Sunflower Dot 3d; third, Thompson & Son, on Baby of Dura.

Aged Cow (3 in class)—First, Kitchen, on Mina of Alta 3d; second, Thompson & Son, on Heather Bloom McHenry 5th; third, Sunflower of Benson.

Junior Heifer Calf (1 in class)—First, Christian & Lang, on York Blossom 3d.

Senior Heifer Calf (5 in class)—First, Culver, on Queenly of Viewpoint; second, Thompson & Son, on Matchless of Irvington; third, Kitchen, on Barbara G.; fourth, Thompson & Son, on Queen of Irvington; fifth, Christian & Lang, on Blossom of York.

Aged Herd (2 in class)—First, Kitchen, on herd headed by Lewis of Meadowbrook; second, Thompson & Son, on herd headed by Metz Novico.

Bull One Year and Under Two (5 in class)—First, Honeywell & Reedy, on Princess Fountainne; second, Young, on bull sired by Guenon's Gay Lad; third, Loung, on bull sired by Guenon's Gay Lad; fourth, Young,

THE GRAND OLD ROOFING

There is only one RUBEROID Standard for 15 Yrs.

Read What One Large User Says:

THE LEHR AGRICULTURAL CO.,
Manufacturers of Agricultural Implements.

FREMONT, OHIO, November 1, 1905.

THE STANDARD PAINT COMPANY, New York.

Gentlemen:—We have your letter of the 27th ult., asking us to report as to the satisfaction your RUBEROID ROOFING has given us.

In reply would say that the Ruberoid Roofing used by us for the past 14 or 15 years has given better satisfaction than any other make of roofing we are using. On the first roof that we covered with your Ruberoid we used the 2-ply and so far as we know it is just as good to-day as it was the first season it was used, and after all these years it does not show any wear, nor has it ever leaked a drop or cost us one cent for repairs. This is more than we can say for any of the other roofings, such as tin, slate, shingles and tar or sheet roofing.

We do not believe that there is a roof on the market to-day that at all compares with the Ruberoid and we feel like congratulating you for having succeeded in placing such a worthy article on the market.

Yours respectfully,

THE LEHR AGRICULTURAL COMPANY, N. P. Lehr, Treasurer.

Do YOU not want a roofing which has shown such durability? It is inexpensive. You can apply it yourself. Send for samples and Booklet "L."

THE STANDARD PAINT COMPANY,

SOLE MANUFACTURERS,

100 William Street, New York.

Chicago Offices: 188-190 Madison Street.

Cincinnati Offices: Union Trust Building.

on bull sired by Guenon's Gay Lad; fifth, sired by Mary Maden's third son.

Senior Bull Calf (3 in class)—First, Young, on Gerty's Son's Jamont; second, Honeywell & Reedy, on Marigold's Quintitus; third, Young, on Blanche's Golden Lad.

 Breeder's Young Herd—First, Lindsey; second, Clark.
 Get of Sire—Lindsey, on get of Pat Ryan of Red Cloud.
 Produce of Cow—Lindsey, on produce of Cherry Lee of Red Cloud.

HORSES.

The same unabated interest shown at other fairs was manifest at the Nebraska fair and the stables were crowded almost all the time and they were crowded to their utmost capacity. It is wonderful the admiration people will show when they look at really fine horses of all kinds. Frank Iams, of St. Paul, Neb., had twenty head which occupied almost all of one barn, consisting of eight Percherons, eight Belgians and four coach horses. Watson, Wood Bros. & Kelly Co., Lincoln, Neb., had five Shires, three Percherons, one Belgian and one Coach. The Lincoln Horse Importing Company, of Lincoln, Neb., had nine German Coach, two Shires, two Percherons and one Belgian. Other exhibitors were Wm. Ernst & Son, Graf, Neb.; J. N. Harrison, Herman, Neb.; Billiter, Burriss & Billiter, Carroll, Neb.; Rhea Bros., Arlington, Neb.; H. E. Peterson, Lyons, Neb. The following are the awards, placed by John Huston, Blandinsville, Ill.

COACHERS.

Four-Year-Old Stallions (5 in class)—First, Lincoln Imp. Horse Co., on Lubben's Ring Leader; second, Frank Iams; third, W. E. Wells; fourth, Frank Iams; fifth, Alex Calder.
 Three-Year-Old Stallion (all German Coach) (9 in class)—First, second and third, Lincoln Imp. Horse Co.; fourth, Watson, Wood Bros. & Kelly; fifth, Iams; sixth, Lincoln Imp. Horse Co.
 Sweepstakes—Lincoln Imp. Horse Co., on Lubben's Ring Leader (German Coach).

REGISTERED TROTTERS.

Best Stallion Four Years and Over—First, second and third, Kinney.
 Three-Year-Old Stallion—Kinney, the only exhibitor.
 Two-Year-Old Stud—First, Adams; second, Adams; third, Chamberlain; fourth, Johnson; fifth, Adams; sixth, Adams.
 Yearling Stallion (3 in class)—First, Johnson; second, Quinn; third, Briggs.
 Sweepstakes Stallion—Adams.
 Aged Mare (3 in class)—First, Neyson; second, Miller; third, Kinney.
 Three-Year-Old Mare (1 in class)—Johnson.
 Two-Year-Old Mare (4 in class)—First, second and third, Adams; fourth, Miller.
 Sweepstakes Mare—Johnson.

BELGIANS.

Stallion Four Years and Over (7 in class)—First, Iams, on Gaston de Fastine; second, Iams, on Prussant de Lisson; third, Watson, Woods Bros. & Kelly Co., on Roan; fourth, Iams, on Cordeau de Landean; fifth, Billiter, Burriss & Billiter, on Marguis de Rummermen.
 Stallion Three Years Old—First, Iams, on Champy & Wellmont; second, Iams, on Due Hon; third, Iams, on Mayor de Andenarken.
 Champion Stallion (2 in class)—Iams, on Gaston de Fostean.
 Stallion Two Years Old (7 in class)—First, Iams, on Volory; second, Rhea Bros., on Jumbo; third, Rhea Bros., on Keito; fourth, Rhea Bros., on Surprise; fifth, Kerr; sixth, Peterson, on Tiger.
 Stallion One Year and Under Two (3 in class)—First, second and third, Rhea Bros.
 Horse Foal (2 in class)—First and second, Harrison.
 Mare Four Years and Over (5 in class)—First, Ernst & Son; second, Harrison; third, Rhea Bros.; fourth, Ernst & Son; fifth, Rhea Bros.

PERCHERONS.

Stallion Four Years and Over (11 in class)—First, Iams, on Tralala; second and fourth, Rhea Bros.; third, Watson, on Clapit.
 Stallion Three Years Old (12 in class)—First, Rhea Bros., on Carlo; second, Lincoln Horse Importing Company, on Jericho; third, fourth and fifth, Iams; sixth, Lincoln Horse Importing Company.
 Sweepstakes Stallion (3 in class)—Iams, on Tralala.
 Sweepstakes Mare (3 in class)—Ernst & Son.
 Mare Three Years and Under Four (1 in class)—First, Harrison.
 Mare Two Years and Under Three (1 in class)—First, Schwab & Sons.
 Mare Under One Year (3 in class)—First, Ernst & Son; second, Rhea Bros.; third, Rhea Bros.

CLYDESDALES AND SHIRES.

Clydesdale and Shire Stallion, Four Years and Over (4 in class)—First, Calder, on Fremont Royal Lockhart; second and third, Watson, Woods Bros. & Kelly Co.; fourth, Calder, on Fremont Langbank.

 Shire Mare, Bred in Nebraska, Two Years Old (2 in class)—First and second, Calder.
 Sweepstakes Stallion (2 in class)—Lincoln Horse Importing Company, on Bordenham Matchless.

SWINE.

The swine exhibit is one of the most inter-

esting to farmer visitors on the grounds. The number on hand this year is far in excess of that of any other year. It is stated that many exhibitors would have attended with their hogs had they been given any encouragement as to whether they could get pens. The pens were all full and many had to be placed in temporary quarters. One slight criticism in the showing of hogs would be that the prize winners are not grouped and left in their show pens so breeders can have an opportunity to compare them and note improvement. This is one thing for which fairs are maintained. The number on exhibition this year was close to 1,500 head. There were about 700 Durocs and 600 Poland Chinas, and Chester Whites and Berkshires made up the remainder of the list.

DUROC JERSEYS.

The pens where this breed were shown were always thronged with interested swine breeders. When the class of aged boars were led out a majority of breeders placed first on Glendale Critic, owned by E. Z. Russell, of Blair, Neb., but the judge put him in second place, claiming that the boar's testicle were slightly wanting in size. A close look at the boar afterwards by the writer failed to disclose this defect. The judge afterwards gave a pen first place headed by this boar, while a competing pen contained two first-prize sows. The following is the list of breeders of Durocs: J. E. Rowe, Stockham, Neb. (10 head); Alvin E. Lund, Kearney, Neb. (16 head); A. J. Firkins, Ord, Neb. (5 head); R. A. Tawney, Pierce, Neb. (20 head); G. W. Briggs & Son, Clay Center, Neb. (11 head); Arch Brown & Sons, Waterloo, Neb. (11 head); Stuart & McCann, Kennard, Neb. (18 head); J. O. Hunt, Marysville, Neb. (19 head); E. J. Brown, Osceola, Neb. (8 head); J. A. Ollis, Ord, Neb. (13 head); Gerald Wilcox, McCook, Neb. (9 head); Smith Brown, Waterloo, Neb. (9 head); C. E. Pratt, Frankfort, Kan. (9 head); Hal C. Young, Lincoln, Neb. (22 head); Moats & Son, Randolph, Neb. (6 head); E. Z. Russell, Blair, Neb. (14 head); G. Van Patten, Sutton, Neb. (17 head); B. F. May, Campbell, Neb. (2 head); J. E. Mendenhall & Son, Fairbury, Neb. (16 head); L. H. Page & Son, Fairbury, Neb. (14 head); John M. Morrison & Son, College View, Neb. (8 head); Peek & Putnam, Tecumseh, Neb. (11 head); N. J. Peterson, Ord, Neb. (12 head); W. G. Unitt, Seward, Neb. (4 head); T. J. Current, Hildreth, Neb. (9 head); Wm. Sutter, Liberty, Neb. (7 head); Carl Hanson, Herman, Neb. (10 head); Chas. Van Patten, Sutton, Neb. (6 head); S. P. Briggs, Seward, Neb. (21 head); G. F. Dorsch, Cook, Neb. (2 head); W. A. May, Blue Hill, Neb. (9 head); W. A. Kirkpatrick, Lincoln, Neb. (20 head); O. J. May, Bennett, Neb. (5 head); W. Siders, Bennett, Neb. (15 head); Jos. Boehler, Alma, Neb. (7 head); M. A. Sellers & Son, Huntley, Neb. (8 head); E. S. Sohl, Cedar Bluffs, Neb. (4 head); Jacob Wernsmann, Cedar Bluffs, Neb. (12 head); F. W. Whitrock, Falls City, Neb. (6 head); Pete Peterson, Herman, Neb. (1 head); W. F. Waldo, DeWitt, Neb. (13 head); Nels Holms, Osceola, Neb. (10 head); Philip Albrecht, Smith Center, Kan. (13 head); Carl Loudin, Clay Center, Neb. (1 head); J. Stroh, DeWitt, Neb. (8 head); C. E. Olson, Colon, Neb. (9 head); P. H. Munk, Broken Bow, Neb. (1 head); Peter Jacoby, Aurora, Neb. (1 head); Ward Bros., Republic, Kan.; E. K. Young & Son, Havelock, Neb.; J. M. Lampert, Wahoo, Neb. (5 head); S. J. Tillman, Ragan, Neb. (16 head); Roberts & Harter, Hebron, Neb. (16 head). The following awards were made by N. H. Gentry, of Sedalia, Mo.:

AWARDS.

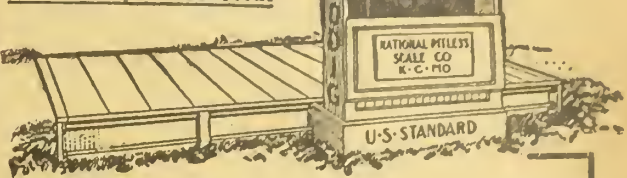

Boar Two Years and Over (17 in class)—First, Stroh, on Hogate's Model; second, Russell, on Glendale Critic; third, Loudon, on Jumbo Perfection; fourth, Ward Bros., on Model H.; fifth, Moats, on Duroc Challenger's Wonder; sixth, Unitt, on Long Wonder.

LET ME SEND YOU A "KNODIG" PITLESS SCALE

On 30 Days Free Trial

Is \$30. to \$50. Worth Saving?

If you think it is don't do a thing about getting a scale until you have heard from me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings. Ready for instant use when you want them. No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices. Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills. Can be moved anywhere on your land, wherever the work happens to be. Absolutely accurate, because tested according to U. S. Standard of weights. My plan saves you all middlemen's profits. Deal direct with me. No Agents, Salesmen.

H. C. GUMBEL, Gen'l. Mgr.,

The Knodig Pitless Scale with the Protected Bearings is used by the U. S. Government which Proves its Quality.

Jobbers or Dealers between you and factory. Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer?

Does it make the scale any better? Does it add one single penny to its value?

Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you are satisfied, no deposit, no notes to sign, nothing to do but give the Knodig a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair. Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover. Free. Write for it to-day, sure, to

POLAND CHINAS.

The Poland China exhibit was a great show of good stock and a close observer would not be willing to place it second to the Duroc show, even if they were outnumbered by about a hundred head. In this ring the competition was close and required very close work on the part of the judge to locate prizes where they belonged. Among those attending with herds were: H. C. Dawson, Endicot, Neb. (12 head); Dawson & Mendenhall, Endicot, Neb. (9 head); Joe Schmidt & Son, Wymore, Neb. (17 head); Geo. H. White, Emerson, Iowa (12 head); H. Hamilton & Son, Guide Rock, Neb. (20 head); H. W. Seefus, Waterloo, Neb. (8 head); W. J. Bowman, Smith Center, Kan. (12 head); J. M. Frazier & Sons, Fort Crook, Neb. (8 head); W. H. Deigan, Raymond, Neb. (8 head); Speit Bros. & Knight, Bethany, Neb. (28 head); C. V. Waugh, Brayton, Neb. (6 head); Wm. Lonergan, Florence, Neb. (12 head); C. M. Hulbert, Oakland, Neb. (29 head); E. M. Metzger, Fairfield, Iowa (9 head); Segrist & Stout, Humboldt, Neb. (11 head); H. C. Luckey, Bethany, Neb. (31 head); F. R. Barrett, Cadams, Neb. (2 head); W. T. Hammond, Osborne, Kan. (9 head); Hill Bros., Trumbull, Neb. (9 head); Frank Davis, Holbrook, Neb. (7 head); W. M. Conn, Utica, Neb. (23 head); J. R. Stewart, Postis, Kan. (12 head); J. C. Meese, Comatock, Neb. (11 head); E. Jackson, Raymond, Neb. (20 head); W. L. McNutt, Ord, Neb. (6 head); C. A. Lewis, Beatrice, Kan. (9 head); C. F. Hutchinson, Bellaire, Kan. (20 head); G. Wilcox, McCook, Neb. (5 head); Frank Riggs, Bethany, Neb. (12 head); E. E. Matticks, Spring Ranch, Neb. (8 head); O. N. Remington, Tekamah, Neb. (3 head); H. C. McGrath, Clarks, Neb. (12 head); Cedar Bank Stock Farm, Fullerton, Neb. (6 head); Willow Dell Stock Farm, Ord, Neb. (5 head); Harvey Johnson, Logan, Iowa (1 head); Spelts Bros., Bethany, Neb. (11 head); Young & Duncan, Madiam, Neb. (11 head); McKeever & Son, Hubbell, Neb. (12 head); J. T. Menchan, Summerfield, Kan. (8 head); J. H. Seid, Nemaha, Neb. (14 head); McNull & Meese, Ord, Neb. (12 head); Fred Friedley, Verdon, Neb. (22 head).

BERKSHIRES.

The following is a list of Berkshire exhibitors: Jacob Wernsman, Cedar Bluff, Neb. (11 head); Weber & Apperson Co., Tecumseh, Neb. (5 head); T. J. Condon, Pawnee, Neb. (17 head); Harris McMahon, Laramie, Mo.; F. A. Scherzinger, Nelson, Neb. (10 head); Muirhead & Gordon, Pawnee City, Neb. (5 head); W. R. Holt, Falls City, Neb. (23 head); Honeywell & Reedy, Lincoln, Neb. (9 head); Etzler & Moses, Decatur, Ind. (20 head).

AWARDS.

Aged Boars (2 in class)—First, Congdon, on Charmer's Duke; second, Scherzinger, on Homestead Duke.

Boar One Year and Under Eighteen Months (6 in class)—First, Holt, on Aimless; second, Scherzinger, on Homestead Model; third, Muirhead & Gordon, on Jennie's Duke; fourth, Weber & Apperson, on Royal Robin; fifth, Etzler & Moses, on Starlight; sixth, Honeywell, on Nebraska Black Robinhood.

Six Months and Under One Year Boar (14 in class)—First, Congdon, on pig by Charmer's Duke; second, Holt, on pig by Duke of Wooddale; third, Etzler & Moses, on Premier Starlight; fourth, Scherzinger, on Homestead Prince; fifth, Congdon, on pig by Charmer's Duke; sixth, Congdon, on pig by Charmer's Duke.

Over Six Months and Under One Year Boar (6 in class)—First, Holt, on Goldust; second, Congdon, on Choice Goods 2d; third, Weber & Apperson, on Helicrist King; fourth, Congdon, on Judge Davis; fifth, Weber & Apperson, on Helicrist Champion.

Sow Two Years and Over (3 in class)—First, Etzler & Moses, on Starlight Queen; second, Etzler & Moses, on Lady Vic 10th; third, Congdon, on Pawnee Lady.

Sow Eighteen Months and Under Two Years (4 in class)—First, Holt, on Violet Pride; second, Holt, on Laura 2d; third, Etzler & Moses, on Starlight Duchess.

Sow One Year and Under Eighteen Months (7 in class)—First, Etzler & Moses, on Starlight Lady Lee; second, Etzler & Moses, on Straight Lady Lee; third, Holt, on Straight Lady Lee; fourth, Scherzinger, on Homestead; sixth, Honeywell & Judy, on Rose 29287.

Sow Six Months and Under Eighteen (12 in class)—First, Holt, on Goldie; second, Etzler & Moses, on Starlight Lady; third, Etzler & Moses; fourth, Etzler & Moses; fifth, Congdon, on sow by Charmer's Duke; sixth, Weber & Apperson, on Helicrist Lady.

Sow Under Six Months (11 in class)—First, Etzler & Moses; second, Etzler & Moses; third, Congdon; fourth, Congdon; fifth, Holt; sixth, Holt.

Boar & Three Sows Under One Year (3 in class)—First, Holt; second, Etzler & Moses; third, Congdon.

Three Head Produce of Sow (7 in class)—First, Etzler & Moses, on produce of Lady Lee 88th; second, Holt, on produce of Oill; third, Scherzinger, on produce of Royal Empress 79th; fourth, Congdon, on produce of Duchess.

Four Head Get of Boar (6 in class)—First, Etzler & Moses, on get of General Starlight; third, Holt, on get of Ardmore Chief; fourth, Scherzinger.

Boar and Three Sows Over One Year—First, Holt; second, Etzler & Moses; third, Scherzinger.

Best Sow, Any Age, (2 in class)—Holt, on Valley's Pride.

Best Boar, Any Age—Congdon, on Charmer's Duke.

CHESTER WHITES.

The following is a list of the exhibitors in this class: Vanderslice Bros., Cheney, Neb.; Gilmore Bros., Fairbury, Neb.; Frank C. Tatro, Geneva, Neb.; Jno. Cramer, Beatrice, Neb.; W. M. Gilmore & Sons, Fairbury, Neb.; J. W. Wharton, University Place, Neb.

Boar Two Years and Over (3 in class)—First, Vanderslice Bros., on Tom Junior; second, Tatro, on Extra Finish; third, Gilmore & Son, on Teddy R.

Boar Eighteen Months and Under Two Years (1 in class)—First, Cramer, on Climax.

Boar One Year and Under Eighteen Months (4 entries)—First, Tatro, on Teddy R.; second, Vanderslice Bros.; third, Gilmore & Sons, on Big Jim; fourth, Gilmore & Sons, on Long John.

Boar Six Months and Under One Year (5 in class)—First, Gilmore & Sons, on Dandy; second, Gilmore & Sons, on Punch; third, Gilmore Bros., on Harry; fourth, Gilmore Bros., on Tommy; fifth, Vanderslice Bros.

Boar Under Six Months (12 in class)—First, Vanderslice Bros.; second, Tatro; third, Vanderslice Bros.; fourth, fifth and sixth, Cramer.

Sow Two Years and Over (6 in class)—First, Vanderslice Bros., on Nebraska Girl 2d; second, Vanderslice Bros., on Nebraska Girl 3d; third, Vanderslice Bros., on Nebraska Girl 1st; fourth, Gilmore & Sons, on McKinley Belle.

Sow Eighteen Months and Under Two Years—First, Gilmore & Sons, on Belle; second, Vanderslice Bros.

Sow One Year and Under Eighteen Months (4 in class)—First, Gilmore & Sons; second, Vanderslice Bros.; third, Gilmore & Sons.

Sow Six Months and Under One Year (6 in class)—First and second, Vanderslice Bros.; third and fourth, Gilmore & Sons; fifth and sixth, Cramer.

Sow Under Six Months (9 in class)—First and second, Gilmore & Sons; third and fourth, Wharton; fifth, Tatro; sixth, Cramer.

Sweepstakes Boar (3 in class)—Gilmore & Sons, on Dandy.

Sweepstakes Sow (2 in class)—Vanderslice Bros., on Nebraska Girl 2d.

Boar and Three Sows Over One Year, Bred by Exhibitor (3 in class)—First, Vanderslice Bros.; second and third, Gilmore & Sons.

Boar and Three Sows Under One Year, Bred by Exhibitor (2 in class)—First, Gilmore & Sons; second, Vanderslice Bros.

Four Head of Swine, Get of Same Boar (5 in class)—First and third, Vanderslice Bros.; second, Gilmore & Sons; fourth, Tatro.

Three Head, Produce of Sow (6 in class)—First and third, Vanderslice Bros.; second, Gilmore & Sons; fourth, Tatro.

SHEEP.

The display of sheep, though not large in numbers, was of a very creditable quality. This is assured when the names of the only exhibitors are mentioned. The Shropshire was represented by that veteran breeder, George Allen, of Lexington, Neb., than whom we have but few more successful breeders and fitters. His sheep were full of quality, as we discovered in looking over his lot of fifty head he had on exhibition. Robert Taylor, of Abbot, Neb., had fifty head of Ramboulllets, Hampshires and Leicester. We suggest that the management of the Nebraska State Fair use an extra effort to get breeders of sheep at their fairs. The state is full of sheep and it is one of the profitable industries in the state. The premiums offered on sheep by that state is little better than county fairs are offering. A good list will bring the sheep and help make up a great stock show.

Echoes From a Kansas Farm

By Henry Hatch

The question that everyone asks now is, is it a land boom? Some say it is, others say it isn't.

Two years ago a friend bought an eighty-acre farm for \$1,510. He is about to sell now for \$3,200. He will buy another "run down" place and fix it up. There seems to be money in "run down" farms.

Most of the so-called run down farms of the West require about \$50 worth of well-directed work to bring them back into shape. Just keep the weeds mowed, the house painted and the fences in repair, is all.

Crop reports depend a good deal on the man who is doing the reporting. For instance, yesterday's daily has two reports on the fruit crop, both not far from here, and one has thousands of bushels of apples to be barreled and shipped, while the other tells of 160-acre orchards without an apple.

If the appearance of a corn field counts for anything, the corn binders will knock off a lot of ears this fall. Last year, though a good crop, most of the ears grew straight with the stalk, and very few were knocked off by the binder, but this year they lop over. There'll be pig feed during corn harvesting this fall.

It is probably impossible to make a corn binder that will not knock off ears when the corn is heavy, and the ears hang over. Some will say that one style of binder will not knock off as many ears as another, but we have had about all makes of corn binders cutting corn for us, and one does the same as the other, as far as knocking off ears goes.

Late cut prairie hay is poor provender for a horse. There is a well-established theory around here that grass allowed to become too ripe before being cut is the cause of most of the worms in horses, if the hay is used for horses. We only know that a neighbor who believes late cut hay is "the stuff" is always doctoring his horses for worms.

Several have inquired about making cement floors for their hen houses. They ask if anyone can make one, or if it takes a mason. Anyone can. Just dig down about three inches below the outside walls of the building, fill up to the level with pounded rock or sharp gravel, on this pour your cement from pail and spread with a trowel. Mix one part of cement to four or five of sand, while dry, then wet it and spread immediately.

When a person makes up his mind that he can do anything and sets himself about it, it is surprising what he can do. We know of some farmers who think they cannot do such work as building a common corn crib or shingling a roof. They hire all like that done, and find at the end of the year they haven't made as much money as they should. To be a farmer these days means to be a lot.

To know how to "run" an engine and to be an engineer are different things.

"Buffalo Calf" Shoes Can't Rip

COMMON shoes often rip in the seams before their soles are half worn through. That is because they are sewed with ordinary thread which begins to rot the first time it gets wet. "Buffalo Calf" Shoes are sewed with waxed thread which is not affected by water. The back seam is "cylinder fitted," to give it extra strength, and, where the vamp is joined to the upper, the seam is sewed with three rows of stitching—one more than on other shoes—and all with waxed thread.

"Buffalo Calf" Shoes don't have to be broken in, because their tops are made from the skins of young cattle, raised inside, and these skins are tanned by a special process, and softened, like Indian buckskin, by "boarding" and handworking. Leather so handled is freed from all the tanning juices and will not harden after a wetting. The shoes always dry out soft and easy to your feet.

Old cattle have age wrinkles that stiffen their hides. These come sooner on out-door cattle than on those raised inside. Their skins have to be tanned with powerful chemicals and bark juices, and the leather can be softened only by artificial greasing. The acids and tan juices left in such leather, draw and irritate your feet.

The leather in "Buffalo Calf" Shoes is tough and close grain, because made from hides of cattle killed in July, August and September, only. Such hides are known as "short hair hides." They are fine, close grain and very tough. Animals slaughtered in winter and spring have "long hair hides" with coarse, loose fiber because much of the strength of the skin goes into the heavy winter coat of hair.

The soles of "Buffalo Calf" Shoes are made from Hemlock tanned Texas steer hides, and their heels, counters, insoles and all soles are all solid leather. We use no corn fiber nor mounded counters. Linings of "Buffalo Calf"

Shoes are heavy twilled duck—seamless so there will be no edges to roll up and chafe and blister your feet.

Under the toe caps of all "Buffalo Calf" Shoes, the vamps go clear over to the soles. So if you wear the toe caps out, the vamp toes under them are still good. These are the main reasons why "Buffalo Calf" Shoes

Out-Wear All Others.

They will stand all the hard knocks you can give them. Weather makes no difference. Neither snow, ice, mud nor water have any effect on "Buffalo Calf" Shoes.

Ask your dealer for "the shoes with the Buffalo Calf." Every pair of "Buffalo Calf" Shoes has tied to the straps, a piece of our special vamp and upper leather, cut in the shape of a buffalo calf. If you can tear this piece of leather with your fingers, we will give you a new pair of shoes FREE.

If your dealer does not carry "Buffalo Calf" Shoes, write to us for one of the leather buffalo calves to test, and then tell him about it. "Buffalo Calf" Shoes are made in all sizes—men's, youth's and boys—they will outlast any others you can buy, and they don't cost any more than common shoes.

Why should you pay good money for common shoes that have to be broken in—that draw, chafe and blister your feet—that cause corns, bunions and callouses—and that are bound to rip long before you can get half the wear you should out of the leather, when you can just as well—and for the same money—or less accordingly—get shoes that are always soft, can't rip and will outwear and outlast any others made.

In "Buffalo Calf" Shoes you get your money's worth always. Insist on getting them. Remember the little Buffalo Calf tied to the straps. Ask about it and tell your dealer how tough the leather is. If he refuses to investigate, write direct to us.

Bentley & Olmsted Co., "The Western People," Des Moines, Ia.

THE NORTH-WESTERN LINE

First-class daily through service from Des Moines to Council Bluffs, Omaha, the Black Hills, Wyoming, Colorado, Utah and the Pacific Coast on the west; to Sioux City, Mankato, St. Paul, Minneapolis, Superior and Duluth and all points in North and South Dakota, Minnesota, Northern Wisconsin and Michigan on the north, and to Chicago, Milwaukee, Peoria and the east, over

401 Walnut St., DES MOINES, IOWA.

There are fellows who graduate in the school of operating a thrashing engine in three weeks, and they get along all right until something goes wrong, then they blame the engine instead of themselves. Of all the thrashing outfits we have had to work for us, we have observed that the man who knows the most about the engine is the one who has been operating one a few weeks.

HOMESEEKERS' EXCURSIONS. CHICAGO GREAT WESTERN RAILWAY.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas; Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit

of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$29.50. Other Colorado points in proportion, all having limit of twenty-one days to return and allowing stopovers on going trip.

To points in Idaho, Montana and Washington homeseekers' tickets on sale the first and third Tuesdays of May, June, September, October and November at rate of one fare plus two dollars for the round trip, tickets having limit of twenty-one days to return.

To points in Minnesota, North Dakota, Manitoba, Saskatchewan and other Canadian provinces, homeseekers' tickets are on sale each Tuesday this year. Have limit of twenty-one days and allow stopovers west of St. Paul.

Full information can be obtained from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOMESEEKERS' RATES.

Every Tuesday, via the C. & N.-W. Ry., until December, 1906, to authorized homeseeker points in Wisconsin, northern Michigan, Minnesota, South Dakota east of the Missouri river, North Dakota, Alberta, Manitoba, western Ontario and Saskatchewan. Full information at C. & N.-W. passenger station or 401 Walnut St.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Picking and Handling Fall and Winter Apples.

Many of the fall and early winter apples will bear picking when the seeds are first browned and before they are fully colored. The Fameuse, Wealthy, Alexander, Jonathan, Grimes Golden, and many of the Russian varieties will complete their coloring and ripen with unimpaired flavor if picked much earlier than is usual. Such early-picked fruit should be barreled when dry and stored ranked up on their sides under a hay or straw-covered shed with free air circulation until wanted for sale in early winter. If the cold becomes severe enough to endanger freezing, the barrels can be protected by a straw covering. Some methodic growers known to the writer keep Fameuse, Wolf River, Lubsk Queen, and other handsome fall apples into the winter, with profit in the way stated by waiting until the last of November before removal from the shed to the cellar. The straw or hay-covered shed has done good service in the West, as it does not heat up in the sunshine like an enclosed building of wood or even brick. But I have had even better success in storing fall apple barrels on their side in a dirt-covered cave. This was closed during the day and opened on two sides during the night. In this way the cooler air of the night was stored for use during the day. The autumn pears can also be picked when the seeds first turn brown. If picked when the stem parts quite readily from the spur and properly stored such varieties as the Kieffer and Mongolian snow will develop dessert quality never attained when ripened on the tree. For distant shipment most fall varieties of the pear picked when hard will ripen up in the covered crates or baskets in a cool, dry room. But it pays best to mature them before reaching the market.

In different sections the season for picking a given variety varies exceedingly. As instances, Rhode Island Greening and Northern Spy will ripen on the trees in Iowa or Kansas if left until the usual time of picking in western New York. In the dent-corn sections of the West and Southwest winter apples are picked when the seeds are brown and the stem parts from the spur without rupture of the bark. Over the West and Southwest winter apples must be picked three weeks earlier than in the Atlantic states. Yet picking at proper time is more imperative in the Southwest than in New York, as even the Ben Davis will get mellow on the trees if left until freezing weather is feared. In picking, varieties of the season of Jonathan and Fulton are picked first, and the tougher late apples, such as Willow and Stark, last of all.

The essentials of good keeping are picking when the stem parts quite easily from the spur, picking when dry, handling as carefully as eggs, and getting them as soon as possible into a relatively dry, cool place. The old idea of "going through the sweat" before placing in the cellar has no foundation. Apples or other fruits will sweat at any time if when cool they are exposed to a current of warmer air loaded with moisture.

Earth-covered caves are used often by nurserymen to store grape vines and fruit trees and for storing grafts of the orchard fruits. The few who have tried it on a large scale also find it a desirable place for storing winter apples. For apple storage it should have ample ventilation. When the apples are put in from the orchard in the fall the

days are usually warm and the nights cool. During the night keep doors and ventilators open, and during the day keep all closed, putting in each day's picking early in the morning. Even in winter the cave is opened at night for a longer or shorter period, depending on the temperature, to let in cold air, which is held during the day by keeping every aperture closed. Those who have had experience with the cave method prefer it to all others, except ammonia cold storage. But it must be kept in mind that when the cellar air is near freezing in winter, if it is opened at midday, when the air outside is much warmer and loaded with moist air, it will rush in and precipitate its moisture.—Budd and Hansen's Manual.

Fall Care of Strawberry Bed.

To the Editor of The Homestead:

The condition of many strawberry beds at this time is not at all satisfactory to their owners. In many cases there are so many weeds, the vines have scarcely room to root, and certainly not enough room to develop. Occasionally, a patch has been tended carefully and though free from weeds, the vines are so thick as to form a solid mat between the rows. In other plantings vines and weeds vie with each other and both seem healthy; yet this condition, like the other two mentioned, is unpromising and unsatisfactory.

If the hopeful berry grower has made the mistake of planting his vines in the summer or fall, there is nothing for him to do but clean out the weeds and cultivate the rest of this season and all of next for a crop the year following.

The ordinary bed set last spring or cultivated this season after bearing a crop needs some care at this time, and its success next year depends largely upon whether it receives it or not.

In the first place the weeds must be kept down and the vines must be confined to rows, leaving paths between for the pickers. Both results may be obtained to some extent by combining a cultivator and vine-cutter in one implement. This is done by taking off the two outside shovels of the Planet, Jr., plow and bolting on rolling cutters in their place by means of straps of iron. The writer has rigged up such a tool and it beats anything in the market for practical use.

Many do not cut the vines but merely allow them to be thrown aside by the plow in passing through them. This is a mistake. Where a runner is cut off the plant from which it came at once throws up a new crown which will produce fruit the next season. But if the runner is merely uprooted, the mother plant expends its energy in supporting it, thereby becoming weakened and unproductive.

The plow should be set to cut the width of the row to not more than eighteen inches. By driving the horse carefully very nice work can be done, and the ground covered quite rapidly. Next is the problem of cleaning out the rows. Hand work is often necessary here, though a hoe may be used where there is room. If the vines are thick there should be no hesitancy in cutting out part of them, care being exercised to remove every young plant that is uprooted for reasons suggested above.

Culture is the secret of successful berry raising. The cultivator should be kept busy all the season. No weeds should be allowed to go to seed in the berry patch. Their presence means grief to the picker and a short crop to the grower. If the work is done at the proper time and the weeds not allowed to gain headway, the expense of cultivation will not be great. In fact, frequent cultivation is actual economy of time and expense, to say nothing of increase in yield.

Many stop cultivating as soon as the danger from weeds is past. This is an error. The last cultivation should be as late as possible in the fall. The purpose of this is the conservation of moisture. The past season was a forcible demonstration of the wisdom of this policy. In beds where the soil had not been cultivated late, it was hard in the spring. The dry weather did great damage, drying up many plantations completely. In others which had been cultivated late, the soil was loose and porous in the spring and the vines withstood the drouth well. Copious rains came just at a time when poorly tended beds were past help and as a consequence the careful growers had the whole mar-

**SIMPSON
EDDYSTONE
PRINTS**

Calicoes of Quality

Ask the old folks what they knew about "Simpson Prints." They will say "Simpson's were the best they could get." And Simpson-Eddystone Prints are still the standard of the United States and better than they used to be.

Modern, improved Eddystone machinery now makes, in new and original patterns designed by talented artists, the prints that still lead.

Ask your dealer for Simpson-Eddystone Prints.

ket through the best part of the season.

It is the thorough work, the extra effort in berry growing, more perhaps than in almost any other line of agriculture, that makes the difference between success and failure. Certain it is that in berry growing half-way methods cannot be depended upon for any great returns.

Polk Co., Iowa. Franklin Brown.

That "Simplicity" means strength and power is not realized by some people. If you will give this question careful consideration and read the advertisement on page 5 by the Litchfield Manufacturing Company you will see the value of simplicity.

Iowa Climate and Crop Bulletin.

The following climate and crop bulletin is issued by the United States Department of Agriculture, Iowa Section, from the central station at Des Moines, Iowa, for the week ending Sept. 10, 1906:

Abnormally high temperatures were registered at all stations during the latter part of the week ending on the morning of the 10th. At the central station the average daily excess was 6.3 degrees, which was about the average excess in the central and western districts: Light local showers were reported at Grinnell, Dubuque and Keosauqua, but in the larger part of the state the week was practically rainless. The corn crop has made very rapid advancement toward maturity, and reports indicate that more than half the crop is now in fit condition to be cut and be put in shock or silo. This work is now in progress on the best class of farms, where the fodder is utilized. With a continuance of these favorable conditions the bulk of the corn crop will be practically safe by the 25th; though as a rule in this latitude it is always desirable to have a frostless September to bring to maturity the belated cornfields in all parts of the state. In the northern section the soil is sufficiently moist, but in the central and southern sections copious showers are needed to facilitate fall plowing and revive the pastures. Reports are quite variable as to the probable yield of the potato crop, on account of local differences in the amount of rainfall in the critical stage of growth.

CEMENT FENCE POSTS.

VERY SPECIAL—To the first THOUSAND farmers who are enough interested in GOOD Fencing to send us a ONE DOLLAR BILL, we will mail COMPLETE instructions and the RIGHT to make and use our Indestructible Cement Fence Posts, Patent No. 702,230. We have a PERFECT post, one that has withstood the test of years of freezing and thawing, a post that will last a lifetime. The instructions contain cuts and photographs, making it so plain that anyone can make good posts at about 2-3 the cost of cedar, 1/2 the cost of iron and BETTER than anything on the market. Will you be one of the first thousand? Don't delay.

THE ROCK CEMENT POST COMPANY.
North Manchester, Indiana.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

STALLIONS AND BULLS—NEW LAW.

Mr. A. N. Vandewater, Orient, Iowa.—Please publish the new stallion and bull law as passed by the legislature last winter.

Answer.—This law is too long to be published in full in these columns. The main feature of it will be found in answer to a question of J. W. Pierce, of Republic, Iowa, entitled "Pedigrees—Stallions and Bulls."

DOG TAX.

Mr. J. B. Henderson, Fort Dodge, Iowa.—Has the city of Fort Dodge a legal right to tax dogs, and to kill dogs when their owners refuse to pay such tax?

Answer.—The city of Fort Dodge and all other cities in Iowa have the power to tax and license dogs, and to provide for this by ordinance, and to also provide by ordinance for the killing of dogs in case their owners refuse to pay the tax levied. See if Fort Dodge has such an ordinance. If it has, then it may collect the tax, or kill the dog if caught at large.

GRADE STALLION.

A Subscriber, Sully, Iowa.—We have a grade stallion which we desire to stand for public service. Some people say that the new law passed by the last general assembly in relation to stallions will not permit us to keep a grade stallion for service. Is this correct?

Answer.—It is not. You can lawfully keep a grade stallion for service, without a certificate of registration, so long as you represent him for what he really is, and make no claims that he is pure-bred, thoroughbred, standard-bred, or registered. The new law applies only to those who represent their stallions as belonging to one of the classes named.

SETTLEMENT OF ESTATE.

A Subscriber, Sanborn, Iowa.—In April, 1905, an estate was left to a number of heirs, all of whom were of age. The oldest son, John, was appointed executor. The estate consisted of a farm of 120 acres and a pasture lot of forty acres three miles from the farm. All this land was rented when John became executor. The rent for the pasture lot became due Dec. 1, 1905, and the rent of the farm became due March 1, 1906. In January, 1906, Frank, one of the heirs sold his share of the farm to John, with the understanding that Frank should not receive any of the rent coming due in March, or pay any of the expenses connected with the farm. John collected the rent of the pasture lot and applied it on the farm for repairs before Frank sold his share to John, but nothing was said about it to Frank, and Frank claims that John must refund to him his share of the rent from the pasture lot. John thinks differently. Which is right?

Answer.—Assuming that the repairs made on the farm were reasonable and necessary, the matter will be settled in this way, namely: John as executor will be charged with all the money that comes into his hands, belonging to the estate from rents and otherwise. Then the

expenses will be paid, including John's compensation as executor, and the debts owing by the estate will be paid, and the balance of the money remaining in John's hands will be divided among the heirs according to the will, and Frank will have his share of the pasture lot and John and the other heirs, except Frank, will own the farm, John having a double share.

ROADS AND FENCES.

A Subscriber, Watertown, Wis.—I own an eighty-acre farm bounded on two sides by two public roads, one being a main road and the other a cross road. My house and barns are on the corner where the roads cross. My pasture and woodland is on the other end of the farm. I drive my cows on the cross road to pasture. My neighbor who lives across the road wants me to make a lane in which to drive my cows to pasture. (1) Can he compel me to do so? (2) Have I a legal right to drive my cows to pasture on the cross road? (3) Can I compel my neighbor to keep a fence on the other side of the road?

Answer.—(1) He cannot. (2) You have. (3) You cannot.

DRAINAGE WATER IN HIGHWAY.

A Subscriber, Osterdock, Iowa.—Water gathers on my side of the public road, and has washed a gully or ditch in my driveway from the road to my yard. If I make a breaker and turn the water across the road on my neighbor's side it cannot enter his field, but must follow along the roadway, on account of an embankment. (1) Have I a right to so turn the water? (2) Has the road boss a right to cut a drain through anyone's driveway while working the road?

Answer.—(1) This is a difficult matter to answer without knowing more about the lay of the land, and where the water so turned across the road would ultimately go. On general principles, you have no right to turn surface water across the road upon your neighbor's depression, that will carry it to a natural water course. (2) The road superintendent has such a right if it is necessary to the proper working of the road, but not otherwise.

PAYMENT ON SUNDAY.

A Subscriber, Yuba, Wis.—A gave his note to C. for \$300. C. traded a cow to B. for a horse, giving \$100 to boot. He paid \$50 of the boot money in cash and told B. to have A. pay him the other \$50, and he, C., would credit that amount on A.'s note. The trade between C. and B. took place on Sunday. A. did give B. \$50 in pursuance of this arrangement, but C. refused and refuses to credit the amount on A.'s note, saying that he don't intend to pay it because A. lied to him about the horse, and also because the trade was made on Sunday. Can C. recover the full amount of the note from A.?

Answer.—We do not think C. can recover the full amount of the note from A. The payment of \$50, which A. made to B., was at C.'s request, and amounted to the same thing as though he had paid it to C. himself. Whether A. paid the \$50 on Sunday, you do not say, but it would not make any difference. It was practically a part payment on a note, and not a Sunday contract.

LAND BOUNDARY.

Mr. Matthias Marty, Monticello, Wis.—A. owns the north one-half of the southeast quarter of section twenty-six, and B. owns the south one-half of the same quarter section. The line fence between these tracts of land is poor and crooked, and has been there a long time. A. wants to put in a new line fence. He had the county surveyor locate the line, and found the old fence all right at the east end, but at the west end, which is the middle of the section, it is two rods too far south. Can A. move the old fence and put it on the new line as located by the surveyor?

Answer.—He cannot do so against B's consent. If B claims the land on his side of the fence, A. will have to bring a suit in court to recover it, and then if it is shown that the line fence has been where it is now located for more than twenty years, and has been recognized by the owners of the two tracts of land, as the division line for all that time, A. would probably lose his case.

NEW LAW ABOUT STALLIONS.

A Subscriber, Delta, Iowa.—I have two imported Percheron Norman stallions, both recorded in the National French Draft Stud Book of America. Does the new law passed by the thirty-first general assembly of Iowa, relating to pedigrees of stallions, require me to send certificate of the pedigree of my stallions to the secretary of the state board of agriculture, or does this law apply only to those who claim to have home-bred full-blood stallions?

Answer.—The new law applies to the owner or keeper of any stallion kept for public service or for sale, exchange or transfer who represents such animal to be pure-bred, thoroughbred, standard-bred or registered, whether such animal be imported or home-bred. You must therefore cause your stallions to be registered in some stud book recognized by the department of agriculture at Washington, D. C., for the registration of pedigrees and obtain certificates of registration, and forward the same to the secretary of the state board of agriculture. After examination by him, if he

T. F. WILLIAMS, M. D.
CONSULTING PHYSICIAN.

What My Patients Say of My Treatment.

Lost Nation, Ia., April 12, 1906.

Dr. T. F. Williams,
Des Moines, Iowa.

I suppose you wondered why I did not answer your letters, but I thought I did not need the treatment any longer. I am letting my system rest from the treatment a while and if any of the symptoms arise again I will be sure to order more treatment. Your treatment has done a great deal for me and I will not hesitate at any time to recommend it to the afflicted.

Thanking you for your liberal offer, I remain,
Yours very truly,
HORACE B. HANSEN.

HAVE YOU CATARRH?

Why will you suffer with this dread disease when you have a positive cure right at your door? I have testimonials from hundreds of my patients who have been PERMANENTLY CURED of CATARRH of the nose, throat, ears, bronchial tubes, stomach, liver or bowels. For eighteen years I have been located in Des Moines and have confined my practice to the treatment of CATARRH.

Hampton, Ia., July 9, 1906.

Dr. T. F. Williams, Des Moines, Iowa.
I don't think I will need any more medicine because I feel perfectly well and have plenty left for the inhaler. A while ago, about four weeks, for one week I felt pretty sick, but that was the change because I got to feel better the next week, and kept on getting better all the time and the last two weeks I feel entirely well, so I don't think there is any need of getting any more medicine and of what I have left there shall not be a drop of it wasted. I remain, Yours truly,
MISS MINNIE LEMKE,
R. F. D. 3, Box 47.

The Cream of Cream Separators

The Sharples Dairy Tubular is the cream of cream separators—the pick of the whole bunch. Supply can wait, you can fill it with one hand. All gears enclosed, dirt free, absolutely self-cleaning—no oil holes, no bother—needs only a spoonful of oil once or twice a week—uses same oil over and over. Has twice the skimming force of any other separator—skims twice as clean. Holds world's record for clean skimming.

Bowl so simple you can wash it in 3 minutes—much lighter than others—easier handled. Bowl hung from a single frictionless ball bearing—runs so light you can sit while turning. Only one Tubular—the Sharples. It's modern. Others are old style. Every exclusive Tubular feature an advantage to you, and fully patented. Every Tubular thoroughly tested in factory and sold under unlimited guaranty. Write immediately for catalog J-121 and ask for free copy of our valuable book, "Business Dairying."

The Sharples Separator Co.,
West Chester, Pa.
Toronto, Can. Chicago, Ill.

A Cream Separator Without Cost

That is What We Offer You in the

Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

CONTAGIOUS ABORTION IN CATTLE.

Some months ago a press bulletin was prepared by Dr. C. L. Barnes, of the Kansas Experiment Station, on the above subject. According to this bulletin, abortion may be caused by drinking considerable ice water, eating a large quantity of cold food (frozen roots or green vegetables covered with frost), exposure to rain or snow storms or wading in ice cold water, injuries to the abdomen (as being crushed by a gate, kicks, or being hooked), foods that are easily fermented, also insufficient or very innutritious foods; too close stabling, heavy milking, early breeding, inbreeding, stagnant drinking water, ergoted grasses and smut in various grains, irritant vegetables, impaction of rumen and constipation, severe constitutional diseases, direct irritation of the womb (as in the removal of the ovaries or death of the offspring) and irritation of the kidneys. Whenever abortion of cows cannot be traced to any of the above causes the contagious form of abortion is to be suspected.

"Contagious abortion is quite common and frequently causes considerable loss, not only from losing the young, but also from the fact that many of the cows that have aborted fail to breed again. Contagious abortion is probably caused by several different germs and is transmitted from one animal to another by contact, by means of the discharge of the cow that has aborted, the afterbirth, dead calf, and from bulls that have served cows affected with the disease.

"Cows may abort any time, but it usually occurs from the third to the seventh month. Occasionally the early symptoms pass unnoticed, but in most cases there is some heat and enlargement of the udder, the vulva is somewhat swollen, and there is a discharge of white or yellowish mucus, which is not unlike the normal transparent material which discharges during heat. After abortion, the afterbirth is usually retained, giving rise to a very disagreeable discharge, which continues for some time.

"All suspected cows should be isolated from pregnant ones, and should any cows abort, the offspring and afterbirth should be burned or buried deeply and the stable thoroughly disinfected by the use of lime on the floor, after all the litter has been removed and burned. Then the woodwork should be disinfected with corrosive sublimate solution, using it in the proportion of one to one thousand. The tablet of corrosive sublimate may be secured at any drug store with directions for use. Ten days after the first disinfection with corrosive sublimate, all woodwork should be disinfected a second time. A week after the second disinfection, the entire stable should be whitewashed.

"Cows that have aborted should be washed out with a 1-per-cent solution of creolin or lysol, continuing this daily until all discharge has stopped. Pregnant cows should be given sodium hypsulphite once daily, in tablespoonful doses, as a drench. When cows abort in pasture, great care should be taken to burn the offspring on the spot where it dropped, and the immediate vicinity should be thoroughly limed.

"As a precaution to prevent the spread of the disease in an aborting herd, it is well to disinfect the tails and also the vulva and immediate parts with a 5-per-cent creolin solution, to make sure of preventing the entrance of the germ into the womb. Bulls that have been with an aborting herd should not be allowed with healthy cattle; and to prevent their spreading the disease, they should receive the same disinfection advised for cows. Cleanliness and the proper isolation and disinfection of cattle should be strictly adhered to in order to eradicate the disease."

Creamery property at Mt. Carmel, Ia., for sale, including necessary buildings, grounds, machinery. M. J. Berger, Sec., Carroll, Ia., R.2.

Kansas Weather and Crops.

To the Editor of The Homestead:

This week has been as you like it—wet or dry. It has rained and it has not rained, depending on which corner of the section you live. Here at this particular spot it has rained, and the roads and fields are still muddy as the natural result of it; five miles west of here it has

Timely Warning Against "MAIL ORDER" CREAM SEPARATORS

The "Farm Implement News," of Chicago, quotes the following good advice to dairy farmers from a lecture by Prof. C. E. Lee, of the University of Illinois State Experiment Station.

After dwelling at length upon the advisability of farmers buying cream separators, as they secure at least a third more butter fat from the milk than the old-fashioned setting processes of "raising" cream, and stating that Iowa has 50,000 hand separators in use and Illinois was fast following this pace and would increase the annual value of the milk now produced by nearly a million dollars if every butter maker in the state had a separator, Mr. Lee was asked the name of the separator he would advise the farmer to buy, and replied:

"I am not at liberty to give my preference, for I am not selling separators—if I were to name a separator manufacturer, either to you here in public or in private, I would lose my position—but there is one thing I desire to warn you farmers against, and that is buying hand separators from the 'mail order' houses. Don't do it—you will regret it. The machines do not give results and they do not last. Our department receives hundreds of inquiries as to 'What's the matter with my separator? It doesn't do this or it doesn't do that,' and I tell you, gentlemen, that in every instance when we ask them to name their separator it is a 'mail order' house machine and almost worthless when it is new."

Don't waste your money in a trashy separator, made "cheap" to sell "cheap," that is going to WASTE instead of SAVE for you EVERY TIME you put milk through it, and which would be very dear even as a gift.

DE LAVAL Cream separators are NOT that kind. They are actually CHEAPEST because they are BEST and last much LONGER than other machines. A DE LAVAL catalog is to be had for the asking.

Drs. Fellows & Fellows Co.
323 W. WALNUT ST., DES MOINES, IOWA

not rained, the roads are dusty, and, while none of the crops are needing rain, a peep between the corn rows as you drive along the road would put you in the notion that it has not rained there since mid-summer.

A few of the belated ones are still at work in the prairie hay fields, and slow work it is, for the mornings have been cloudy and foggy. One commercial hay-maker in this county still has 1,200 acres of grass to be made into hay. He will not get a quality that will go in as "No. 1" now, even though it is baled and stored in a shed for some months.

The past few days of damp, and, as the particular location may warrant, rainy weather, has been keeping the corn in a wonderful green stage. All ears are turning brown in the earlier planted fields, and the grain is quite hard on the cob, yet the stalks and leaves are much too green to put in shock this damp weather. Corn cutting will be late, and corn husking still later. The finish of corn husking will be later still, as the crop will be what one man was heard to call a "big 'un." The state will need, not an army of reform voters this fall, but an army of expert corn huskers.

Where the late rains have fallen the

BUTTER-BRED Holstein bull calves, 6 to 8 months old, sired by Prince Inka, (18 A. R. O. daughters), and out of A. R. O. dams, \$50 each. No females now for sale. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

plowed land is being put in excellent shape for fall seeding, and some already talk of commencing to sow wheat next week. There is nothing to fear of the Hessian fly here, so wheat sowing need not be put off on account of that pest, which is a pest indeed in certain parts of the winter wheat belt.

In the way of prices, the only two that look off are those of cattle and hogs. The "two H.'s," horses and hogs, are selling for more money than we always expect to get. There is a great demand waking up for last winter and spring farrowed shoats. The few that are expecting to feed cattle are needing them, while the man with a lot of surplus corn in sight, and his name is legion, can make good use of a good sized drove of thrifty shoats.

It is warm this evening, almost too warm for the nearing of a change in the seasons, and while it is clear, it will probably repeat the usual performance of being foggy a part of the forenoon.

Henry Hatch.

Coffey Co., Kan., Sept. 6, 1906.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

LOCATION FOR POULTRY HOUSE.

Doubtless there will be a great deal of building of poultry houses this fall after the harvest has been eared for and before the winter comes. We have had many inquiries about what is the best location for a poultry house. We have had a good deal to say on this question from time to time, but still there comes requests for additional pointers.

The ideal place for locating a poultry house and yards is a dry, rather high, piece of ground having a slope to the south or east. Natural drainage should be good. A poultry yard located on a low and undrained piece of ground can never give satisfaction. A light, porous soil is vastly better than a heavy clay soil. Clay land is objectionable because hens cannot scratch to advantage, and unless hens can scratch in the ground in well pulverized soil they will not do well.

Poultry grounds should be protected on the north and west by farm buildings, a high, tight board fence or a hedge or grove. The size of the house will depend on the number and variety of fowls to be kept. The usual rule is to provide each fowl about ten square feet of space. This will appear to be large by many, since there are so many houses where a fowl does not have one-half that much space. Disease is much more likely to attack them where they are crowded in a small space.

In planning a house, arrange it so it will provide shelter for the required number of fowls, in order that it will be reasonably warm in winter.

GAPES.

Please tell me what is the cause and cure of gapes in chickens.

Ogden, Iowa. A Subscriber.
Gapes is due to the presence of small, thread-like worms in the wind pipe. When they are known to be present poultry houses should be cleansed, fumigated, disinfected and whitewashed.

Cheap coal oil is used to destroy the worms in the following way: Take a small medicine dropper; half fill it with oil. Open the chicken's bill with the bird held back down between your knees, pull out the tongue and hold the lower bill and the tongue between the forefinger and nail of thumb of left hand. This will bring into view the opening into the windpipe at the base of the tongue, into which gently insert the tip of the medicine dropper and discharge the oil. Then close the bill and hold the head still for a few seconds. Then let the chicken go and he will cough up some of the oil, but enough remains to kill the worms and they will be coughed up and swallowed.

FRESH AIR POULTRY HOUSES.

In previous numbers we have called attention to the system of fresh air houses. A man by the name of Tollman has brought forth an old principle, though by some it is called new. It consists in making a house after the fashion of the dwellings in China and Japan. Four sides of the house are closed and the roof is so constructed as to make the open side very much smaller in area than any of the other sides. This open side is covered with poultry netting and the house being made deep from the open side. In a house of this kind poultry is supposed to be more healthy than in a house that is closed on all sides.

This matter of open houses or fresh air system is not a new one since many of our poultrymen on farms have never had any house for their poultry save an open shed and during summer the roosting place consisted of the branches of trees. An open house sounds all right in summer when the thermometer is crowding towards the top, but in winter when the temperature is down about the zero point or below, it has a different sound. With some modifications in a cold climate this house may be made very useful, but to make it answer during the severe winter weather will become a question.

MODERN POULTRY CULTURE.

We are learning many new things in the management of poultry and we are compelled to unlearn some things that we once learned. Methods of poultry keeping are being greatly simplified, and much that was once considered necessary is now thought to be useless and unnecessary. One thing that we have learned is that much less space can be used for keeping poultry than laid down in the text books, if we use the proper methods of management. A free range, once thought necessary, has been found to belong to the past age. Some experts have demonstrated that fowls can be profitably kept in close quarters if the conditions are made right. Professor Gowell, of the Maine Experiment Station, on his own farm kept 2,000 pullets in one house, an area of 200x400 feet, a little over two acres. Each fowl had four square feet of house room, which would naturally be considered limited quarters, and was only made possible by keeping them in large flocks in curtained houses. These pullets laid from 600 to 900 eggs per day during December and January.

If 2,000 laying hens can, as has been demonstrated, be successfully kept on about two acres of land, then five acres are capable of supporting a complete plant for 2,000 hens and the growing stock to renew the layers, and such a plant with proper management should pay from \$2,000 to \$5,000 annually. We are in an age of intensive action and we must come to making the most of what we have. Keeping down the cost of production by producing large numbers from a small area of land—not every man can do this. Some will fail. But it has been demonstrated to be possible.

MOLTING A NATURAL PROCESS.

A chicken is a machine and as fast as the parts are worn out they must be replaced with newer parts. When they are properly fed they lay eggs and keep up the laying just as long as the machinery is well eared for and kept in condition for producing them. Now the elements that go to make up feathers are very much the same as those in eggs and the feeding required will need to be very much the same.

If there is a desire to hasten the process of molting it will be well to feed such feeds as oilmeal or sunflower seeds, the oil of which will produce heat in the body of the chicken, drying out the quills and the process of molting will be aided thereby. To aid a new growth it will be well to use wheat bran, beef scraps, wheat, clover, alfalfa and some other feeds containing nitrogen. Also add a little corn to the ration so as to produce heat.

A FOREIGN JUDGE CHOSEN FOR THE INTERNATIONAL.

It has been the custom of the management of the International Live Stock Exposition, of Chicago, to select a foreign judge to pass on the grade and champion steers in this great December show. The record made thus far by these judges in the fairness and wisdom of their decisions more than justifies the continuance of the practice.

A judge for the grade steers at the coming International has been secured in the person of Arthur P. Turner, of Pembroke, Herefordshire, England. Mr. Turner's career as breeder, feeder and judge fits him admirably for the responsibility that will fall to his lot next December.

How Interurbans Affect Railway Fares.

Interurban railway systems are being established in every state in the corn belt, and such a system of transportation is bound to change radically the relation of rural districts to the towns and cities and also the relation of the latter to the former. Their effect on the cost of passenger transportation is a notable feature of the new service.

A typical instance is furnished by the interurban lines that enter the city of Des Moines. These electric roads have reduced the passenger round-trip rate from Perry to Des Moines, a distance of thirty-four miles, from \$2.04 to \$1.10, while a round-trip ticket from Boone to Des Moines, a distance of thirty-two miles, will soon be reduced to \$1.30. There has also been a reduction in rates to travelers going to and coming from points beyond interurban terminals. For example, passengers west of Herndon, a point thirteen miles west of Perry, will be able to procure round-trip tickets to Des Moines at a saving of \$1.36 over former rates.

The influence of freight rate reductions is not so marked as in the passenger service, but to shippers along the electric a saving is made manifest not only on local shipments but on other transportation, because of the arrangements made between the electric railway and two trunk lines entering the city of Des Moines.

CROCKER RELIEF CORPS NO. 27.

Invite all members, friends and veterans to accompany them on September 25th to Marshalltown by special train via the Chicago Great Western Railway at 8 a. m. from Des Moines, visit the Soldiers' Home and return by special train leaving Marshalltown at 7 p. m. Tickets will be on sale by the following persons at rate of \$1.50 for the round trip: Miss L. Rood, care of Pension Office; Dr. Ridgway, 211 Hillside Ave.; Mrs. Don Tullis, Ninth and School; Miss Ruby J. Echerson, Thirty-eighth and Ingersoll; Mrs. J. J. Stuckey, 567 Seventh St.; May E. Jones, president, 1212 Tenth St.; Lucinday E. Drake, secretary, 663 Twenty-first St.; Mary W. Hazard, treasurer, 560 Seventh St.; Commander W. V. Wilcox, Adjutant J. J. Stuckey, or E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

The Wabash, "The Banner Route," has arranged for the following low rates, available to the public:

Los Angeles and return, on sale September 3d to 15th, inclusive, \$54.25, good until October 31st.
Buffalo, New York, and return, October 10th, 11th, 12th, \$24.15, final limit October 19th.
Toronto, Canada, and return, \$23.55, account Sovereign Lodge I. O. O. F., final limit October 21st.

For further information address F. C. McMillan, D. F. & P. A., or L. R. Davis, P. & T. A., 512 Walnut St., Des Moines, Iowa.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. Rate one fare plus \$2. Liberal limits and stop-over privileges. For rates and further particulars call on agents or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

CALIFORNIA EXCURSIONS.

The Iowa Central will sell tickets to Los Angeles and San Francisco, Cal., from September 3d to 14th, inclusive, limited to October 31st at rate of one fare for the round trip. Variable routes and liberal stopover privileges. For further particulars call on agents or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

Make Your Own Stock And Poultry Foods

AT ONE CENT A POUND.

A Subject of Interest to All Feeders.

EXPERIMENT Station Bulletins are unanimous in their claims, based on many careful tests, that a good tonic or Stock Food is both profitable and positively necessary to the feeders of today, but the great objection is "they cost too much." "Should be bought for about one-half of the usual price." Farmer's Bulletins 73 and 144, Dept. Agt., Washington, D. C., show how Stock Foods are usually made, using about 90 per cent cheap "filler." You have a good "filler" of your own. We give you here a formula proven and guaranteed as The Best Stock Food Ever Known.

Formula:

50 lbs. Common Bran, Chop or Meal.
5 lbs. Common Salt. Mix and add a 50 cent package of Arabian Stock Food Tablets. Costs you only 50 cents for 50 lbs.

Arabian Stock Food Tablets are made from the seeds of wild flowers—the most reliable remedies known to medical science—reduced to extract form for economy. Send 50c to The Be-Saw Chemical Co., 335 Schofield Bldg., Cleveland, O., for Trial Order (sent prepaid and guaranteed) including a Co-operative Advertising Certificate good for a free order and other premiums in return for recommending the Tablets, if you like them.

SANDWICH SELF FEED Full Circle Two Horse **HAY PRESS**
The Baler for speed. Bales 12 to 15 tons a day. Has 40 inch feed hole. Adapted to bank barn work. Stands up to its work—no digging holes for wheels. Self-feed Attachment increases capacity, lessens labor, makes better bales and does not increase draft. Send for catalogue. Sandwich Mfg. Co., 143 Main St., Sandwich, Ills.

CANCER
CURED to stay cured. My TRUE METHOD kills the deadly germ which causes Cancer. No knife! No pain! Longest established, most reliable Cancer specialist. 16 years in this location. I give a WRITTEN LEGAL GUARANTEE. My fee depends on my success. Send for free 100-p. book and positive proof. Address, DR. E. O. SMITH, 200 WABASH AVENUE KANSAS CITY, MO.
WANTED, alfalfa seed. Send sample, address, price and quantity to R. E. SMITH, SHERMAN, TEXAS.

THE FAMOUS OLD TRUSTY
More than your money's worth in incubators during the summer. We have them all beat; 40, 60 or 90 days to prove it. 5 year Guarantee. Now is the time to write to M. M. JOHNSON, The Incubator Man, Clay Center, Neb.

POULTRY.

When writing please mention this paper.

VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

SWAY-BACK SOW.

I have a choicely-bred Duroc sow, two years old this fall. She is a very fine individual and I desire to cure her if possible. This sow is down in the back and after lying down for some time she seems to me more afflicted than when up and about. Occasionally she carries herself quite well, but not to any great extent. This sow is due to farrow in a short time and I wish to save her pigs. Is there any chance of curing her and what treatment must I give?

We presume you mean that the sow has a sagged back, or "sway back." In that case nothing can be done for her other than keeping her in good health by exercise and such feeding as will keep her bowels regular and supply all requirements of her body without making her fat. Feed nitrogenous foods and green feed. She should not again be used for breeding purposes. If the sow is weak in muscle she may be helped by giving fluid extract of nuxvomica in small doses, say five drops two or three times daily, but this will not cure her.

FISTULA.

I have a bay mare six years old with a fistula of the withers which came on her last spring. As I had to work her, I used a liniment and succeeded in keeping it from breaking until the work season was over; but about six weeks or two months ago I concluded it was not getting better, but worse, and opened it from the bottom to insure good drainage of the wound and injected tincture of iodine for a week; then began applying a healing ointment. About three weeks ago I opened it again farther back, and took out quite a lot of pus and also found pipes; so I treated it as I did the first opening, but the bunch does not go down very fast. Am I too impatient? Both openings are running some. Can you give me any information?

Every pipe and pocket will have to be freely opened to the very bottom to provide perfect drainage, after which inject once daily a large quantity of a hot 2 per cent solution of coal tar disinfectant or permanganate of potash and afterwards pack cavities full of oakum saturated in a mixture of equal parts turpentine and raw linseed oil. As soon as it is doing well blister the enlargement every two weeks with cerate of cantharides while continuing the other treatment. It may take six months to cure the trouble.

STIFLE LAMENESS—WORMS.

(1) I have a horse colt fifteen months old that was fed on corn and hay last winter and very little corn since on pasture. A few weeks ago I noticed he was stiff in the back joint, especially early in the morning when he would be standing. When made to move the muscles of his hind leg would become stiff and rigid and he would drag his foot sometimes several steps and then it would bend with a jerk and he would walk all right. He is in good flesh, but getting worse. (2) I also have two two-year-old Delain ewes. One showed a few symptoms of indigestion last spring; now it has a dry cough at night. There is a slime on its dung. They are both poor, thinner in flesh than the older ones of the same flock. Do you think worms are troubling them? Do sheep need a worm medicine regularly as a safeguard?

(1) The seat of the lameness is the stifle joint. In such cases the patella (knee cap) of stifle slips out of place and the hock at such times becomes "set" and the leg is dragged behind. When the patella returns to its place the leg is jerked up and forward and often a clicking sound is heard as the cap snaps into place. Tie colt up short in stall and blister the stifle joint with cerate of cantharides. Keep it in stall

Lameness

Greatest Success on Bone Spavin.

Corona, L. I., N. Y. March 26, 1905.

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Gentlemen—I have been using your Spavin Cure with great success on a horse that had a bad Bone Spavin; he went very lame for about one year; after using two bottles of Kendall's Spavin Cure he now goes without any lameness at all.

Yours truly, Joe Barrad.

Kendall's Spavin Cure

will cure if anything will. The world has never known its equal for Spavin, Curb, Splint, Ringbone and all forms of Lameness. Price \$11.00 for \$5.00. Greatest known liniment for family use. All druggists sell it. Accept no substitute. Book "Treatise on the Horse" free from druggists or Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Cures Hog Cholera

Chloro-Naphtholeum Dip is guaranteed to cure Hog Cholera. Kills hog lice. Heals wire cuts, sores and wounds. It is the greatest germicide, insecticide and disinfectant known. Quick and sure in its action. You can try it at my expense and risk. A gallon of

Chloro-Naphtholeum Dip

shipped anywhere, express prepaid, to prove my claims. Send no money. It must do the business or you are not obligated to pay a penny for it. The trial gallon makes 100 gallons when diluted. Give it a test. Simply send your name and address to

E. TAUSSIG, President WEST DISINFECTANT CO.
21 East 59th St., New York City

for a week; then turn into box stall for two weeks. Repeat blister if necessary in one month. (2) Worms in the lungs most probably caused the cough referred to. It certainly is good policy to give sheep commercial worm powders or other effective preventive medicine for worms from lambs until yearlings. Give a tablespoonful of gasoline in six ounces of milk and repeat the following week and oftener if found necessary. Great care must be taken when drenching, as it is an easy matter to choke a sheep.

NAVICULAR DISEASE.

I have a gray driving mare four years old that has been lame about a year and a half, at times. Then again she will be all right. Sometimes the trouble appears to be in both front feet and when standing she shifts her weight from one foot to the other. Our local doctor said it was a disease of the nerves and could not be cured. Another one said that the nerves would have to be cut and that there was danger of her hoof coming off. At times her foot seems to be sore and feverish, but there is no blemish of any kind on it. Can you advise me what to do?

The inflammation evidently involves the navicular bones and associated tissues, thus constituting the trouble known as navicular disease. Apparently the cause in this case is rheumatism and there is a possibility of relief from repeated blistering of the coronets after removal of the hair. Use a mixture of one dram of biniodid of mercury in two ounces of cerate of cantharides. At time of excessive lameness, if it comes on suddenly, give two drams of salicylate of soda three times daily on tongue. Avoid damp stable.

SWELLING.

I would like to know what to do for a mare that has a stiff neck. Her neck is swollen from her breast about three-fourths of the way up to her head. The swelling is under the throat and up both sides. She cannot put her head to the ground until she gets her front feet in a lower place than where she is eating. She sometimes puts her front feet out and stands with her head on about a line with her breast. The veterinarian here thinks she has sprained her neck in some way or else she was kicked. She ran loose in lot all winter and I saw no sign of a kick. She has been this way ever since April.

The condition is not likely due to strain or injury, but is a trouble affecting either the jugular veins or the lymphatic glands of the parts involved. Bathe with warm water twice daily; then apply druggist's soap liniment and extract of witch hazel, equal parts. Give a dram of iodid of potash night and morning every other day unless she is in foal. Stop for a time when she begins to discharge from the eyes. There seems a possibility that an abscess may form or be present and require opening.

INDIGESTION.

What is the matter with my four-year-old gray horse? He has been worked this summer, fed on oats and corn, half and half, and Timothy hay. He has been on pasture when not at work and looks very well, but does not look as he should after he has been worked a little. When you stop him he grinds his teeth every little bit and when kept in the barn over night his hind legs swell very badly. He has coughed a little all summer, but of late coughs three or four times at once quite often. There is no discharge from his nose and no signs of worms. Fed stock food and flaxseed meal all spring. He has grinded his teeth and coughed for the last six months or so when I kept him in barn.

Have his teeth attended to by a veterinary dentist and have him clipped if his coat is long and rough. Wet all coarse food with lime water and for cough give him half to one ounce of glyco-heroin two or three times daily, as required. Also give twice daily half an ounce of solution of arsenic. It would be best to feed him on cut hay, bran and corn meal, with one quart of black strap molasses made into a mash night and morning, and feed whole oats at noon and long hay at night. Molasses has a fine effect in such cases and may be fed much more heavily than we have prescribed, and without causing scours or colic.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points

OUR HOME DEPARTMENT

ALL communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

AMONG OURSELVES.

The circle is expecting something unusual today, it will not be disappointed, our program is both novel and interesting. I am also expectant, I hope I shall not be disappointed, but of my hopes more anon.

There is quite a story connected with today's program. I shall outline it less briefly than I would otherwise because I happen to know that the friends Among Ourselves dearly love to hear about Mrs. Walker's doings.

When I returned from Europe in the early summer I thought I was home to stay, that there would be no further outing this year. Six weeks later I was packing up again. The Only Man had decided to take summer work at the University of Kansas, and nothing would do but that I should accompany him. We were nicely settled, enjoying Lawrence, its fresh, sweet air, its restful quiet and its tree embowered streets, the delightful panorama from Oread Hill, and the library with its treasures of books, when, one morning, I received a Home Department letter dated Lawrence—it had come back from Kansas City with other forwarded mail. When the Only Man came home to lunch I told him about the letter and said I would write and ask the writer to call on me. "Perhaps she has a 'phone," said he. A moment later I was consulting the telephone book. Sure enough, there was the name, B. M. Gregory, three and one-half miles southeast of Lawrence.

Blessed be the rural telephone. I called up Mrs. Gregory, she agreed to come and see me, and a day or two later we clasped hands. As we chatted it transpired that Mrs. Gregory belonged to a club composed of neighbors and friends living on farms. At once I was all attention. If there is one thing which interests me more than another it is how to sweeten and broaden life for women who live in the country. The upshot of it all was that I accepted an invitation to attend the next meeting of the club.

Club day morning I ran to the window as soon as I awakened. The sky was clear. The weather would be fine. My spirits rose as I thought of the joys the day promised, the treat of a long drive in the country and a quite new experience.

I wish I might tell of the pleasure of the drive to and from that club meeting. But come to think of it, it would be like carrying coals to Newcastle. You certainly know how lovely the open country is upon a summer day, and I hope you all know how good it is to enjoy it in congenial company, behind a good horse.

It would take too long to give a detailed account of that day's club meeting, but there are some things which should be told.

The club met in a comfortable farm house set among trees. There were twenty-three women present, all farm wives or mothers, or daughters. There was no stiffness or formality, but everything was done decently and in order. My new-found friend, Mrs. Gregory, presided with grace and dignity, and the ladies taking part in the program bore themselves admirably. The meeting opened with a roll call answered by quotations from Aets. After some music Miss Wright gave a reading—the story of the courtship of Alphonso and Ena. Then came the paper of the day, by Miss Howell, who proved the history of a foreign country can be made a fascinating study. After Germany be-

tween 1840 and 1861 came "Mythology" by Mrs. Gentry, and then a delightful social time during which refreshments were served.

Long before the meeting adjourned I was resolved that Among Ourselves we should talk about this club. When I asked the president if she would write about it for us she kindly consented. Afterwards some of the members obligingly agreed to tell of how the club had helped them. They kept their promises so nobly that I decided to give an entire meeting to this matter. I am extremely anxious that the matter of clubs for country women should receive greater attention here Among Ourselves than ever before. I am hopeful that today's program will result in the formation of a number of clubs. To that end I bespeak a careful hearing for the Minervian ladies who will now take the floor. Mrs. Myrtle Gregory, president of the club, will open the program:

I wonder how many readers Among Ourselves belong to a literary club? Those who do, know the benefits and pleasures derived therefrom, and to those who do not is this letter written. Some few years ago a number of the ladies of this community decided to try the experiment of a literary and social club. We have now passed from the experimental to the pleasant, practical working stage. I will try to briefly outline our organization and its work. We have a constitution and by-laws by which we are governed, and let me suggest right here that great care should be exercised in formulating the constitution, as the life and success of the club will depend largely on this. Officers are president, vice-president, secretary and treasurer, all elected for one year. Committees are four, appointed by the president, namely: Program committee, whose duty is to prepare programs for the year; membership committee, who pass upon applications for membership before presenting them to the club to be voted upon; music committee, to assist program committee; flower committee, who provide flowers at the expense of the club when death enters the home of a member. Money for necessary expenses is raised by a per capita tax. We entertain as our names appear on the roll, meeting every two weeks at half past two o'clock. At the close of the study and business session light refreshments are served and a delightful social hour follows. At the annual meeting and election the subject of study for the ensuing year is decided by vote, the program committee supplying miscellaneous work. We have studied in turn America, Holland, Germany, and will this year take up Japan. We do not find the work irksome, seldom if ever without prepared program; indeed it is one of the provisions of our constitution that we do to the best of our ability whatever work is assigned us. Perhaps someone will say, "All very well for people who have leisure and no children to care for." But, dear friends, right here you mistake. Membership to our club is restricted to rural ladies and each and every one has the usual duties found in the farm home, but we so arrange our work that the afternoon for club is set apart for that purpose, except perhaps during times of extra work, such as harvesting, thrashing, etc., and I am confident that it is the voice of our circle that we gain more than we lose every time we do so. As for the children, will say that we suffer very little inconvenience through that medium. The children are left at home when it can be so arranged, or when old enough to care for themselves, otherwise the mother brings them with her and they behave admirably. In the summer time they often have a nice visit, all their own, out on the lawn while the meeting is in progress, and in winter all but the younger ones are in school. So, dear mothers, do not hesitate on that score if you have an opportunity to join a good club. There are no less than fifteen children under twelve years of age in the homes of our club members, and I believe the younger mothers get quite as much enjoyment out of the gathering as do the unmarried few and the older matrons. Our most distant meeting place is something over four miles, and some are quite centrally located. The club does much to relieve the isolation so often found in the farm life and keeps us in touch with the world and its happenings. I certainly urge the ladies of every community to have a club. If you have had the advantage of a college education you can certainly do much to assist in the work, but whether college bred or not the average American woman of today, whatever her walk in life, is fully capable of organizing and maintaining a good study club. Now, just a word in closing in regard to the sterner sex. Not once, I think, has complaint reached our ears that home is neglected because of the club. Indeed, it meets with the approval of all our men folk. Try an open meeting occasionally and review a part of the work done. You will enjoy it, so will the husbands and brothers. I will gladly answer any questions in regard to organizing a club if I can be of assistance in this way.—Mrs. M. V. Gregory, Lawrence, Kan.

Before reading the constitution and by-laws of the Minervian club which Mrs. Gregory kindly places at our disposal we shall have a few words from ladies who are prepared to testify as to the benefit such a club is to its members:

There can be no doubt that a country club is of benefit to its members. In a club that is to some extent literary it keeps one from becoming as "rusty" in literature as the average woman on the farm becomes when her school days are over. If the affairs of moment in the world are discussed it keeps one better informed than would usually be the case otherwise. It brings the women in the country together in a neighborly way, and this in itself is a rest and change from the daily routine of housework that falls to the lot of most country women. The fact that there is a certain time for such a meeting induces many of us to leave our cares and go to our neighbors' homes when we probably would await a "more convenient

season," which seldom comes, if it were not for our club.—Charlotte Stone Gentry.

In answering the question as to how I have been benefited by our society I will say, "In many ways." In the country we have many little cares, as well as great ones, and the society coming at stated times gives us something to look forward to, and we learn to systematize our work and save the time in which we may meet friends and neighbors for our mutual pleasure and profit. I will mention one great privilege which we enjoy through the medium of our society and that is hearing from those who have visited scenes and countries distant from our own, and we certainly appreciate the kindness of the ladies who have thus honored us. A notable instance of this is the beautiful and interesting description of Holland and Scotland given our society by the editor of the Home Department.—Annie A. Mitchell.

The Minervian Club, of which I have been a member for nearly six years, has been the means of developing and training my mind. I might still be discussing neighborhood differences if club work had not come into my life. Often the words of wisdom and messages of truth spoken by some of our members in a quiet, unassuming way have awakened my interest and imparted strength. I have conquered self consciousness enough to say what I think at the right time. I have learned that it is unwise when anything of an unpleasant nature transpires to speak of it outside of the club, to hold whatever happens in the club as sacred. I find I am not so sensitive and apt to be personal; that I do not interpret the actions of members in a personal manner as in the beginning of my club life. I am more willing and submit with far better grace to be governed without question of authority, and I take broader views of things and people, also I have learned to take fair criticism kindly, and can say with all my heart that club work is a profitable pleasure.—Mrs. Guy Harshberger.

The composite testimony of these three ladies is a strong plea for clubs for country women, it seems to me. I do hope it seems so to you. It will delight me if hearing about the Minervian club inspires and encourages some of you to form circles in your neighborhood. To further stimulate and assist you after the reading of the constitution and by-laws I shall say something about the club's admirable program:

CONSTITUTION OF THE MINERVIAN CLUB.

Article I.—Name.
The name of this club shall be Minervian.
Motto—Alpha Beta Mathea Metia Kla Fetchua.

Article II.—Object.
The object of this club shall be united effort toward peace, charity, equity and the higher civilization.

Article III.—Membership.
Any person interested in the object of this club may become a member upon the conditions prescribed in by-laws.

Article IV.—Officers.
Section 1. The officers shall be president, vice-president, secretary and treasurer.
Sec. 2. All officers shall be elected by ballot at the annual meeting and continue in office one year.
Sec. 3. No member shall hold the same office more than two consecutive terms.

Sec. 4. Vacancies in office can be filled at any regular meeting in the same manner as at the annual meeting.

Sec. 5. Duties shall be the same as other corporate bodies.

Article V.—Meetings.
Section 1. The annual meeting shall be held on the first Thursday in May.
Sec. 2. The club shall meet every two weeks at half past two o'clock p. m.

Article VI.—Quorum.
Section 1. A majority of the active members shall constitute a quorum.

Article VII.—Amendments.
Section 1. This constitution and by-laws

may be adopted, amended or repealed at any regular or annual meeting by a two-thirds vote of the active members present, provided the proposed amendments have been submitted in writing at a previous regular meeting.

BY-LAWS.

Article I.—Membership.

Section 1. Women from the rural districts shall be eligible for membership.

Sec. 2. Membership in this club shall be of two classes, active and honorary.

Sec. 3. Active membership shall consider themselves in honor bound to study the subjects under consideration by the club and perform literary or committee work assigned them.

Sec. 4. Honorary members shall be entitled to all the privileges of the club except those of voting and holding office, but shall have no responsibility in regard to the work of the club.

Sec. 5. Active members shall be limited to twenty-five and honorary to five.

Sec. 6. Honorary members shall be eligible to active membership as vacancies occur.

Sec. 7. Elections shall be by ballot and two negative votes shall exclude from membership.

Sec. 8. Any places not filled by honorary members may be filled by the membership committee from their list of applications in their regular order.

Article II.—Members.

Erased. Article III.—Committee.

Section 1. There shall be three committees, membership, program and music.

Sec. 2. The membership committee shall investigate the qualifications of applicants for membership and report the same to the club.

Sec. 3. Program committee shall prepare the literary work of the club.

Sec. 4. Music committee shall arrange the music.

Article IV.

Any question not arranged for in this constitution and by-laws shall be guided by regular parliamentary rules.

Section 1. There shall be two articles of diet and one of drink.

Amendments.

No one member shall hold more than one office at a time, also no one member holding office shall serve on committee unless there are not enough members to fill such committee. Neither shall one member serve on two committees at the same time.

The mere mention of constitution and by-laws sears some women. Where that is the case, rules and regulations should be few and simple. A club can be operated with very little red tape. I am personally acquainted with one which has been in operation almost two years without any written constitution or by-laws, and has suffered no conscious loss thereby. I do not recommend following the example of this club, but refer to it as evidence of what can be done by women who are timid about formal organization while anxious to meet as a club. These women of the club referred to simply met together by invitation, agreed to meet regularly once a fortnight, chose one of their number to preside and two others to draw up a program, and so launched out on the sea of club life.

The success of a club depends so largely upon its program that I should like to give the circle the benefit of that of the Minervian club for 1905-1906. I must, however, content myself with supplementing Mrs. Gregory's reference to it. I notice first of all that it commends itself to persons of varied tastes.

25c

EASY ON WRIST
No Blisters

NEW AKIN CORN HUSKER

Just fine for rapid, easy work. Strong and durable. Easy to use. Fits snug and holds fingers firmly together so there's no jar to speak of. Quickly put on.

Adjustable Pin, made of cold-drawn steel, mounted on piano-wire spring, relieves the strain on hand, wrist and arm muscles. If your dealer hasn't it, send 25c and get the Husker that beats 'em all.

Smith and Davis, Box 2, Ames, Iowa.

The quotations which open each meeting are so appealing to readers and thinkers and doers, among them are Current Events, Short Household Suggestions, the names of Cities of Germany and Women of the Bible, and lines from books and authors as dissimilar as the Bible and the poet, Schiller. Then in addition to the history work, which covers Germany from early times to the present day, there is, at each meeting, a paper on some other subject—"Luther Burbank," "Arts and Crafts," "Music and Musicians," "The Cliff Dwellers," "The Associated Press," "Home Life," "The German Army," "Martin Luther," etc. Music and a reading furnish further variety and round out the programs which have made the Minervian a more than usually successful club.

Where members of the club are not of one mind and books of reference are not easy of access a mixed program is frequently the best. On the other hand a Magazine Club, where the program consists of selections from monthly reading, a Current Event Club where world politics as reported by the newspapers are discussed, or a literature club where some classic author is studied, binds women of similar taste in delightful bonds. As examples along this line I give two pages from the year book of women who are studying Shakespeare and Dickens:

MACBETH.

First Day.

1. Classifications and history of the play.
2. How much of Middleton's play The Witch has been introduced in Macbeth?
3. Characterize the witches. The belief in witches; their supposed powers.
4. The character of Macbeth; the dominant element of his mind; compare and contrast with Richard III.
5. Quotations on sleep.

Second Day.

1. Lady Macbeth, her character and personal appearance.
2. Define Thane, and give history of the title.
3. Reading: Act 1, scene 3.
4. Locate and describe Scone, the scene of the coronation of the Scottish kings. The stone of Scone, how it became part of the coronation chair of the English sovereigns.
5. Quotations from speeches of the various kings in Shakespeare.

Third Day.

1. Reading: Act V, scene 1.
2. Discussion: Who was morally responsible for the murder of Duncan?
3. Malcolm, his place in history; how did he become ancestor to the present king of England?
4. Brief synopsis of the play.
5. Selected readings.

OUR MUTUAL FRIEND.

First Day.

1. (a) Outline Book I. (b) Book II. (c) Book III. (d) Book IV.
2. The Boffins: How affected by the Harmon will; their domestic arrangements.
3. Read chapter IX, Book I.
4. Lizzie and Bertha; compare and contrast.
5. Read chapter IX, Book II.

Second Day.

1. Discussion: The Lovers in the story:

W. L. DOUGLAS

\$3.50 & \$3.00 SHOES FOR MEN

W. L. Douglas \$4.00 Cilt Edge Line cannot be equalled at any price.

W. L. DOUGLAS SHOES ALL PRICES

BEST IN THE WORLD

THE WORLD'S GREATEST SHOEMAKER

SOLE AGENTS FOR W. L. DOUGLAS SHOES

ESTABLISHED JULY 6, 1876

CAPITAL \$2,500,000

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD.

\$10,000 REWARD to anyone who can disprove this statement.

If I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. Douglas Strong Made Shoes for Men, \$2.50, \$2.00. Boys' School & Dress Shoes, \$2.50, \$2.17, \$1.50.

CAUTION.—Insist upon having W. L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom. Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

W. L. DOUGLAS, Dept. G, Brockton, Mass.

(a) Mr. and Mrs. Boffin, Mr. and Mrs. Lemmle. (b) Eugene Wrayburn, Lizzie Hexam; Bradley Headstone, Miss Poocher. (c) John Harmon, Bella Wilfer, Mortimer Lightwood. (d) Georgiana Popsnap, Fascination Fledgby. (e) George Sampson, Lavinia Wilfer, Mr. Venus, Pleasant Riderhood, Sloppy, Jenny Wren.

2. Read chapter XV, Book Three; chapters VIII and XI, Book Four.

Third Day.

1. Discussion: The Villains: Fascination Fledgby, Gaffer Hexam, Charlie Hexam, Rogue Riderhood, Bradley Headstone, Silas Wegg, Mr. and Mrs. Lemmle. Did each receive satisfactory punishment?
2. Describe the trade of Dustman: how profitable; how conducted?
3. The best and the worst drawn characters.
4. Impersonations by club.

At various times in the years since I became editor of the Home Department I have urged the formation of Mothers' Clubs and given lists of subjects suggested and helps provided by the National Congress of Mothers. In the clubs which will result from today's program I trust there will be many little groups which will make Child Life their study.

In bringing this program to a close there is one other word I should say. The success of a club does not depend upon numbers. Some of the most helpful and enjoyable clubs are small, quite small. Don't be discouraged because there are only a few women in your neighborhood, just get together and see if you do not have good times. If you cannot meet once a fortnight, meet once a month. And if you cannot write papers, try reading the same things and talking about them, or reading something aloud and then talking about it.

Mrs. Gregory has very kindly offered to answer questions or give advice to those who would like to form clubs. Lest she be overworked I make the same offer. It will give me great pleasure to be of any assistance to women who feel they would like to organize a club.

It is time to adjourn and I have said not a word about my visit to Iowa's State Fair and the pleasure of meeting members of this circle while there. Perhaps some other time I shall tell how I came to go; it all grew out of attending that meeting of the Minervian Club, and of the resolutions I made while exchanging greetings with Home Department readers in "Iowa, Beautiful Land."

Next week we shall return to our usual order, resume discussion of various matters interrupted by today's program and launch a new subject, one which appeals especially to the unmarried members of this circle.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

A crowd of troubles passed him by,
As he with courage waited;
He said, "Where do you troubles fly,
When you are thus belated?"

"We go," they said, "to those who mope,
Who look on life rejected.
Who weakly say 'goodby' to hope;
We go where we're expected."

—Anon.

Perhaps today is a dismal day,
With never a joy in sight;
But tomorrow may dawn in a splendid way
And scatter your woes in flight.
Tomorrow may come with blessings rare
To lay at your feet, and you
May wonder why men sit down in despair
When the world is so fair to view.

WHAT TO READ.

If you have the blues, read the twenty-seventh Psalm.
If you are losing confidence in men, read the thirty-seventh.
If you are losing confidence in men, read the thirteenth chapter of First Corinthians.
If people seem unkind, read the fifteenth chapter of John.
If you are discouraged about your work, read the hundred and twenty-sixth Psalm.
If you find the world growing small and yourself great, read the nineteenth Psalm.
If you cannot have your own way in everything, keep silent and read the third chapter of James.
If you are all out of sorts, read the twelfth chapter of Hebrews.

TESTING OVENS.

To judge of an oven's heat try the oven every ten minutes with a piece of white paper. If too hot the paper will blaze up or blacken. When the paper becomes dark brown—rather darker than ordinary meat-pie crust—the oven is fit for small pastry. If light brown, the color of nice pastry, it is ready for tarts. When the paper turns dark yellow you can bake bread, large meat pies or pound cakes; while if it is just tinged the oven is fit for sponge cake or meringues.

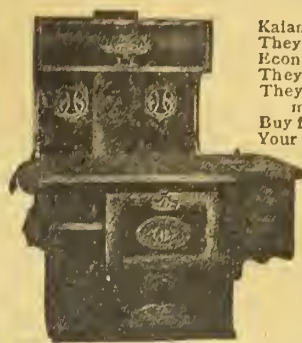

HOUSEHOLD NOTES.

Use modern conveniences if you can get them and afford them.

A folding shelf on the kitchen range on which pies, bread, etc., may be set when taken from the oven will prove quite a convenience.

Time and strength will be saved by having at hand all the needed materials for the

GREEN FOUNDRY & FURNACE WORKS, DEPT. F, DES MOINES, IA.

performing of any household task before beginning it.

Milk which has been standing for any length of time in a jug should be carefully poured into another, leaving a little at the bottom, for this portion of the milk is injurious to the health.

When washing glassware do not put it into hot water bottom first, as it will be liable to crack from sudden expansion. Even delicate glasses can be washed in very hot water if slipped in edgewise.

Instead of putting food into the oven to keep hot for late-comers, cover it closely and place over a pan of hot water. The steam will keep the food hot and at the same time prevent it from drying.

TIMELY RECIPES FOR THE COOK.

Tomato and Egg Salad—Immerse ripe tomatoes in hot water until the skins will rub off easily. Slice the tomatoes and arrange the slices on a cold plate, and pour over them any favorite cold salad dressing. Sprinkle on top with hard-boiled egg yolks which have been pressed through a sieve. Garnish with lettuce.

A Supper Dish—Make three cups of good, well-seasoned tomato sauce, thickened with a heaping teaspoonful of flour rubbed into one of butter. Keep hot in a double boiler set at the side of the range. Toast slices of bread, butter them, spread on a platter and put a tablespoonful of tomato sauce on each. Into the remainder of the tomato sauce turn two cupfuls of minced mutton, put the saucepan over the fire, stir until the meat is thoroughly heated, season to taste and pour upon the toast.

Apple Custard Pie—Prepare the apples as for custard; to three cups of apple add six eggs, one cup of white sugar and one quart of milk. First add the sugar to the apples and let cool; then beat the yolks of the eggs with the apples and season with nutmeg or allspice. Stir in the milk gradually, beating it well; lastly, add the whites. Bake with only one crust. This makes three pies. We find them equally nice with dried apples by making the apples a little more juicy. The appearance of the pie may be improved by reserving the whites of two eggs and making a frosting as for lemon pie.

Chicken Cream Soup—An old chicken for soup is much the best. Cut it up into quarters, put it into a soup kettle with half a pound of corned ham and an onion; add four quarts of cold water. Bring slowly to a gentle boil, and keep this up till the liquid has diminished one-third and the meat drops from the bones; then add half a cupful of rice. Season with salt, pepper and a bunch of chopped parsley—Pare and quarter ripe pears. Put them on to cook in clear water and when tender remove them to a flat dish. Make a sirup of the water in which the pears were cooked and an equal measure of sugar. Cook until clear, then add the fruit; also the juice of two lemons. Cook five minutes, then place the pears in a jelly mold. Dissolve one package of gelatine in a little water and add to it the sirup, stirring constantly. Boil up once and strain over the fruit. When cold take from mold and serve with a border of whipped cream garnished with candied cherries.

Pear Compote—Pare and quarter ripe pears. Put them on to cook in clear water and when tender remove them to a flat dish. Make a sirup of the water in which the pears were cooked and an equal measure of sugar. Cook until clear, then add the fruit; also the juice of two lemons. Cook five minutes, then place the pears in a jelly mold. Dissolve one package of gelatine in a little water and add to it the sirup, stirring constantly. Boil up once and strain over the fruit. When cold take from mold and serve with a border of whipped cream garnished with candied cherries.

[5437 Fitted Coat with Vest, 32 to 42 Bust.]

with one of the leading colors seen in the plaid. Not necessarily the ground or leading tone in the plaid, but if it is one that is seen only in the over-plaid it should be one that is quite prominent. There are entire costumes of plaid, to be sure, but these are not the rule. A coat showing gray in the ground color will be worn with a skirt in plain gray fabric. A green jacket will be worn with a skirt of plaid in which the ground color is brown, but the over-plaid shows a prominent note of green. A waist of very small check in black and white will be worn with a skirt of larger check or plaid of black and white. The idea may be carried out in ways that will enable many of us to so combine materials that we have at hand or to remodel a costume, getting new cloth for either skirt or waist, or coat or jacket as may happen.

Plaids are trimmed with plain material, folds, straps and tabs being made from the plain and applied in any manner to suit the user, and by referring to recent papers you will find a number of suggestions as to the manner of their use.

A coat and skirt suit may be made up of the two numbers shown in this paper, but they may be used in a separate manner, not

Dressmaking and Millinery—No. 533.

Sylvia Silverthorne, Muscatine, Iowa. [All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] A noticeable feature in the use of plaids

being designed specially as companion garments.

The fitted coat illustrated in No. 5437 is one of the season's favorites, and is very simple

[5436 Eight Gored Pleated Skirt, 22 to 32 Waist.]

and becoming with its long lines, the seams by which it is fitted to the form extending from the shoulder to the bottom edge, both

at the back and the front. A very narrow vest forms extensions at the front, these being simply joined to the fronts beneath their edges. Buttons in groups are used to simulate the joining. The vest is of velvet, but may be varied to suit the fancy, there being many fancy materials that are used for such purposes. The collar is flat and somewhat oddly shaped. Stitching or narrow band trimmings may finish all edges. It is advisable for the home dressmaker to select the loose weave fabrics when attempting this or other "tailor" work. Pattern No. 5437 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure.

Skirt design No. 5436 is an eight-gored pleated model, the pleats overlaying and concealing the seams. As will be noted, there is a double box pleat at the front and a similar one at the back, the skirt closing at the side back. You have noted that these designs having the box pleat at front and back are in the lead, and seem to be growing in favor. They require careful pressing for satisfactory results. Then, too, the fabric should not be too heavy. Either plaids or plain material are made after such designs. Pattern No. 5436 is cut in sizes for 22, 24, 26, 28, 30 and 32 inches waist measure.

When there is delay in getting the pattern or patterns ordered remember that the first thing to do is to make special inquiry at your postoffice for it. This class of mail matter is not handled as carefully as is first class, and packages are lost if not attended to in seasonable time. They are mailed you promptly.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range
Among the pleasant fields of Holy Writ
I might despair.

The International Sunday-School Lesson.

Third Quarter. Lesson XII. Mark. XII, 13-27. September 16, 1906.

Jesus Silences the Pharisees and Sadducees.

Handel, when composing his oratorio, "The Messiah," was found bathed in tears. What touched him was the prophet's words, "He was despised." The despising of Jesus was as evident in the temple as at the cross. And physical pains are not so severe to a spiritual soul as wounds inflicted upon that higher nature. Lowell says: "Our modern martyrdoms are done in type." So Jesus was crucified again and again before ever He came to the cross. We come now to the last onset of His despising critics.

It is led on by the Pharisees. They have heard of the bewildering defeat Jesus has given their rivals, the Sadducees; how, in a dialectical way, He had put an end to them forever. Now, if they, the Pharisees, could get the better of this brilliant young rabbi in debate, they would score a point against the Sadducees at the same time that they blocked the way of a Teacher whose success meant the end of their system.

We cannot know whether the questioner was disingenuous or not. To assert (Expositor's) that the question was asked by "a true man," "a genuine inquirer," is an assumption, and, at any rate, aside from the real point at issue. What the Pharisees wanted was to elicit from Jesus a sentiment; if possible, a cate-

gorical statement which could be used against Him in the trial for heresy impending.

The question itself illustrates the character of religion then current. It was technicality gone to seed. Literalism had killed spirituality. There was such a batch of commandments that classification seemed imperative; so there were the little and great, light and weighty. And the question which was the chief of all was naturally much mooted. A spiritual virtue was not thought of. It was for some, washing hands; others, how to build a booth for the Feast of Tabernacles, or, at best, circumcision and keeping Sabbath.

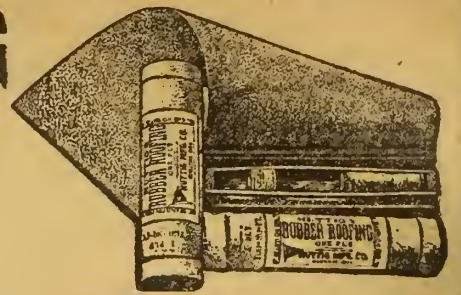

The answer of Jesus has been called a miracle of genius, a flash of inspiration. He escaped the snare of the fowler. He allied Himself with no bickering faction. He carried the question over into an entirely new realm, where there are no disjointed commands and sacramental offices, but where there is a Life which gives continuity, vigor and progress to the whole. With one splendid flash, as of a heavenly searchlight, Jesus discloses the permanent and fundamental element in religion—for all time and all people. Absent, it makes the Christian a heathen; present, it makes the heathen a Christian, though he may have never so much as heard of Christ. The disputatious coterie fades away. Jesus is speaking to the universal human heart. The man of today, technically rated an unbeliever, must recognize the Divineness of this message, and receiving it into an honest heart, must begin the life of love toward God and his fellows. And that is religion.

Too great technicality must be avoided in defining the manner of our loving God—viz., heart, soul and mind. It means, as Meyer aptly says, "the complete, harmonious, self-dedication of the entire inner man to God." It seems worth while, however, to emphasize the fact that we can love God with the mind. It is to be feared that, as Phillips Brooks says, "there are ignorant saints who come very near to God and live in the rich sunlight of His love; but none the less would have escaped the labyrinth of Pharisaism. Alas! Give your intelligence to God! Know all you can about Him!"

These two principles—love to God and love to man—from which all religion flows, must be consistent with one another, otherwise they could not both be principles of the same religion. (Homiletic.) Love to God is also love to His children, our fellow-men. (Geike.) Nothing is or ought to be esteemed religion that is not reducible to one or the other of these principles. (Sherlock.)

Now the questioned turned questioner. It was no Scripture conundrum, however. Jesus was really profiting them the elow of faith. If, with the spirit of teachableness, which is the pre-requisite to entering all other kingdoms, as

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

well as the kingdom of heaven, they had followed the thread, they would have escaped the labyrinth of Pharisaism. Alas! they loved the maze, and they would none of the leadership of Jesus. They would not welcome Him as Son of David and Son of God. So it ended with their finding themselves in the same plight as the Sadducees. But the mouths that were gagged might have been vocal with hosannas.

Analysis and Key.

1. Jesus' moral agony; greater than physical; cause of it. Contradiction of sinners against Himself. Effort to entangle Him in His words. Refusal to accept Him or His message. (1) Particular instance: Pharisees' covert attack. Effort to elicit a criminalizing statement. The chief commandment; mooted because of number and variety. (2) Jesus' answer; partisanship avoided. Substance of religion, a Life. Characteristic of that Life—love—toward God; toward man

The Teacher's Lantern.

The whole last week of Jesus' life He was continuously engaged in cleansing the temple. Only the whip of small cords with which He drove out the gross profaners changed to the sword of His mouth, with which He slew the refined, hypocritical perverters of the sanctuary. The sacred inclosure, called the treasury, became an arena which witnessed an unparalleled dialectical tournament.

A towering, united, invincible ecclesiasticism set itself for the overthrow of a Teacher whose spirit and doctrine it justly recognized as entirely inimical. It had to do it if it would perpetuate itself. It was the instinctive dictate of self-preservation.

Jealous fear made strange bed-fellows. Pharisee, the paragon of orthodoxy, and Sadducee, who stood for heterodoxy, like Pilate and Herod, were made friends in a day, and both consorted with the supposedly unpatriotic Herodians. This triple alliance could hardly fail to compass its end. It was only a question of means to use.

The importance of this climacteric controversy is apparent from the large space

given to the account of it. Twenty-five chapters in the four Gospels are devoted to the last week of Jesus' life.

Through the opaque surface of a hard, polished, conventional ecclesiasticism Jesus shot the Roentgen ray of His omniscience. Beneath the whitened surface the moral filth of an inveterate depravity was brought to light.

The temple witnessed the fiercest dialectical contest ever seen. It was fought to the finish. Jesus was victor. His denunciations fell like strokes of lightning. None could stand before Him. He was like refiner's fire and fuller's soap.

The principle of stewardship underlies all individual, national and ecclesiastical life. Nothing is held in fee-simple. All is in trust for the infinite Proprietor. The Lord's collectors are ever appearing to demand His portion.

The happy, prosperous, useful, individual, national and ecclesiastical life is that in which the principle of stewardship is recognized, its rightness conceded, and its requisitions met.

There is no escaping the retributions of Divine justice. How short-lived the victory of Jewish ecclesiasticism over Jesus! Into what an awful maelstrom and how soon, temple with its godly stones and gifts, city, nation—all were swept!

BEFORE YOU BUY A MANURE SPREADER

SEE that its frame and sills are made of oak; that it has a ball and socket joint on front axle to prevent racking and twisting and steel braces and steel truss rods to guard against warping and sagging. See that the apron does not run backward and forward on hilly ground but insist on a positive and continuous apron drive.

"A boy can run it"

See that it is practically automatic and so simple that any boy who can drive a team can run it as well as any man and control its every operation without leaving the seat. The

Appleton Manure Spreader

has all these improved features and many others equally important. Write to-day for free catalogue and special prices and terms.

DAY BY DAY

Agricola

The weather is most excellent for maturing the corn crop. If through September the weather should be dry the crop would be safe. We never had a better prospect for a bumper turnout.

The season in every direction has been all the farmer could wish. The fruit crop has been immense. All sorts from apples to grapes have apparently been vying with each other to excel.

The schools have all commenced this week, both college and public schools. A full attendance has been noticed the first day.

There are a great many vagaries connected with worshipping. There are what are known as Jumpers in the Christian worship. We saw in a Dunker church near Lebanon, Ohio, the members thereof dance around the room until it made our boyish head swim.

They were an agricultural community, too. They owned several thousand acres and farmed or had it farmed. They did not believe in marriage. When they took a family they separated husband and wife and kept them so.

They were wont; it was said, to go to poorhouses and take the children of the paupers. They had good schools, however. We are not aware of what they are doing now or that they yet exist.

Dancing seems to be a part of religious worship in all its guises. In Mohammedism the Howling Dervishes dance and howl.

We have seen Indians "make medicine" before going on warlike expedition. They howled and danced also.

But so far as we know such nonsense has not invaded the farm. Nature is full of intelligence. The farmer sees the "reign of law" in everything he does, or which he grows out of the soil. We have not seen, heard or read, of any vagary which had its birth on the farm.

The farm is full of wisdom. It breeds intelligent men and women. That is, in this our free land.

In such lands as Russia and through Europe generally, the farmer is called a peasant and treated by a nobility as a creature of a lower order of beings.

The fruit crop has been so great that now grapes are ripe, but few can be sold. Yet the use of grapes is said to give health. Wine is a health drink, and is drunk as a pledge of good will when friends meet.

Our mention of the sensitive plant has brought seeds of it from two readers of this paper. One says that he has read "Farm Furrows" and "Day By Day" for years and that they are the first things he looks for on receiving the paper. This should stimulate to do ever the best possible with us.

Any reader, however, knows that the short paragraph is far more welcome than long dissertations.

Long winded articles, or speeches, soon pall on the intellectual stomach.

The new spelling reform, so strongly endorsed by our president, is making friends every day. It is no new thing. It has been going on without intermission for 1,000 years.

We have three huge volumes printed in 1728. The covers are leather a quarter of an inch thick. The paper is so tough that it is not easily torn.

There are combinations of letters in words which would puzzle many teachers today.

Then we have Bede's Ecclesiastical History with the spelling and letters of English of 1,000 years ago. It is almost as strange as an entirely new language.

One thing, however, is seen, viz.: that the sowing and culture of the ground have not changed materially. The tools only have.

Eggs are fourteen cents a dozen. We remember when they were sold at two cents a dozen. We were a boy then

and there was not a foot of railroad in Iowa.

For years after our family settled in the state the eggs, butter, etc., were hauled to the river towns in wagons. No wonder that at home such things were cheap.

We have, when a lad, assisted in driving hogs to Keokuk on foot. It was slow business. A wagon was taken along to haul any which should give out.

They did not make them so fat as we do at the present day. There were no Poland China, or any of our fine breeds.

Indeed we know of hogs which were sold right off the "mast," as acorns and nuts were called.

Of course these were from towns that lay along the forest border. Railroads and wire fences changed all this.

Several months ago 20,000 acres in oil and gas leases were taken by syndicates in the neighborhood of Lawton, Oklahoma. The Signal Star says: "Months have passed and no preparations for developing the fields have been made by this company and all others are kept out of the field because owners of the lands foolishly tied them up. It is claimed now that the company securing the leases has sold them to another company. If this is true, it is dollars against doughnuts that the Standard was all the time behind the lease securers, and the field will not be respected even as long as they can prevent it through their lease holdings."

The O'Neill Short-horn Sale.

The combination sale held at O'Neill, Neb., on September 7th, brought out a good crowd, but the race attraction at the fair mitigated against the success of the sale. The cattle were mostly young heifers and bulls except a few. The highest priced animal in the sale was the three-year-old cow, Sly Puss, a daughter of Sharon Victor, with heifer calf at foot, and she was purchased by Mr. W. G. Bell, of O'Neill, Neb., at \$100. Quite a number were on hand to buy bulls and the crowd picked up the heifers at fair prices.

Cancer Cured by Anointing with Oil.

A combination of soothing and balmy oils has been discovered which readily cures all forms of cancer and tumor. It is safe and sure and may be used at home without pain or disfigurement. Readers should write for free book to the originator, whose home office address is Dr. L. T. Leach, Drawer 365—, Indianapolis, Ind.

CHICAGO MARKET LETTER.

From Clay, Robinson & Co., Sept. 7th: The native cattle market has ruled weak and lower this week on practically all grades. The recent supplies of western range cattle cut into the demand for medium natives as the buyers prefer the westerns the latter dressing out more economically as they have traveled a long distance and are well shrunk out. We do not look for any improvement in the market for common to medium native cattle for the next few weeks as westerns will hold the boards during that time. However, there is a steady demand for prime

LANDS AND HOMES FOR SALE

A BEAUTIFUL
OKLAHOMA HOME.

320 ACRES of good land lying 3½ miles from Kingfisher, county of Kingfisher, the town of about 6,000 inhabitants, and is the county seat, besides being the largest grain market in Oklahoma. Farm lies well, and every foot of the land can be plowed; there is now 260 acres in cultivation, balance in pasture. Good new five-room house, large barn, size 30x40, with hay loft, granary room for 3,000 to 4,000 bushels of grain; plenty of good water and windmill; water is piped into tank at the barn; good orchard farm, all fenced and crossfenced; soil is of rich sandy loam and very productive, being well adapted to raising corn, wheat and cotton. Dwelling is one-half mile to school house, besides being three miles from Kingfisher college, the greatest, largest and most thorough college in Oklahoma, having recently received an endowment of \$18,000. This is one of the choice farms in Kingfisher county, the banner crop county of the territory and in a very desirable investment for a home. Any one wanting a first-class home, good soil and good improvements, good neighborhood, etc., will certainly be contented here. The farm must be seen to be appreciated. Price, \$12,800, with incumbrance of \$4,000 at 6 per cent. interest. This beautiful home will not be on the market long at this price, so you better act quick.

THE HOME LAND CO.

Main Office in Newton Hotel. NEWTON, KANSAS.

YOU HAVE NEVER
SEEN IT

BUT you should, this 631 acre farm, all fenced and cross fenced, never failing water, 200 acres under cultivation, some alfalfa and other tame grasses, good orchard bearing, balance pasture and mow land. House of 7 rooms, barn, cribs, feed yards, etc. Only 2½ miles from good shipping and trading point; 20 miles from Emporia. Price only \$45 per acre. Good terms can be given. Write for booklet on Lyon Co., Kan. I. N. WELLS & SON, EMPORIA, KAN.

SUNNY
COLORADO FREE

BOOKLET about Colorado and other WESTERN STATES, has just been issued, setting forth the advantages and profits of investing in irrigated and non-irrigated lands. Beginning with the question, "Do you want a change?" it leads the reader on through a description of the climate, the farming system, fruit and vegetable crops. If interested, write for free booklet. The W. E. Moses Co., 718 17th Street, Denver, Colorado.

ARE COMING WESTWARD?

BUY a home in central and northern Kansas, in the corn, wheat, alfalfa and hog belt. We have the best of soil and an ideal climate. For full description and particulars, address Griffin's Real Estate Agency, Smith Center, Kan.

HORSE RANCH, with meadow and range for 500 head, will be exchanged for half interest in live stock company that will stock the ranch with 100 good mares. No expense for feed or management for two years. Lemhi Land Co., Salmon, Idaho.

BOTTOM farm, Republican Valley, 1½ miles from town. Raise corn, alfalfa, sugar beets, grain, hogs and cattle. 800 acres at \$25 per acre.

D. C. BENEDICT. CULBERTSON, NEB.

HOMESSEKERS' EXCURSION

TO Jasper county, southwest Missouri, every two weeks. Write for free list of lands for sale. M. F. Davison Realty Co., Carthage, Mo.

1 SEC. river bottom land, Cheyenne Co., Kan. Good soil. 100 A. under irri., part seeded to alfalfa. Price \$25 per A. R. D. Voorhees, 1957 Wash. St., Lincoln, Neb.

well fattened native bevers and these will continue to sell well right along. At the present time choice to extra prime corn-fed steers are quotable at \$6.25 to \$6.80, good to choice steers at \$5.60 to \$6.25, medium to good \$4.90 to \$5.60, common to fair at \$4.15 to \$4.90. We have had very liberal receipts of butcher stuff this week and while best grades are about steady, others have declined 10c and 20c. The supply of western cows have been heavy and the quality good which has affected the sale of native butcher stuff. The tendency of the stocker and feeder market has been slow and draggy on certain grades. Best heavy fleshy feeders continue in good demand and there is also a specially strong inquiry for prime yearlings and spring calves, as well as for feeding heifers. The hog market under decreased receipts has gained 5c @ 10c from a week ago. Today the bulk of the good hogs sold at \$5.50 @ 5.60, with extreme top at \$6.2½. The week is closing with the sheep and lamb market in excellent condition; in fact, good western lambs are selling at the highest point in years. Some prime Idahos reached \$8.00 today. We are not getting many choice native lambs but anything strictly prime would sell up to the same figure. As a matter of fact, however, there are not many lambs coming good enough to sell above \$7.50. There is a very strong demand for feeding lambs at prices ranging around \$6.90 to \$7.00 for best, with fair to good grades at \$6.60 to \$6.75.

PIKE'S PEAK CELEBRATION.

For the above occasion the Chicago Great Western Railway will sell round trip tickets from Des Moines to Denver, Colorado Springs and Pueblo at rate of \$19.25. Want To Sell FINDING BUYERS is our business. Free booklet explains our successful plan. Don't wait. Send Your Farm? for it. REALTY PUBLICATION CO., Scam. Am. Bank, ST. PAUL, MINN.

When writing please mention this paper.

MINNESOTA ACRE BONDS

The Opportunities Offered by Cass County (Minnesota) Farm Lands Are Drawing Thousands of Families to That Section. The Lands Are Being Rapidly Taken Up And It Will Be the Same Here As It Was In Iowa, Nebraska, Kansas And Other States. Values Are Going UP. UP. UP. Lands Can Be Bought Today by the ACRE BOND PLAN for \$10 Per Acre, But They Will Not Remain Long at that Price.

THE ACRE BOND PLAN

is beyond any doubt the Easiest, Safest, Most Desirable, Most Honest and Straightforward ever invented. It enables you to buy a farm just as you can afford to buy. You can pay for your land one acre at a time if you wish. And you are not obliged to pay at any set times or in any set amounts. No forfeits. No chance under any circumstances to lose even one single payment.

How This Plan Differs From Buying Land On Instalment Payment Plans—and Why It Is Better.

Suppose you want to buy a farm of forty acres, and you want to pay for it at the rate of \$10 per month. Under the old instalment plan you would enter into a contract to buy the forty acres. You would begin making payments—but you would **NOT OWN ANY LAND** until you had paid for the entire 40 acres. If, for any reason you could not keep up your payments you would lose whatever you had paid in.

Now, under our plan—the **ACRE BOND PLAN**—you would **not** enter into a contract. You would begin paying \$10 monthly or any other way. And every time you paid \$10 you would receive a **BOND ON ONE ACRE OF LAND**—and that bond would at once begin earning you 5 per cent interest. When you had made 10 payments you could (if you wish) exchange them for a **WARRANTY DEED** to 10 acres of land. That land would **BELONG TO YOU**. Then you would accumulate 10 acres more in the same way—and so on until you had your 40. While you are buying it you are running no risk of losing a dollar. You can stop payments any minute. You still have your bonds or your land. There are no forfeits of payments already made. In other words you **GET YOUR MONEY'S WORTH FOR EVERY PAYMENT**.

On the Acre Bond Plan YOU CANNOT LOSE.

On the Instalment Payment Plan You Lose All You Pay In Unless You Are Able to Continue Paying to the End.

Growing Corn in Cass County.

The Reason Why This Land Can Be Bought So Low.

Do you know that lands in southern Minnesota and Iowa now worth \$75 and \$100 per acre sold for \$4 and \$5 per acre not more than twenty years ago? The same is true of the timber lands of southern Wisconsin. These Cass county, Minn., lands were until very recent years covered with forests. The lumber companies in some instances owned the land. It was only a short time ago that these lands were available for farming purposes. Now they are known as "cut over" lands, meaning the land from which the timber has been cut.

A large part of this country needs to be cleared of the stumps left from the cutting of the timber. Energy is needed, nothing else, to make a farm

here worth just as much as a farm in any of the older settled parts of the country. The soil is very rich. It is sandy loam with a clay subsoil. There is plenty of water, the rainfall being about forty inches. It makes the best dairy land in America. No one will question this statement who is at all familiar with this section. Clover and the tame grasses thrive as you never see them grow in Iowa or farther south. Vegetables of all kinds grow so large that the counties of central Minnesota always take the prizes at the state fair.

Anyone at all acquainted with soils will realize how rich this land must be when he considers the fact that it was formerly covered with maple, elm,

poplar, pine, and basswood timber. The forest fires have done much toward making the land easy to clear. There is just enough wood left for fencing and local uses.

There is never a crop failure in the timber country.

The lands lie in the famous Park region which has been talked of for several years as the location for a national park. There are no swamps or marshy lands. The drainage is excellent.

Facilities for marketing vegetables, produce and crops are exceptionally good. Railroads run all about and through this land, and there are numerous settlements. Land values are advancing rapidly. Our advice to you

would be to get started to buying your farm just as soon as you can.

We prefer for you to come and look the lands over. But as there are many who cannot come at once we have arrangements to describe and picture to you just what we have. If you have friends in Minneapolis ask them to pick out your land for you, or ask them what kind of land we have. If you wish, we will pick out your land and hold it for you subject to exchange if not your preference. Our booklets which we send you free will tell you all about the farms, what is raised, how much and what kind of grain is grown on our lands and give you lots of other valuable information.

Don't Overlook the Splendid Investment Features of Acre Bonds. Your Money Secured by Real Estate and Drawing 5 per cent Interest. Even Though You May Not Want to Buy a Farm, You May Never have Another Such Opportunity for a Safe Investment.

We have valuable and instructive booklets, maps, photographs, etc., which we will be glad to send you. Write today, right now, while you are thinking about it. Better still, send a first payment of \$10 and begin buying a farm now. We will send you a Bond on an acre of land for your \$10 payment. There will never be a better time for you to begin on this plan to accumulate.

 FIELD NOTES.
 Mr. B. F. Clark, of Albia, Iowa, is offering Lincoln rams for sale in his advertisement on page 13 of this issue.
 Remember the White-Metzger Poland China sale at Council Bluffs, Iowa, on September 15th. Nearly all their prize winners are included.
 A three days' sale of Hereford cattle is announced by Mr. Frank Rockefeller, the sale to be held in the fine stock pavilion at Kansas City, Mo., October 17th, 18th and 19th.
 Mr. Thomas Gorman, of Avery, Iowa, has fifty smooth, rangy, heavy-boned O. I. C. spring pigs which he is offering for sale in his advertisement on page 36 of this issue.
 Mr. J. C. Jay, of Mt. Pleasant, Iowa, is offering Duroc Jersey pigs for sale on approval, in his advertisement on page 30. He can furnish them in pairs not akin and eligible to record.
 Mr. J. D. Golder, of Scribner, Neb., is offering thirty-five head of spring boars sired by his \$300 boar, Glendale Jim 33291, second-prize boar at Des Moines in 1905. He is very reasonable in his prices.
 Mr. B. C. Benedict, of Culbertson, Neb., is offering an 800-acre farm for sale, located in the Republican Valley bottom. For the price read the advertisement on page 21 and write Mr. Benedict for further particulars.
 How about attending the A. W. H. Orr Duroc sale on Thursday, September 20th? Fancy-bred individuals included in the offering. Some are going to make herd headers. Write for catalog. See sale card on page 38.
 Mr. A. Latimer Wilson, of Creston, Iowa, is offering Cotswold rams for sale on page 13 of this issue of The Homestead. He also announces that he is selling imported Percheron, English Shire and Belgian stallions at \$1,000 each.
 Get prices on Mr. R. J. Peckham's growthy Polands. The great boar, Major Blain, has passed away and his get are left to make his past reputation stand. Mr. Peckham breeds hogs with quality, bone and finish. His sows farrow large litters and raise them.
 Messrs. Manlove Bros., breeders of Duroc Jersey hogs, of Bowen, Ill., have canceled their date claim of October 26th and wish to announce that they will sell their pigs at half price for the next thirty days. They are good and very large for their age. The herd is headed by Big I Am 2885, the first prize winner at the Illinois State Fair in 1904, and they have the produce of prize-winning strains on hand.
 Mr. H. S. Chapman, of Pawnee City, Neb., is advertising some choice pigs in our columns. His type of Polands are the kind that sell readily. Look up his advertisement on page 37 and write him for prices. You cannot go wrong in making a purchase here.
 One hundred choice Iowa farms are offered for sale by the Allen Land and Loan Company, of Laurens, Iowa, on page 21 of this issue. They also have five or six large farms which they wish to rent. Write them for catalog and map of Iowa, which is sent free.
 The advertisement of Griffin's Real Estate Agency, of Smith Center, Kan., appears on page 21 of this issue of The Homestead. They have land for sale on central and northern Kansas in the corn, wheat, alfalfa and hog belt. For full description and particulars write the agency.
 Long Mac's Model 41627, a boar used in the A. W. H. Orr herd at Lorimer, Iowa, was one in the litter under six months old that won first at the Creston district fair last fall. Some of his sons are included in Mr. Orr's sale on Thursday, September 20th. Better write for a catalog.
 Messrs. McNutt & Meese, of Ord, Neb., and Comstock, Neb., will hold their Poland China sale at Grand Island, Neb., on October 27th. Watch The Homestead for the sale advertisement. These gentlemen have been winning their share of ribbons at the Nebraska State Fair and some of the winners will be included in the sale.
 Mr. Robert Pritchard, of Carroll, Neb., purchased of Mr. Charlie Pratt, of Frankfort, Kan., the first-prize under six months pig at the Nebraska State Fair last week and he will be put at the head of his herd. He will be mated with his gilts sired by Combination, the boar he paid \$275 for at the Kirkpatrick sale last fall.
 Mr. James Sheeran, of Solomon, Kan., has eastern central Kansas farms for sale in a German settlement; also farms for sale in a Catholic settlement. The land is in Dickinson county, where large yields of wheat, corn, alfalfa, apples, peaches and fruit of all kinds are produced. Write him for list of farms and price you want.
 A 631-acre farm, all fenced and cross fenced, with never-failing water, 200 acres under cultivation, house of seven rooms, barn, cribs, feed yards, etc., is offered for sale at a very low price per acre by Messrs. I. N. Wells & Son, of Emporia, Kan. The advertisement from which further information can be learned appears on page 21 of this issue.
 Mr. F. Alldritt, of Friend, Neb., is offering some choice pigs of spring farrow. His spring crop will number around 200 head. These represent the blood of Crimson Wonder, Improver 2d, Red Knight, Cole's Duroc, Higgins' Model and Red Chief I Am. He has any number of pigs that should be looked after. His fall sale will be announced later.
 Messrs. Stewart & McCann, of Kennard, Neb., showed Durocs at the Nebraska State Fair last week and succeeded in landing first prize on senior yearling sow, sixth on junior yearling, fourth on aged herd and fourth on boar under twelve months. They have a nice line of boars for sale, bred along the same lines, and they will price them right if taken soon.
 The Hartford Land Company, of Hartford, Kan., deal in farms, stock ranches and city property, buying, selling and exchanging. They have a large list of the best farm lands in eastern Kansas for sale and solicit visits or correspondence of prospective purchasers. Their advertisement appears on page 21 of this issue and they give as reference the Hartford National Bank.
 A horse ranch with meadow and range sufficient for keeping thereon 500 head is offered in exchange for a half interest in a live stock company that will stock the ranch with 100 good mares in the advertisement of the Lemhi Land Company, of Salmon, Idaho, which appears on page 21 of this issue of The Homestead.
 A booklet entitled "Sunny Colorado," giving valuable information about Colorado and other western states, has just been issued by the W. E. Moses Company, of Denver, Colo. This booklet, which sets forth the advantages and profits of investing in irrigated and non-irrigated lands, will be sent free by application to the above company, at 718 Seventeenth St., Denver, Colo.
 Mr. W. F. Hemmerling, breeder of Chester White swine, of Dike, Iowa, is advertising for sale thirty choice spring pigs. They are sired chiefly by W. F.'s Model 12101, the boar that took second place in his class a few days ago at the Iowa State Fair. W. F.'s Model is a boar of great promise. He has proven himself a breeder of size and finish. See advertisement on page 36.
 Messrs. W. H. Seaman, route 5; Carl H. Van Evera, route 1, and Gus. E. Seaman, route 5, all of Davenport, Iowa, have 100 head of thoroughbred Red Polled cattle which they are offering for sale on page 34 of this issue of The Homestead. The offering includes twenty-five bulls ranging from eighteen months old down, also some choice beefers. They will be quoted at reasonable prices.
 We would like to call the attention of our readers to the advertisement of Mr. J. P. Eveland, of Jamaica, Iowa, which appears on page 36 of this issue. Mr. Eveland is offering four Duroc Jersey fall boars and a few spring boars for sale, sired by Modeler's Boy 46359 by Top Notcher, and out of Belle by Gold Dust Jim. Modeler's Boy has an exceedingly heavy bone and is very lengthy, which is a notable characteristic of his get. Some of the above boars are sired by King David II. 34759.
 On account of wishing to quit farming and engage in other business Mr. W. H. Grassmeyer, of Riverdale, Neb., is offering his 790-acre farm (located near that city) for sale. His advertisement on page 21 of this issue gives some information in regard to the improvements on this farm. The land is mostly all fenced and cross-fenced, including two fine pastures fenced off for hogs. Five hundred acres are under cultivation, eighty acres in alfalfa, 125 acres fenced in pasture, and the balance in wild

hay meadow. See his advertisement on page 21.

Messrs. A. M. Avery & Sons, of Masou City, Iowa, are breeders of Short-horn cattle, Shropshire sheep, and Duroc Jersey hogs. They are offering bulls, boars and bucks for sale in their advertisement which appears on page 30 of this issue. They state that they are good ones and that they will be priced right.

The new advertisement of Mr. S. D. Miller, of Wellmau, Iowa, offering Galloway cattle for sale appears on page 30 of this issue of The Homestead. Mr. Miller has eight bulls, six cows, and three heifers which he will quote at prices sufficiently attractive to move them at once.

Mr. E. A. Fricke, manager of the Short-horn sale of the State Center Short-horn Breeders' Association, writing to The Homestead, says: "You can tell your readers that the cattle which Mr. C. P. Klump, of Nevada, Iowa, is consigning to our sale on September 27th, are a good, well-bred lot. One of the bulls was a winner in the calf class at the Story County Fair last year."

The Be Saw Chemical Company, of 835 Schofield Building, Cleveland, Ohio, have an advertisement on page 16 of this issue of The Homestead that will interest any of our readers who use stock foods of any kind. This company are placing on the market the Arabian Stock Food Tablets which are to be used in preparing your own stock food. Send to them for their printed matter after reading the advertisement referred to.

Mr. James Spear, breeder of Aberdeen Angus cattle, of Stanwood, Iowa, writes: "The cows and heifers we are offering for sale are a choice lot and are bred to Rose Gay Lad 70259, who won second as a calf at all the shows, including the American Royal and the International and the same rating as a yearling. I also have six choice yearling bulls—good, large-boned, low-down, blocky fellows." See advertisement on page 35.

Mr. E. J. Brown, of Osceola, Neb., is the owner of one of the best pigs shown on the Nebraska State Fair Grounds this year. Mr. Brown knows a good pig on sight and never lets a chance go. He purchased this one to use on his Red Knight sows and Belle's Echo stuff, as well as getting line breeding for his Crimson Wonder sows. The pig represents the blood of Crimson Wonder. You will hear more of him.

Messrs. J. M. Morrison & Son, of College View, Neb., are offering some very choice pigs sired by Ohio Chief and Morrison's Bell Top. This herd has as strong a lot of sows as you will find in any herd in the United States. They made the world's record on high average of this breed last spring. The great show boar, Kan't Be Beat, is now in the herd. Buy a sow bred to him. Look up the advertisement on page 39.

A 240-acre Iowa farm is offered for sale on page 22 of this issue by Messrs. Bosserman Bros., of Murray, Iowa. The land lies well, part of it, however, being rolling. There is an abundance of water, piped from a spring; and in fruits there are apple, peach, and cherry trees and also small fruit. This farm will be sold on easy terms and at a price that may be considered a snap. Write the advertisers as above or go and see the farm.

Mr. T. A. McMahon, of Craig, Neb., offers a good bunch of Duroc Jersey boars for sale sired by Agitator, one of the best breeding sons of Proud Advance. He also has a choice litter by Trone's Oom Paul and a very choice litter by Duroc Standard, a grandson of the sweepstakes boar, King Perfection. His Oom Paul litter is not awfully long of body, but they are full of quality and are very showy. Write him for prices, as he can suit you if you are looking for something real choice.

The firm of Messrs. Burress, Billiter & Burress, of Carroll, Neb., showed Percherons and Belgians at the Nebraska State Fair last week and got fifth prize on Belgian and sixth prize on Percheron stallion. Their Belgian show horse is Marquis De Derumon, and he was one of the best movers in the show. He lacked somewhat in flesh to show to best advantage, but was one of the most popular horses with the audience who watched the judging. This firm have an excellent lot of horses for sale and they are pricing these at a figure that anyone can buy.

Mr. Joe Young, of the firm of Messrs. Young & Duncan, of Madison, Neb., purchased Mo. King 39964, the third-prize boar at the Iowa State Fair this year. His sire is Wandering Boy 35380 by Chief Tecumseh 3d and his dam is Little Gem by Gully Perfection by Chief Perfection 2d. Mr. Young won second on his yearling sow, Queen of Diamonds, at the Nebraska State Fair and he got seventh place on her at Des Moines. The firm of Messrs. Young & Duncan will make a public sale of twenty-five boars and twenty-five sows at Mattison, Neb., on September 29th.

Mr. Gilbert Van Patten, of Sutton, Neb., was again a winner at the Iowa State Fair. His high-class herd of Durocs always show their value in the show ring, as well as the breeders. Mr. Van Patten won second on the six months male boar sired by Beauty Wilkes. He also won second on a yearling sired by Ben Davis. The latter was purchased before the show and Mr. Van Patten will use him in his herd. He has several very strong animals in his herd and we can say that you can expect some choice stock by buying of this reliable breeder. Look up the advertisement on page 39.

The Royal Ruby Duroc Jersey herd, owned by Mr. Gus A. Pederson, of Ocheyedan, Iowa, advertises boar pigs on page 30 of this week's issue. He writes us as follows: "I have never had better success with my pigs than I have this year. I have 105 living pigs from fifteen sows and eight of them were gilts. They are all doing splendidly and I have never had a better lot of boars. They are sired by Osceola Chief, a very large, heavy-boned hog, also by Proud Perfection, one of the best sons of the Iowa State Fair first-prize winner in 1905; Perfection Chief. I have closely culled my pigs and I am prepared to ship only the best." Mr. Pederson furnishes free livery to intending purchasers and will be glad to

have the boys call and see him. He will treat you fair if you send him an order for a boar pig.

Messrs. Rhea Bros., of Arlington, Neb., the bustling Percheron stallion firm, are gradually hitting the high places, and last week at the Nebraska State Fair they succeeded in landing the following premiums: Second and fourth on four-year-old stallion; first on three-year-old stallion; second, third and fourth on two-year-old stallion; first, second and third on yearling stallion; third and fifth on aged mares, and second and third on maro colt. The boys have a lot of good stallions in their barns, besides these winners, and will be glad to show their horses at any time to intending buyers.

Mr. Jno. Cramer, of Beatrice, Neb., is offering some real choice Chester White pigs. This herd is not only well represented in blood of noted families, but is as well marked on individual merit as you will find any place. Mr. Cramer has used good boars at the head of his herd and has gained a wide reputation for being able to supply the demand of the hogmen of his breed. He was a good buyer at the Kerr sale last year and has some of that gentleman's show stock in his herd today. We believe this herd to be one of the good ones and would willingly recommend it to you as one of merit and honest dealings. Look up his advertisement on page 36.

The Interstate School of Correspondence, affiliated with the Northwestern University of Chicago, Ill., is making an announcement on page 2 of this issue of The Homestead that will be of particular interest to those of its readers who contemplate taking up home study. This school gives instruction in forty courses of study in normal, academic, commercial and pharmacy departments. Those taking the courses will receive university entrance credits and annual scholarships in the university for the best work in the correspondence courses. The instructors are college graduates who give their entire time to this work.

Mr. Frank Iams, of St. Paul, Neb., the well-known Percheron, Belgian and French Coach importer and breeder, showed horses at the Nebraska State Fair last week and succeeded in winning the following premiums: On Percherons he won first on stallion four years old or over; third, fourth and fifth on stallion three years old, and sweepstakes stallion. On Belgians he won first on stallion four years old or over; first, second and third on stallion three years old; champion stallion, and first on stallion two years old. On coaches he won second and fourth on stallion four years old; fifth on stallion three years old.

Mr. W. S. Penn, proprietor of the East Linn Breeding Farm of Duroc Jersey swine, of Springfield, Iowa, in furnishing copy for his new advertisement which appears on page 38 of this issue, writes: "My crop of spring pigs are now for sale. They are coming along nicely, not fat, but growing and making frame for future use. September 1st they weighed around 150 pounds, and some of them considerably more. I am pricing them reasonable and will give my customers a square deal all around. My pigs are mostly by Iowa Chief 37453, but I also have pigs by Rosewood 31345, Cracker Jack 33885, King Perfection 16235, and Roy Advance 42724."

If you are a real estate owner in all probability you would like to sell your holdings if you could realize a reasonable price for them. Perhaps you do not wish to list your property with a local agent for some reason, or perhaps you would rather have the advantage in listing it of the facilities of an agency doing a national business and covering the entire country. If you are looking for such an agency which can sell your property without delay it would be well to correspond with Mr. A. Edgar Davis, of Room 412, Brace Block, Lincoln, Neb., who sells real estate located in any part of the country and who is in close touch with over fifteen hundred agents located everywhere. Write him.

Messrs. Jos. Skinner & Son, of Bedford, Iowa, write: "Our March and April Duroc Jersey boars are the special attraction with us now. We have not raised quite as many as usual, but those that we have are unusually good, so that buyers at this place will have a good lot to select from. We like for buyers to inspect our herd, but will be glad to quote prices by mail to all those desiring, and will do our best to fill all mail orders in the most satisfactory way possible. The boars are sired by Billy Golden 37037, Addy's Chief 42615, Mogul's Best 27643 and Expansion 43949, some of the most noted hogs of the breed. Anybody desiring a good pig will not go wrong in placing their order with us." See advertisement on page 30.

The M. F. Davison Realty Company of Carthage, Mo., are offering for sale some fine farms in Jasper county, which is a great corn, wheat, fruit and stock country. Jasper county claims to raise and grind more wheat than any other county in the United States. In purchasing a farm there, you may not only buy rich land, but beneath the soil may be treasures of a thousand times more value, as it is one of the greatest zinc and mining districts in the world. Carthage is the county seat of Jasper county and is a beautiful and prosperous city of 14,000 people. It has good schools, fine churches and homes. If you are contemplating a change in location it would be well for you to write the M. F. Davison Realty Company. See their advertisement on page 21.

Mr. B. M. Boyer, of Farmington, Iowa, is offering Improved Chester White pigs for sale in his advertisement on page 30. Writing in regard to his herd he says: "My pigs are all of March farrow, mostly early, and they have made exceptionally good growth and are the nicest bunch of pigs I ever raised. As a general rule they have nice neat heads, small, drooping ears, are lengthy, with good, strong backs; are well quartered, have deep sides, good heart and flank girth, large, strong, smooth bone, straight legs, and every one stands right up on its toes. Have the range of an eighty-acre farm and run on blue grass, clover and rape pasture. They are fed a feed composed of equal parts of oats and rye ground together, with 100 pounds of tankage added to every 700 pounds of oats and rye. This is mixed into a thick slop and fed twice daily, morning and evening, with but

little ear corn of an evening, so you can see I have been feeding for bone and muscle, and I certainly have it. My pigs are all out of matured sires and dams, their sires weighing from 550 to 850 pounds in breeding condition, dams weighing from 400 to 700 pounds if fat. I am getting out an illustrated catalog which I furnish free, giving full particulars in regard to my herd."

Mr. W. A. Kirkpatrick, of Lincoln, Neb., was out this season with his show herd, and among the lot were some very strong yearling boars by the great Crimson Wonder. A few fall sows sired by this same hog were taken on the trip and they were all noticed when any breeder passed the pen. Mr. Kirkpatrick was very unfortunate in losing his herd boar, Fancy Crimson, sired by Crimson Wonder. This hog had developed into a large animal and his get are very strong. Mr. Kirkpatrick has some choice spring boars sired by Fancy Crimson and these will be offered at prices that will sell. The Crimson Wonder blood has become very scarce and if you are looking for it you should get in early. Look up his advertisement on page 39.

Mr. Chas. C. Norton, breeder of Short-horn cattle, of Corning, Iowa, writes: "I have received word from Mr. H. P. Eakle, Jr., of Woodland, Cal., to the effect that he has made a showing of some of his Short-horns at the recent California State Fair at Sacramento, Cal. He won first on two-year-old bull and first on junior yearling bull. Both of these bulls had for dam the young cow, Bampton Spray, bred by me, and sired by my Imp. Bampton Admiral, and one of the bulls was sired by my Banker's Victor. The Howard Cattle Company won first at the same show on a junior yearling heifer that was sired by the bull, Saturn, that was bred by me, Saturn's sire being my Imp. Bampton Admiral. Saturn is a full brother to the young bull, Sultan, which I am now offering for sale." See advertisement on page 37.

Messrs. W. J. East & Son, of Clay Center, Neb., are forging forward every day and today they hold a place among the Duroc breeders that many have struggled for years to get. The senior member of the firm has been a good buyer and has used his good judgment in selecting the sows that he thought best adapted for his different crosses. Messrs. East recently purchased the highest-priced Duroc sows ever sold in Kansas and is now raising a very choice litter of pigs by Improver 2d. This herd is headed by Bezdek, Frank's Choice and a son of Billi K. Messrs. East have a herd of sows that are choice in all respects. These gentlemen are offering some of these spring pigs at prices that should move them at once. Look up their advertisement on page 39 and write them for prices. They were at the Nebraska State Fair.

Are you looking for a Poland China herd boar? On page 30 Mr. A. M. Stine, of Adel, Iowa, is offering them. The herd boar in use by this breeder is known as Major Westbrook 37023 by Logan Chief 60085 by Chief Tecumseh 3d 38233. In ordinary flesh he weighs 760 pounds. Mr. Stine now offers three fall yearling boars and about a dozen of March and April farrow, sired by the above boar. The dams of these boars are of well-known strains and are well bred. While Mr. Stine has never placed his name before the public before, he has been in the pedigree hog business for some years and has sold to numerous breeders, every one being pleased. The three fall yearlings are extra good, coming out of a very fine sow, Miss Mollie 2134 by Wide Back 72047, a Happy Medium strain. Better write for prices on these boars. Mention The Homestead when writing.

Mr. F. A. Murray, breeder of Polled Durham cattle, of Mazon, Ill., writes as follows regarding his stock: "We have had much needed rains the past month which has livened up the pasture and brought the corn on for a bumper crop. The Polled Durhams are enjoying themselves on plenty of blue grass and clover. Orange Knight 4398 (242700), a dark red two-year-old, heads the herd. He is a grandson on dam's side to Mr. Barber's Marshall Abbottsbum 2d, to Imp. Orange Blossom 19th by Royal Duke of Gloster and his sire, Brookshire Knight, and grandsire, Idle Knight, were good enough to bring me \$1,500 at private sale. Orange Knight is a low-down, mellow chap, weighing 1,500 pounds at twenty-six months. During August, a dull month, we sold two bulls and four cows and heifers to the following parties: Mr. Nourse, Seytonville, Wis.; D. Worthington, Rochelle, Ill.; B. Barrett, Gardner, Ill., and R. D. Menaugh, Mazon, Ill. I have some young bulls and bred females for sale and would be pleased to quote prices." See Mr. Murray's advertisement on page 35.

Mr. Fred Ebendorf, of Strawberry Point, Iowa, starts his advertisement offering Poland China hogs for sale on page 30 of this issue. Writing in regard to his offer he says: "My offering now is choice fall yearlings weighing 300 to 400 pounds. They are long, deep, heavy boned and are of Perfection and Tecumseh breeding. They are very black, with the best of coats. I price them at \$25 to \$40. I also have for sale a yearling boar, Correct I Know Jr. 111629. He is by Correct I Know by Corrector, dam by Keep On, and is long and deep with fancy head and ear, well-sprung rib, with the best of color and coat. He is a great breeder of large, fancy pigs and weighs, in breeding form, 450 pounds. He will be sold at a bargain for anyone in need of such a hog. I also have choice spring pigs by Hustle On 105337 by the great On and On, and his get are showing up extra, having size, quality and bone that all are looking for. Then I have a choice litter by C. I Know Jr. and others by L's Tecumseh 70627 that are extra in range and are fancy, as well. There are some also by Justice that are of good breeding, and some of Corrector. All the above breeds are hard to fault. They have all been handled to do the buyers good. In Short-horns I have some good bulls just ready for hard service and also heifers for sale. They are Scotch and Scotch-topped. In poultry we have the best we have had for years. Last spring we had Rose Comb Brown Leghorns and have a fine lot of cockerels for sale to make room. They will be sold low, as we wish to move them at once. We also have some Silver Laced Wyandotte cockerels that are extra well marked. They are large, heavy-boned birds and will go at bargain

If the dealers would only be fair to you and me, you would have less lamp troubles and I would make more chimneys.

If a MACBETH lamp-chimney was sold every time one is asked for, I would make all the lamp-chimneys instead of half of them.

The Index explains how to get a MACBETH chimney to fit every lamp, and how to care for lamps. Sent free to everyone asking for it.

Address, MACBETH, Pittsburgh.

When writing to advertisers please mention this paper.

prices. I will meet parties at Strawberry Point or Volga if notified in time. I also have a choice pig for sale by Preceptor, he the Ohio winner under a year. This pig is remarkable for bone and is very good in all points."

On page 30 of this issue will be seen the advertisement of Mr. A. M. Stine, of Adel, Iowa. An excellent, well-bred Hereford bull, known as Royal Lad 145066, used with success the past year or two, is now offered for sale. Royal Lad is a massive, low-down, heavy-boned bull, of a deep red color and nicely marked. Mr. Stine is willing to let him go, as he can no longer use him on his herd, being related to many of the females. This bull is only four years old and an imported individual. He is a sure breeder. Two younger bulls sired by him, known as Major Jack and Nicholas L., are ready for service and are offered to those desiring new blood. The dams of both of these young bulls are bred in the blue. Major Jack's dam is Cort 6th 83517, taken from the W. W. Wheeler herd, at Harlan, Iowa, while the dam of Nicholas L. is Persis 85740 by Manager 69252, a Lord Wilton strain. The young bulls are strong in Anxiety blood and ought to head some good herds. See the advertisement and mention The Homestead when writing.

Mr. Geo. C. Mosher, owner of the Hillcrest Farm herd of Holstein-Friesian cattle, of Greenwood, Mo., whose advertisement appears on page 15 of this issue, writes: "The sales of high-class Duroc Jersey pigs at weaning, which we have made a specialty at Hillcrest farm the past season, have been advertised exclusively through this paper. The results have been customers well satisfied in every instance, and stock has been shipped from Minnesota and the Dakotas to Oklahoma. Every animal up to our standard has been sold except one yearling boar, a dandy, that our manager says is the best he has seen in a long time. He will be sold for \$30. Three boar pigs from the spring farrow remain unsold. They will make money for their purchasers. All pigs are accompanied by certificates of pedigrees ready for recording. We are now booking orders for the fall pigs, and they will be shipped in the order of the sale on our list. These pigs are descendants of Oom Paul, Crimson Wonder, and the most-noted lines of breeding. No wonder our customers write they had no idea they would get such fine specimens. We ship none but good ones. Sixteen selected sows are being used. Write today and engage a trio."

Mr. F. M. Huff, of Afton, Iowa, proprietor of the Grand View herd of Duroc Jerseys, is making prices on boars by Crimson Wonder Jr. 41103 and Chief I Am Now 43955. Mr. Huff was recently visited by a representative of The Homestead and the herd was carefully inspected. It was found to be in a healthy and growing condition. In Mr. Huff's herd of Durocs are some noted sows, such as Mona II., a granddaughter of Bruno, sweepstakes hog at the Iowa State Fair in 1897. Mr. Huff also has Burnhilda 2d 104134. She is a granddaughter of the sweepstakes sow at the interstate fair at Sioux City for three years. Burnhilda is a full cousin to Perfection Chief 28367. Mention is also made here of a sow in the herd known as Oto Belle, a granddaughter of American Royal 15453, a sire of prize winners. Mr. Huff uses the best to be had, as is seen above. He has used King Perfection in his herd, also. This hog was sired by Iowa King M. 14279, a first-prize winner at the Iowa State Fair in 1902. It can be seen from the above notes that prize-winning ancestors, both on the sire and dam's side, are the rule with the Grand View herd. At present the herd is headed by a son of Perfection Chief 28367 and he is using good individuals. Better write for this breeder's prices. They are placed at figures that will sell them. On page 38 will be seen

PILES

FISTULA--NO MONEY TILL CURED

Mr. S. J. Glen, Stockman and Ranch Owner, Wellington, Tex., writes, under date of Aug. 25, 1906: "I wish to say that after being tortured with protruding piles for 25 years and being treated by many local physicians, using all the advertised remedies without relief, but growing worse until two fistulas developed, I at last put myself under your care and was cured in five weeks."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. Address either our St. Louis office or

the advertisement. Kindly mention The Homestead when writing.

G. VAN PATTEN WINS AT NEBRASKA STATE FAIR.

Mr. G. Van Patten, of Sutton, Neb., was again in the winning at the state fair. His Durocs always carry off part of the ribbons. Look up his advertisement in this paper. Watch for his sale announcement later.

ONE MONTH FREE.

Dr. Williams is so confident that he has a positive cure for catarrh of the head, nose, throat, ears, stomach, liver and bowels that he offers a full month's treatment to the afflicted free of charge so that all may know of his wonderful treatment. It costs you nothing to consult the doctor, and he will send you his treatise on catarrh and its allied diseases and his symptom blanks free of charge to all who write him. On page 14 will be found some testimonials from his cured patients.

CURES DONE SPAVIN OF SEVEN YEARS' STANDING.

Mr. Julius Grodert, of Wilton Junction, Iowa, writing to the Dr. B. J. Kendall Company, of Enosburg Falls, Vermont, in regard to Kendall's Spavin Cure, says: "I have used your spavin cure and find it a great remedy. I have used it on a horse that had a bone spavin for seven years and after using two bottles find it as sound as a dollar—a complete cure. You can use this testimony if you so desire." See advertisement on page 17.

CEMENT POSTS.

Readers of this paper should take advantage of the liberal offer made by the Rock Cement Post Company, of North Manchester, Ind., on page 13 of this issue. They have supplied hundreds of farmers throughout the middle West with instructions how to construct cement posts that stand all weather conditions and last a life time. This post can be manufactured at two-thirds the cost of cedar posts and one-half the cost of iron posts. Look up the advertisement and write at once for further particulars, kindly mentioning this paper.

ELMENDORF'S DUROC JERSEYS.

On page 30 of this week's Homestead will be found the advertisement of Mr. M. M. Elmendorf, of Lacona, Iowa, one of Iowa's well-known Duroc Jersey breeders. He is offering thirty choice boars for sale sired by Duke of Ohio 3529, Geo. Hur 40851, Alfonso 40849, Ulster Chief 11425, and he also has pigs by a son of Crimston Wonder I Am. He is making special prices on these pigs for the next thirty days and anybody that wants a boar pig will find it to his interest financially to write the above breeder as soon as possible.

BLACK DIAMOND SAMPLE FREE.

There are many roofings on the market, but there is only one which undertakes to stand squarely on a platform of results achieved. That one is Black Diamond Ready Roofing. Although its price is low, there are many instances all over the country where roofs of this material have shown truly remarkable durability. Some roofs laid away back in the eighties are still in use and have given satisfaction all the time. The free booklet which the manufacturers give away contains many such instances. A sample will be sent free on request to the nearest office of the Barrett Manufacturing Company, Black Diamond Dept., New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans and Cincinnati.

A. F. RUSSELL'S SALE OF DUROC JERSEYS.

On next Thursday, September 20th, at his farm near Savannah, Mo., Mr. A. F. Russell will make his annual sale of Duroc Jersey hogs and sows. Thirty-one boars and forty-four sows are cataloged. These are boars and sows that Mr. Russell is glad to show, and a representative lot from which breeders and farmers can make selections that will do them good. The herd boars that are represented as sires of the offering are among the most popular now known to the breed. Mr. Russell invites his friends, his old customers and any who may be interested in the Duroc Jersey to be with him sale day. Free entertainment at Richelieu Hotel and free conveyance to and from the farm. Col. Jud McGowan will do the selling.

SOUTH OMAHA SALE OF DOUBLE STANDARD POLLED DURHAM CATTLE.

On October 5th will occur at the South Omaha Stock Yards the very important sale of the popular Polled Durham cattle. This sale is under the direct management of that master hand in the business of conducting Polled Durham sales, Mr. L. G. Shaver, of Colona, Iowa. Mr. Shaver will be remembered as being of the firm of Shaver & Buckner, of Colona and Wellman, Iowa. There is probably no breeder of Polled Durham cattle in Iowa, at least, that has made more rapid strides in the business during the past few years than has Mr. Shaver, and it is very fitting that the breeders associated in this sale have selected him to manage this offering at South Omaha. These breeders are Mr. M. Rau, of Harlan, Iowa; John Renswick, of Boyden, Iowa; D. L. Pond, of Inman, Neb.; and Shaver & Buckner, of Colona, Iowa. The offering comprises fifty head of representative animals from these respective herds. There are a splendid lot of cows and heifers as well as a goodly number of young bulls, all Double Standard Polled Durham. A number of the cattle offered have some good Scotch blood in their pedigree and are all eligible to registration in either the American Short-horn herd book or the Polled Durham herd book.

In other words, these cattle are simply Polled Short-horns.

FARM AND RANCH BARGAINS.

On page 22 you will find advertisement of Mr. W. E. Francis, of Newton, Kansas, offering the best farm and ranch bargains of the year. Mr. Francis is well acquainted with these propositions, having lived in that section for twenty-five years. He informs the writer that these are exceptionally good ones. The Southern Pacific railroad runs within one-half mile of ranch, and is only ten miles from a divisional point. Will also support 10,000 head of cattle. The farms are extra good land, close to town and are as productive as any Iowa farm for one-third the cost. Write Mr. Francis for full particulars and kindly mention this paper.

WATT & FOUST WIN AT OHIO STATE FAIR.

Messrs. Watt & Foust, the well-known breeders of Duroc Jerseys, residing at Cedarville and Xenia, Ohio, were successful at the Ohio State Fair last week, winning every first but one in the strongest Duroc show ever held at Columbus. Not only were there more herds, but more Durocs than any other breed on the ground. In our next issue we will give detailed report of the Duroc show. If in need of an extra good herd boar write Messrs. Watt & Foust at once and watch these columns for full information concerning this noted herd.

A BEAUTIFUL OKLAHOMA HOME.

The Home Land Company, of Newton, Kan., are offering in this issue on page 21 320 acres of good, productive land, every foot of which can be plowed. This farm, the Home Land Company inform us, is a very desirable investment for someone wanting a first-class home. It is the custom of Mr. Randolph Moos, manager for the Home Land Company, to personally inspect each and every proposition placed in his charge and he guarantees it to be as described. If you are an investor or homeseeker you will do well to correspond with this firm. Mr. Moos also informs us that all correspondence will receive his personal attention. Write them today, mentioning The Homestead.

AN IMPORTANT SALE.

American Short-horn sales have proven very successful for several years and have afforded stockmen an excellent opportunity to get choice cattle to improve their herds. In this respect the sale to be held October 10th will be a repetition of former sales. The offering includes fifty-five head of choice Short-horns taken from some of the best herds in the country and are the produce of excellent bulls. The cows and heifers offered in this sale will afford bidders an opportunity to make valuable additions to their herds, while among the bulls are some of great excellence in form and of faultless breeding. The sale will begin at 1 p. m., October 10, 1906. For catalog, write Mr. B. O. Cowan, assistant secretary, 17 Exchange avenue, Chicago, Ill.

VALUE OF FURS.

The furs of nearly all wild animals are more or less valuable. They are worth more when taken in mid-winter to early spring than at any other time. An interesting and suggestive illustration, the creation of Mr. W. J. Burnett, appears on page 8 of this issue of The Homestead under the title of "Fur-Bearing Animals Going to See the Northwestern Hide & Fur Co., Minneapolis, Minn." This illustration is made from a large and very fine painting. As a souvenir, a reduced copy of the big picture in colors, together with a forty-page illustrated trap book and color picture showing forty-six wild fur-bearing animals, gun and trap catalog, with price list of raw furs and hides, is given away free at the company's office, or it will be mailed to anyone interested in furs if, with their request, they enclose four cents in stamps for postage.

BARGAINS IN RANGES AND STOVES.

On page 3 of this issue will be found the advertisement of Sears, Roebuck & Co., of Chicago. At the present time this company are making specially low rates on ranges and stoves. They are offering six-hole steel ranges as low as \$12.75, while their Acme Triumph six-hole range sells at \$22.58. These prices are considerably reduced from what they formerly were, and we know that our readers will appreciate that these are real bargains. This company are selling sheet iron heating stoves as low as sixty-nine cents, while they are also putting on the market at \$1.89 a new Roccoco pattern oak heating stove for coal or wood. Sears, Roebuck & Co. have a large stove factory at Newark, Ohio, and their low prices are due to the fact that they sell directly to the user, saving the buyer the profits of two or three middlemen. The stove catalog will be sent free of charge to those who make application for same. Address Sears, Roebuck & Co., Chicago.

NO ENTRIES AFTER LAST MONDAY.

Entries in the breeding classes of the American Royal Live Stock Show, to be held at Kansas City October 6th to 13th, closed Monday, September 10th. This includes breeding cattle, horses and swine. Entries of car lots of cattle will be received up to October 5th, and it behooves those who expect to exhibit at the American Royal this year in car lots and who have not made their entries, to do so at once. The reason for closing the entries so far in advance of the opening of the show is to enable the management to get the entries in the official catalog. It is very unsatisfactory to both exhibitors and visitors to have exhibits omitted from the catalog, which is necessary when they are received only a few days preceding the show. Entries should be made with the following: Herefords, C. R. Thomas, 221 W. Twelfth St., Kansas City, Mo.; Short-horns, John W. Groves, 17 Exchange Ave., Chicago; Aber-

deen Angus, Thos. McFarlane, 17 Exchange Ave., Chicago; Galloway, Chas. Gray, 17 Exchange Ave., Chicago; horses and mules, H. A. Heath, Topeka, Kan.; Berkshire swine, Frank S. Springer, Springfield, Ill.; Poland Chinas, Arch. T. Grimes, Greenwood, Mo.; Duroc Jerseys, Thos. L. Williams, Dawn, Mo.; O. I. C. Swine, L. L. Frost, Mirabile, Mo. The opening day of the show, Saturday, October 6th, will be devoted to the students' judging contest. The awarding of prizes will be begun Monday afternoon, October 8th, and exhibits must be in place by noon of that day. See advertisement on page 34.

BUY SHOES THAT CANNOT RIP.

We wonder if our readers know just what a "Buffalo Calf" shoe is. By referring to the advertisement of Messrs. Bentley & Olmstead, of Des Moines, Iowa, which appears on page 12, a full description of this well-known shoe can be had. This firm are a characteristic western concern in every respect, making shoes for western people, and this Buffalo Calf shoe is made to stand the hardest kind of usage. So many shoes offered for sale rip so easily that they are unfit for use. Not so with the Buffalo Calf. It is impossible to rip or tear them. They are fit for all kinds of weather and the leather will always be found soft and pliable to the foot. These shoes are made in all sizes to fit any foot and if you cannot find them at your dealers, just drop a line to Bentley & Olmstead, Des Moines, Iowa, and they will tell you how to get a pair of these famous shoes.

A NEW IDEA IN MANURE SPREADERS.

The William Galloway Company, of Waterloo, Iowa, are advertising what they call a wagon-hox manure spreader, an illustration of which is shown in their advertisement on page 7. This spreader is designed to fit the running gear of any ordinary farm truck or wagon. It is being offered at the low price of \$39.50, and is guaranteed to stand the strain of spreading any kind of manure and to do the work in a perfectly satisfactory manner. The Galloway Company have already procured, without solicitation, a large number of testimonials from those who have used their wagon-hox spreader, and a bond of \$25,000 is put up as a guaranty that the spreader will do exactly what is claimed for it. The company offer to allow the purchaser to use this spreader thirty days and if it does not prove satisfactory in every way money will be refunded and freight paid both ways by the company. A spreader booklet may be obtained upon application to the William Galloway Company, 109 Jefferson street, Waterloo, Iowa.

GLENWOOD CRITIC 33579.

Misfortune oftentimes strikes a man just at the zenith of his fame, and death often removes an animal just when victory is in sight. It may seem presumptuous to say that Glenwood Critic 33579 would have been in the front rank of the yearlings at the state fairs this fall, and yet we will stake our judgment on that prediction after seeing the great array of hoars in that class that were out this fall. He was owned by E. Z. Russell at the time of his death and was fitted for the show by him. However, he formerly headed the herd of Mr. A. W. Lamb, of Monroe, Neb., who starts an advertisement in this week's issue of The Homestead and who now has twenty-five boar pigs and some choice gilts sired by him. One of the best litters of two boars and four sows by him is out of Leda L., a granddaughter of old Pilot, and another litter of five boars and three sows is out of Miss Ollie by Drummer Boy 2579. Another good litter is out of a sow called Mable B. and there are four hoars and four sows in this litter. Mr. Lamb says that there are several hoars among these that are as good as their sire at the same age, and as this stuff breeds on and has a good outcome in it, we can recommend it to Duroc Jersey breeders who are wanting something of this kind. If you want a prospect for next season write Mr. Lamb. This is the blood that won first and sweepstakes at Des Moines, and was also leading winners at Nebraska. Write him at once.

THE PFANDER POLAND CHINA SALE.

One of the sales that is attracting more than ordinary attention this fall is that of Messrs. J. W. Pfander & Son, which takes place at their farm near Gravity, Iowa, on September 28th. The entire offering may be truthfully said to be practically a Giantess offering, as three-fourths of the stuff that go into the sale are of that blood, close up. The best thing in the sale is Model Giantess, a two-year-old daughter of old Youngs, and she will have a litter of eight pigs at side. Her spring litter of eight goes into the sale and is one of the great litters of the year. It makes no difference where you go. He also has a fall litter of seven in the sale, and breeders will be prone to admit that she is one of the great brood sows of the present day. This sow is put into the sale simply as an attraction and not because they want to sell her, and we miss our guess if the best breeders do not go after her. We unhesitatingly say to breeders of Poland Chinas, especially those who are paying a little attention to home and size, that here is a sow that is a gold mine if properly handled. There will be fifty head in the sale, the choice of both the fall and spring crop of about 200 head. There will be eight good fall boars in the sale, and three of these will be out of Model Giantess. The other five will be out of Crescent Giantess, another daughter of Mr. Fred Rood's famous old brood sow. There are two February gilts on the farm out of this same sow, and one of these will go into the sale. One of these is to be counted among the best we have seen this year. The spring litter of Model Giantess—four boars and four sows—goes into the sale, and they are all

that could be desired. There will also be four fall sows in the sale out of Model—two of these will be open and the other two will be bred to Tibbickset and Woodbine Chief, the latter hog being a son of Chief Tecumseh 3d. There will be other splendid fall sows in this sale, besides a grand lot of spring gilts. The Pfander offering will certainly appeal to the breeder and farmer who is looking for size and quality and a good big bone. We have seen this sale offering and we do not hesitate to recommend it to those who are looking for Poland Chinas of this type. Write Messrs. Pfander & Son, Gravity, Iowa, at once for catalog and kindly mention The Homestead. See page 32.

A. W. H. ORR'S FALL DUROC SALE, THURSDAY, SEPTEMBER 20TH.

Duroc breeders should keep in mind the fall sale of fancy-bred Durocs to be held by Mr. A. W. H. Orr, of Lorimer, Iowa, on Thursday, September 20th. Mr. Orr will sell about thirty head in all, consisting of fall yearling boars that are very large and come from good strains. A choice number of spring hogs are also to sell, besides a few yearling sows that will have litters at their side on sale day. The herd boar, Pilot Onward 23421, used by Mr. Orr, is the sire of a great portion of the boars that are to go, as well as a sire of some of the young sows included in this sale. It is stated here that Pilot Onward was the sire of the heaviest litter of pigs under six months class at the Iowa State Fair in 1905. He also is the sire of a number of gilts taking prizes at various county fairs in the state, and was also sire of the grand champion sow any age or breed at the Lorimer street fair last fall, and competition was keen. Breeders will find his sons in this sale a healthy, growthy lot. Two of the spring boars that Mr. Orr will put up are sired by Perfection Advance 41429 and out of a Princess Perfection sow. These are extra good and ought to find ready buyers. Among the sows offered are two yearling animals that will have litters by their side. The balance will consist of fall gilts that are large, rangy individuals for their age, with sufficient bone to carry them easily. Accommodations will be provided for all, and breeders are extended a cordial invitation. Catalogs are ready for those interested. Kindly look up the sale announcement on page 38 and reserve September 20th for the Orr sale.

THE KNODIG PITLESS SCALE.

Every farmer in the corn belt should have a scale of his own. If he is selling grain or live stock he can usually save the price of a good scale in one year. If you know what your loads weigh before starting from home there is little danger of your being cheated in town, because the town scale or feed-yard man soon learns who has scales. We know of one instance where on a sixty-bushel load of corn the town scale was off 800 pounds, and as corn was selling at fifty cents a bushel a few experiences of that kind would pay for a scale. At this time we desire to call special attention to the Knodig Pitless Scale, the advertisement of which is found on page 11 of this issue. This scale has all the advantages and none of the disadvantages of the old-fashioned kind. It is guaranteed to be absolutely accurate, because tested according to the United States standard of weights. It is manufactured by the National Pitless Scale Company, of Kansas City, Mo., and is sold directly to the user, thereby cutting out the middleman's profits. The manager of this company, Mr. Gumbel, has been singularly successful in placing a reliable, though reasonably-priced scale within the reach of farmers. His plan is to let any farmer, stockman, elevator man or grain dealer use the scale one month on trial and if it is not then satisfactory the company will pay the freight both ways. Without spending a single cent, therefore, you can obtain a trial of the Knodig Pitless Scale. Please insert your name and address on the corner of the advertisement referred to and send it to the National Pitless Scale Company, 2011 Wyandotte street, Kansas City, Mo.

RATES FOR AMERICAN ROYAL.

As the result of the efforts of H. W. Priekett, traffic manager of the Kansas City Stock Yards company, the territory from which reduced rates to the American Royal Live Stock Show will apply this year has been materially extended beyond that of last year. Last year the rates applied only to the territory within a radius of 200 miles of Kansas City. This made it necessary for many stockmen in Missouri, Iowa and Illinois to pay full fare to Kansas City. This year the rate applies to all points in these states from which the local one-way fare to Kansas City is \$3 or less, which includes practically all stations within 300 miles of Kansas City. This will take in a large part of Illinois and practically all of Iowa. The rate this year from Western Passenger association territory is as follows: One lowest regular first-class fare plus \$2 from all Trans-Missouri territory; also from points in Illinois, Missouri and Iowa, from which the local one-way fare to Kansas City is \$3 or less, except where open rate of one fare and one-third makes less. The open rate of one fare and one-third applies from all points where the fare and a third is less than one fare plus \$2. From points from which the local one-way fare to Kansas City is \$6 or less, tickets will be on sale October 5-13, and from other points October 5-9. The return limit will be October 15, but by depositing ticket with joint agent at Kansas City on or before October 15, and paying a fee of fifty cents, the return limit may be extended to October 31. From points in Southwest Missouri from which the local one-way fare to Kansas City is \$6 or less, and from southeastern Kansas, Oklahoma, Indian Territory, Arkansas and Texas, the rate will be one fare plus \$2, except where the open rate of one fare and one-third makes less, when that rate will ap-

ply. The dates of sale return limit and conditions of extension are the same as in Western Passenger association territory given in detail above.

ED. HOLMES CLOSING-OUT SALE.

On September 27th, at his farm near Bedford, Iowa, Mr. Ed. Holmes will close out his entire herd of Poland Chinas, including herd boars, brood sows and fall and spring boars and gilts. Mr. Holmes is moving to Canada, so everything goes. His well-known herd boar, Mo. Perfection, considered one of the best boars ever used in southern Iowa, will be sold, also Big Shamrock and Cleansweep, the latter being considered a good show prospect for next year. There will be daughters of R's Claud, Mo. Perfection, P. W. Perfection and Big Shamrock in the sale, and some of these have never been priced before. One of these sows is out of Anna Price, a full sister to old Glantess. One of his best sows is American Maid, a daughter of R's Claud and she has a litter of nine by Mo. Perfection. Black Beauty, another of his daughters, also has a litter by Mo. Perfection. Rosebud, a daughter of Black Prince, a half sister to Glantess 2d, goes, as does Darkness 3d, one of the largest sows in the offering. She is an extra good sow and a daughter of Crescent Tom. There will be a splendid lot of spring gilts in the sale sired by Mo. Perfection. He will sell Mo. Perfection, also Big Shamrock and Cleansweep. The latter is a fall boar and he is a prospect for next year, and some good breeder should get him. He is a son of Mo. Perfection and there will be another good fall boar in the same sale. The spring boars are all sired by Big Shamrock and Giant Killer, the latter being a son of P. W. Perfection and out of old Glantess. There will undoubtedly be some good bargains in the Holmes sale. Write for catalog and mention The Homestead.

PUBLIC SALE OF SHORT-HORNS.

We make the announcement for the first time that on Thursday, October 4th, Mr. J. B. Brown, of Solon, Iowa, will make a draft sale of Short-horn cattle at his farm of forty-two head, among which are a goodly number of Scotch cattle, the remainder all Scotch-topped. This offering will include his entire herd of show cattle that were exhibited at Des Moines. Mr. Brown has been in the business of breeding Short-horn cattle for more than twenty years. This sale is made purely and solely because the herd has grown to such proportions that it now becomes necessary to dispose of some of them. No doubtful animals are included and not only does Mr. Brown believe this to be true, but guarantees every animal to be a breeder. The offering includes, so far as the Scotch contingent is concerned, Lavenders, Claretts or Columbias, Gwendolines, Lovelies, Miss Ramsdens, Acanthuses, Raspberries, Orange Blossoms, etc. The American families are all of standard sorts with from three to six Scotch tops. Mr. Brown is in a series of sales and will hold his sale between the dates of Mr. E. Cosgriff, of Clarence, Cedar county, Iowa, and Mr. George H. Burge, of Mt. Vernon, the first selling on October 2d, Mr. Burge on October 5th. Several good Scotch bulls will be offered in addition to the choice array of females. The catalogs are now ready for distribution and are a neat production from the Bedford Catalog Printery, of Bedford, Iowa, which is an exclusive catalog printing establishment owned by Mr. F. P. Healy, a well-known Short-horn breeder who compiles and prints catalogs. Mr. Brown will be pleased to mail catalogs to all applicants.

THE ROOD-FESSEMEYER BIG POLAND CHINA SALE.

On September 29th, at Clarinda, Iowa, is where the Rood-Fessenmeyer "Big Poland Chinas" go through the public sale ring. These two breeders have won a reputation for breeding the big stuff and their annual sales always furnish an attraction to those who are looking for size, bone, quality and finish. Mr. Fred Rood sells thirty head, five matured sows, ten fall gilts, five spring gilts and ten boars. Two of these fall boars are sired by Longfellow H. and one of these is out of his famous old brood sow, Glantess. The other is a 17th of October boar and will weigh 400 pounds. To the man that wants show type we would call his attention to a fall boar sired by Proud Corrector, out of Nellie Perfection, the well-known show sow. Three of his spring boars are sired by Big Tecumseh, and are out of old Glantess, and they will make big, heavy boars. Among the brood sows is a two-year-old daughter of P. W. Perfection and out of old Glantess. This sow is called Glantess Best and she is all that her name implies. She raised him a litter of nine pigs and she is so good that Mr. Rood thinks the other fellow ought to own her. Another good sow that he sells is Mayflower 3d, and her sister sold in his last sale for an even \$100. He also lets go a couple of good ones by Pawnee Lad and two by Guy's Best 2d. He puts in a lot of very choice fall sows, mostly the get of Longfellow H., a Peter Mouw-bred boar. To those who want size we would call their attention to any of these. His spring gilts are bred along the same lines, and he certainly has size enough on these, and you would be surprised with the quality. Mr. Rood says he will not put a boar in the sale that will not be fit to head a herd. Mr. H. Fessenmeyer will sell twelve boars in this same sale. Ten of these will be spring boars, all sired by P. W. Perfection. In fact it will be practically a P. W. Perfection offering. Two of his best fall boars will be sired by the above boar and will be out of Glantess II., one of the best sows in southern Iowa. One of the largest spring boars that he sells is out of Nelson Superior, a direct descendant of old Nelson, the sire of Glantess. He will easily weigh 250 pounds by sale day. A good fall boar by P. W. Perfection that goes into the sale contributed by Mr. Fessenmeyer will weigh close to 450 pounds by sale time. Among his females are a litter of four fall sows sired by P. W. Perfection and out of Glantess II. that are hard to beat, when size and quality are wanted. These are bred along the same lines as the White sow that sold in the Council Bluffs sale for \$165. He sells two good fall sows by P. W. Perfection and out of Molly M., the sow that topped the Peter Mouw sale. He puts in a yearling daughter of Longfellow Jr. that for size will please anybody. She will be bred to P. W. Perfection. Both the Rood and the Fessenmeyer offerings are bred in the blood of the largest and

biggest-boned Poland Chinas, and they have added abundance of quality to their breeding operations. Write Mr. Fred Rood, Clearfield, Iowa, or Mr. H. Fessenmeyer, Clarinda, Iowa, for catalog, and mention The Homestead. See page 32.

TURBETT'S POLAND CHINA SALE.

A very good, useful lot of Poland Chinas of the large, growthy sort is offered for sale at public auction by Mr. Jas. B. Turbett, of Illana City, Ill., on Thursday, September 27th, at his farm two miles south of Eden, Ill. Mr. Turbett has been breeding the large, growthy sorts and has selected for this, his first annual sale, seven aged sows, five with litters; two aged boars, including the herd boar, Woodview Keep On 99883, a grandson of the noted breeding and prize-winning boar, Keep On 61015; about fifteen spring boars, mostly the get of Woodview Keep On, and about twenty head of spring gilts. This stock has not been pampered in any way, but is in first-class condition for the breeder and farmer who are looking for good, useful stock. In addition to the Poland China consignment Mr. Turbett is selling some excellent yearling and weanling colts or both Percheron and standard-bred families. Catalogs giving full information regarding all the stock will be sent to Homestead readers as per the advertisement on page 31. Plan to attend the sale if you need of something good of either breed of stock. If it is impossible to attend this sale bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Turbett, will be properly handled.

COSGRIFF'S SHORT-HORN SALE.

This is our initial mention of the very good lot of Short-horn cattle that will be sold on October 2d by Mr. Ed Cosgriff, of Clarence, Cedar county, Iowa. On the above date Mr. Cosgriff will sell forty head of Short-horns from his well-established herd, all of which are good individuals and will be sold in good flesh and with a liberal guarantee thrown around them. No man who buys cattle of Mr. Cosgriff is buying a "pig in a poke." He is considered one of the most conscientious and reliable breeders in the state of Iowa. He is a man whose life has been such that all his neighbors have implicit confidence in him. It is certainly worth something in huying the foundation for a herd of Short-horn cattle to secure them of a man whose character is above reproach and whose good name stands unsullied for nearly fifty years in the community in which he has lived. We will not attempt to individualize at this time on anything in this offering, but will state, however, that we have inspected the cattle to be sold and that no more useful lot of thick, thrifty Short-horns can be found in this part of Iowa. Mr. Cosgriff has never endeavored to maintain an extremely large herd, contenting himself with a smaller herd better cared for that would bring honor and renown to him as a breeder and care taker, rather than the praise that he might secure by having a large herd. It seldom happens that any young breeder is so fortunate as to secure such good Scotch herd bulls as has been the lot of Mr. Cosgriff. In our succeeding issues we will have something to say of these grand, good huls and of their breeding. At this writing we would earnestly request all Homestead readers that may be interested to write Mr. Cosgriff at once, mentioning The Homestead and ask for his sale catalog, which is now ready for distribution.

THE BIG FOUR DUROC CIRCUIT.

Lovers of the Duroc hog will have ample opportunity to secure some choice animals at the four days' circuit of sales to be held in southeastern Nebraska. The four firms selling Durocs tell us that they have selected the tops of their herds and that the offerings will not only be strong in individuality, but as much so in breeding. The first sale will be held at South Auburn, Neb., on September 25th. Mr. Ford Skeen, of that place, will offer his entire herd, numbering about forty head. This gentleman has some choice fall sows sired by Kan't Be Beat's Son by Kan't Be Beat, Ben B., Cole's Duroc and Improver 2d. Another strong attraction for this sale will be the show boar, Liberty Challenger. This animal was first in class last year at the Nebraska State Fair. He should be a bargain for someone in need of a good herd header. Then come the eight brood sows safe in pig for fall farrow. These should be ready sellers, as the tried sows are always more desirable for use in any herd. The fall yearlings should not be forgotten. Ten spring pigs sired by McClellan and Liberty Challenger will be offered. Bear in mind that this is a dispersion sale and the entire lot goes. Write for his catalog. On September 26th Messrs. Peek & Putnam & Lamb Bros. will offer forty head of tops from their herds. This sale will be held at Tecumseh, Neb. This offering will be made strong by the fall yearling boar, High Notcher by Uni. Russell, and one sired by Caesar by Top Notcher. Some of the spring boars are sired by Hanley and he tracing to The Lad For Me on his dam's side. Messrs. Lamb Bros. offer some choice boars sired by Beatrice Boy and Moren Durocs. They also offer a few sows as well bred as the boars. Each firm in the Tecumseh sale has made his offering small, but has decided to make up in quality and individuality where they are short in numbers. They believe in leaving a good impression and can then expect good sales to follow. For further particulars write Messrs. Peek & Putnam or Lamb Bros., at Tecumseh, Neb. On September 27th, at Cook, Neb., Mr. John Schowalter will offer forty-six head of richly-bred Durocs. The offering will be as follows: Seventeen spring boars, twenty-two spring gilts, one yearling boar and six yearling sows. Mr. Schowalter has been breeding Durocs for some time and today has his herd well up in the good blood of this breed. He will offer only the tops and these will represent the blood of such families as Oom Paul, Tip Top Notcher, West's Choice, Crimson Wonder and Improver 2d. His herd has been given good care and the sale stuff will go into the ring in good breeding condition. You will find an offering with good colors and plenty of quality. Write for his sale catalog and post yourself on his offering. Try and attend his sale. On September 28th, at Cook, Neb., Mr. Geo. Dorsch will make his first sale of Durocs. This gentleman has started right and his class of Durocs will please anyone interested in good colors and good feet, strong hacks, etc. His offering

will number forty head in all, of which twenty-three are boars and the balance sows. He is trying to make his first sale one to be remembered by all and consequently the tops of the herd are offered. Mr. Dorsch's offering represents the blood of Tip Top Notcher, Iced Duke, G. W.'s Favorite by Sec's Kan't Be Beat, and Red Chief I Am. If you cannot attend the sale send a bid to the auctioneer. Look up the display advertisement on page 31. Try to attend this sale, as you will find as strong an offering as will be shown in this circuit. Don't forget to get his catalog.

GOOD RESULTS FROM DIPPING HOGS.

The following testimonial to the Iowa Stock Food Company, of Jefferson, Iowa, speaks for itself: "Oskaloosa, Iowa. Gentlemen:—On June 7th I made arrangements with your agent, Mr. Pringle, to dip my hogs, and 100 head of sheep and lambs. My hogs were bothered with mange and not doing well. Several of them were off feed. My April pigs were not as bad as my fall sows, and seemed to be doing as well as the average spring pigs. They had been well fed and slopped twice daily. Mr. Pringle told me he thought the hogs were troubled with worms, as well as mange. While we were yarding and sorting them for dipping, we accidentally killed one of the average pigs. On investigation we found in this pig seventeen worms from one and one-half to nine inches in length. I then fed the Iowa Worm Powder to my bunch of sows and followed it as directed with Iowa Stock Food. Inside of thirty-six hours worms passed from them by the hundreds. This was witnessed by a number of parties. I am more than satisfied with my investment and can heartily recommend Iowa Worm Powder as a worm destroyer and Iowa Stock Food as a conditioner for hogs, to my fellow hog raisers and hope more of them will find the value of these products. I purchased of your agent, Mr. Pringle, one of your dipping tanks, five gallons of your dip, fifteen pounds Iowa Worm Powder and 500 pounds Iowa Stock Food, and I consider this the best investment I have made this year for my herd of hogs. Yours truly, A. Chandler." Mr. Chandler sold seventy head of these spring pigs Nov. 18, 1905. The average weight per head at Oskaloosa was 210 pounds.

LAST CALL FOR M. L. LOGAN'S SHORT-HORN SALE.

The last call for Mr. M. L. Logan's sale of Short-horns, to be held at his farm, near Lineville, Iowa, on Tuesday, September 18th, will be found on page 33. As stated in previous issues, Mr. Logan is making a most representative offering in both bulls and females and it is not probable that another such an opportunity to buy as many good cattle in a single sale will be found again soon. Mention has been made of the Scotch end of the offering and we now wish to direct attention to the Scotch-topped part of the sale. About twenty-five head are the reliable, Scotch-topped sort, the kind that breed on and produce the typical Short-horn that is thick from end to end and carries an even coating of mellow flesh. A majority of these spring from the imported cow, White Rose, a cow whose descendants have always been held in high esteem by breeders. A goodly number are descendants of the cow, Imp. Miss Severs, and all are topped with good Scotch sires and either have calves at foot by or are well along in calf to the pure Scotch bulls, Victor Knight or Chief Cruickshank, a bull whose dams for eleven generations were bred by that veteran breeder, Mr. Amos Cruickshank. The bull, Victor Knight, goes in the sale and should be looked after by someone wanting a proven bull and one that sires high-class stuff. About twenty-five of his get are included and they show him to be a sire of much merit. In conclusion, we wish to urge all our readers who may be in the market for good Short-horns to attend Mr. Logan's sale. We do not think the offering will disappoint you. Cols. Geo. P. Bellows and Harry Graham will do the selling.

GRANT CHAPIN'S DUROCS AS BIG AS ELEPHANTS.

The writer had the pleasure of looking over the well-known herd of Durocs owned by the above named gentleman located at Green, Kan. This herd has been making some of the older ones take a back seat owing to the fact that the owner has purchased some of the best sires and brood sows found in this breed. We found the spring pigs as large as elephants and they have the bone, feet and backs that so many are trying to get into the Durocs. Mr. Chapin tells us that his sows farrowed large litters and that they were very lucky in number raised. The herd of sows are as choice as you will find in any one herd of this breed. Mr. Chapin has separated himself from a goodly sum of money in order to get the class of sows that he is now using. We will say that this herd will be heard from from now on. The 100 head of spring pigs will afford many opportunities for the seekers of herd headers. As to breeding we will say that his herd comes as near representing the cream of this breed as any herd we have ever visited. The crop of spring pigs are the largest and evenest lot we have seen of any breed this year. The good care and good crosses make his herd what it should be. In looking over the herd boars we find Model Chief Again by Model Chief by Ohio Chief and out of Dew Drop Maid. This boar is a very good hog and his pigs have just started to arrive. His dam has eighteen herd headers doing service over the country and in the best herds as well. Red Raven by Joe Folk by Belle's Chief and out of Bishop's Choice is a very strong yearling and his get are showing up very well at this writing. Ohio Major by Kant Be Beat and out of Top Notcher sow is also doing service. His pigs are very strong. He shows signs of making a very large hog. You will notice that his blood lines represent two great herds, each selling for the high mark of this breed. As we go along we will ask you to make an estimate as to the cost of the sires and grand-sires of the sows and boars. You will agree that they run to large sums of money. The sows used in the herd represent the blood of such animals as Hunt's Model, Kant Be Beat Corrector, Improver 2d, Eclipse, Surprise and Cole's Duroc. Mr. Chapin made his purchases from such well known breeders as Messrs. Watt & Foust, Ira Jackson, J. D. Nidlinger, Chas. Speaks, J. O. Hunt, C. E. Pratt, Chester Thomas and others as well

known. Mr. Chapin will hold a fall sale on October 2d and his brood sow sale will be January 29th. Mention this paper when writing and oblige both advertiser and publisher.

WRIGHT'S STOCK FEEDERS WERE POPULAR AT THE IOWA STATE FAIR.

Mr. C. A. Wright, of Rosendale, Mo., "the Stock Feeder man," had a neat exhibit of the Wright feeders at the Iowa State Fair. From Monday until Saturday Mr. Wright and his corps of assistants were busy as bees explaining the merits of the "Wright" hog, calf and chicken feeders. Not less than five thousand people visited Mr. Wright's tent and 99 per cent of these pronounced "The Wright Feeders" the best and most satisfactory feeders on the market. Sales were exceedingly good, old customers brought their friends and induced them to buy. Many came who had read of "The Wright Feeders," these were so well convinced that "The Wright Feeder" is all that is claimed for it, that they bought. Mr. Wright has done a great work for the farmer, as when using his feeders the pigs, calves and chickens cannot crowd, muss or dirty their feed, thus avoiding waste and insuring the owner that each animal gets its share of the feed. Mr. Wright has been making the low price of \$10.00 on a feeder and a farm right and he pay the freight, but owing to the advance in cost of material Mr. Wright must discontinue the paying of freight and on and after October 15, 1906, all prices will be F. O. B. cars save the freight. In addition to the great showing of stock feeders Mr. Wright made a strong showing of Duroc Jerseys, winning seventh on boar pig under six months and several herd prizes all being hogs bred by himself. These and the tops of the 1906 crop and a few fall yearlings will sell in Mr. Wright's sale on October 18th at Rosendale, Mo. Those who attend Mr. Wright's sale will find one of the most even bunches of pigs he has seen this year. The stock feeder has been used and as a result no runts are found at Wright's. Watch for future announcements of Mr. Wright's sale; he has the goods and will be prepared to deliver them on sale days. See advertisement on page 14.

RANKIN'S DUROC JERSEY SALE.

On Friday, September 28th, Mr. W. A. Rankin sells fifty head of Duroc Jerseys at Carson, Iowa. He is one of the breeders that has crept to the front by degrees, mainly, because he bought the best foundation stuff that money could buy. His offering this fall surpasses anything that has heretofore come from his herd, both from the standpoint of individual merit and breeding. To top off this sale he is putting in a pair of boars sired by the great Ohio Chief and out of Wonder's Queen, one of the best daughters of Crimson Wonder. Here is something with an outcome, and we predict that it will be some enterprising breeder that will get the snap. The most of the offering will be sired by Miss Bob's Wonder and Jim's Gold Dust. There is a good litter in the sale sired by a son of Proud Advance. There is also a good litter in the sale sired by Glendale Critic, the noted prize-winning boar at the Iowa and Nebraska State Fairs. A son of Glendale Critic won second and another won third at Nebraska, and he also won fourth at Des Moines. So you see, here is the blood that breeds on. Miss Russell, by Gold Dust Jim, is a fine two-year-old sow with eight toppy pigs by Miss Bob's Wonder. Some of the oldest and largest pigs are out of Miss Timmons by Ohio Cedar, he by Kan't Be Beat. Miss Brown is a two-year-old daughter of Orion, and a "topper" at that, and she has a good litter by Miss Bob's Wonder. One of the finest young boars is out of a litter of thirteen farrowed, out of Mollie's Girl, by Mart's Choice, and sired by Miss Bob's Wonder. Breeders who are looking for a good Ohio Chief boar should attend the Rankin sale. Accommodation will be made for everybody and he says for all the boys to come to the sale. Write for catalog and mention The Homestead. See page 34 for advertisement.

INITIAL ANNOUNCEMENT OF THE WAYSIDE SHORT-HORNS.

We call attention for the first time to the very important sale of Short-horn cattle to be held at Wayside Farm, one mile south of Mt. Vernon, Linn county, Iowa, on October 5th, by Mr. Geo. H. Burge. Mr. Burge, while comparatively a young man, is not a young breeder, neither is he a novice in the cattle business. Few men have made greater strides in the breeding and developing of Short-horn cattle than has Mr. Burge. He is sometimes styled "the self-made, irrepressible, young Short-horn giant of Iowa." Either in the show ring or in the development of cattle or in argument, Mr. Burge is like "Banquo's Ghost" who will not down. This offering selected for the public sale to be held October 5th, consists of forty-four head, practically all bred at Wayside. It also includes almost the entire show herd exhibited at the Iowa State Fair the last week of August. It is the sixth sale to be held at Wayside and it goes without fear of successful contradiction that this is the best offering of Scotch and Scotch-topped cattle that has ever been offered in or about Mt. Vernon. Mr. Burge is one of those breeders who has a model in his mind. That model is his ideal of the typical Short-horn. That his ideal is about correct is evidenced by the great favor in which the Wayside Short-horns are held when in the show ring. We predict for Mr. Burge that large measure of Success to which he is entitled. In private conversation with the proprietor of Wayside, he informed the writer that in listing his show cattle for sale in connection with a goodly number of the best breeding cows on the farm, that it was a great sacrifice to the herd, but that as he owned the sires and dams, he simply had the risk of their lives to run for a few years when he could again produce the same character and in fact full sisters to the good things listed in this sale. The great success attached to Mr. Burge's shows of 1904-5-6, with both his aged and young herd, has demonstrated that he has a fixed type of cattle peculiar unto himself. Every animal shown by Mr. Burge for the past three years has been of his own breeding, and of the forty-four slated for this sale, thirty-six are of his own breeding and four of the remainder are by bulls bred at Wayside. The bull contingent in this

offering is exceptionally strong, and we would admonish those in need of good Scotch herd bulls or Scotch-topped ones, to keep this sale in mind. Mr. Burge offers no apology for this sale. It is purely and solely a business proposition. His herd is so prolific and reproductive that it has outgrown its quarters. Besides this, Mr. Burge wants the money that these cattle represent. Each and every animal sold is clothed with a liberal guarantee. He will be pleased to furnish his Wsidesale catalog to every Homestead reader who applies for the same.

HATCHER'S DUROC JERSEYS.

On September 27th, at Clarinda, Iowa, Mr. H. H. Hatcher, of Shenandoah, will contribute a choice offering of Duroc Jersey boars and one gilt to the Hatcher-Pfander-McClelland sale. These will be sired by Hatcher's Marti 16525, possibly the best breeding boar ever used on his farm, and the sire of the first-prize litter at Shenandoah Fair this year. The others will be sired by Jim's Critic, a son of Glendale Critic, the Iowa and Nebraska State Fair winner, and by Isaac's Prince, a son of Belle's Perfect King. He is putting in three pigs by this hog, two boars and one sow out of Lady Empress by Gold Dust Jim. The first-prize Shenandoah litter are sired by Hatcher's Marti and are out of Hilda B. by Sensation Chief. There were eleven in this litter and she raised nine. Cherry Bounce, another Sensation Chief sow out of Cherry Blossom, Manley's old show sow, will have one good boar pig in the sale and by Jim's Critic. Another pig by the same sire will be out of Mogul's Profit, by old Mogul, and Belle B. and granddaughter of Long John will also have three boars in the sale by the same sire. Mr. Hatcher never sold from his farm as good a bunch of boars as he is putting into this offering. Anyone who cannot attend the sale in person can send a bid to Mr. E. Z. Russell, president of the National Association, who will attend the sale and will take pleasure in selecting what the buyer wants.

LAST CALL FOR MANLEY'S GREAT FALL SALE.

On September 18th, at Lyons, Neb., will occur the fall Duroc Jersey sale of Messrs. Manley & Co., one of the best-known red hog farms in the West. This is one of the first fall sales made in recent years by this firm and they are therefore putting in some of the best things they have in the herd. They are selling thirty-five head in this sale, and thirteen of these are sows. The rest are practically all fall and yearling boars, sired by Young John, Orion and Belle's King. They are also selling a full brother to the great Proud Advance in this sale and he is a good hog. Some good breeder can afford to loosen up his purse a bit when he comes into the ring. Several of the best boars in the sale will be sired by old Orion, and as that noted boar has passed away it will be about the last chance breeders will have to get one of his sons. A few of the good ones will be sired by Belle's King, a son of the great sweepstakes sow, Nebraska Belle, and they are out of some of their very best sows. Messrs. Manley & Co. are selling an Orion sow out of a Dandelion dam that is one of the best things in the sale, and she is due to farrow a litter by Proud Advance in the early part of October. This is the combination that produced Alix II., the sow that Mr. Austin Renshaw won sweepstakes with wherever shown, and this same combination was the means of enabling ten of our very best breeders to top their sales last winter. Breeders, and the very best breeders at that, should come out and buy these sows, as they will be able to repeat what others have done if they take care of their get. In conclusion we want to call attention to a boar that is out of Nancy, their sweepstakes sow last year. He is a good one and will weigh 375 pounds at eleven months. If you are on the market for some of the good things you can't afford to miss the Manley sale this fall. Write for catalog and kindly mention this paper. See page 31.

THE HATCHER-PFANDER-MCCLELLAND DUROC JERSEY SALE.

One of the sales that never fails to attract breeders and farmers in southern Iowa is the Hatcher-Pfander-McClelland sale, which takes place at Clarinda, Iowa, on September 27th. They sell fifty head of spring boars and gilts and a few brood sows with litters, and it is an offering that will be appreciated when the buyers see the stuff. Mr. McClelland sells fifteen head. These are all spring boars and gilts, except two sows that will have litters at sale. One of these is a daughter of Orient Boy and the other a daughter of Paddy Orion. One of these will have a litter by Stout's Advancer, the other by Golden King, a boar purchased by Messrs. Watt & Foust. Two of his boars are sired by Improver II. and several by Stout's Advancer. One boar is sired by Iowa Banker II. out of a Top Notcher Chief dam. One of his Stout's Advancer boars is out of an Orion dam and another out of a daughter of Glendale Critic. Another of these, a very growthy fellow, is out of a daughter of old Mogul by Tom Watson. Another good pig is sired by Goldie's Top Notcher out of a Tom Watson dam. This fellow is a double-bred Top Notcher boar, tracing on both sire and dam's side to old Top Notcher. His gilts are sired by Perfection Chief, a son of Proud Advance, and by the boars mentioned above. Mr. Harry Pfander puts in about the same number and his are sired by Duroc Standard, Belle's Corn Cracker and Red Knight, the Nebraska State Fair sweepstakes boar. He also sells one sow, a daughter of Paddy Orion, and she will have litter of pigs at side on sale day. The most of his boars are sired by Duroc Standard and Corn Cracker, and are a nice lot, good in color, with plenty of bone and a good all round bunch. Those who attend the sale will like them when they see them. He sells a good gilt or two sired by Duroc Standard, as well as several others that bid fair to mature into excellent brood sows. Mr. Hatcher sells fourteen boars, all of spring farrow, and one gilt. These are all sired by Hatcher's Marti and a grandson of Nebraska Belle. Some of these have been winners at the Shenandoah fair, where they were shown against strong competition. Mr. Hatcher's offering is large for their age, strong and vigorous. He will put up an offering in this sale that will be the best that has ever come from his herd, and he is satisfied that they will meet with appreciative bidding on sale day. Mr. W. W.

McClelland, of Clarinda, Iowa, has the sale in charge and he will take pleasure in sending a catalog to anyone who writes for it. Application can be made to either of the other parties, however, who will take pleasure in sending one to all those who apply. Remember the date and place, September 27th, at Clarinda, Iowa. See advertisement on page 29.

CRAYER'S DUROC SALE.

The writer, representing this paper, recently inspected the herd of Durocs owned by Messrs. W. A. Crayer & Son, of Fillmore, Ind. A good lot have been selected for the forthcoming sale to be held at the breeding farm near Fillmore on Wednesday, September 26th. We take pleasure in recommending this herd to our readers, and especially the sale consignment. Not that there is any difference between the sale consignment and the breeding herd, but because they represent one of the best and most useful lot of Durocs to go under the hammer this year. At the head of the herd stands One Such 14037. He was sired by the prize-winning boar, None Such 10025, owned by Mr. J. D. Nidinger, of Decatur, Ind. One Such was second at the Indiana State Fair, last year and had many admirers for first place. At Terre Haute and Crawfordsville and again at Ft. Wayne One Such was first in strong competition. The dam of One Such is Decatur Belle 4th, one of the best daughters of the noted prize-winning boar, Corrector. Individually One Such is of the show-yard type and his get are of like quality. One Such is a full brother in blood to Hanley, the boar owned by Messrs. McNeil Bros., of Bowen, Ill., and like Hanley has proven himself a very good sire. Another boar used by Messrs. Crayer was High Notcher. He was sired by Top Notcher Again and his dam was Buckeye Belle 27292 by Dictator Chief. Top Notcher Again is a brother to the World's Fair champion, Tip Top Notcher, recently sold for \$5,000. Some fall and spring litters in the sale are sired by High Notcher. In our next issue we will have more to say regarding the offering and in the meantime would urge our readers to write for catalog as per the announcement on page 31 of this issue. If any reader cannot be present sale day bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Crayer, will be properly handled. Please mention The Homestead when writing.

A. L. MOSSMAN'S DUROC BOAR SALE.

When Duroc breeders assemble at the A. L. Mossman farm at Radcliffe, Iowa, on Tuesday, September 25th, they will find an offering of boars that will compare with any to go in the sale ring during the oncoming sale season. Mr. Mossman never does anything by halves, he believes in taking an interest in all that is good, no matter what the undertaking, pushing incessantly toward the goal. Something, however, that he takes special interest in is the raising of good hogs. In this he has been successful to a marked degree, as will be seen by Duroc fanciers on sale day, at which time Mr. Mossman will select thirty-five Duroc boars from the Prairie Glenn herd and let breeders make their own prices. That they are well bred goes without saying, as Mr. Mossman has not only choice ones (practically all of his own breeding), but from time to time has purchased good brood sows and herd headers from some of the tippy breeders of Iowa and other states. Plenty of good-boned youngsters, with quality thrown in, sired by Tientsin, are included. It is well here to announce that Tientsin is the sire of the first prize junior yearling sow at the Iowa State Fair this year. Duroc men know how good she was, it taking the judges considerable time to decide between her and the sweepstakes sow. Now is the opportunity to secure direct sons of Tientsin. The herd boars used by Mr. Mossman are A. L.'s Chief by I. J.'s Chief (an excellently-bred individual), King Al by Surprise (also a sire of quality pigs), and A. L.'s Advance by Advance Lad (a litter brother to Proud Advance). All Duroc admirers know the kind he has sired. In a following issue more will be said about the offering. While you are waiting, however, just send in for a catalog, which is free for the asking. All trains will be met, both Iowa Falls & Northern and Chicago and Northwestern. Free conveyance to and from the farm, and a substantial dinner as well. Cols. J. L. McIlrath and O. L. Mossman will be the auctioneers. Bids sent to them will receive proper attention. See sale announcement on page 29 and send for catalog at once.

GARRETT & SONS' SALE OF POLAND CHINAS.

When Messrs. W. T. Garrett & Sons, of Maryville, Mo., announce a sale of Poland Chinas everyone knows that there will be something doing at their farm sale day. This year, Tuesday, September 25th, is the day, and Messrs. Garrett have selected from their herd such an offering as is rarely seen or heard of. For this occasion sixty-one head have been selected. Four are fall boars, twenty-one are spring boars. The man hunting herd boar material will find it here and in plenty. These boars are the kind that appeal to the men who want size, quality and a hog that is practical. It is from Messrs. Garrett & Sons' herd that Mr. John Blain, of Pawnee City, Neb., selected the great Blain's Tecumseh, probably the most satisfactory boar Mr. Blain ever owned aside from Logan Chief. Two of the fall males are out of the great brood sow, Miss Allerton, a full sister to Blain's Tecumseh. Many others are closely related. In spring boars these gentlemen will sell several that promise as good as Blain's Tecumseh ever did. They are growthy, yet not fat, and anyone looking for the kind that have always been money makers and the kind that breed on should not miss this opportunity. The sow end of Messrs. Garrett & Sons' offering is even stronger than the boar end, and this is saying much, but the writer in his fifteen years' experience among pure-bred hogs does not remember of ever having seen so many good sows. The great brood sow, Miss Allerton, is an attraction worthy of note. Her six daughters got by the great boar, I Am Sunshine, should appeal to breeders wanting sow material that is unsurpassed. Others just as good are found in this offering. In fact from end to end the Garrett offering is one of such quality that it is useless to individualize. That it is possible for these gen-

Lightning

strikes more barns during September than in any other month, according to reports. It is due to the storing of great crops of grain and hay in them, and makes

the loss much greater than if the barn burned in the spring or summer when it was empty. One Insurance Company reports over 500 losses by Lightning since June 6th, and not any of it on buildings properly rodged.

Your crop is harvested and in the barn, and is exposed to the Lightning Flash. Can you afford to risk losing it when you can get absolute protection for a few dollars? This is an important question for you to decide, for the safety of your life and property rests in the answer.

Write for our booklet, "The Laws and Nature of Lightning, and How to Control It," and remember that our rods are made of pure copper; are sold and erected by honest men only; that we guarantee every job, and are the only rods endorsed by 2,000 Insurance Companies. Write for the free booklet.

DODD & STRUTHERS, DES MOINES, IOWA

tle men to make such an offering is because for upwards of forty years Mr. Garrett, Sr., or "Uncle Bill," as his friends know him best, has bred for a type, that type being one that has stood the test of time and one that will continue to stand the test. In conclusion we wish to state that there is not a poor back, a poor foot or a hog in the entire offering of sixty-one head that will not do good and be a profitable investment to the purchaser, barring death. For advertisement of Messrs. Garrett & Sons' sale see page 34 and write today for a catalog, mentioning this paper when doing so.

MORE OF W. A. MERRYMAN'S DISPERSION SALE OF HEREFORDS.

Hereford breeders who are interested in the breeding of recorded stock on the production of beef from high grade Herefords should not fail to look up the advertising of Mr. W. A. Merryman, of Laredo, Mo., who will on Friday, September 28th, disperse both herds of cattle. Mr. Merryman has always lived among his cattle, the pure breeds being kept on the home farm and the high grades on one of his adjoining farms, which made an ideal arrangement. The original stock in the herd of pure breeds came from the herds of Messrs. Overton Harris, C. G. Comstock & Son, Cornish & Patton and W. H. Curtis. Some cows of strong show yard characteristics will be found in Mr. Merryman's sale; among these is the cow Blossom, a cow that carries the blood of Anxiety Star Grove and Wester Eagle. She is one of those good matronly appearing cows and as an individual is among the good things of this sale any other sale. The cow Lucy, got by Pablo tracing to St. Grove and Archibald, should appeal to discriminating buyers. The Comstock bred cow, Lady Britton, will be found a low, down, thick, meaty proposition and a desirable female. Several granddaughters of Improver should not be passed by those hunting for desirable breeding stock. One of these and a show heifer is called Gipsy Girl. Her dam was got by Beau Brummel which gives her two lines of breeding that have not been found wanting. Another is out of a Wilton Anxiety bred cow. Both are two years old and will add to any herd. Topsy, another granddaughter of Improver and out of a Peeping Tom cow, should appeal to the more critical buyers. A Pretty Face heifer will no doubt prove an attraction for the particular buyers. From this it may be seen that the blood lines in Mr. Merryman's offering are desirable. The representative of this paper, who visited the herd, wishes to say that the cattle are all that is claimed for them, and more, and that those who want Herefords should not miss this opportunity. If you want high grades for the production of beef cattle that will go out and top any market, Mr. Merryman has them and will sell to the highest bidder. See page 18 for advertising and if you have not received a catalog write for one and arrange to be with Mr. Merryman sale day. Laredo is one hundred miles northeast of Kansas City, Mo., on the main line of the Chicago, Milwaukee & St. Paul railroad. All trains stop. See page 32 for advertisement.

LAST CALL FOR W. W. ANDREWS AND HOOKER & SON'S SALE OF ANGUS.

Next Monday, September 17th, at Mr. Andrews' farm, near Maryville, Mo., he will disperse his richly bred herd of Aberdeen Angus. At the same time C. D. Hooker & Son will sell ten head of good Angus. In Mr. Andrews' offering will be found three daughters of the great Prince Ito. One of these, Woodlawn Blackbird Pride, a three-year-old, is a full sister to the \$1,000 bull calf sold recently in the Pierce dispersion sale. Mr. Pierce considered the dam of this young cow the best breeding cow he ever owned. She is a very smooth, evenly-built cow and her bull calf, Blackbird Ento, shows her to be a breeding matron of much merit. She is due to calve in October to the service of Black Magic of Home Dale 2d. She is listed as Lot 4 and her son as Lot 5, Blackbird Irene, listed as Lot 2, is another daughter of Prince Ito, two years old, and a desirable young cow. Her daughter, listed as Lot 3, was got by Elder Erica. Lot 8 Pride Perfect is the other daughter of Prince Ito and out of Imp. Pride of Baintomb 5th. She, too, is a good individual and has calf at foot and a daughter listed as Lot 9 and got by Imp. Eliflock. Eliflock heifers are in much demand and she should find an appreciative buyer.

Among the Queen Mothers is found Orleans Manilla, a cow of much substance; one of those table backed cows thick from end to end and probably as good a Queen Mother cow as is found any place. Much of her stock will be found in the sale as she has been a wonderful brood cow. She is due to calve in October to the service of Black Magic of Home Dale 2d. The imported cow Eudora, of Eccleshall, will be found a desirable double bred Trojan Erica that has four calves at five years of age and is well along in calf again. For scale, even fleshing qualities and as a brood cow she is hard to excel. Other useful things are found throughout the herd of Mr. Andrews and it will be a good opportunity to buy choicely bred stuff that is individually good. Messrs. C. D. Hooker & Son consign ten head, two bulls and eight females. Among the females is the Pride Cow, Pride of South Oaks, a cow that Mr. Hooker considers a very valuable breeding cow. She is well along in calf to the show bull, Blackbird Benton. The Erica topped Queen Mother heifer, got by Eraste, Messrs. Hooker & Son's senior herd bull, will be found a most desirable yearling heifer. The two bulls cataloged are good useful fellows, both sons of Eraste, their senior herd bull. If you have not received a catalog do not wait to send for one as the sale is Monday. The cattle are right both as individuals and are as well bred a lot as one can find. The final announcement appears on page 33.

THE LAST CALL FOR THE WISNER THREE DAYS' SALE.

The first day's sale at Wisner, Neb., will be Short-horn day, when fifty head of good, useful cattle from the herds of Messrs. S. S. Hall, J. R. Mansfield & Son, Theo. Serck and J. O'Kane will be sold. A representative of The Homestead has seen these offerings and is in position to say to our readers that there will be some good bulls and females in this sale. As in previous issues, we desire to say that the major portion of the females will be consigned by Mr. Hall, and the most of his offering will have calf at foot by Oliver Gloster, his former herd bull, and will be bred back again to his present Scotch bull, Morning Star 24370. Mr. Hall is putting in a lot of broad-backed, mellow-fleshed and easy-keeping cows and the number that he sells with calf at foot will show they are good breeders. Messrs. Mansfield & Sons sell eight head of bulls, all sired by Nonpareil King, and they are a nice, even lot, possibly the best they have ever sold from their herd. One of these is an exceptionally good young bull. Mr. Theo. Serck sells Merry Lad, the only son of Imp. Merry Hampton used in the West. He is a good breeding bull. We have known him for a number of years and know he breeds on. He also sells some good young bulls and some cows and heifers. Mr. John O'Kane, the man that showed American Flag at Lincoln last week and got first place on him, consigns one good yearling bull to the sale. Western men, especially, should attend this sale, as the cattle will be sold right at their door. It will be a good place to buy a bull or to add a few females to your herd. The catalog is ready. Write to Mr. S. S. Hall, Pender, Neb., for one, and please mention The Homestead.

VON SEGGERN'S HEREFORDS.

On Friday, September 21st, Mr. J. G. Von Seggern will sell at the sale pavilion, Wisner, Neb., forty head of richly-bred Hereford cattle, composed of a nice string of bulls and a lot of good cows and heifers. Twenty-seven head will be cows and heifers, eight of which will have calf at foot. These will all be rebred to his great bull, Columbus 25th, considered the best son of old Columbus, or to Monarch of Shadeland 10th. The larger part of this offering is sired by Swinbourne 109741, a son of old Lamplighter. The blood of The Grove 3d and Anxiety 4th is very conspicuous in the Von Seggern offering. The cows are large, very breedy in character, good flesh carriers and are decidedly of the money-making kind. He is selling a nice string of good young bulls in this sale, among which is a son of Columbus 25th. These cattle have run on grass all summer and have only been up a short time, but they are going to be in the very best condition for buyers. We urge Hereford men to attend this sale and show their faith in Hereford cattle by making a few purchases. Mr. Von Seggern is one of the most reliable

breeders in the West and he is not putting a thing in this sale that he does not know to be all right. He is one of those breeders that stand behind his cattle, and anything he says can be depended upon. If any of our readers want Hereford bulls or cows and heifers they will find them in this sale. Write for catalog and mention The Homestead.

PRITCHARD'S BIG POLANDS.

On Saturday, September 22d, at the sale pavilion, Wisner, Neb., is where you get a chance to buy large, big-boned Poland Chinas of the money-making kind. The offering comes from the herd of Dr. H. Pritchard, one of the best and most popular breeders in the West. They are sired by Big Tom 2d, his 1,000-pound boar, and by Wisner Chief, a son of Chief Tecumseh, and Perfect Keep On. He is selling a grand, good lot of yearling sows sired by the above boars. They have plenty of size and bone and have a lot of finish. He will include one or two of the best sows just for an attraction. He has sows in this sale that will mature into 500 to 700-pound animals, and this is the kind a lot of the boys want. He will sell a good bunch of fall boars, bred along the same line. If any of our readers are looking for a stretchy, big-boned, well-bred Poland China boar or sow they should make it a point to be at this sale. There will be enough boars and sows for everybody, and they are good ones. Write to Dr. Pritchard for catalog and mention The Homestead. See page 35.

PETERSON BROS.' CLOSING OUT SHORT-HORN SALE.

An attractive offering of Short-horn cattle that will be dispersed at public auction will be that of Messrs. Peterson Bros., at Lamoni, Iowa, on September 27th. There will be fifty head in the sale, and it will close up the partnership existing between the two brothers. All their herd bulls, breeding cows, heifers and young bulls will be included and it will be an offering that will be especially attractive to breeders. In a note just received from Messrs. Peterson they say: "We have just returned from our county fair, where the liveliest cattle ex-

hibit of recent years was held. We won first prize on Gay Hampton as best three-year-old bull, first on Fairholm Jewel as best two-year-old bull, first on Lady Hampton as best yearling heifer, second on bull calf and second on yearling bull." All of these go into the sale. Gay Hampton, their three-year-old herd bull, is one of the best sons of Hampton's Best and is out of a daughter of the Harris-bred bull, Gay Laddie. He is low, wide and compact, smoothly laden with flesh of good quality and is a bull that is good enough to go to the head of some good herd. He has done excellent service in the Peterson herd and he will be one of the bargains in the sale. Fairholm Jewel is a two-year-old Bates bull, as straight a Bates bull as can be found at the present time. As a breeder he has no equal in southern Iowa, and some of the best calves on the place are sired by him. There will be a number of young bulls in the sale sired by both of these bulls. Among the best Scotch cows that go into the sale will be Imp. Crescent 8th, bred by Mr. W. S. Marr and imported by Mr. W. D. Platt. She is good enough to go into the best herd in this country and is a cow that has sold for a lot of money. Imp. Princess Fame is also included and she was bred by Mr. Wm. Ross, of Aberdeenshire, Scotland. Both of these cows will have heifers in the sale. Another cow that should be sought after by some good breeder is Spicy of Oak Grove. She is No. 3 of the catalog. Among the good Scotch heifers in the sale will be Stakeholder Princess, a two-year-old daughter of Stakeholder, and out of Imp. Princess Fame. She will make a show cow if she falls into good hands. A great many of the cows will have calf at foot and others will be well along in calf. Speaking of Fairholm Jewel, they say: "He is the largest two-year-old bull we have ever owned and he will easily make a 2,500-pound bull. Gay Hampton will weigh over a ton at sale time." There will be a splendid lot of young bulls in the sale and it will be an excellent place to buy Short-horn cattle. Write for a catalog to Messrs. Peterson Bros., Lamoni, Iowa, and please mention this paper. See page 36.

PREVENTING DISEASES OF SWINE

BY A. S. ALEXANDER.

When hogs begin to die in considerable numbers and losses are experienced in different herds in a district the people say "cholera has broken out," and immediately hogs are doped with diverse concoctions and the cholera medicine pedler is in his element and carries the disease with him, perchance, as he visits from farm to farm.

But cholera is not always present. The government scientists assure us that there is another similar disease called "swine plague" which is about as bad and, of recent years, they have discovered another "bug" trouble which is akin to cholera, sometimes associated with it and equally virulent and fatal. Then there are many other ailments common and more or less fatal to hogs and in the category may be included indigestion, worms, scours, rheumatism, canker of the mouth, snuffles or bull-nose, rickets, thumps, and various troubles of the respiratory organs induced by dust, bad ventilation, exposure, etc.

Let it clearly be understood that cholera, swine plague and other virulent contagious diseases of swine are due to specific germs which come to the hogs in the food or drinking water (cholera) or in the air (swine plague); that there is no known cure for cholera or swine plague; that scientists have utterly failed to discover and manufacture a perfectly safe and effective preventive anti-cholera inoculation vaccine or serum; that always the germ of the given disease is present and must be present to cause the disease, and that the disease cannot be directly caused by feeding new corn or by any other injurious food or cause of debility.

Understanding that these virulent contagious diseases come from specific germs, it should next as clearly be understood that not all animals fall victims to the germs when introduced or present. "One is taken, and the other left." We all know this and have noticed the phenomenon in the history of disease outbreaks in a given district. One herd is affected and that of the neighbor is left. The disease takes the hogs one year and misses the herd for a number of years. All of the time, apparently, the herd is exposed to the germs of the disease, and everywhere the germs of many diseases are around us and our animals. But not all of us succumb to disease; not all of our animals contract it. What is the reason? That is the question, and scientists evade it in their writings, but are about ready to confess that certain conditions of the blood favor the entrance and growth of germs; that certain conditions tend to destroy germs in the blood or prevent their growth or the effect of the toxins they produce in growing. In short, it

seems certain that while many herds at one time are exposed to the germs of hog cholera or swine plague, only those particularly susceptible to the inroads of the germs contract the disease and die and the susceptibility is induced by some undermining, debilitating, enervating cause.

As the hog cholera germ enters in the food or drink, yet does not always cause the disease, so far as we are aware at present, it seems reasonable to conclude that it takes hold at once and in virulent form where there already is some trouble of the digestive tract. If, for instance, indigestion and scouring have been induced by the overfeeding of new corn or of any unsuitable or indigestible food, there will exist a condition of the lining membrane of the intestine, and possibly of the blood, to attract and aid the germs of hog cholera in multiplying in the system invaded; or, if the air passages and lungs have been irritated by continued inhalation of dust or noxious gases, or by lung worms, we may in the same way conclude that in such conditions swine plague, the germ of which enters by the respiratory tract, is most prone to attack, thrive and prove malignant.

Again, it is certain that the system in perfect health possesses certain resistant powers against disease; that blood perfectly pure, fully provided with red corpuscles and oxygen, possesses through its leucocytes the power of destroying and throwing off invading enemies such as germs; and that conversely, an unhealthy system and impure blood circulation invite germ enemies, lack power to resist them and offer the conditions most suitable for germ multiplication.

Evidently then, there are several feasible plans of fighting disease among hogs and these should be followed wherever swine are kept. In the first place, every precaution should be taken to raise hogs of strong vitality and this is to be accomplished by using robust breeding stock, not too closely related, but changed often enough to prevent the weaknesses sure to result from consanguineous breeding. Next the hogs at all stages of life should be fed in such a way as to induce full exercise of the excretory organs and incidentally or primarily of the respiratory organs that blood circulation may be active and the blood pure; that the surroundings of hogs are to be kept as clean and free from germs as possible; that the food and drinking water are to be protected against germ contamination; that worms are to be prevented or destroyed; that indigestion is to be avoided so far as possible and that all known sources of the specific germs of cholera, swine

plague, etc., are to be excluded from the premises occupied by swine.

Medicine is an afterthought and used mostly when trouble has been observed. It seldom is effective where actual disease is absent, and if used strongly as a preventive, is apt to cause conditions conducive of disease. For these reasons, the less medicine hogs are required to take, the better will it be for them, provided they are properly fed and cared for, disinfectants and whitewash are frequently and freely used about the pens, the drinking water is pure, the food suitable, well-balanced and free from germ contamination or conditions likely to cause derangement of the digestive organs. It is right and beneficial, however, to mix a disinfectant in the slop now and then as a preventive and hogs have been found to take readily to slop impregnated with coal tar disinfectant at the rate of from one pint to a quart per barrel. There can be no question that such a use of disinfectant is useful in preventing or destroying worms and germs in the intestinal tract and so warding off cholera and other enteric diseases. It also is legitimate to use other simple correctives with the hope of preventing indigestion and these may include salt, charcoal, wood ashes, stone coal, epsom salts, glauber salts and lime water. Strong, irritating medicines should be avoided and no medicine the exact composition of which is unknown should be fed to hogs. One cannot afford to trust to the other fellow's intelligence or integrity when it comes to treating hogs for disease or attempting to prevent its ravages. For the latter reason, and the fear of contamination, it is a wise policy to keep the hog cholera patent dope pedler off the place by any means necessary to that end.

Although new corn cannot possibly cause cholera, it may, if fed in too large quantities and without due admixture with other foods, induce a condition of the digestive tract, blood and system, favoring the entrance and multiplication of hog cholera germs. For this reason it is wise to use new corn sparingly and all corn strictly as a part of the ration, balanced with other necessary foods. Feed less corn and more milk, middlings, flaxseed meal, tankage, blood meal and other nitrogenous foods along with green fodders and roots, while, at all time, allowing free range in the open air, or at least as much exercise as possible at all times of the year. Then keep the hogs away from drinking water other than that from the well or spring, for contamination is sure to come sooner or later from the drinking water obtained from creeks, rivers, runs, sloughs, ponds, and depressions where surface water gathers. Ancient hog wallows are dangerous. Dogs and car-

HATCHER-PFANDER-McCLELLAND DUROC JERSEY SALE

To be held at Moore's Feed Barn
CLARINDA, IOWA, THURSDAY, SEPTEMBER 27, 1906

The Blood of such well known Sires as
TOP NOTCHER, PRINCE MARTI, IMPROVER II, GLENDALE CRITIC, RED KNIGHT, ADVANCER AND ORION.

50 Head 25 boars—25 sows. We have selected the pick of our herds to go into this sale. There will be a few sows with litter. The rest will be spring boars and gilts. There will be some good boars in the sale. Two are sired by Improver II., others are sired by Red Knight, sweepstakes boar at Nebraska State Fair, Duroc Standard. Belle's Corn Cracker, Hatcher's Marti, and other good boars. The offering is strong in the blood of the leading winners, and we are contributing a lot of good boars and sows to the sale. Write any of us for catalog.

H. H. Hatcher, Essex, Ia.; Harry Pfander, Clarinda, Ia.;
W. W. McClelland, Clarinda, Ia.

PRAIRIE GLENN HERD DUROC SALE

TUESDAY, SEPTEMBER 26, 1906.

35 head by these sires: A. L.'s Advance by Advance Lad, litter brother to Proud Advance; King Al by Surprise, a boar of excellent quality; A. L.'s Chief by I. J. Chief, a sire of good ones, and Tientsin, sire of 1st prize junior yearling sow, Iowa State Fair, 1906, a warm competitor of the sweepstakes sow. The boars I offer come from large, healthy litters. My sows averaged ten to the litter this spring. Every boar royally bred. Catalog free. Sale at my farm at 1 o'clock. Dinner served. Free conveyance to sale. All trains met. Breeders extended a cordial invitation.

A. L. MOSSMAN, - - RADCLIFFE, IOWA.
Cols. I. L. McIlrath and O. L. Mossman, Aucts.

35 DUROC JERSEY BOARS

Sired by my \$300 boar Glendale Jim 33291.
2d prize boar at the Iowa State Fair. Prices reasonable.
J. S. GOLDER, SCRIBNER, NEB.

tion birds should be shot on sight. People from cholera-tainted farms should be kept off the place. All newly-bought stock should be quarantined until known to be free from disease. All places occupied by hogs should be kept clean, and if the old quarters are filthy, abandon them at once and put the hogs on new ground. It would be well indeed, were it possible each season to provide new ground for hogs while the old yards were being cropped and laid down to grass for future occupation.

But we need not elaborate the thoughts set down in this article. The fundamental principle of veterinary hygiene is to exclude all things that induce disease, and provide everything necessary to health and likely to conserve it and prevent disease. We have made our hogs weak in many ways—by inbreeding, stuffing upon corn, overfeeding on other rich foods, lack of exercise, lack of green food or other succulent food, inattention to cleanliness, allowing parasitic invasion, prolonged use of filthy hog yards and houses and senseless drug-ging with unnecessary and often hurtful medicines.

Let us manage hogs to exclude all of these causes and conditions favoring disease and cholera and other maladies will be far less common and virulent than heretofore.

That "Simplicity" means strength and power is not realized by some people. If you will give this question careful consideration and read the advertisement on page 5 by the Litchfield Manufacturing Company you will see the value of simplicity.

VERY LOW RATES TO BUFFALO, N. Y., Via the North-Western Line. Excursion tickets will be sold at one fare for round trip October 10th to 12th, inclusive, with favorable return limits, on account of International Christian Convention. Apply to agents Chicago & North-Western R'y.

ARE YOU GOING ABROAD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Chessman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

VERY LOW RATES TO CHATTANOOGA, TENN.

Via the North-Western Line. Excursion tickets will be sold September 16th to 17th, inclusive, with favorable return limits, on account of Regimental Reunion, Anniversary Battle of Chickamauga. Apply to agents Chicago & North-Western R'y.

Low Colonist Rates

ONE WAY TO North Pacific Coast Points

Daily until Oct. 31--From St. Paul to Billings, \$15; (from Chicago, \$25); to Helena and Butte, \$20; (from Chicago, \$30); to Spokane and Ellensburg, \$22.50; (from Chicago, \$30.50); to Portland, Tacoma and Seattle, \$25; (from Chicago, \$33). Similar rates to all points in the great irrigated districts and the other wonderfully productive farming regions in Montana, Idaho, Washington and Oregon. Farm where you will be independent of rain-fall, where there is no severe cold, where fuel and clothing bills are cut in half. For information and printed matter describing fruit and farming lands and business openings, write to C. W. MOTT, G. E. A., St. Paul, Minn.

NEW choice boars of March farrow for sale. The growthy, prolific kind, weighing from 150 to 175 pounds.

R. D. 1 JOS. SKINNER & SON, BEDFORD, IA.

You Will Prosper in the great growing SOUTHWEST

If you purchase a farm in the Southwest now, while the land is cheap, you will soon see grow up around you a community of prosperous, energetic men, who, like yourself, have seen the possibilities of the Southwest, and have taken advantage of them. This very condition, which is rapidly forming all over the Southwest, is making the value of land increase rapidly, to the certain profit of those who own it.

There are more and better opportunities for making money—for home building, in the Southwest—along the line of the Missouri, Kansas & Texas R'y today, than anywhere else. You have only to get on the ground to prove this. If you are in any way interested in the Southwest, write today for a copy of my new paper, "The Coming Country."

Go Southwest Now

Take advantage of the exceptionally low homeseekers' rates, September 18th and October 2d and 16th, and go and see the country for yourself. On above dates most lines will sell round trip tickets via M., K. & T. R'y at not more than one fare plus \$2.00; in many cases—from Chicago to San Antonio, e. g., the rate is \$25.00, from St. Paul, \$27.50, from St. Louis and Kansas City, \$20.00—the rates are considerably lower. The tickets permit of stop-overs in both directions via M., K. & T. R'y. If your nearest railroad agent cannot give you the rates, write me for particulars.

DISPERSION SALE OF THE ELM GROVE HEREFORD CATTLE

AT LAREDO, MO., FRIDAY, SEPTEMBER 28, 1906.

45 Head of Recorded Herefords 45

::::

90 Head of High Grade Herefords 90

THE PURE BRED CATTLE.

8 BULLS My herd bull, Prince 182194 got by the prize-winning Prince Rupert that made circuit in 1905, and seven Short-horn yearlings. These are of the herd-heading sort.

37 FEMALES Twenty-four cows, seventeen with calves at foot, seven two-year-old heifers and six yearling heifers. All females of breeding age will be bred to Prince or will have calves at foot. Many of these are rebred. Several of show-yard character. Twenty-four head of the offering were got by Kruger, he by Improver and out of a daughter of Corrector. Others are rich in the blood of Beau Brummel through Beau Donald, Gentry Briton 6th, Wilton Anxiety, Pablo and other noted sires. Many of the cows were bred by such breeders as Overton Harris, C. G. Comstock & Son, Cornish & Patton and W. H. Curtis. The individuality of the entire herd will compare favorably with any lot to be sold this year. Not a shy breeder or an inferior animal is cataloged.

HORSES

Consist of ten head well bred and a useful lot. Two draft brood mares, seven and eight years old. One family driving horse seven years old. One high-class driving mare five years old. Three two-year-old high-grade colts and one eight-year-old saddle pony; no better saddle and cattle pony in northern Missouri. These horses are in good market condition, sound and well broken, excepting the two-year-olds.

THE GRADE CATTLE

Are the fruits of fifteen years' experience in breeding up a set of brood cows, the product of which have been market toppers for the last six years on the Chicago market.

30 BREEDING COWS That look like pure breeds, with good backs and individual merit. Every one a prolific breeder.

30 YEARLINGS Eighteen head of steers and twelve head of heifers that will make car lots of show stuff.

30 CALVES All like "peas in a pod," and with quality unsurpassed.

This sale is the final wind-up of my fifteen years as a breeder of both registered and high-grade Herefords. I would not part with them, but my business interests in town compel me to leave the farm. My entire herds of pure bred and high-grade Herefords go, and at your price. You are cordially invited to be with me sale day. The sale will be held under cover. For catalog address Harry Graham, Chillicothe, Mo.

GRAND PUBLIC SALE

OF

SHORT-HORN ... CATTLE ...

AT

CLARENCE, CEDAR COUNTY, IOWA,
TUESDAY, OCTOBER 2, 1906.

On the above date I will sell 40 head of as good individual Short-horns as will be sold this season, at my farm two miles south of Clarence, Cedar county, Iowa. The offering consists of 30 cows and heifers and 10 bulls, all richly Scotch Topped with some of the best Scotch blood extant. All females bred to the Scotch bulls Victor Fashion 194906 and Scottish Spartan 257120. It is a grand aggregation of heavy milking breeding Short-horns. A large number of cows will be sold with calves at foot. A certified copy with each sale will be finished with each individual catalog. Parties from a distance will be entertained free of charge at the Cottage Hotel. Terms cash, but bankable notes will be accepted on six months time at 6 per cent interest. All lovers of good Short-horns are cordially invited to attend this sale.

E. COSGRIFF, PROPRIETOR,
CLARENCE, IOWA.

COL. GRIFF JOHNSON AND O. S. JOHNSON, AUCTS.

Attention is called to J. B. Brown's Short-horn sale at Solon, Iowa, Oct. 4, and G. H. Burge's sale of Short-horns at Mt. Vernon, Iowa, Oct. 5. Parties can attend all three sales without any inconvenience. Mention Homestead when writing for catalog.

Rhea Bros. ---- Percheron Horses.

We won the following premiums at the Nebraska State Fair, 1906:

- 2d and 4th on four-year-old stallion.
- 1st on three-year-old stallion.
- 2d, 3d and 4th on two-year-old stallion.
- 1st, 2d and 3d on yearling stallion.
- 3d and 5th on aged mares.
- 2d and 3d on mare colts.

Compare this with the official report. Don't take "peaches and cream" orders for authority. We have the above winners and the barns are full of others just as good. Come and see us and our horses.

...LAST CALL... M. L. LOGAN'S SALE OF ...CRUICKSHANK AND CRUICKSHANK TOPPED... SHORT-HORNS

AT
LINEVILLE, IOWA,
TUESDAY, SEPT., 18TH.

44 HEAD

One-third are pure Scotch—Victoria, Secret, Athene, Aconite, Violet and Emma tribes. Victor Knight 177893, my great breeding bull, is included. In blood lines he is one of the best, as an individual and a breeding bull he is one of the best to be sold this year. His yearling son, Baron Victor 25011 and Scottish Archer 258515 are also attractions worthy of note.

The females have been selected from my breeding herd with the one idea of making such a sale as will pay breeders well to attend. I am including some of the best in my herd, and the buyers of both the pure Scotch and Scotch-topped sorts will find much in this part of the offering that merits the attention of those who want good cattle. All females of breeding age have calves at foot or are in calf to Victor Knight or Chief Cruickshank. Nothing but useful cattle cataloged, and I desire to have you as my guest sale day whether you buy or not.

M. L. LOGAN, LINEVILLE, IOWA.

Cols. Bellows and Graham, Auctioneers.

... SIXTH ... Annual Sale of Short-horn Cattle From WAYSIDE FARM.. MT. VERNON, IOWA.

On October 5th I will sell 35 Scotch and Scotch Topped females and nine of the best bulls I have ever been able to offer. This stock is by such or bred to such bulls as Acrobat 152554, Money Musk 186542, and Raphael 127581. A large per cent of the offering is Scotch including most of my show herd of 1906. More young herd bulls are offered in this sale than are usually offered in any sale. Watch The Homestead columns September 27th for sample Scotch pedigrees. Auctioneers, Col. Griff Johnson and E. S. Johnson.

Attention is called to the Short-horn sale of J. B. Brown at Solon, Iowa, October 4th and of E. Cosgriff at Clarence, Iowa, October 2d. These three sales are all in close proximity to each other. Write to George Burge today for a catalog.

Drafts from the above herds will be on exhibition at the Wisner Live Stock Show, Wisner, Neb., Sept. 12-14.

(PLEASE MENTION THE IOWA HOMESTEAD WHEN WRITING FOR CATALOG.)

HORSES.

THE WENONAS' GREAT STUD

HAVING concluded a change in placing stallions before the public on account of the unsatisfactory business methods by the so-called salesmen, we will sell entirely from the barns. Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and the great expense of selling also the unsatisfactory manner in which sales have been conducted. The long time notes, from three to five years have to be discounted enormously or carried by the seller making the cost of the stallions to the buyers or the companies from \$2,500 to \$1,000. Our desire now is to sell our entire STUD at our barns in Kansas, Pullman, Washington, and at our headquarters at Wenona, Illinois.

From \$800 Good American Bred Stallions from \$800 to \$1,000
to \$1,800 First Class Imported Stallions from \$1,200 to \$1,600
Choice \$1,800

THESE are the prices at our barns in Kansas and Illinois. Prices at the Great Western Barns, apply to M. C. Grey, Pullman, Washington. We ask all intending purchasers to visit our stables where we have over 300 head of stallions to select from and do not be misled by the so-called salesmen who have been the cause of the unsatisfactory business done in the stallion trade to the buyer as well as the seller. We have told you of our change of selling stallions, now we will tell you what we have on hand, SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS, over 300 of the BEST. We will show at Springfield, Ill., SIXTY HEAD and at Hutchinson, Kan., of which THIRTY HEAD will be two-year old PERCHERONS and we know no one on earth can show colts of such size, weighing now after just landing over 1,500 pounds each. Come to Wenona and deal with BOB BURGESS who has been in the business over 32 years, longer than any man in the stallion business and we guarantee to make every deal satisfactory to you and save you from \$1,000 to \$1,500 by dealing with us. Get your guarantee and insurance direct from our headquarters. Visit our barns, see our exhibits at the different state fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that BOB BURGESS is the oldest importer in the business, the largest importer and have the quality of stock that will suit the people, perfectly good for their guarantees and will sell to you cheaper than anyone in the business. COME TO THE BARN AND GET THE MOST REASONABLE TERMS THAT CAN BE OFFERED.

ROBERT BURGESS & SON, WENONA, ILL.

W. A. LANG & CO., - GREELEY, DELAWARE COUNTY, IOWA.
IMPORTERS AND DEALERS IN
CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH
AND STANDARD BRED STALLIONS.

WE have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No old, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more top horses than any other place in America. Write.

Greeley Horse Importing Co.

Percherons, Belgians, Shires, Clydes, French and German Coach, Hackney and Trotting Stallions.

CHOICE YOUNG DUROC JERSEY HOGS

OF BOTH SEXES at reasonable prices. Address
W. J. S. Titler, Homestead, Iowa.

DUROC JERSEY HOGS.

Dispersion of the Famous Gold Dust Herd of Durocs.

HAVING decided to close out my Gold Dust herd of prize winning Duroc Jerseys, I now offer to the public, at private treaty, my entire crop of spring boars. They arose by "Tip Top Notcher, grand champion at World's Fair, acknowledged by most competent judges to be the best Duroc boar in America, and sold at the record breaking price of \$5,000; Ohio Chief II, one of the best sons of Ohio Chief; Champion Paul, a son of the noted Oom Paul; and Fancy Orion, an exceptionally good son of the World's Fair winner, Orion Chief. I am keeping my sows and spring gilts for closing out sale on October 24. I am keeping nothing back and my entire herd will be disposed of at private and public sale. Write for prices and descriptions at once if you want a herd boar from Gold Dust herd. Address,
GEO. W. SECKMAN, RIPLEY, ILLINOIS.

40 DUROC-JERSEY BOARS 40

Sired by 1st prize yearling boar at the Nebraska State Fair.
JUNIOR JIM, 1st prize brother to the great sweepstakes sow Alix 2d, that sold for \$740.
LONG ALIX, 2d prize yearling boar at Iowa-Nebraska State Fair, and sire of 1st prize litter at Iowa-Nebraska State Fair.
Pigs by other well-known boars. If you want a herd-header, write me.
AUSTIN RENSILAW, BLAIR, NEB.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppiest Duroc Jersey Pigs.

I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Al-Sar-Ben 4th. I also have pigs by Crimson Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address
W. D. PITTMAN, LAKE CITY IOWA.

125 Duroc Spring Pigs For Sale Cheap

I AM making very reasonable prices on our crop of spring pigs. The pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Red Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.
O. E. MICKEY, OSCEOLA, NEB.

CLOVER-WAVE DUROC JERSEYS.

THE WORLD'S BARGAIN CENTER

That's what we are known as everywhere and there is reason for it. Our prices as a rule do not represent the original manufacturers cost. Our goods are the best. We do not sell anything but what is in first class condition. Satisfied customers all over this land will confirm this. We guarantee absolute satisfaction.

WE BOUGHT EVERY EXPOSITION

Including the Great \$50,000,000.00 St. Louis World's Fair, the World's Fair of Chicago, the Pan-American Exposition, Trans-Mississippi Exposition. This has added enormously to our large stock. We have for sale all kinds of building material including lumber, sash doors, windows, and in fact, everything needed in construction of a building for any purpose. In purchasing the St. Louis Exposition, we secured over \$300,000.00 worth of furniture and household goods, as good as new for further use. It is all overhauled and renovated. Here is a chance for you to get some extremely handsome and fine furniture at half what it would cost you otherwise.

WE SAVE YOU MONEY

You are bound to save big money on your purchases of any kind, from us. There isn't an article that we handle, but what we can sell you at a lower price than you can purchase it elsewhere. You will appreciate this more and more as you get to know us better. No Sheriff's or Receiver's sales complete without the presence of our alert representatives. We get all the good things at slight. Because we offer goods at lower prices than manufacturers cost has earned for us the good will of thousands of families everywhere.

OUR GUARANTEE

We guarantee absolutely that all purchases of every kind made from us will prove entirely satisfactory and that the material will be exactly as represented. Thus you know that you will receive what you buy and pay for. If the goods received from us are not as represented, return them to us and your money will be immediately refunded. Our method of satisfying customers. There will be no argument about the return of your money. All you need to say is, the goods are not satisfactory and that you cannot use them. You will promptly receive your money back. Send us your orders at once.

OUR REFERENCES

Our Capital Stock and Surplus is over \$1,000,000.00. We cheerfully invite investigation as to our responsibility. Look us up in Dun's or Bradstreet's or any other responsible mercantile agency. Ask any Express Company; write to the Editor of this or any other paper; ask any Banker, or refer direct to our depository—The Drovers' Deposit National Bank, Chicago.

SHREWD BUYERS ACT QUICKLY

Now is the time to buy your needed supplies. This advertisement may never be repeated. The larger portion of these bargains will be sold in quick order. Buy to-day so that tomorrow you will not have to blame yourself for being too slow. All these bargains are offered you subject to quick sale. Action and quick action is the keynote of business success. Send us your order to-day.

Steel Roofing per 100 Sq. Feet \$1.50

Steel Enameled Bath Tubs \$6.00

At this price, our 4 1/2 ft hard wood rim, enameled steel tub, with nickel plated inside and outside. Overflow. Other lengths at proportionate prices. Handsome porcelain bath tub with full 8 inch roll rim, white enameled on the inside, seamless, cast iron, with all fine nickel-plated fittings at \$14.00. Other tubs ranging in price to \$25.00.

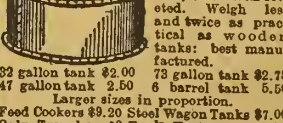

\$60.00 for Complete Water Works System,

Even though you live on a farm, you can have just as much comfort as the city folks. Our modern book on water works Systems shows you how you can do it.
We offer you a complete outfit consisting of pressure tank, brass lined pump, all valves and fittings necessary for \$60.00. Other outfits at prices ranging up to \$200.00. At \$37.50 we furnish a complete bath room outfit, consisting of tub, toilet and wash stand. Send us diagram of your home. We will make you a liberal proposition.

Galvanized Steel Tanks \$2

Brand new galvanized steel tanks, lined strong and durable, extra well riveted. Weigh less and twice as practical as wooden tanks; best manufactured.
32 gallon tank \$2.00 73 gallon tank \$2.75
47 gallon tank 2.50 6 barrel tank 5.50
Larger sizes in proportion.
Feed Cokers \$9.20 Steel Wagon Tanks \$7.00
Oat Troughs .80 Tank Heaters - 2.50

IRON BEDS \$1.40

Full size, strongly built, finely upholstered \$1.40
100 single iron beds, complete with woven wire spring \$2.25
Handsome brass trimmed beds, like picture, twice as heavy as any ordinary bed of this style. Head 65 in. high; brass tubing 3/4 in. diam. and 6 in. x 6 in. finished in bronze; good enough for any one. Retail for \$35.00. Our price \$17.50
200 wooden beds, nicely carved, good as new each \$1.50
Full size cotton top mattresses from \$1.00 up
Felt mattresses \$5.25
Beds and bedding of every kind

DRESSERS \$7.50

600 unique designs in dressers from the World's Fair, overhauled and first class. Prices from \$7.00 to \$30.00, easily worth \$15.00 to \$45.00. Commodes, dressing tables, hall racks and fine furniture for every purpose.

ROPE BARGAINS

Good Manila Rope, slightly used, all sizes, 3/4 in. to 10 in. per 100 ft. \$2.75
New Manila Rope slightly shop worn, per lb. 10 cts
Wrapping Twine lb. 6c
Galvanized Guy Wire, 100 ft. \$1.60
Wire Rope and Cable at way down prices. Derricks, Tackle Blocks, etc. Write for prices

6000 Strong Doors from St. Louis World's Fair

In all sizes \$1.00
5000 Windows at half price. 10,000,000 feet of lumber, short lengths, made as it comes, to close out, per M \$3.00
If you want lumber of specified sizes, send us your lumber bill for our estimate. Now is your opportunity to save money while we are still engaged in dismantling the World's Greatest Exposition. Everything in the line of Building material.

NURSERY CHAIRS 60c

500 like illustration, made of selected willow; strong and substantial; removable seat with wooden table. Will last for years. Plain Children's Chairs bow-back at 25c. Handsome Children's Rockers, golden oak, with cane seat, worth \$2.00. Our price 95c
Full sized, roomy rockers, worth \$3.50. Our price \$1.75
Reed furniture of all kinds.

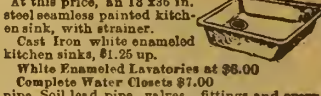

Fancy Sewing Rockers \$1.25

600 like illustration, golden oak finish, full polish, continuous post strongly braced arm, 39 inch high; screwed together. Built for wear. Worth \$2.50.
Our price \$1.25
1000 other rockers from 75 cts. to \$10
Handsome genuine leather rockers at \$12.00.
50 beautiful davenport from the Pennsylvania building and other State Buildings at the World's Fair, overhauled and as good as new. Worth \$75.00. Our price \$15.00 and up.

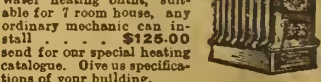

KITCHEN SINKS 75c

At this price, an 18 x 36 in. steel seamless painted kitchen sink, with strainer.
Cast iron white enameled kitchen sinks, \$1.25 up.
White Enameled Laboratories at \$6.00
Complete Water Closets \$7.00
Pipe, Soil lead pipe, valves, fittings and everything needed in the plumbing line.

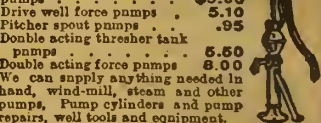

HEATING PLANTS

A complete steam or hot water heating outfit, suitable for 7 room house, any ordinary mechanic can install \$125.00
Send for our special heating catalogue. Give us specifications of your building.

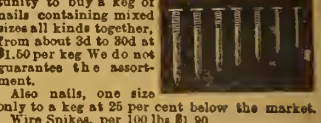

Wind Mill Lift Pump \$3.65

Double acting, anti-freezing force pumps \$9.00
Drive well force pumps 5.10
Pitcher spout pumps .95
Double acting thresher tank pumps 5.50
Double acting force pumps 8.00
We can supply anything needed in hand, wind-mill, steam and other pumps, Pump cylinders and pump repairs, well tools and equipment.

Wire Nails \$1.50 per keg

An exceptional opportunity to buy a keg of nails containing mixed sizes all kinds together, from about 3d to 80d at \$1.50 per keg. We do not guarantee the assortment.
Also nails, one size only to a keg at 25 per cent below the market.
Wire Spikes, per 100 lbs \$1.90
Iron Bolts, per 100 lbs \$3.00

Farm & Platform Scales

Three ton Steel Wagon Scale with 8x14 foot platform \$25.75
Other Wagon Scales up to 6 5.00
400 lb. capacity Portable Platform Scale, guaranteed \$3.00
Brand new Counter Platform Scales, weighs from 1/2 oz. to 240 pounds \$2.25
Brand new Family Scale weighs from one ounce to 24 lb. 90c

THE SQUEALING PIG.

We have been very free to advocate the policy of feeding farm animals liberally under practically all circumstances. Of course on a subject of this kind it is impossible to make a sweeping statement that is applicable in detail to animals of all ages.

During the next two months there will be heavy losses due to cholera or swine plague. These diseases, although not as common as they were formerly, are breaking out here and there throughout the central West. There may be a difference of opinion among men as to whether the disease can be checked when it once gets into a herd or not, but all will agree that the best policy is to keep it out if it is at all possible.

It is a sensible thing to feed growing pigs or even hogs lightly when there is cholera or swine plague in the neighborhood. The squealing hog is usually a healthy hog, and while it is practicable to feed a little grain every day along with pasture so as to keep young pigs growing well, at the same time comparatively little grain will do the work.

The method of handling and the conduct of a bunch comprised of 150 pigs that were swept away by cholera a month ago may be taken as a typical instance showing how the disease takes hold when conditions are favorable. These pigs were fed about all the grain they would eat while sucking, and they were kept on what is ordinarily called heavy feeding after they were weaned. At no time were they equal to the task of cleaning up the troughs at feeding time, though some time during the day they succeeded in eating up everything that was placed in the troughs. They were in a state of constant satisfaction, so far as the food supply was concerned, and, as the owner expressed it after they were swept away with cholera, "they never knew what it was to squeal."

Seemingly, before cholera germs were introduced some of these pigs got off feed and seemed to dry up, as it were. They poked around with their noses on the ground and their tails hanging straight with an exceedingly tucked up appearance of flank. The manure was hard and dry, though after a few days they began to scour and a comparatively short time ensued between this date and death.

We believe this was an instance where hogs were overfed, their digestive system being thrown out of order by the extravagant use of food. This was followed by a sort of feverish condition and, as described above, loss of appetite so that conditions were ideal for the development of disease when the germ became lodged in the system. We do not say that hungry, vigorous hogs will never take cholera, but we do believe that in nine cases out of ten keeping them active and not supplying much grain during the first four or five months will tide them over.

New corn is now being fed and there is a little danger attending the feeding of the new crop. The only advice we can give as to the feeding of new corn is to go cautiously. An ear a day for the first week when pigs have had little or no grain is plenty. In the course of ten days or two weeks a little more may be fed with safety. One should take at least a month or six weeks to get them onto corn, and even then when handling pigs five or six months old there is no sense in giving all they will consume. It is better to keep their appetites keen right through until cold

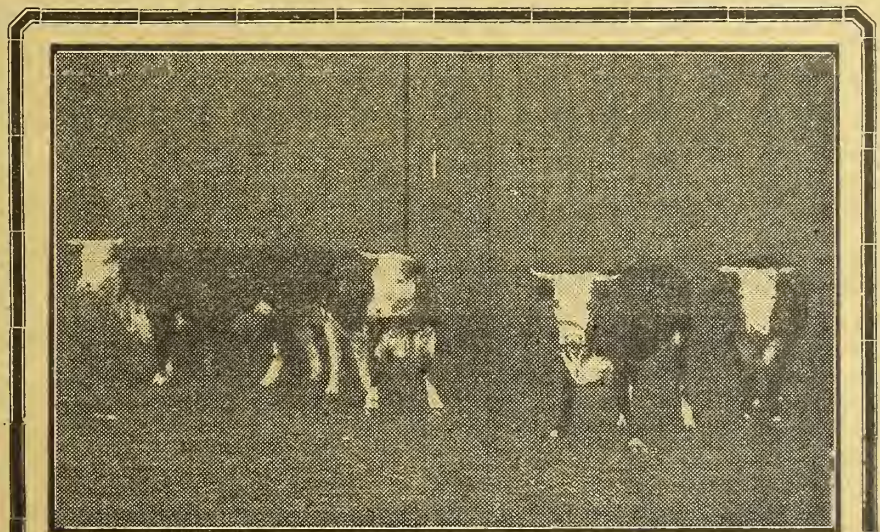

weather approaches, though of course before that time enough may be fed to put on good daily gains.

As a closing word, we would like to advise the use of a small amount of mill feed or rich meals. Even if a slop is only fed two or three times a week it will do much by way of contributing to health and vigor. Hogs will relish it greatly and there will be no difficulty about using a little coal tar disinfectant in the slop. When hogs are on full feed the disinfectant usually makes the slop so unpalatable that it is not eaten, but just a little now and then seems to answer an exceedingly important purpose. By using a little disinfectant inside and

place. Another is good, fresh whitewash. There are many places where this should have the preference. It kills germs, holds them whenever they may be caught and lightens dark places. The material can be applied with a spray pump or brush and hurried or incomplete work can be seen as the job progresses or after it has been finished. It has the other requisite so much in demand, cheapness.

There are a number of other disinfectants, but it is better to use those which are least liable to cause injury to the buildings, to be poisonous to stock or harmful to those making the application. We consider the use of formaldehyde the most objectionable of those recommended because of its being so irritating to the nose, eyes, lungs and to the hands.

Harness should be disinfected by first washing with soap and water, and then with the cresol solution, and finally rinsed with water.

Gipsy Girl 207342 is a fine two-year-old heifer got by Kruger, a \$500 son of Improver 94020, and out of a daughter of Bell Donald 24th, bred by Mr. W. H. Curtice, of Eminence, Ky. She is a show type sort, low down and thick fleshed. Another good one is Lassie 207343 by the same sire and out of May Queen. Wild Rose 207348 is another good two-year-old by the same sire and out of Lulu 60821 by Wilton Anxiety. Topsy 207347 by Kruger and out of Bell 96329 is one of the desirable two-year-olds, whose makeup will make a strong appeal to those wanting something good. There appears herewith an illustration of the above four heifers. These are only a sample of what the rest of the herd is. For further information see advertisement of Mr. W. A. Merryman on page 36.

plenty of it in the hog quarters, and if, in addition, their blood is kept cool, as will be the case if fed as described above, one may reasonably expect to escape disease.

VALUE OF SENSIBLE DISINFECTION.

In a bulletin recently prepared by the Indiana Experiment Station this subject is discussed at length. Attention is called to the fact that the object of disinfection is to kill disease germs. Sunlight is the natural disinfectant and should be employed wherever it is possible, both for the prevention of disease and the stamping out of same. Sound logic demands that the greatest possible amount of light be admitted into stables and animals' quarters. We now quote from the bulletin referred to:

Steam generated to a pressure of twenty pounds may be carried inside the barn or stable by means of a hose and a jet directed upon every part of the walls, ceiling, stable fixtures, and floor. This is quickly done and not expensive, as a thrasher engine can be hired at almost any place. Burning may be employed in some feed lots.

Among the chemical agents which may be used is a one-fourth of 1 per cent solution of formaldehyde applied with a spray pump. The application of a 2 to 4 per cent solution of coal tar disinfectants, such as cresol, or carbolic acid, may be made in the same manner and are not so disagreeable to apply. Every part must be thoroughly covered.

An excellent disinfectant, one always obtainable, is turpentine. This may be sprayed or painted on the same as the others. It is a little too expensive for use upon a large

Blankets can be disinfected best by placing in a tub or a barrel and covering with boiling water. Robes or things which might be injured by the heat or soaking, can be placed in a tight box and a small quantity of formaldehyde placed inside on some cotton (four tablespoonfuls to a space equal to that of a flour barrel).

In case an animal be buried, as a result of anthrax, blackleg, hog cholera, swine plague, corn stalk disease, tetanus, or any other soil or water borne disease, the best disinfectant is lime. The lime should be fresh, be broken up into small lumps, and a half barrel be used directly upon the body of a full grown cow or horse. Antiseptic solutions, such as cresol solutions drain away before they accomplish the desired result. Crystals of copper sulphate may be used for the disinfecting. All bedding and litter containing germs of diseases which live on the ground or in water should be burned. The litter from animals infected with glanders, influenza, tuberculosis, strangles or parasitic infections, will be perfectly safe if deposited on cultivated ground, but should not be deposited upon grass land or pasture fields.

We have no hesitation in advising the free use of the coal tar disinfectants in the place of some of those mentioned. The advantage of these over some of the others is that they are absolutely harmless when brought in contact with the skin or hair. Indeed, many farm animals need an application of this kind occasionally in order to cleanse the skin. If a good disinfectant were kept on hand on every farm of the corn belt, we believe it would prevent millions of dollars loss every year, by contributing to the health of animals and by preventing the spread of contagious diseases.

GOVERNMENT CROP REPORT.

The government's report on the condition of spring wheat, corn, oats, and the minor cereals, given out last week, suggested continued prosperity for farmers and the nation at large. The statement maintained the earlier predictions of "bumper" yields of wheat and corn, and was about as had been expected on oats, the outturn of which is conceded on all sides to be materially under that of last year.

According to the most popularly accepted basis, the statement promised a total corn outturn of about 2,713,000,000 bushels, compared to a yield of approximately 2,700,000,000 bushels in 1905.

The following table shows for each of the states having 1,000,000 acres or upward in corn, with the condition on September 1st for the last three years, the condition on August 1, 1906, and a ten-year September average:

States.	Sep. 1, 1906.	Aug. 1, 1906.	Sep. 1, 1905.	Sep. 1, 1904.	Ten Yrs.
Illinois	83	83	96	86	85
Iowa	95	95	83	85	83
Nebraska	87	84	95	87	81
Kansas	86	83	83	63	70
Texas	77	75	79	86	71
Missouri	87	82	98	74	80
Indiana	95	85	99	80	88
Georgia	91	92	86	91	84
Kentucky	100	96	95	89	84
Tennessee	97	95	84	90	81
Ohio	99	92	90	78	85
Alabama	93	92	84	93	82
North Carolina	85	91	83	96	85
Mississippi	92	92	74	92	78
Indian Territory	95	92	96	92	90
Arkansas	97	97	83	87	77
Oklahoma	95	96	83	87	70
South Carolina	84	86	74	91	79
Virginia	91	95	97	98	89
South Dakota	91	85	91	80	86
Minnesota	92	95	90	80	86
Wisconsin	95	89	91	78	87
Pennsylvania	96	95	96	94	88
Louisiana	85	93	71	87	81
Michigan	93	87	85	73	84
U. S.	90.2	88.1	89.5	84.6	81

The average condition of spring wheat when harvested was 83.4. September 1st, last year, it was 87.3, that of August 1, 1906, being 86.7. The condition in the five principal producing states were given as follows:

Minnesota	79
North Dakota	84
South Dakota	83
Iowa	83
Washington	75

Figuring on the basis of seventeen bushels to the acre, the statement indicates a spring wheat yield of 255,000,000 bushels, which, with the estimated winter yield, brings the total estimated wheat crop of the country up to about 748,000,000 bushels, compared to approximately 693,000,000 bushels harvested last year.

The average condition of the oats crop when harvested was 81.9, against 82.8 a month ago; 90.3 on September 1, 1905; 85 on September 1, 1904, and a ten-year average of 81.9. Figuring on the basis of 35 bushels to the acre, the statement suggests a total yield of about 794,000,000 bushels. Last year's outturn was in the neighborhood of 900,000,000 bushels.

The average of barley when harvested was 89.4, against 90.3 on August 1, 1906; 87.8 on September 1, 1905; 87.4 on September 1, 1904, and a ten year average of 83.7. The statement indicates a total yield of 140,137,000 bushels, compared to 141,706,000 bushels estimated on Aug. 1.

The average condition of rye when harvested was 90.5, compared to 90.8 on September 1, 1905; 86.9 on September 1, 1904, and a ten year average of 86.5. The indicated rye crop is 26,486,000 bushels, against 26,488,000 bushels suggested by the August figures.

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscription, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

Des Moines, Iowa.

GETTING BACK TO THE SOIL.

In an address dedicating the immense live stock pavilion on the Minnesota State Fair Grounds last week, Mr. J. J. Hill, president of the Great Northern Railroad, referred to the fact that although a million people from abroad are added to the population of the United States annually, yet labor outside of the city was never as scarce or wages as high as at the present time. Farmers stretch out their hands in vain for help, while immigration lingers in the great centers and adds to the difficulty attending employment. A considerable portion of this year's magnificent crop, said Mr. Hill, will either be reduced in quality or altogether lost by reason of the impossibility of getting labor to handle it properly. The country needs more workers on the soil. Within twenty years there will be fifty million more people in this country, and by the middle of the century Mr. Hill estimated that there would be two and one-half times the present population. As to how these people are to be provided for, in view of the fact that arable public lands have disappeared, Mr. Hill said:

Our one resource, looking at humanity as something more than the creature of a day, is the productivity of the soil. The reckless distribution of the public land; its division among all the greedy, who chose to ask for it; the appropriation of large areas for grazing purposes, have absorbed much of the national heritage. Only one-half of the land in private ownership is now tilled. That tillage does not produce one-half of what the land might be to yield, without losing an atom of its fertility. Yet the waste of our treasure has proceeded so far that the actual value of the soil for productive purposes has already deteriorated more than it should have done in five centuries of use.

The single intelligent advance on practical lines made by public authority within the last quarter of a century is the reclamation law. Initiated and inspired and paid for by a few western railway companies, it provides for a real addition to the source of food supply and the opportunity for employment. But it is only a light breeze blowing in the face of a cyclone. If every project contemplated as feasible were executed, and if all were completed instantly by the rub of a magic lamp, some sixty million acres would be added to the arable national domain. And if only forty acres of this were assigned to each family, it would supply the needs of the actual addition to population, by natural increase and by immigration, for less than three years.

Certain it is that the time has come for setting our household in order, and creating a serious study of national activity and economy according to a true insight and a more rational mood.

The first step is to realize our dependence upon the cultivation of the soil. The next will be to concentrate popular interest and invention and hope upon that neglected occupation. We are still clinging to the skirts of a civilization born of great cities. We at this very moment use a slang which calls the stupid man "a farmer." Genius has shunned the farm and expended itself upon mechanical appliances and commerce and the manifold activities whose favorable reactions filter back slowly to the plot of ground upon which stand solidly the real master of himself and of his destiny. If we comprehend our problem aright, all this will change; and a larger comprehension of agriculture as our main resource and our most dignified and independent occupation will for the future direct to their just aim the improvement of methods and the increase of yield, the wisdom and the science and the willing labor of the millions who thus may transmit to posterity an unimpaired inheritance.

If we are to walk safely in the way of wisdom there is much to be done. It is time to begin. There must be, first, a return to conservative and economic methods, a readjustment of national ideas such as to place agriculture, and its claims to the best intelligence and the highest skill that the country affords, in the very forefront. There must be a national revolt against the worship of manufacture and trade as the only forms of

progressive activity, and the false notion that wealth built upon these at the sacrifice of the fundamental form of wealth production can endure. A clear recognition on the part of the whole people, from the highest down to the lowest, that the tillage of the soil is the natural and most desirable occupation for man, to which every other is subsidiary and to which all else must in the end yield, is the first requisite. Then there will be a check administered to the city movement that lowered the percentage of agricultural labor to the whole body of persons engaged in gainful occupations in the United States from 44.3 in 1880 to 37.7 in 1890, and to 35.7 in 1900. With public interest firmly fixed upon the future of the country, in mere self preservation, must give serious attention to the practical occupation of restoring agriculture to its due position in the nation.

The solution of the problem as given by Mr. Hill is the correct one, but the difficulty lies in making the application. While it is desirable to check the further reduction in the percentage of those who live on the farm, how is the check to be applied? It can only be done in one way, namely, by the adjustment of affairs so that the man on the farm, both employer and employee, shall receive

more liberal profits in the future than in the past.

It is an easy matter to theorize over a situation of this kind, but as a matter of fact it is the American dollar that is the great center of attraction. Then again, there is a question as to whether or not further inducement should be offered to increase rural population. It would mean more producers and less consumers. There are those who believe that a sufficiently large percentage of our people are now engaged in agriculture for the general welfare of all, and if this be true the large increase in the population that is predicted by Mr. Hill may have to be absorbed by our towns and cities in the future as in the past. We would like to see a little more help available for the farm, but in our opinion a very large percentage of our emigrants are not capable of taking intelligent part in the complicated affairs of modern agriculture.

SELECTING SEED CORN.

BY CLINTON D. SMITH, DIRECTOR MICH. EXPERIMENT STATION.

This fair time calls to my attention a mistake that some farmers are making in regard to seed corn. The lesson cannot be impressed too soon that you cannot pick out seed corn by the appearance of the ears. You have known as well as we, for a good many years, that it was utter folly to pick out a breeding animal by his form alone. We always investigated the pedigree. So we have known farmers to select corn, taking the best ears they could find each fall, year after year, and yet have not noted much improvement in the quality of the crop. Now come our Corn Improvement Associations offering large prizes at fairs and elsewhere for the bunch of prettiest ears and we have known men to invest considerable money in a lot of ears for seed simply because those ears conformed to an empirical standard, a so-called score card. This is utter folly. If corn breeders could come to the Michigan Agricultural College and see the product of ears to all intents and purposes alike in form, they would receive some light on this topic.

Here we have the shelled corn from 108 ears planted in 108 different rows, the product of each year in a row by itself. This gives us a chance to compare the relative vitality and the relative values of the ears for seed. The eye last fall could not tell which ear was the best for seed because corn does not carry a photograph of its inner qualities on the exterior of the ear. All the ears looked alike but let us notice some of the differences in the growing corn, although it is too early to pronounce anything final in the matter. We must wait for harvest before we can do that.

Of two ears planted side by side one gives us in 33 hills 148 ears, the other but 62. We shall have to wait until the ears are husked before we shall know the relative yields. What is true of these 33 hills is true of the entire rows. One row has more than twice as many ears of the same size on it as the other; again one row is characterized by slender, tall, strong, vigorous stalks, another row by short, weak stalks; in one row every stalk is erect, notwithstanding the recent terrible wind storms, of another row fully one-quarter lies flat. It is safe to say that any man could get almost any type of stalks that he wanted in these 108 rows and yet we must remember that the ears furnishing the seed for these separate rows looked very much alike.

Without occupying farther your valuable space let me say that I am compelled to write this letter now to suggest something not new but something which our corn growing farmers should do. Our plan of corn selection is this:

Let each farmer select a dozen or twenty ears this fall, selecting them before harvest and take them from stalks that suit. Put these ears away where they will dry thoroughly before freezing and keep them warm and dry through the winter. Next spring go to the windward side of the corn field, after it is thoroughly prepared and marked. Shell one ear and plant the first row as far as the ear will plant it, saving perhaps 150 kernels not planted. Take ear No. 2 and plant it on row No. 2 and so on until the whole number of ears for seed have been planted. Cultivate the field as usual. Next fall harvest each row separately and save the seed corn from

the row giving the largest yield. This seed corn will be partly cross bred. In case the farmer is willing to do it, let him remove the tassel from each alternate row and save the seed from the detasselled row, thus insuring a harvest free from inbred ears. Where he finds two rows alike in most respects and conforming to his ideal, let him note the ears which furnish the seed for those two rows. Then the next spring let him plant the small amount of seed he has saved from those two ears side by side in a field away from his corn field, if possible, detasselling each alternate hill or detasselling all the stalks growing from one of the ears, thus insuring cross fertilization and strong seed. These detasselled hills so selected should furnish him his best seed, but until this shall have increased enough to furnish him the desired quantity let him save his seed from the best row of his first selection. Naturally at the colleges we go farther and keep selecting a dozen of the best ears from each row and plant them separately, an ear to the row, saving the best ears from the best rows. In this way we insure improvement because we know the pedigree.

In conclusion it is the duty of the agricultural press and the stations to warn farmers against selecting corn by the sole standard of the pretty ear which wins the prize at the fair. Such selection is a delusion and a snare.

ROAD MAKING WITH THE KING DRAG.

Some time ago an agricultural society in Warren county, Iowa, offered premiums amounting to 25 for farmers who would make the best half-mile of road within a year without the use of the road grader. Something like twelve farmers entered this contest, and on the first of September, last, three judges awarded the premiums. Mr. H. L. Parrish, of Wick, who won first premium, makes the following statement regarding his work, for the benefit of our readers:

My half mile of road had not been graded for three years. When I commenced one year ago last spring there was practically no grade to speak of and about half way up the hill on the first quarter there was a bad spouty place about five rods long. This in many cases got so soft that a person could hardly go through on horseback. I dragged it three times and the springs entirely disappeared. That was nearly one and a half years ago and it has not bothered any since.

My piece of road was forty feet wide, with telephone lines on either side about four feet from the fence. I first built a grade by plowing. I commenced plowing about eight feet from the center of the road on both sides, throwing the dirt in toward the center. I plowed until I got to within about four feet of the telephone poles on both sides. I then put the disk on the plowed part and thoroughly worked the soil down, following this with a harrow. By this time the soil was well pulverized, and I then took the King drag and commenced to run the loose dirt toward the center of the road. This task is not so very easy. If the soil is wet it will roll up in front of the drag until finally the drag will raise up and dump it all in a pile. To avoid this the dirt must be thoroughly dry, then it will be distributed evenly from the back end of the drag. I continued to drag until I got all the loose dirt in the center of the road, then I plowed two furrows on each side where I wanted my open ditch. The last furrow came right up against the bank. I then put the drag right in the bottom of the ditch on both sides, throwing the dirt toward the center. Then I had a nice oval grade. When the work was finished the center was about a foot higher than when I commenced and the ditch about

HOME STUDY

a foot and a half lower. No more work was done then until after a good rain. I then dragged it before it got thoroughly dry and followed this up by loading an iron roller with rock and putting it over the entire surface. I continued this process of dragging and then rolling three times, doing the work in each case after a rain.

This dragging and rolling combined gives you a surface that is as smooth as asphalt and as hard as brick. The trouble with most people is that they try to improve the King drag instead of trying to improve their roads. My advice is to take a regular King drag made of a split log one foot thick and seven feet long, put the split sides in front and attach thirty inches apart with the front log about six inches further to the right than the hind one. A piece of steel should be put on the front log. I find that by using it in the manner I have described above water runs immediately off the center of the road into the ditch where it belongs and never down the center of the highway.

It was our pleasure to examine the piece of road made by Mr. Parrish and we pronounce it a model earth road. It has stood the heavy traffic in wet weather and in dry weather and has always been kept from rutting by the use of a drag after rains.

It will be noticed that Mr. Parrish plowed the sides of the road in order to get some soil to build up the center. There are those who differ from him in this regard, but we believe where the roadbed is flat some such plan as this is practical in every way. By working away without the plow or disk the matter of building up the center is very slow work, and we believe that there would be more drags in use today if this plan were more freely advocated. Roads would then immediately show the effect of the drag, while in some instances where they are grassy or flat much of the labor is lost on account of the drag not taking hold of the soil.

We ask our readers who are specially interested in the road dragging problem to give Mr. Parrish's letter a second reading. What he says is out of his own experience and is not based on any theory.

AGE OF CEMENT POSTS.

The following communication has been received from one of our subscribers, Mr. Jens Kallervang, of Winneshiek county, Iowa:

I notice a discussion in your paper on the cement post question. I have had a little experience along that line and can possibly give your readers a hint or two that may prove of value. Concerning the length of time that posts should be kept on hand before being put in the ground, will say that I have put them in the next day after they were made and have never had any trouble with their breaking. I make them seven inches square at the bottom and six inches at the top, using Portland cement in their construction in the proportion of one part to three and a half of river sand. I place the flue of an old boiler in the center of every post, and as a result I think I have an almost everlasting post.

Concerning the age of posts it may be said that something depends upon conditions. If there is no special strain brought to bear on the posts it is doubtless possible to put them in the ground just as soon as the outside has hardened sufficiently so that they will handle without breaking or bending. However, where live stock has access to the fence we would not advise putting them in too soon after they are made. While firms that manufacture posts in large quantities for sale make a practice of keeping them on hand a year before selling, yet the man who makes his own posts need have little fear if he puts them in the ground when they are a month or six weeks old.

Regarding the size of posts, the dimensions given in this instance are much greater than those commonly used. A line post four inches square at the bottom and three inches at the top is considered plenty strong enough for all practical purposes, providing it is properly strengthened by the use of an iron rod or wire. For corner posts of course much more material must be used.

ARE YOU GOING ABROAD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Cheeseman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

Farm Furrows

Turned by a Practical Farmer.

The milk-fed calf needs water. This is something that should not be neglected.

Get that manure spreader if you have to get one or two neighbors to take stock in it.

There were hogs at the fair that made an ordinary 400-pound hog look like a spring pig.

The cockle bur is found most useful when it is "cast into the fire." The cockle bur farmer is living in a past age.

The Iowa State Fair managers demonstrated what they could do this year when they had the weather man on their side.

Remove every possibility of the colt getting hurt. A large percentage of colts get hurt before they reach the marketable stage.

At the fair one will see the effect of both breed and feed. The owner of prize winners knows about both and he understands the combination.

Smut on corn increases from spores and the way to prevent spreading of this trouble is to get the smut before the spores ripen and blow away.

We are prone to think that it does no harm to neglect the little things. The feeling is that we should be always looking after the big ones.

The man who sows winter wheat broadcast is inviting failure. It may not come, but it is liable to. If I could not drill my wheat I would not sow any.

There is such a thing as being a country gentleman. In no other place can more real gentlemen be found. It is easy to be a gentleman if one's blood is right.

A friend of mine turned his hogs in his berry patch to clear it of weeds and they succeeded admirably; they ate up all the raspberry canes, root and branch.

It is the hungry hog that is always looking for a break in the fence. It is the chicken-eating sow that should never be bred. Her kind will not pay for the raising.

Saw a sunflower as large around as a washtub, and I just thought what good news that would be to a Kansas man. I'll tell Henry Hatch the first time I see him.

The man who has sold his wool this year is wearing a smile that is gigantic in proportions and it refuses to wear off. It may be said to be "all wool and a yard wide."

A sheaf of rye at the Iowa fair grown in Cass county had to be shown in sections on account of its extreme length. The fertility of the Missouri slope in Iowa is wonderful.

The man who is ever ready to do others is often fighting a trust and at the same time is looking for a trust he can join so he can carry on his business of doing others.

The stock pavilion at the Iowa State Fair proved itself to be inadequate in size on several of the days of the fair this year. It was full to overflowing almost all the time. The Iowa fair is just now leaving the fair proportions

and assuming that of an exposition. The grounds would hardly hold it this year.

I have noticed that some hogs never do much squealing, and I have often observed that some men are that way, too. Some men are both hoggish and mulish; they squeal and kick at everything.

The female animal on the farm that is coming up in flesh at mating time is much more liable to produce a good offspring than the thin or poor animal. This should be thoroughly understood.

Regularity costs no more than irregularity and it means much in the management of stock. Stock have no timepiece, but it is wonderful how they can tell when feeding time is at hand.

Do the boys turn the horses out of the barn by scaring them out and making them run? It is not the best plan. Slapping them with the halter and saying, "Get out of here," makes fools of them.

Cutting bands at the thrashing machine? Why, there is no more such work to be done around the thrasher. Self-feeders now take the place of band cutter and feeder. This is a saving of three men.

The large pods on the catalpa trees growing on the fair grounds of Iowa, seem to be unknown to many, and one woman thought them to be small green snakes holding on to the branches. A snake tree! Just think of it!

I like the ground floor for horses to stand on. I have a drain under the stalls and it reduces the wet places in the stalls to a minimum. There must be a regular net work of drains and they should not be put in too deep.

Remember that the three-leaved ivy is the poisonous kind and that the five-leaved variety is the kind to propagate for porch ornament. The five-leaved variety is also called woodbine. Lose no time in exterminating the poison ivy.

In the summer time the porch is the most-used room of the house; hence, it should be spacious. It should also be screened so flies and mosquitoes cannot revel there. In winter the inside of the house will be used more than the porch.

Has it ever occurred to you that the boxes in which grain is fed to horses will get foul and ill-smelling? They will and they should be cleaned out occasionally. It pays to keep them clean, for a germ will do a mint of trouble sometimes.

In looking over the art hall I came to the conclusion that some of the patch quilts were a little threadbare. They have been shown for twenty years or more. There is room for something new in the art halls other than that of oriental fakers.

Cutting up corn is hard work, but when "the frost is on the punkin and the fodder's in the shock" there is a feeling that the country is safe. There is so much good feed in fodder that the stock breeder can scarcely afford to let it go to waste.

One man at the fair is producing water melons so large that no boy in the state can carry one of them off, and he thus avoids the stealing by boys. Even men can't carry them. Gee, what an opportunity for the colored race! I'd like to see a melon that a negro can't carry off.

In storing potatoes one should not bruise them, as they rot worse when they have become bruised. Many are under the impression that they can be handled like coal. Of course sometimes one feels pressed for help and time and they are handled more roughly than there is any necessity for doing.

The man who keeps his horses "scared of him" all the time is wondering why they do not come up to him when he is in the far side of the pasture trying to catch them. He is heard to say, "If I ever catch you I'll give you a sound thrashing," and that probably explains why he can't catch them.

Ah! There are hopes of doing away with the old stinking kerosene lamp that insists on smoking when it should be making its light shine. No more hauling a leaky kerosene can six miles over a rough road, all the time feeling like swearing. At a moderate outlay of money an electric light plant can be

YOU CAN GET THIS CAN OF Dipolene

on 30 days trial. We don't ask you to pay for it unless it does the work. We don't ask you to take a single chance or a bit of risk on this proposition. We know what Dipolene will do—we want you to know by testing it thoroughly. That's why we are willing to send it

ON A MONEY-BACK 30 Days Trial

You can try it on hogs, cattle, sheep, horses—give it as severe a test as you please, it cannot do them any harm, and if it fails to do them any good, send it back at our expense and we will refund your money. You'll only be out the stamp it costs to mail us your order if it does not do what we claim for it. We want every farmer and stock-raiser in the United States to know by personal test how good a dip Dipolene is. We want him to know what it will do, and why it will pay him to use it in preference to all others. We make some pretty broad claims for Dipolene but we prove them with the dip. This is how we do it. We will send any quantity of Dipolene over two gallons on 30 days trial, to any farmer and stock-raiser who will write for it agreeing to use it according to directions, and refund his money in full if it proves unsatisfactory. Write for our introductory prices and we will mail you free a booklet stating specifically what Dipolene is good for and just how to use it to the best advantage. This offer is well worth accepting today—it may save you many dollars. Address, MARSHALL OIL COMPANY, Dept. Y, MARSHALLTOWN, IOWA.

installed, consisting of a gasoline engine, a dynamo and a few well-arranged wires. It is a glad day when we can say goodbye to the kerosene lamp.

The Milwaukee railroad this year is experimenting with a new way of exterminating weeds along the right of

way. It consists of a weed burner carrying a long kerosene torch which extends the entire distance between the rails and the fence on either side of the road bed. If the device proves effectual it will mean the replacing of a vast army of men formerly employed for that purpose.

THE INTERSTATE FAIR

The Interstate Fair opened on Monday of last week under tropical skies and both man and beast suffered intensely from the heat and humid atmosphere, which prevailed on the opening days. The rain which came early on Wednesday morning was welcome and the thirsty earth drank up the moisture so that but little inconvenience resulted. Monday was preparation day and most of the time was spent in getting exhibits in place. The crowds began coming in the heat of Tuesday and the drink vendors started a thriving business. On Wednesday (Dan Patch Day) the crowd was said to be close to 40,000, although conservative judges were not in a position to put the crowd at that number. Sioux City is strategically located and there is no reason why a good fair cannot be maintained at that point. Good material may always be expected from three substantial states—Iowa, Nebraska and Dakota.

The things that go to make a fair, such as brass bands, lemonade vendors, cane racks and midway were all there. More implements than ever were on exhibition. The poultry exhibit was large and farm products occupied most of the main building. If there is any reason more prominent than another why the fair was not larger, it is that the exhibits occupied all the space allotted to such purposes. Many exhibitors were kept from coming because of lack of exhibition space.

It was stated by those in a position to know that there were more people in Sioux City on Dan Patch day than ever before upon any other occasion, even eclipsing the Corn Palace days of years ago. Hotels and transportation lines were congested to a maximum degree. When the hungry had all been fed there were but few scraps left. Buns were selling at a premium before the sun went down that day.

Sioux City has both a half-mile and a mile track, and racing is a big feature of the fair. Outside of this feature the live stock exhibition was of the next greatest importance and in many respects was close to some of the larger fairs. New stables had been built, but additional tents had to be erected to shelter the stock exhibit.

Tuesday was children's and old soldiers' day and it was notable that there was an increase in the former and a decided decrease in the latter. Young America was everywhere in evidence, and the

pink lemonaders did a thriving business.

A number of improvements were made over last year's fair. A tent had been erected as a women's rest place, and in another place tired mothers could check their babies while they took in the sights at the fair. Both places did a rushing business and both babies and tired women were cared for by skilled hands.

A better way might be provided for getting the stock from the cars to their quarters. The unloading takes place almost a mile from the stock department and there seems to be no route but right through the crowds of early visitors at the fair. There is room for improvement in this respect.

This is distinctively a farmers' fair and that class largely predominated around the stock department. These came from Dakota, Nebraska and Iowa, while some were from Minnesota.

The camping feature of the Interstate fair has not been noted for extensiveness in former years, but it is growing and should the park be cleared up and about one-half the trees removed, that part of the fair can be largely increased.

Sioux City streets at night during fair time is bedlam turned loose. Fun and frolic is exaggerated to impudence and both sexes seem to engage in it with apparent relish. The main street of the city during the evenings of Wednesday, Thursday and Friday, is almost wholly given up to what some have termed innocent rioting, but which more often blooms into actual viciousness. Confetti is knee deep and all sorts of instruments of hideousness are brought into requisition to help in the celebration.

The judging in the live stock department was conducted in a quiet and careful manner by competent men and we did not hear one word of criticism. The man who did not win seemed to be satisfied and he will go home with redoubled energy to produce something that will win another year. All the judging was done under a large tent erected for that purpose. The arrangements for keeping back interested spectators were not good and a lack of proper policing interfered a great deal with the judging. There is room for improvement here, it being little better than the average county fair.

More people like to see good driving and carriage horses in harness than any other kind of stock, perhaps, and yet there was but little chance for displaying the drivers. There should be a better place to show such horses.

A little jaunt about the swine pens on the last day led us to believe that nearly everything had been sold. "That pig is sold," seemed to be the language universally used by breeders. The practice of buying breeders at fairs is growing, since the buyer can see his purchase and he would much rather buy in that manner than by correspondence.

Dan Patch proved to be a drawing card this year and it was noticeable that the roofs of buildings and every available space was occupied by both men and women. In one instance a dozen women were seen on top of one of the stock barns waiting for Dan Patch to go. The fence around the ring was one black mass of humanity six feet deep, and the grounds being level none could take advantage of elevations to see the race track.

The lack of placards in the live stock department reduced the educational value of this feature of the fair. There were lots of animals stalled on the grounds without the slightest indication as to their age, breeding, weight or ownership. This is just fifty years behind the times and if the management does not see fit to adopt a rule about placards and enforce it, breeders themselves should take the matter in hand. The Sioux City fair is nearly big enough to issue a catalog, with every animal numbered.

CATTLE.

SHORT-HORNS.

Being in the very heart of a good Short-horn district, Sioux City naturally attracted many good ones of this breed. Iowa, Ne-

What Can a Roof Do?

It depends upon the roof. Shingles, tin, or cheap prepared roofs are mere water-sheds and not very reliable ones at that.

Rex Flintkote sheds water surely, but that isn't all. It is damp-proof as well as rain-proof, and keeps poultry houses as dry as can be. It makes the best possible siding. It is a non-conductor of heat and cold, and helps preserve an even temperature in milk houses. Any one can lay it. It is fire-resisting—it is wind-proof and rot-proof along with its other good qualities making it all that a good roof can be.

Rex Flintkote ROOFING

Rex Flintkote Roofing is not "another of those prepared roofings." It is in a class by itself. Made of chemically treated long-fibre wool. No tar about it. Don't buy another roofing expecting it to do what we say Rex Flintkote will do. Cheap makers imitate its appearance only. Write for name of nearest dealer who has real Rex Flintkote.

Samples of Rex Flintkote Sent Free

We make a special handsome red paint or Rex Flintkote. For 4c. to pay postage, we will send free, a valuable booklet, "How to Make Poultry Pay." "Look for the Boy"

J. A. & W. BIRD & CO., 86 India St., Boston
Chicago Office: 222 E. Lake Street

FARM BUILDINGS—T. W. TAYLOR, ILL.
COVERED WITH REX FLINTKOTE ROOFING

braska and Minnesota were the states represented in the rings. Practically all the Short-horn exhibits were brought out by men whose business it is to breed good cattle and who have never made "showing" their strong point. They were just the kind of men who furnish the good material that makes up the show herd of the professional showman. A glance over the following list of names will convince the reader of the facts in the case: C. A. Saunders, Manilla, Iowa (6 head); Stratton & Frank, Odehoit, Iowa (4 head); C. R. Steele, Ireton, Iowa (15 head); Ardmore Stock Company, Holstein, Iowa (11 head); Walpole Bros., Rock Valley, Iowa (3 head); Held Bros., Hinton, Iowa (15 head); Chas. Weber, Hornick, Iowa (7 head); J. T. Judge, Carroll, Iowa (1 head); N. A. Lind, Rolfe, Iowa (9 head); C. E. Clarke, St. Cloud, Minn. (13 head); Elizabeth D. Buckley, Holstein, Iowa (5 head). The judging in this class was performed by Prof. C. F. Curtiss, Ames, Iowa, and the following are the awards:

AWARDS.
Aged Bull (7 in class)—First, Clarke, on Bapton Favorite; second, Saunders, on King Cumberland; third, Weber, on Captain Thislewood; fourth, Ardmore Stock Company, on Lord Mount Stephen.

Bull Two Years and Under Three—First, Ardmore Stock Company, on Superbus; second, Judge, on Clear the Way; third, Walpole Bros., on General Booth; fourth, Stratton & Frank, on Knight of Wild Eyes 3d.

Bull One Year and Under Two—First, Held Bros., on Valiant Jr.; second, Buckley, on Sailor; third, Lind, on Pride of Fashion; fourth, Saunders, on Champion Lad.

Bull Calf (8 in class)—First, Clarke, on Choice Knight; second, Walpole Bros., on Valley Prince; third, Clarke, on Knight's Commander; fourth, Walpole Bros., on Diadem.

Aged Cow (5 in class)—First, Clarke, on Welcome of Meadow Lawn 9th; second, Saunders, on Somerila 12th; third, Steele, on Contessa; fourth, Ardmore Stock Company, on Manor Lilly.

Heifer Two Years and Under Three (5 in class)—First, Clarke, on Duchess of Lancaster 13th; second, Saunders, on Velvet Eyes; third, Clarke, on Dortha 2d; fourth, Ardmore Stock Company, on Miss Hudson 3d.

Heifer One Year and Under Two (10 in class)—First, Saunders, on Independence Lady 3d; second, Clarke, on Lady Mysie 2d; third, Lind, on Lovely Belle; fourth, Clarke, on Alice of Meadow Lawn.

Heifer Calf (10 in class)—First, Lind, on Victoria Countess; second, Clarke, on Lady Dortha 3d; third, Saunders, on Cumberland's Countess; fourth, same, on Rose Champion.

Aged Heifer—First, Clarke; second, Saunders; third, Ardmore Stock Company; fourth, Steele.

Calf Heifer—First, Clarke; second, Lind. Get of Sire—First, Lind; second, Clarke; third, Ardmore Stock Company; fourth, Steele.

Produce of Cow—First, Clarke; second, Ardmore Stock Company; third, Steele. Champion Bull—Clarke, on Bapton Favorite.

Champion Cow—Clarke, on Welcome of Meadow Lawn 9th.

ABERDEEN-ANGUS.

Two well-known breeders constituted the only exhibitors in the doddie classes last week at Sioux City. Mr. C. A. Binnie, of Alta, was out with a herd of fifteen, and Mr. W. J. Miller, of Metz, with sixteen head. Mr. Binnie's herd secured a bare majority of the best premiums, but Mr. Miller in every case was there with strong competition, his herd winning the champion cow premium, while Jim Delaney, the noted Angus bull, carried away the champion bull premium for Mr. Binnie. The two names, Binnie and Miller, would have been thickly dotted through the premium report even had the number of doddies in the classes been multiplied by ten, because these breeders were there with the winning kind. The awards are as follows:

AWARDS.
Aged Bull (1 in class)—Binnie, on Jim Delaney.

Bull Two Years and Under Three (2 in class)—First, Miller, on McDonald Lad; second, Binnie.

Bull One Year and Under Two (4 in class)—First, Binnie, on Elmer Lad; second, Miller, on King Donald; third, Binnie; fourth, Miller, on Belshasser 2d.

Bull Calf—First, Binnie, on Even Lad; second, Miller, on Erica Prince; third, Binnie, on Blackbird Royal.

Aged Cow (3 in class)—First, Miller, on

Snow Flake 2d of Kirkwood; second, Binnie, on Gussie Kirkbridge; third, Miller, on Metz Ogarta.

Heifer Two Years and Under Three (2 in class)—First, Binnie, on Mina of Alta 5th; second, Miller, on Metz Ogarta 2d.

Heifer One Year and Under Two (5 in class)—First, Miller, on Queen of Cherokee; second, Binnie, on Blackbird Lassie; third, same, on Coquette; fourth, Miller, on Metz Ogarta 4th.

Heifer Under One Year (6 in class)—First, Binnie, on Queen Lassie; second, Miller, on Snowflake's Queen; third, Binnie, on Ena Lass; fourth, same, on Coquette of Alta.

Exhibitor's Herd—First, Binnie, on Jim Delaney; second, Miller, on McDonald Lad.

Breeder's Young Herd (2 in class)—First, Binnie, on Elmer Lad; second, Miller, on King Donald.

Get of Sire (2 in class)—First, Binnie, on get of Heather Lad of Emerson; second, Miller, on get of Black Prince of Estel.

Produce of Cow (2 in class)—First, Miller, on produce of Ogarta; second, Binnie, on produce of Blackbird of Denison 34th.

Champion Bull, Any Age—Binnie, on Jim Delaney. Champion Cow, Any Age—Miller, on Snowflake 2d of Kirkbridge.

HEREFORDS.

There were but three herds represented in the white faces—all from Iowa. The classes were all nicely filled and some exceedingly breedy individuals were brought out. There were few examples of overfitting and in the main the white faces could be said to be in their every-day clothes. They were the kind, however, that here inspection when in this form. The exhibitors present were Green & Broughton, Lake View, Iowa (12 head); Edmonds, Shade & Co., Kingsley, Iowa (11 head); E. M. Cassidy, Whiting, Iowa (6 head). The following are the awards:

AWARDS.

Aged Bull—First, Edmonds, Shade & Co., on King Edward; second, Green & Broughton, on Dudley.

Bull Two Years and Under Three—First, Edmonds, Shade & Co., on Sir Albany 9th; second, Cassidy, on Don.

Bull One Year and Under Two—First, Edmonds, Shade & Co., on Passport Prize; second, Green & Broughton, on Leopold.

Bull Calf—First, Edmonds, Shade & Co. Aged Cow (3 in class)—First, Edmonds, Shade & Co., on Frances; second, Green & Broughton, on Elsie; third, same, on Fannie Crosby.

Heifer Two Years and Under Three (6 in class)—First, Edmonds, Shade & Co., on Columbus Lassie; second, same, on Delight 3d; third, Cassidy, on Valentine; fourth, same, on Topsy.

Heifer One Year and Under Two (5 in class)—First, Edmonds, Shade & Co.; second, same; third, Green & Broughton.

Heifer Calf (3 in class)—First and second, Edmonds, Shade & Co.; third, Green & Broughton.

Aged Heifer (2 in class)—First, Edmonds, Shade & Co.; second, Green & Broughton.

Young Heifer (2 in class)—First, Edmonds, Shade & Co.; second, Green & Broughton.

Get of Sire (3 in class)—First, Edmonds, Shade & Co.; second, Green & Broughton; third, Cassidy.

Produce of Cow (3 in class)—First, Cassidy; second, Green & Broughton; third, Edmonds, Shade & Co.

Champion Bull (3 in class)—Edmonds, Shade & Co., on King Edward.

Champion Cow (2 in class)—Edmonds, Shade & Co., on Frances.

RED POLLS.

Although there were but twenty-seven Red Polls on exhibition last week at Sioux City, considerable interest was shown around the judging ring when the Red Poll classes were brought out. The winning animals in nearly all cases combined in a remarkable degree the beef and milk qualities. The mature animals had scale and the cows in most cases carried well-developed udders. The awards follow:

AWARDS.

Bull One Year and Under Two (5 in class)—First, Chas. Graff, Bancroft, Neb., on Captain; second, B. A. Samuelson, Kiron, Iowa, on Pleasant Hill Advance; third, same on Pleasant Hill Victor.

Bull Calf (4 in class)—First, Samuelson, on Henry; second, Frank Clause, Clare, Iowa, on Turner; third, same, on Rofer.

Cow Three Years or Over (6 in class)—First, Samuelson, on Maud; second, Graff, on Ruberta; third, Samuelson, on Edna.

Heifer Two Years and Under Three (3 in

Genasco Ready Roofing takes care of your building because it takes care of itself.

Roof economy lies not in costing little, but in lasting long. All so-called "ready roofings" made of coal-tar, or any imitation of asphalt, may be cheaper at first cost, but they dry out, break in the cold, melt in the sun, and disintegrate, long before the real asphalt Genasco shows a scratch.

The Trinidad Lake Asphalt we use in the making, gives *Genasco Ready Roofing* the power to resist years of weather—to take care of itself.

Easy to lay and always ready; several weights; mineral or smooth surface.

Write for Book N and samples. Ask your dealer for Genasco Ready Roofing.

THE BARBER ASPHALT PAVING COMPANY

class)—First, Graff, on Imo; second, Clause, on Cresco Boy 5th; third, Samuelson, on Aleda 2d.

Heifer One Year and Under Two (5 in class)—First, Graff, on Doss; second, Samuelson, on Primrose 4th; third, Clause, on Dawn 2d.

Heifer Calf—First, Samuelson, on Red Lady 2d; second, Clause, on Darling; third, same, on Melinda.

GALLOWAYS.

There were but two herds of shaggy coats shown at Sioux City last week, one by N. P. Clarke, of St. Cloud, Minn., and the other by A. F. Craymer, of Morris, Ill., the former showing eleven head and the latter fifteen. The following is the premium list:

AWARDS.

Aged Bull (1 in class)—Craymer, on Scottish Sampson.

Bull One Year and Under Two (4 in class)—First, Clarke, on Prince of Meadow Lawn; second, same, on Madalish; third, Craymer, on Flagman of Rivers.

Bull Under One Year (4 in class)—First, Clarke, on Victor of Meadow Lawn; second, same, on Meadow Lawn Madalish; third, Craymer, on Grandee of Rivers.

Aged Cow—Craymer, on Imp. Princess Mable.

Cow Two Years and Under Three (2 in class)—First, Clarke, on Soney Meadow Lawn; second, Craymer, on Prudie of Rivers.

Cow One Year and Under Two (4 in class)—First, Clarke, on Cora of Meadow Lawn; second, same, on Sadie of Meadow Lawn; third, Craymer, on Mischief of Rivers.

Heifer Under One Year (5 in class)—First, Clarke, on Lady Douglass 3d; second, same, on Lady Belle 4th; third, same, on Primrose.

POLLED DURHAMS.

The Ardmore Stock Farm, of Holstein, Iowa, and David Wehtervy, of Dow City, Iowa, were the only exhibitors of Polled Durhams at Sioux City last week, and the number of entries brought out by each breeder was small. The animals, however, were what one might call typical Short-horns with the horns off.

FAT STEERS.

It is rather surprising that our large fairs do not succeed in creating a greater interest in the showing of fat steers. Breeders of beef cattle ought to have a good steer in mind as a model, because the block is the final test. At Sioux City last week a number of classes of fat steers were shown. In the two-year-old steers Mr. W. J. Miller, of Metz, Iowa, won first, second and third. He also won first and third on a yearling steer against four Short-horns and one Hereford, while N. A. Lind, of Rolfe, Iowa, carried away second honors in the yearling classes on a Short-horn, and Mr. A. C. Binnie, of Alta, Iowa, fourth on an Angus. Mr. Lind won first with the Short-horn on the steers under one year old against five doddies, second and third going to Miller and fourth to Binnie. In the champion group of prizes Mr. Miller won first, second and fourth and Mr. Binnie third. Sweepstakes and champion premium on best steers were won by Miller.

HORSES.

The showing of horses made at Sioux City last week was an exceedingly creditable one. A number of exhibitors who were taking in the circuit of large fairs were on hand with a few choice ones. Mr. H. G. McMillan, of Rock Rapids, Iowa, for example, showed fifteen, among this number being the famous Percheron stallion, Olbert, the winner at last year's International, and also the first-prize horse at the Minnesota State Fair this year. Finch Bros., of Joliet, Ill., were there with some good young Shires and Clydes. The following is a complete list of the exhibitors of good horses, draft breeds, together with the number brought out by each exhibitor: H. G. McMillan, Rock Rapids, Iowa (15 Percherons); Alex. Calder, Tecumseh, Neb. (5 Clydesdales and 1 French Coach); Rhea Bros., Arlington, Neb. (7 Percherons); Finch Bros., Joliet, Ill. (4 Percherons, 5 Belgians, 12 Shires); Billiter, Burruss & Billiter, Carroll, Neb. (9 Percherons, 1 Belgian); L. L. Goreham, Odeholt, Iowa (1 Percheron); Chas. Boone, Sioux City, Iowa (1 Shire); Joseph Bernard, Correctionville, Iowa (2 Percherons); George Hirschman, Pierson, Iowa (6 Percherons). Professor Curtiss made the awards as follows:

PERCHERONS.

Aged Stallion (7 in class)—First, McMillan,

on Olbert; second, Rhea Bros., on Frenen; third, Billiter, Burruss & Billiter, on Bizette.

Stallion Over Two and Under Three (5 in class)—First, Rhea Bros., on Carlo; second, McMillan, on Childebert; third, Rhea Bros., on Rahoteur.

Stallion Over One Year and Under Two (6 in class)—First, McMillan; second, Rhea Bros., on Jumbo; third, McMillan.

Yearling Stallion (5 in class)—First, Rhea Bros.; second and third, McMillan.

Horse Foal (1 in class)—Jos. Bernard.

Aged Mare (4 in class)—First, McMillan, on Eloise; second, Geo. Hirschman, on Surprise; third, McMillan, on Ruby.

Mare Over Three Years and Under Four (2 in class)—First, McMillan, on Iolanthe; second, same, on Antonette.

Mare Over Two Years and Under Three (2 in class)—First and second, McMillan.

Yearling Mare (4 in class)—First, Hirschman; second and third, McMillan.

Get of Sire (1 in class)—McMillan, on get of Calypso.

Produce of Mare—McMillan.

CLYDESDALES AND SHIRES.

Aged Stallion (4 in class)—All ruled out because of defects.

Stallion Over Two and Under Three (3 in class)—First and third, Finch Bros.; second, Calder.

Stallion Over One Year and Under Two (2 in class)—First and second, Finch Bros.

Yearling Stallion (3 in class)—Finch Bros.

Mare—Finch Bros. had the only entry in Shires, showing an aged mare, a three-year-old and a yearling filly; Alex. Calder had the only exhibit in Clydes—a pair of two-year-olds.

Get of Sire—Finch Bros. had the only entry, showing four head the get of Dunsmore Justice.

Produce of Mare—Owned by Finch Bros.

BELGIANS.

Aged Stallion (4 in class)—First and third, Finch Bros.; second, Billiter, Burruss & Billiter.

Stallion Two Years and Under Three (1 in class)—Finch Bros.

Stallion One Year and Under Two (1 in class)—Finch Bros.

Only one Belgian mare on exhibition, she owned by Finch Bros.

SWINE.

Sioux City Fair may have fallen far below some of the high state fairs in some of its departments, but in hogs the exhibit last week was right up among the big ones. There was something like 800 head on exhibition, and this number would have been materially increased had suitable accommodations been provided. There were 350 Durocs, 300 Poland Chinas, 100 Chester Whites, sixty Berkshires and a few Tamworths. The list is largely made up of breeders whose business it is to produce good hogs. Judging was done by L. H. Roberts, of Paton, Iowa; H. F. Hoffman, of Washta, Iowa, and John Cox, of Harlan, Iowa.

POLAND CHINAS.

In the Poland China classes the competition was strong, the quality high and the interest never lagged. There were many state fair winners here to compete for the prizes. In point of numbers the Polands were next to Durocs. The following are among the breeders present: E. M. Metzger, Fairfield, Iowa (25 head); A. C. Lanham, Battle Creek, Iowa (10 head); W. N. Booth, Danbury, Iowa (8 head); Held Bros., Hinton, Iowa (20 head); Henry Bros., Le Mars, Iowa (16 head); O. D. Hart, LeMars, Iowa (18 head); A. J. Brower, Sioux City, Iowa (22 head); John Miller, Rock Valley, Iowa (23 head); J. A. Benson, Primghar, Iowa (6 head); J. J. Short & Son, Sutherland, Iowa (1 head); S. A. Roeder & Son, Sioux City, Iowa (13 head); John Heeren, Carroll, Neb. (7 head); F. H. Long, Manning, Iowa (12 head); Wm. Bales, Allen, Neb. (7 head); E. H. Maurer, Vermillion, S. Dak. (6 head); Frank Brown, West Side, Iowa (16 head); Jno. Schmieder, Remsen, Iowa (18 head); D. F. Shannon & Book Bros., Storm Lake, Iowa (22 head); Fred Dralle, Struble, Iowa (18 head); W. C. Lookingbill, Sac City, Iowa (18 head). The following are the

AWARDS.

Aged Boars (6 in class)—First, Henry Bros., on Matchless Jr.; second, Johnson, on Chief Tecumseh 4th; third, Miller, on Columbia Chief 2d; fourth, Long, on Monarch Jr.

Boar One Year and Under Two (19 in class)—First, Shannon & Book Bros., on Shannon's E. L.; second, Lanham, on L's Sunshine; third, Lookingbill, on Village Meddler; fourth, Metzger, on Dude's Winner.

Boar Six Months and Under One Year (29 in class)—First, Henry Bros., on Meddler Jr.; second, Held Bros., on Royal Perfection; third, Benson, on Spruce Line; fourth, Schmieder, on a son of W. S. Choice.

Boar Under Six Months—First, Schmieder, on a son of Winning Perfection; second, same, on a son of Shake Hands 3d; fourth, Lanham, on a son of Keep On Jr.; fourth, Metzger, on a son of Winning Dude.

Aged Sow (3 in class)—First, Lookingbill, on Perfection Queen; second, Long, on Top Notch; third, Miller, on Mollie Surprise.

Sow One Year and Under Two (12 in class)—First, Henry Bros.; second, Metzger; third and fourth, Shannon & Book Bros.

Sow Under One Year (27 in class)—First, Henry Bros.; second, Hart; third, Metzger; fourth, Lookingbill.

Sow Under Six Months (14 in class)—First, Metzger; second, Lookingbill; third, Bales; fourth, Dralle.

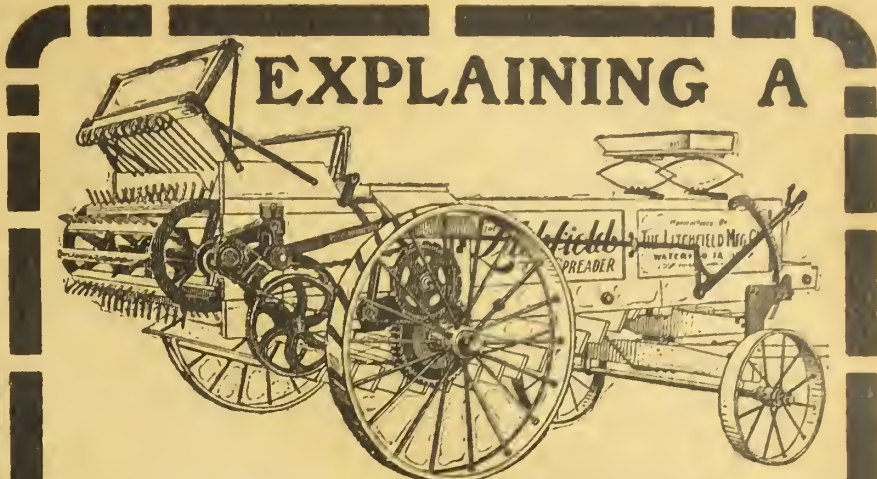

Aged Herd (3 in class)—First, Shannon & Book Bros., on herd headed by Shannon's E. L.; second, Metzger, on herd headed by Dude's Winner; third, Henry Bros., on herd headed by Matchless Perfection.

Herd Bred by Exhibitor—First, Shannon & Book Bros., on herd headed by Shannon's E. L.; second, Metzger, on herd headed by Dude's Winner; third, Henry Bros., on herd headed by Matchless Perfection.

Young Herd (5 in class)—First, Henry Bros.; second, Lookingbill; third, Metzger; fourth, Held Bros.

Herd Bred by Exhibitor—First, Henry Bros.; second, Lookingbill; third, Metzger; fourth, Held Bros.

Get of Sire (7 in class)—First, Henry Bros., on get of Matchless Jr.; second, Metzger, on get of Dude's Winner; third, Dralle,

COLD WEATHER MANURE SPREADER.

HOW many farmers wait for a suitable time to haul out manure in the winter because the spreader won't work in the freezing weather, or because the snow is deep, or because the ground is slippery?

We ask our dairy farmers, "How about this?" If you are in the market for a Spreader, do you want one you can use every day in the year to suit your convenience or will you, because you are told that a complicated return-conveyer machine is "just as good" or because you can save \$10 on the purchase price, be induced to accept a machine that can only be used when conditions are favorable?

The Litchfield self-cleaning, no-choke, endless conveyer, never clogs or freezes in the most severe weather, or interferes in any way with free, unobstructed action. You can load this every-day machine from your cow barn on any day in the year, no matter if you have 20 degrees below zero weather, no matter if the snow is three feet deep, no matter if the ground is icy and slippery, no matter if the mud is hub deep, it always works and always goes.

The Litchfield Spreader does not do all this without a good and sufficient reason. Look this machine over. Study the conveyer. It is endless and the lower, or unused part, is open because the slats or sections hang down edgewise and this lets everything fall through to the ground. This is why it is automatic cleaning or non-choking. No other spreader made has the hinged slats or sections. These hinged sections lie flat on top when conveying the load and hang down edgewise when passing under. This prevents the accumulation that would otherwise form and freeze on. This also prevents the clogging up in warm weather until something has to break.

When this machine is through, it is through. No scattering of the accumulated material while the apron is being returned to position. You can take a load out in snow drifts and put it off evenly and just as regularly as you can any other time. This is because of the light-running heater wheel and the wide, round-edged tires. The reason this heater wheel runs so easy on heavy duty work is because it takes hold of the material in an entirely different manner from all other wheels as used on all other machines. This counts in snow banks, on ice and in mud holes.

Do not depend on what we say, but just take the first opportunity to inspect this cold-weather, all-the-year-round Spreader. It knows how to talk for itself. Guaranteed for five years. More next week.

THE LITCHFIELD MFG. CO. P. O. Box A388, WATERLOO, IOWA

on get of Latest Chief; fourth, Lookingbill, on get of Sunshine Lad.

Produce of Sow (4 in class)—First, Miller, on produce of Lilly; second, Lookingbill, on produce of Black Beauty; third, Metzger, on produce of Golda U. S.; fourth, same, on produce of Sensation Queen.

Sweepstakes Boar—Henry Bros., on Matchless Jr.

Sweepstakes Sow—Lookingbill, on Perfection Queen.

DUROC JERSEYS.

The following breeders were present: G. B. Moon, Manson, Iowa (7 head); F. J. Clouss, Clare, Iowa (15 head); A. J. Hicks, Manson, Iowa (10 head); Easton Bros., Galva, Iowa (16 head); Geo. Gertzen, Alton, Iowa (12 head); J. Roghair, Orange City, Iowa (16 head); Clark & Tryon, Wausa, Neb. (6 head); Robert Pritchard, Carroll, Neb. (12 head); J. W. Reynolds & Son, Defiance, Iowa (10 head); J. E. Wehr, Portsmouth, Iowa (21 head); Edmonds, Shade & Co., Kingsley, Iowa (13 head); M. Mihills, Norfolk, Neb. (18 head); A. B. Winger, Kingsley, Iowa (19 head); H. R. Bell, Lawton, Iowa (21 head); E. A. Stolt, Leeds, Iowa (8 head); Norrish & Bevington, Kingsley, Iowa (16 head); M. S. Moats & Son, Randolph, Neb. (6 head); R. A. Tawney, Pierce, Neb. (19 head); E. J. Compton, Navell, Iowa (12 head); Robbins Bros., Lyons, Neb. (19 head); Sol Franks, Sioux City, Iowa (8 head); H. L. Cantine, Holstein, Iowa (12 head); W. A. Staples & Sons, Glidden, Iowa (6 head); A. D. Mackrill, Platte, S. Dak. (16 head); G. Soesbe & Son, Wagner, S. Dak. (1 head); Jos. Short, Sutherland, Iowa (6 head); A. C. Cummings, Leeds, Iowa (6 head). The following are the

AWARDS.

Aged Boar (10 in class)—First, Winger, on W's King; second, Norrish & Bevington, on Pericles H.; third, Moats, on Duroc Challenger Wonder; fourth, Gertzen, on Sioux Grove.

Boar One Year and Under Two (12 in class)—First, Easton Bros., on Iowa Notcher; second, Norrish & Bevington, on Cedar Lawn Model; third, Moats, on Crimson Critic; fourth, Edmonds, Shade & Co., on American Royal Jr.

Boar Under One Year (8 in class)—First, Easton Bros.; second, Norrish & Bevington; third, Wehr; fourth, Mackrill.

Boar Under Six Months (36 in class)—First, Pritchard; second, Mackrill; third, Roghair; fourth, Robbins Bros.

Aged Sow (3 in class)—First, Edmonds, Shade & Co., on Royal Blossom 5th; second, Easton Bros., on Sunshine Tena; third, Compton, on Shadynook Beauty; fourth, Roghair.

Sow One Year and Under Two (15 in class)—First, Frank, on Marie Antoinette; second, Edmonds, Shade & Co., on Lady Shadeland; third, Easton Bros., on King Lady 2d; fourth, Clouss, on Wick's Model.

Sow Under One Year (10 in class)—First, Edmonds, Shade & Co.; second, Easton Bros.; third, Clouss; fourth, Winger.

Sow Pig Six Months or Under (34 in class)—First and second, Pritchard; third, Winger; fourth, Edmonds, Shade & Co.

Boar and Three Sows Under One Year (8 in class)—First, Pritchard; second, Easton Bros.; third, Clouss; fourth, Robbins Bros.

Boar and Three Sows Under One Year, Bred by Exhibitor (8 in class)—First, Pritchard; second, Easton Bros.; third, Robbins Bros.; fourth, Edmonds, Shade & Co.

Boar and Three Sows, Any Age, Bred by

Exhibitor (4 in class)—First, Gertzen; second, Norrish & Bevington; third, Moats; fourth, Edmonds, Shade & Co.

Get of Sire, Any Age (12 in class)—First, Gertzen; second, Moats; third, Edmonds, Shade & Co.; fourth, Mackrill.

Produce of Sow—First, Mackrill; second, Pritchard; third, Robbins Bros.; fourth, Winger.

Aged Herd (5 in class)—First, Easton Bros.; second, Edmonds, Shade & Co.; third, Gertzen; fourth, Norrish & Bevington.

Champion Boar—Winger, on W's King.

Champion Sow—Edmonds, Shade & Co.

BERKSHIRES.

In this class but three herds were represented: The Ardmore Stock Company, Holstein, Iowa (23 head); J. F. Wheeler, Albert City, Iowa (25 head); C. S. Buckley, Holstein, Iowa (13 head), but the competition was strong and the showing spirited. The following are the awards:

AWARDS.

Aged Boar (1 in class)—Ardmore Stock Company, on Royal Improver.

Boar One Year and Under Two (4 in class)—First, Ardmore Stock Company, on Stumpy Pat; second, Ardmore Stock Company, on Typesetter; third, Wheeler, on Ideal Victor; fourth, Wheeler, on Flossie's Duke.

Boar Six Months and Under Twelve (5 in class)—First, Ardmore Stock Company, on Royal Majestic; second, Buckley, on Conquest II.; third, Wheeler, on Model Victor; fourth, Wheeler, on Model Victor.

Boar Under Six Months (11 in class)—First, Buckley, on Conquest II.; second, same, on Conquest II.; third, Wheeler, on Baron Knight; fourth, Ardmore Stock Company, on St. Patrick of Ardmore.

Aged Sow (4 in class)—First, Buckley, on Pretty Face; second, Ardmore Stock Company, on Columbia Ardmore 7th; third, Wheeler, on Nora B.; fourth, same, on Ardmore Lady.

Sow Twelve Months and Under Twenty-four (4 in class)—First, Buckley, on Inez; second and third, Ardmore Stock Company; fourth, Wheeler, on Dot.

Sow Six Months and Under Twelve (5 in class)—First, Ardmore Stock Company, on St. Patrick; second, same, on St. Patrick; third, Wheeler, on Model Victor; fourth, Buckley, on Topsy.

Sow Under Six Months (7 in class)—First, Buckley, on Conquest II.; second, Ardmore Stock Company, on St. Patrick of Ardmore; third, Wheeler, on Model Victor; fourth, Ardmore Stock Company, on St. Patrick of Ardmore.

Boar and Three Sows Over One Year (2 in class)—First, Ardmore Stock Company, on Typesetter; second, Wheeler, on Ideal Victor.

Boar and Three Sows Over One Year, Bred by Exhibitor (2 in class)—First, Ardmore Stock Company, on Typesetter; second, Wheeler, on Ideal Victor.

Boar and Three Sows Under One Year (3 in class)—First, Ardmore Stock Company, on Royal Majestic; second, Buckley, on Ireland; third, Wheeler, on Model Victor.

Boar and Three Sows Under One Year, Bred by Exhibitor (3 in class)—First, Ardmore Stock Company, on Royal Majestic; second, Buckley, on Ireland; third, Wheeler, on Model Victor.

Get of Sire (6 in class)—First, Ardmore Stock Company, on St. Patrick of Ardmore; second, same, on Royal Majestic; third, Buck-

FIRE PROOF ROOFING

I WANT to tell you how I make roofing without tar, so that it will resist fire. I want to tell you why my "No-Tar" Roofing enables you to get lower Fire Insurance rates.

Send me your name and address on a post card, and I will write you a personal letter all about my roofing.

I will also send you a sample of it to test and a copy of my FREE book on how to lay roofing without outside help, and only a sharp knife and hammer for tools.

My "No-Tar" Roofing is the only roofing that is weather, water, acid and almost wear proof, as well as Fire Proof.

It won't crack in cold weather, nor melt in the hottest sun.

You ought to send for my book at once if you have any roof that needs fixing.

"No-Tar" Roofing

is the best for new buildings, the kind for re-roofing old buildings, and the easiest to patch with.

Let me tell you how I can save you a lot of money and give you the best roof protection you ever heard about.

Write me a post card today.

H. W. BINNIE, President,

THE HEPPESS CO.

2401 Fillmore St., Chicago.

ley, on Conquest II.; fourth, Wheeler, on Model Victor.

Produce of Sow (3 in class)—First, Buckley, on produce of Pretty Face; second, Ardmore Stock Company, on produce of Bright H.; third, Wheeler, on produce of Nora Dimple.

Champion Boar Any Age—Ardmore Stock Company, on Typesetter.

Champion Sow Any Age—Buckley, on Inez.

CHESTER WHITES.

The Chester Whites shown at the Sioux City fair composed a fine class of hogs and were given more attention than in former years. The sentiment seemed to be that this breed is growing in popularity and many a Duroc and Poland China breeder were heard to remark that "this is a fine showing of the whites." The following breeders were present: Wm. Hanson, Inwood, Iowa (6 head); A. A. Rogers, Inwood, Iowa (30 head); E. J. Brouhard, Colo, Iowa (29 head); J. P. Turin, Kiron, Iowa (16 head); Frank Martine, Storm Lake, Iowa (14 head); A. B. Heath, Newell, Iowa (14 head). The following awards were made:

Aged Boar (2 in class)—First, Martin, on White Oak; second, Hanson, on Wellington.

Boar One Year and Under Two (7 in class)—First, Brouhard; second, Heath, on Monte Cristo; third, Rogers, on Seductor; fourth, Brouhard.

Boar Six Months and Under One Year (6 in class)—First, Brouhard; second, Rogers; third, Heath.

Boar Under Six Months (13 in class)—First, Brouhard; second and third, Rogers. Aged Sow (8 in class)—First, Brouhard, on Iowa Belle; second, Rogers, on Bacon Bess; third, Turin, on Lady Eclipse.

Sow One Year and Under Two (6 in class)—First, Brouhard, on Hazel; second, same; third, Rogers, on Curly 3d; fourth, Heath, on Snow 7th.

Sow Six Months and Under One Year (7 in class)—First, Brouhard, on Pansy 1st; second, same, on Pansy 2d; third, same; fourth, Turin.

Sow Under Six Months (18 in class)—First, Brouhard; second, Hanson; third, Heath; fourth, Turin.

Boar and Three Sows Over One Year (3 in class)—First, Brouhard; second, Rogers; third, Turin.

Boar and Three Sows Bred by Exhibitor (4 in class)—First and second, Brouhard; third, Rogers; fourth, Turin.

Boar and Three Sows Under One Year (3 in class)—First and second, Brouhard; third, Rogers; fourth, Turin.

Get of Sire, Bred by Exhibitor (5 in class)—First and third, Brouhard; second, Rogers; fourth, Turin.

Produce of Sow (4 in class)—First, Rogers, second, Brouhard; third, Turin; fourth, Hanson.

Sweepstakes Boar—Brouhard.
Sweepstakes Sow—Brouhard.

SHEEP.

It is very evident by the display of sheep at the interstate fair that exhibitors in the territory near Sioux City have not become enthused over that industry. There were two small lots of Shropshires exhibited by J. Roghair, of Orange City, Iowa, and S. Swearingen, of Hornick, Iowa, and Joseph Bernard, of Anthon, Iowa, exhibited some Cotswolds. No attempt was made to fill the classes, the whole being shown as a display.

POULTRY.

The poultry house was well filled with almost all the varieties and this was a place

of interest to visitors almost all the time. The awards were made in the poultry house by J. L. McCorkle, of Akron, Iowa, who pronounced it the best show that had ever been held on the grounds. Had there been many more fowls to place on exhibition additional quarters would have been necessary.

FAIR NOTES.

In the fat steer class was a Short-horn that no feeder would put in the feed lot if he were judged by his head, but the body was good enough to get second place in his class.

The method of showing all kinds of live stock at Sioux City could be very much improved, and if the fair is to advance more attention should be paid to making the stock quarters convenient.

The heat of Sunday and Monday was so intense that Mr. Fred Dralle, of Struble, Iowa, lost five of his choice Polands while on the way to the Sioux City Fair. This helps to make up the unpleasant side of the life of an exhibitor.

It was noticeable that Mr. Charles Steele had a good string of Short-horn bulls at the interstate. Among other good bulls we saw while there were some that belonged to Walpole Bros. In these bulls we find some excellent animals that will be heard from later in the ring, as well as on breeding farms.

A daughter of C. S. Buckley, of Holstein, Iowa, showed some very fine Short-horns and was very much gratified when one of her own animals, a yearling heifer, was taken from near the foot of the class and given second place. The heifer was put where she belonged and we therefore doff our hats to the young lady.

The cattle show at the interstate was far ahead of anything heretofore shown at Sioux City. The same can be said of the hog show, there being twice as many hogs as at any previous fair at the interstate. It is safe to say that many animals that were not winners are still good enough to bring top prices at some of the sales that will be held in the near future.

In the sweepstakes Short-horn bull class at the interstate fair the decision was very close and the ringside people were divided as to where the prize ought to go. Professor Curtiss for a long time debated in his mind whether it should go to the bull, Superbus, owned by the Ardmore Stock Company, or to the Clarke bull which won in his class. The judge finally put him up ahead.

Some confusion was evident in the manner of showing hogs. Mr. Roghair, of Orange City, Iowa, had some pigs showing in the class of produce of sow and the judges never saw them until the awards had been made. One of the judges said he would have been placed in the money and of course was sorry that he had been overlooked. Superintendents should endeavor to secure a square deal for all.

It is safe to say that visitors at the Interstate Fair were not proud of the saloon that did a thriving business under the grand stand all through the week. This is a very conspicuous place and in sight of men, women and children and must have its demoralizing effect on the people. If this fair is to be made a success the beer clause ought to be cut out. The Iowa State Fair could not live long with a saloon running like the one in the interstate grounds.

showing stock; even yet there is an overflow that was put in tents. The grounds have been parked and nicely drained and new walks put down. In a rapidly developing fair, perfect organization is not always possible, and details will be slighted; however, in the future there should be issued an indexed entry catalog, containing names of animals and such data as will make the stock show more comprehensive to those who watch the judging from the amphitheater seats. Unless every animal is placarded with a number corresponding to the entry number, the spectators are in absolute ignorance of what is occurring in the rings, and valuable information thus lost. A closer surveillance of eating houses which become careless in the matter of refuse will undoubtedly be maintained in the future. A very unfortunate thing occurred in the loss of some of the prize animals by being held too long at the fair destination and overcome with heat. A thing of this kind will certainly not happen again if the fair's interests are to be guarded, and there is every indication that they will be.

Splendid inducements were offered for a display of the products of garden, field and factory in the agricultural department, which resulted in a well-balanced exhibit. The educational idea was prominent and well planned by the agricultural college and state horticultural society. The best varieties of fruits for farm orchards, and hardy new varieties for market were shown interestingly. About 2,000 plates of apples and other fruits in proportion comprised the hort-

Poland China Barrow. Age 18 months. Weight 1,035 pounds. Fed on Iowa Stock Food Bred and owned by Peter Houw, Orange City, Iowa.

FREE To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 20 cents in stamps for postage and packing. Address Dept. A.

IOWA STOCK FOOD CO., JEFFERSON, IOWA

icultural exhibit and told of the large extent of the fruit interests of the state. Honey, ginseng, tobacco and many other products made the display a complete one. The county display included eleven participants and some very complete and well-arranged booths were to be seen. One of the foremost in excellence was that of Marathon county, where the idea of agricultural education in common schools is being fostered. Prize money to the amount of \$1,500 was divided among the best displays. The machinery men occupied ten acres, with a most complete showing of farm implements, and many were the suggestions that visitors received concerning the saving of labor on the farm.

The live stock show was the best ever held in the state, and better classes than those that came out for adjudication in some of the breeds are not seen in any fair of similar importance. While all breeds made a creditable showing, the Short-horns and Percherons were in advance. Dairy cattle were strong in the number of breeds and comprised about half of the cattle show in point of numbers. The totals were in round numbers 150 horses and 400 cattle, and but few of this number came from outside the state. A grand parade was the final educational feature. It may be safely said that as a producer of good stock, Wisconsin has a bright future and from the flocks and fields may be expected many prize-winners in the years to come.

The Wisconsin Draft Horse Breeders' Association and the state board of agriculture offered very liberal support to the horse show in the way of prize money to special and farmers' classes. The former organization is the result of the efforts of Dr. Alexander and the intention of its members is to place the business of breeding horses on sound principles that will lead to definite results. That inestimable good will be accomplished by this movement is already demonstrated in the showing made from one of its strong centers, the Richland County Horse Breeders' Association. During the last two years this organization has placed forty Percheron mares of pure breeding in their community and the result is that they played a very prominent part in the show. Jay-Eye-See, the famous combination pacer and trotter, now twenty-eight years old, was an attraction to many fair visitors.

Dairy Hall contained a nice display of dairy products, but good organization was lacking. The cheese display contained about 200 entries, and of many varieties, while the butter exhibit was solely comprised of firkins, tubs and packages of the golden product for the scoring contest. A much more extensive exhibit might be expected in a state that produces annually \$55,000,000 worth of these products. Much interest would have been added to the exhibits had

they been placarded or described in some manner to indicate their prominence in the exhibit. A milking machine in actual operation was a drawing card that was of interest to all, while dairy machinery was well displayed by manufacturers. The state veterinarian demonstrated the danger of the transmission of tuberculosis to swine by the feeding of dairy by-products. Actual specimens of diseased parts were explained and forcefully impressed observers with the importance of combating this dread disease in their herds.

Officials and patrons of the Wisconsin State Fair are highly gratified over the result of this year's show. Every department has made a better and larger display than heretofore. While the policy of the management is to encourage exhibitors from outside the state to attend, it is not the idea to allow the farmer, who is to be ultimately benefited by these fairs, to be slighted for the purpose of making a national institution out of what should properly be a state affair. The Milwaukee fair affords the opportunity to see and study the products of Wisconsin soil and the results of Wisconsin industry.

CATTLE.

SHORT-HORNS.

A better exhibit of the red, white and roans than that shown at the Wisconsin State Fair this year is rarely seen. There were many reasons for such an assertion. Every exhibitor was a native of the state, and with such a nucleus as the herd of Whitehall Sultan's fame, breeders are fast pushing their stock to a high standard of excellence. The show was not confined in its excellence to a few stars, but there were herds that were way above the rank and file of Short-horns in merit. Classes were well filled and with the exception of some animals that were undersized the showing was most gratifying to stockmen. Among those working to improve this breed are men with some of the best years of life before them, which fact should make Wisconsin one of the strongest Short-horn centers in the country in coming years. The most exciting contest was that waged over champion bulls. A most eager crowd of talent eyed every movement of Mr. Thomas Clark as he made a detailed examination of Whitehall Marshall, then of Royal Sultan, before he could make the first bull his choice. His remark that "they were two of the best bulls he had seen in many a day" was generally conceded without condition. Some surprise was occasioned in the choice of Helen of Troy for first in the two-year-old class, although she is a most exceptional animal, and if she should meet her rival again this season the decision will be interesting. Those who showed were F. W. Harding, Waukesha, Wis. (16 head); E. D. Jones & Son, Rockland, Wis. (7 head); Herr Bros. & Reynolds, Lodi, Wis. (14 head); R. C. Jones, Oregon, Wis. (13 head); A. A. Arnold, Galesville, Wis. (11 head); Divan Bros., Ludlow, Wis. (11 head); W. J. Bernd, New Richmond, Wis. (11 head); G. Hatch, Wisconsin.

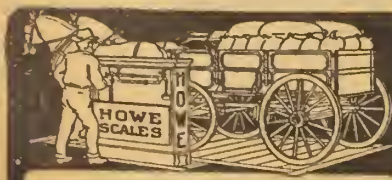

AWARDS

Aged Bull—First, Harding, on Whitehall Marshall; second, Jones, on Young Demon; third, Jones & Son, on Lord Harvester; fourth, Bernd, on Archer Hulstead; fifth, Divan Bros., on Caesar Augustus; sixth, Arnold & Son. A nice handling roan filled second place. He was criticized for being small in the heart, otherwise he was much the best bull for the place. Two bulls of

WISCONSIN STATE FAIR

Monday of last week, the first day of the Wisconsin fair, opened under most auspicious weather conditions, which continued throughout the week, and as a result the total attendance for the week was close around the 150,000 mark. Opening day was children's day and Fair Park was practically turned into an immense playground for the youngsters who found unbounded delight in the Indian village, the stock and extensive poultry and pigeon display and other well-selected amusements on the grounds. Gate receipts show an increase of about 30 per cent over last year's fair.

Under the aggressive management of President McKerrow and his cabinet, many badly needed improvements have been realized, with more to follow. A splendid new live stock amphitheater and three new barns have greatly improved the facilities for keeping and

50 YEAR SCALES

That's how long the famous Howe Farm Scales have been in use. Many of the first ones set are still in use. Standard everywhere. Absolutely correct weight. No other like them for satisfactory service. Investigate before you buy. Send for free book of details.

HOWE SCALE CO., OF ILL.
50-52 Lake St., Chicago, Ill.

fair type contested for third place, with the result that Lord Harvester, a somewhat undersized animal, won over Archer Hlastead, which was not as smooth-bodied a type.

Bull Two Years Old—First, Herr Bros. & Reynolds, on Royal Sultan; second, Divan Bros., on Caesar LaCrosse; third, Dawson, on Feunmore Coburn.

Yearling Bull—First, Herr Bros. & Reynolds, on Royal A.; second, Bernd, on Choice Archer; third, same, on Home Archer.

Senior Bull Calf—First, Harding, on Anoka Sultan; second, same, on Gloster Marshall; third, Herr Bros. & Reynolds, on Commodore; fourth, same, on Lassie's Last; fifth, Jones, on Dalmeny Boy; sixth, Divan Bros., on Fashionable Augusta. Harding's white bull won first in this class easily, but for second place there were two very good youngsters that gave the judge some interesting work. Commodore, a roan of trim lines and low set build, would probably have been more favored by the ringside had he carried more flesh over his crops and loin, which point was a strong one in the final choice for second.

Junior Bull Calf—First, Herr Bros. & Reynolds, on Sultan of Lodi; second, Harding, on The Goods; third, same, on Sultan Commander; fourth and fifth, Jones.

Aged Cow—First, Harding, on Princess Flora 2d; second, same, on Money Fluffie Maid; third, Bernd, on Lady Lovell 4th; fourth, Jones, on Louise; fifth, Herr Bros. & Reynolds, on Mary Ann of Variety Grove; sixth, Divan Bros., on Rose Cadiz.

Cow Two Years Old—First, Herr Bros. & Reynolds, on Helen of Troy; second, Harding, on Anoka Broadhooks; third, Jones, on Roan Lady; fourth, Divan Bros., on Bonnie Belle; fifth, Bernd, on Rosy Jane.

Yearling Heifer—First, Harding, on Missie Browndale; second, same, on Clara Belle; third, same, on Fanny Lovell; fourth, Herr Bros. & Reynolds, on Mamie Abbottsburn; fifth, Jones, on Lady Helen Marr; sixth, Herr Bros. & Reynolds, on Bernice. The Abbottsburn heifer was a close rival for third place, having plenty of size and quality, but a bit off at the crops and heart. The three first heifers are certainly an exclusive trio in any company.

Senior Heifer Calf—First, Harding, on Anoka Gloster 2d; second, same, on Broadhooks Sultana; third, Herr Bros. & Reynolds, on Lady Sultan; fourth, Harding, on Claret; fifth, Jones, on Lady Englewood; sixth, Herr Bros. & Reynolds, on Mabel. Half of the twelve classes that made a showing in this lineup were of very notable uniformity in type and quality. However, there was more difference in condition and minor points of excellence on which the decisions were made.

Junior Heifer Calf—First, Herr Bros. & Reynolds, on Royal Lady; second, Harding, on Ramsden Flower; third, Divan Bros., on Fairy Belle; fourth, Harding, on Roan Lady 5th; fifth, Bernd, on Happy New Year.

Four Animals, Get of One Sire—First, Harding, on get of Whitehall Sultan; second, Herr Bros. & Reynolds, on get of Royal Sultan; third, Jones, on get of Englewood; fourth, Harding, on get of Whitehall Marshall; fifth, Divan Bros., on get of Caesar Augustus.

Produce of Female—First and second, Harding; third, Divan Bros.; fourth, Jones. Exhibitor's Herd—First, Harding; second, Herr Bros. & Reynolds; third, Jones; fourth, Divan Bros.; fifth, Bernd.

Young Herd—First, Harding; second, Herr Bros. & Reynolds; third, Jones; fourth, Harding; fifth, Divan Bros.

Calf Herd—First, Harding; second, Herr Bros. & Reynolds; third, Jones.

Champion Bull Over Two Years—Whitehall Sultan.

Champion Cow Over Two Years—Helen of Troy.

Champion Bull Under Two Years—Anoka Sultan.

Champion Heifer Under Two Years—Missie Browndale.

HOLSTEIN FRIESIANS.

The Holsteins made a most successful exhibit at the Wisconsin State Fair. Easily the strongest in numbers and not excelled in general excellence by any of the standard breeds, lovers of these cattle should feel gratified over the showing. Moreover, it was a Wisconsin affair, with the exception of one breeder. Five breeders with very well-matched and properly-fitted herds brought out some full and close classes which were passed upon by Mr. F. H. Scribner, of Rosendale, Wis., in a very satisfactory and affable manner. Only with difficulty in some instances was Mr. Barney, of Iowa, able to carry away as many ribbons as he did. However, the general uniformity of dairy type shown in this herd made for it very consistent winning. The representation of Holsteins were in the hands of the following men: E.

J. Fargo, Lake Mills, Wis. (13 head); Rust Bros., Greenfield, Wis. (14 head); E. T. Carroll, Wales, Wis. (15 head); N. Grimm, Ringgold, Wis. (13 head); W. B. Barney & Co., Hampton, Iowa (12 head).

AWARDS.

Aged Bull—First, Barney & Co., on Jewell of Home Farm; second, Grimm, on Colanthus 2d Prince; third, Carroll, on Gold Coin Colanthus. All five bulls shown in this class were good Holsteins, the most common failing being perhaps not enough refinement, as is seen in the winners of the day. However, it is a question if this feature in breeding Holsteins may not be overdone.

Bull Two Years Old—First, Grimm, on Johanna Rue Lad; second, Grimm.

Yearling Bull—First, Barney & Co., on Captain Way; second, Rust Bros., on Sir Josephine Aaltaje Salo; third, Grimm.

Bull Calf—First, Fargo; second, Barney & Co., on Josephine Lad De Kol; third, Carroll, on Vievo Piebe. Some splendid type and character were reflected in the winners of this and the class previous.

Aged Cow—First, Barney & Co., on Parthena Hagerfeld; second, Fargo, on Barbetta 3d; third, Rust Bros., on Akkrummer Earnestina. Thirteen matronly-looking animals with good indications of large performance made this a notable class.

Cow Two Years Old—First, Barney & Co., on Florence Jewel De Kol 3d; second, Carroll, on Sluces Piebe De Kol; third, Grimm.

Yearling Heifer—First, Barney & Co., on Empress Gerben of Home Farm 3d; second, Rust Bros., on Aaltje Salo Netherline 5th 56th; third, Barney & Co., on Lustem Belljeek.

Heifer Calf—First, Barney & Co., on Lady Myrtle Gerben; second, Rust Bros., on Aaltje Salo Princess Paulee 2d; third, Carroll.

Get of Sire—First, Rust Bros., on get of Prince Inka Petertje De Kol 2d; second, Barney & Co., on get of Colanthus Lad 4th.

Produce of Cow—First and second, Rust Bros.

The four championships were awarded to Barney & Co.

ABERDEEN-ANGUS.

Mr. Thomas Clark, of Beecher, Ill., made the awards in the Angus classes and found no difficulty in making prompt and satisfactory decisions. The most important class was that of aged cows where three very smooth, typical forms headed by Glenfoill Rose attracted much admiration as they were led out of the arena. No entries in the two-year-old bulls made this end of the competition much smaller. The McHenry herd were in much better condition and won easily on their size and symmetry. The exhibitors were J. D. Hatch, Lancaster, Wis. (14 head); W. L. Hauser, Mondovi, Wis. (10 head); Alexander, Stuart Lumber Company, Warsaw, Wis. (12 head); W. A. McHenry, Denison, Iowa (11 head).

AWARDS

Aged Bull—First, McHenry, on Baden Lad; second, Hauser, on Morgan Farm; third, Alexander, Stuart Lumber Company, on Black Hawk.

Yearling Bull—First, McHenry, on Star of Denison; second, Hauser, on Ethelwold; third, Hatch, on Accepted.

Bull Calf—First, McHenry, on Prince Pico; second, Hauser; third, Hatch, on Curley Barba.

Aged Cow—First, McHenry, on Glenfoill Rose; second, Alexander, Stuart Lumber Company, on Elenor's Queen Fanny; third, Hauser, on Petosi's Dimple; fourth, Alexander, Stuart Lumber Company, on Rubicon Macnone; fifth, Hauser, on Ruth of Cherokee 2d; sixth, Hatch, on Duchess Hortense 3d.

Cow Two Years Old—First, McHenry, on Barbara McHenry 18th; second, Hatch, on A's Lucy; third, Alexander, Stuart Lumber Company, on Bessie Pine; fourth, Ethelwold Farm, on Ethelwold Dimple.

Yearling Heifer—First, McHenry, on Pride McHenry 45th; second, same, on Pride of Abess; third, Alexander, Stuart Lumber Company, on Key of Chicago; fourth, same, on Meadow Knight.

Heifer Calf—First, McHenry, on Blackbird 66th; second, same, on Pride of McHenry 57th; third, same, on Abess McHenry 7th; fourth, same, on Pride of McHenry 53d; fifth, Alexander, Stuart Lumber Company, on Minnie Pine.

Get of Sire—First, McHenry, on get of Bobbie Dobbs; second, Alexander, Stuart Lumber Company, on get of Barge Eclipse.

Produce of Cow—First and second, McHenry.

All championships went to McHenry.

HEREFORDS.

The showing of Herefords was made without creating any great interest from the standpoint of competition, as Cargill & McMillan, of LaCrosse, Wis., found no difficulty in taking the best ribbons. This fact would not necessarily signify that the remainder of the exhibit was not of good quality, for the LaCrosse herd have yet to meet their equal this season. Principle 4th was not at the show, which left the field open for other exhibitors. Royal, owned by A. C. Robinson & Son, took first in this class and had much the advantage in size over Capricornus, owned by H. N. Thomson, whose animals were hardly in the finish to handle and show as much flesh as is desirable. The exhibitors who appeared are as follows: Cargill & McMillan, LaCrosse, Wis. (12 head); H. N. Thomson, Woodstock, Ill. (8 head); J. C. Robinson & Son, Evansville, Wis. (11 head). Mr. Thomas Clark made the awards without any difficulty.

AWARDS

Aged Bull—First, Robinson & Son, on Royal; second, Thomson, on Capricornus.

Bull Two Years Old—Cargill & McMillan, on Privateer.

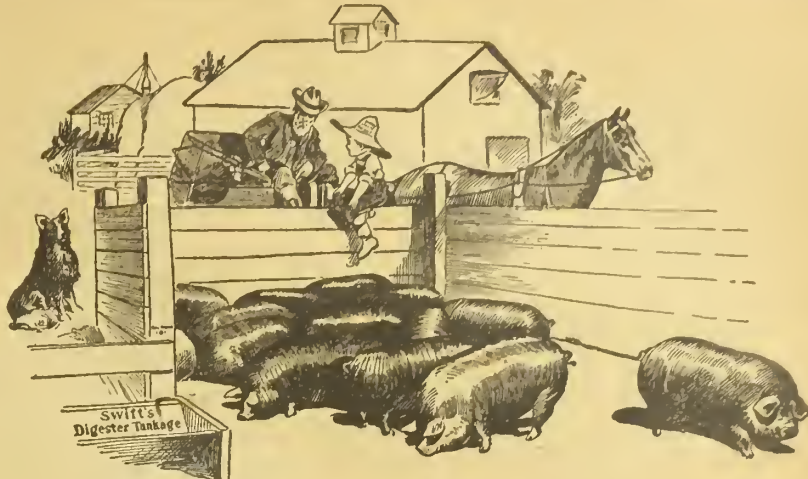

Yearling Bull—First, Cargill & McMillan, on Bonnie Brae 3d; second, Thomson, on Rustler; third, Robinson & Son, on Rolland.

Bull Calf—First, Cargill & McMillan, on Fulfiller 3d; second, same, on Fulfiller 5th; third, Thomson, on Lucky Help.

Aged Cow—First, Cargill & McMillan, on Heliotrope; second, same, on Twilight; third, Thomson, on Cherry Pie 8th.

Cow Two Years Old—First, Cargill & McMillan, on Miss Donald 17th 184573; second, same, on Golden Lassie 182126; third, Robinson & Son.

Yearling Heifer—First, Cargill & McMillan, on Ethel 2d 203170; second, same, on

Magnonette 209514; third, Thomson, on Hildegard.

Get of Sire—First, Cargill & McMillan; second, Robinson & Son.

Produce of Cow—First, Cargill & McMillan; second, Robinson & Son.

Champion Bull Over Two Years—Cargill & McMillan, on Privateer 2d.

Champion Cow Over Two Years—Cargill & McMillan, on Heliotrope.

GUERNSEYS.

This dairy breed was well represented by a uniform exhibit and in point of numbers was second. Keen interest was manifest in the judging on account of the fact that no one breeder was able to secure the best ribbons, and Guernsey showmen enjoyed a nice, even contest. An organization known as the Waukesha Guernsey Association was represented by five breeders who are working along the right lines for improvement. Their cows were all in the Advanced Registry. Following is a list of those who showed: W. M. Jones, Waukesha, Wis. (10 head); R. M. Rowlands, Waukesha, Wis. (6 head); J. W. Williams, Waukesha, Wis. (4 head); Seymour Bros., Manitosa, Wis. (12 head); Brookhill Farm, Geneseo, Wis. (8 head); Fred Vogel, Jr., Milwaukee, Wis. (11 head); M. D. Cunningham, Kansasville, Wis. (12 head).

AWARDS.

Aged Bull—First, Cunningham, on Robene's Standard; second, Vogel, on Treritos Lonen; third, Cunningham, on Sorograt.

Bull Two Years Old—First, Seymour Bros., on Sir Lionel 2d.

Yearling Bull—First, Jones, on Lord of Waukesha; second, Cunningham, on Hatfield's Bonnie; third, Vogel, on Athenian.

Bull Calf—First, Williams, on Knight of Gold; second, Cunningham, on Coliseum; third, Green, on Howard of Brookfield.

Aged Cow—First, Vogel, on Rosalind of Fern Ravine; second, Cunningham, on De Fes; third, Vogel, on Lily O. K.

Cow Two Years Old—First and second, Cunningham; third, Seymour Bros.

Yearling Heifer—First, Williams; second, Cunningham; third, Jones.

Heifer Calf—First, Williams; second, Jones; third, Cunningham.

Get of Sire—First, Cunningham; second, Jones.

Produce of Cow—First, Seymour Bros.; second, Cunningham.

Champion Bull Over Two Years—Cunningham.

Champion Cow Over Two Years—Vogel.

Champion Bull Under Two Years—Jones.

Champion Heifer Under Two Years—Jones.

AYRSHIRES.

This breed is becoming one of the popular dairy breeds in the regions adapted to dairying and breeders find ready demand for their surplus in the rough farm lands throughout the North. Some breeders are working for more size, while quality can stand considerable improvement. In the herd of Adam Seitz were some very pretty heifers with very desirable quality. His cow, Altabrook 2d, has a yearly record of 11,500 pounds of milk, with a test of 4.5 per cent butter fat. Others showed good indications for like performance. Those showing were Adam Seitz, Waukesha, Wis. (12 head); Sam Jones, Juno, Wis. (13 head); E. Finn, Whitewater, Wis. (12 head).

AWARDS.

Aged Bull—First, Jones, on Ivanhoe of St. Ann's; second and third, Finn.

Bull Two Years Old—First, Seitz, on Darmon Chief Avon; second, Finn, on Koshkonong King.

Yearling Bull—First, Jones, on Major Juno; second, Jones, on Major Belle.

Bull Calf—First, Seitz; second and third, Jones.

Aged Cow—First, Seitz, on Altabrook 2d; second, Seitz, on Altabrook 3d; third, Jones, on Josie Pender.

Cow Two Years Old—First, Seitz; second and third, Jones.

Yearling Heifer—First, Seitz; second, Jones; third, Finn.

Heifer Calf—First, Jones; second, Seitz; third, Jones.

Get of Sire—First, Seitz; second, Jones.

Produce of Cow—First, Seitz; second, Jones.

Champion Bull Over Two Years—Jones, on Ivanhoe of St. Ann's.

Champion Cow Over Two Years—Seitz, on Altabrook 2d.

Champion Bull Under Two Years—Jones, on Major Juno.

Champion Heifer Under Two Years—Seitz, on Coloperator of Waukesha.

RED POLLS.

Prof. G. C. Humphrey, of Madison, Wis., made the awards in this breed and found some good ones to work on. After the showing that this dual-purpose breed has made at Iowa, Minnesota and Wisconsin respectively, this year, breeders should be well satisfied, while the general observer must conclude that despite the fact of variation in breeds of the dual-purpose kind, this one presents a very stable type. Cows of great performance at the pail, with the ability to put on flesh rapidly when not making milk, have not been uncommon. Three herds were shown and were owned by the following breeders: J. Slimmer, Wausau, Wis. (20 head); A. W. Dopke, Milwaukee, Wis. (12 head); Geo. B. Buck & Co., Orion, Ill. (13 head). The awards:

AWARDS.

Aged Bull—First, Slimmer, on May Duke 8th; second, Buck & Co., on Money Maker; third, Dopke.

Bull Two Years Old—First, Slimmer, on Dare; second, Dopke, on Village Boy.

Yearling Bull—First, Slimmer, on May Duke 13th; second, Buck & Co., on Zamon.

Bull Calf—First, Buck & Co., on Rumble; second, Slimmer, on May Duke 20th; third, Buck & Co., on Monmouth.

Aged Cow—First, Slimmer, on Parthenope L.; second, Slimmer, on Miss Brown; third, Slimmer, on Imp. Nell.

Cow Two Years Old—First, Buck & Co., on Dewdrop 4th; second, Slimmer, on Duke's Parthenope; third, Slimmer, on Duke's Hagar.

Yearling Heifer—First, Slimmer, on Duchess Brown; second, Buck & Co., on Red Belle; third, Dopke, on Miss Chadwick.

Heifer Calf—First and second, Slimmer; third, Dopke.

Get of Sire—First and second, Slimmer.

Produce of Cow—First and second, Slimmer.

The champions in the aged and the young animals were awarded to Slimmer.

POLLED DURIAMS.

The exhibit of this breed was in the hands of two breeders and included some animals of great size, combined with good fleshing qualities, although there is not that smoothness that the block demands. W. M. Smiley, of Albany, Wis., had perhaps the most size

Direct from Mills to You

We Pay the Freight

Beacon-ite is a ready roofing made of the finest long wool fibre thoroughly saturated with a special preparation that makes it absolutely watertight. Wind, rain, snow or sleet has no effect on it whatever. It will not rust like tin or rot like shingles. It can be applied by anyone to any kind of roof; we furnish all necessary nails and cement. All you need is a hammer.

Beacon-ite roofing will save you money in two ways:

- First. By buying direct from the mills you save the jobbers and dealers profits.
- Second. By putting it on yourself you save the expense of hiring a roofer.

We want to quote you our Beacon-ite prices. You will find them to be about one-half the cost of tin or shingles, and considerably less than any other ready roofings. We want to send you FREE samples of Beacon-ite so that you can compare its quality with others. If you want better, cheaper roofing send for our FREE samples.

BEACON-ITE MILLS, 1105 N. Second St., St. Louis

and scale in his showings, while among his young stuff there was a very smooth, growthy pair of heifers out of Monarch 3520X that created favorable comment. This bull showed and won sweepstakes at this year's Nebraska fair, although Roan Hero, owned by Shaver & Deuker, of Kalona, Iowa, a second choice at that fair, was considered by some to have had some the advantage. Wasb. Courtner & Son, of Farmland, Ind., was a close competitor, but had but six animals, which lacked a little in size and slightly off in quality. Prof. Geo. C. Humphrey, of Madison, Wis., made the awards. Smiley won the four championships, on the aged bull, Monarch, and the aged cow, Whitestockings 2d. Courtner showed a good type of the two-year-old bull without competition and got first and third in the aged cow class.

BROWN SWISS.

While there are several breeders of the Brown Swiss in Wisconsin, but one made an appearance. This was the same one that exhibited at Minnesota the week previous where it attracted considerable attention. H. W. Ayers, of Honey Creek, Wis., was this exhibitor and to him belongs the credit of upholding the merits of this breed in a very creditable and affable manner.

JERSEYS.

This breed had a very small representation, but of good quality. Aside from the ten animals shown by Dixon & Deane, of Brandon, Wis., there was shown an aged bull, Hood's Combination 5229, taking second, and a heifer calf getting third in her class, these two being the property of E. T. Thomas, Mashotah, Wis. Mr. Scribner made the awards.

HORSES.

PERCHERONS.

The size and quality of this exhibit was a subject of frequent comment among horse admirers. It was good for other reasons. With one exception it was local to the state and told people in a very convincing manner that as good representatives of this draft breed could be purchased at home as elsewhere. The Richland County Horse Breeders' Association made a splendid showing and were worthy competitors for the best that was shown. Their showing was partly comprised of some well-shaped colts with mares of the plain, durable kind. This association is young and it will be of interest to watch the outcome of its efforts, which are purely for the improvement of their local holdings. Keen interest was taken in every class, as no one exhibitor had things his way, and ribbons were well distributed by W. E. Pritchard, of Ottawa, Ill., among the following breeders: Lew W. Cochran, Crawfordville, Ind. (13 head); H. A. Briggs, Elkhorn, Wis. (7 head); Lewis Lewellin & Son, Waterloo, Wis. (11 head); Richland Horse Company, Richland Center, Wis. (15 head); Fred Pabst, Oconomowoc, Wis. (16 head); A. W. & F. E. Fox, Waukesha, Wis. (13 head); Schley Bros., Waukesha, Wis. (4 head); J. H. Williams, Waukesha, Wis. (5 head); W. H. Hauser, Mondovi, Wis.

AWARDS.

Aged Stallion—First, Richland County Horse Breeders' Association, on Valseur; second, Briggs; third, Cochran, on Salvanos. The first in this class was fourth in his ring at the last year's International and not all were agreed as to his placing.

Stallion Three Years Old—First, Hauser, on Shoking; second, Lewellin & Son; third, Pabst.

Stallion Two Years Old—First and third, Pabst; second, Briggs. Some would have criticized this placing, as first choice had hardly the amount of substance and flat bone that indicates durability. Otherwise the horse was much thicker muscled and of the closer-coupled type than the rest of the class and fitted well at the head of the list.

Yearling Stallion—First, Cochran, on Macduff; second, Cochran, on Amerigo; third, Pabst. Macduff is a horse of strong character and build and won first in a strong class at Minnesota and second in home-bred class at Iowa.

Stallion Foal 1906—First, Richland County Horse Breeders' Association; second, Pabst; third, Lewellin & Son.

Aged Mare—First, Pabst, on Festinia; second, Pabst, on Petrel; third, Briggs. Twelve mares of very good quality made this one of the best classes. There was a hint of protest over the showing of Festinia, although she is a compactly-built beast and well shaped.

Mare Three Years Old—First, Cochran, on Lady of Quality; second, Richland Horse Company, on Lora Queen; third, Briggs.

Mare Two Years Old—First, Richland County Horse Breeders' Association, on Lady 41922; second, Lewellin & Son; third, Richland Horse Company, on Mayoholo 41533. The Richland County Horse Company made a strong showing in this class with great, well-grown mares.

Yearling Filly—First, Lewellin & Son; second, Cochran, on Sweet Marie; third, Richland Horse Company, on Rosetta P.

Get of Sire—First, Pabst; second, Cochran.

Produce of Mare—First, Pabst; second, Lewellin & Son.

Aside from liberal prizes offered in a farmers' class and special premiums given

to Wisconsin breeders by the Wisconsin Draft Horse Breeders Association and the state board of agriculture conjointly, the following ones were given by the Percheron Society of America:

Champion Stallion—Hauser, on Shoking.
Champion Mare—Richland County Horse Breeders' Association, on Laura.
Champion Stallion, American Bred—Cochran, on Macduff.
Champion Mare, American Bred—Richland County Horse Breeders' Association, on Laura.
Best Group of Five Stallions—Fred Pabst.
Best Group of Three Mares—Richland County Horse Breeders' Association.

CLYDESDALES.

The Clydesdales made a creditable showing and despite the fact that they were few in numbers, they received much favorable comment. Strongly-coupled bodies, flat bone of durable quality and level action were characteristic of most of the animals shown. Prof. W. B. Richards, of the North Dakota Agricultural College, made the awards for the following breeders: McLay Bros., Janesville, Wis. (13 head); W. L. Hauser, Mondovi, Wis. (11 head); Galbraith Bros., Janesville, Wis. (7 head).

AWARDS.

Aged Stallion—First, Hauser, on Criterion; second, McLay Bros., on Prince Punctual; third, Galbraith Bros.

Stallion Three Years Old—First, McLay Bros., on Montrose; second, same, on St. Columba; third, Galbraith Bros., on Baron Reliance.

Stallion Two Years Old—First, Galbraith Bros., on Baron Clifton; second, McLay Bros., on Scottish Mint; third, Hauser, on Prince Winsome.

Yearling Stallion—First, Hauser, on Prince Fortune; second, same, on The Professor.

Aged Mare—First, McLay Bros., on Princess Handsome; second, Galbraith Bros., on Flossie; third, Hauser, on Lady Winsome. This class was notable for great size and massiveness, combined with plenty of quality and good action.

Mare Three Years Old—First, Galbraith Bros., on Strathanderick Jean; second, McLay Bros., on Lady Graceful.

Mare Two Years Old—First, McLay Bros., on Point Lace; second, same, on Miss Sloan; third, Hauser, on Thorncliffe Belle.

Yearling Filly—First, Hauser, on Princess Winsome; second, McLay Bros., on Florentia.

Mare Foal 1906—First, Hauser, on Winsome Princess.

Get of Sire—First, Hauser.

Produce of Dam—First, Hauser.

ENGLISH SHIRES.

This exhibit contained a stallion and three mares owned by Lew W. Cochran, of Crawfordville, Ind., and the massive stallion, Earl King, owned by Galbraith Bros., Janesville, Wis. He was shown alone and was generally admired as being a good one in all particulars. John D. 8241 was the stallion that won first in a good class of two-year-olds at Minnesota the week previous for Mr. Cochran.

BELGIANS.

H. A. Briggs, Elkhorn, Wis., was the only exhibitor and showed five stallions, all up to standard excellence. The awards were all made as cataloged. W. E. Pritchard, of Ottawa, Ill., placed the awards.

SWINE.

The hog show at Wisconsin State Fair was never as good as this year, even though the show was made up almost entirely from Wisconsin herds, with the exception of a herd of Chester Whites belonging to Humbert & White, of Iowa, Berkshires from Indiana owned by Eltzer & Moses and C. D. Johnson, of Nashua, Iowa. Eight breeds were represented and in the following numbers: Chester White (82 head), Yorkshire (10 head), Berkshire (140 head), Tamworth (23 head), Victoria (50 head), Poland China (183 head), Duroc Jersey (95 head), total 588 head. Victoria and small Yorkshires were classed as miscellaneous breeds and were shown together, in most cases the Victorias winning the best awards. J. N. Dillon, of Mondovi, Wis., had in charge this part of the show. R. A. Jones, of Belmont, acting as judge for all breeds. Tamworths, Durocs and miscellaneous breeds were shown Tuesday.

POLAND CHINAS.

This breed as usual was well represented, twelve breeders bringing out hogs of the very best strains and quality. All of these exhibitors except Zach. Keene, of Three Oaks, Mich., were Wisconsin breeders. Many of these herds already exhibited at Des Moines and Hamline were well fitted for strong competition. As the classes were large the judging of this breed consumed a large part of one day. The animals were a typical and modern lot and for the most part standing straight on their legs, low set, good length and strong backs. The young classes were particularly strong in number, although quite a number of animals entered were not shown. In general the awards were pretty evenly distributed and general satisfaction was expressed by the exhibitors. Some of these failing to get awards in the open class got in on the special Wisconsin class, where five awards were offered. Exhibitors and number exhibited by each are as follows: Geo. Martin, Darlington, Wis. (26 head); W. G. Bartholf, Burlington, Wis. (11 head); Jacob Kreuscher, Jr., Somers, Wis. (25 head); W. J. Bernd, New Richmond, Wis. (25 head); A. Beaumont, Belmont, Wis. (1 head); T. P. Bishop, Whitewater, Wis. (14 head); Robt. Flint, Argyle, Wis. (6 head); J. R. Gordon, Mineral Point, Wis. (12 head); M. W. Reed, Whitewater, Wis. (11 head); L. P. Martiny, Chippewa Falls, Wis. (22 head); Jas. Hogan & Son, Waumakee, Wis. (21 head); Zach. Keene, Three Oaks, Mich. (11 head); total 188 head. Four boars came out in aged class, Geo. Martin winning first on Prince 87445 by Conductor 75997, L. P. Martiny following close with Groat's Tobo Bob's Tecumseh, Martin's boar having a stronger back and better hams. The championship boar won first in class in the yearlings. This boar, Dictator 6429, by Peacemaker and out of Dark Perfection, owned by Geo. Martin. This class had six good representatives. Boars in under one year class were not as strong as was expected, only five coming

VALUABLE HINTS ABOUT ROOFING.

No roofing which contains tar or paper can resist weather conditions.

The tar soon melts, the paper soon rots and leaks soon result.

Rain water running from a tar roof becomes tainted and should not be used for domestic purposes.

Ruberoid is a roofing which contains no tar or paper, will not melt or rot and is tasteless and odorless.

A siding and roofing for barns, poultry houses, etc., should be air-tight to keep out draughts and cold in the winter and heat in summer.

When selecting a roofing, ask your dealer if the name of the roofing is stamped on the under side of the sheet as a guarantee of quality. Otherwise you are likely to be imposed upon by a poor material which will soon wear out and which the manufacturers do not guarantee.

Ask your dealer to show you letters from people who have had a certain roofing in constant use from ten to fifteen years. That will be your most reliable assurance of its durability.

Ruberoid is an air-tight roofing which excludes cold and dampness as well as summer heat.

The manufacturers of Ruberoid Roofing stamp the registered trade-mark "RUBEROID" on under side of the material, every four feet, as a guarantee of genuineness. If you accept any other you do so at your own risk.

Insist upon getting Ruberoid Roofing. Tell your dealer to show you letters proving that the first Ruberoid roofs laid, fifteen years ago, are still giving satisfactory service.

Ruberoid is the only roofing which can be depended upon to outlast metal and shingles. It costs much less.

out, but in class under six months eighteen came before Judge Jones. Keene, of Michigan, won first on aged sows. This animal was afterwards awarded championship. This animal was Lillian Winn 279754 by Lamp-lighter and out of a Perfect I Know sow. This class was a strong one, eight coming out for awards. Keene also led in yearling sow on sow by Belle Keep On by Keep On 61015 and out of Chief Gem 2d, Geo. Martin pushing a close second with Perfection Star 280008 by Kelly's Perfection 84317 and out of Lulu K. 224170. Sow under six months class was stronger than over six months class—fourteen in the former and eight in the latter. First in under six months class was won by Gordon, on Darkness Perfection, a granddaughter of Chief Perfection. Martiny's Lady G's Perfection by G's Perfection, the noted boar at Iowa and Illinois State Fairs in 1903, with her litter won first in produce of sow. Aged herd, first to Keene, on herd headed by third-prize yearling boar, and second to Martin, on herd headed by Prince 87445. The Poland China show, though inferior in numbers to Des Moines and Hamline, had equally as good representatives. A good feeling prevailed among the exhibitors, and especially toward the judge. Awards as follows:

AWARDS.

Aged Boar (4 in class)—First, Martin, on Prince 87445; second, Martiny, on Groat's Tobo; third, Keene.

Yearling Boar (6 in class)—First, Bishop, on Dictator 64295; second, Bartholf; third, Keene.

Boar Six Months and Under One Year (5 in class)—First, Gordon, on Gordon's Oakridge by Colonel Oakridge; second, Keene; third, Martiny.

Boar Under Six Months (18 in class)—First, Beaumont; second and third, Flint.

Aged Sow (8 in class)—First, Keene, on Lillian Winn 279754; second, Flint; third, Hogan.

Yearling Sow (8 in class)—First, Keene, on Belle Keep On; second, Martin; third, Hogan.

Sow Six Months and Under One Year (8 in class)—First, Flint; second, Martin; third, Keene.

Sow Under Six Months (14 in class)—First, Gordon, on Darkness Perfection; second, Reed; third, Bishop.

Produce of Sow (4 in class)—First, Martiny, on Lady G's Perfection; second, Martiny; third, Kreuscher.

Get of Sire—First, Keene; second, Martiny.

Champion Boar—Bishop, on Dictator 64295. Champion Sow—Keene, on Lillian Winn 279754.

Aged Herd—First, Keene; second, Martin; third, Martiny.

DUROC JERSEYS.

Just as soon as the Tamworths were placed the Durocs were called out. A better lot never assembled before on Wisconsin State Fair grounds. The hogs were well fitted, many of them coming direct from Des Moines and Hamline, winning firsts and championships there. The following is the list of exhibitors, with number of animals exhibited by each: Geo. Martin, Darlington, Wis. (6 head); F. H. Patten, Lyons, Wis., Route 1 (23 head); W. G. Bartholf, Burlington, Wis. (11 head); E. Crall & Son, Evansville, Wis. (17 head); W. W. Vaughan & Sons, Lyons, Wis. (12 head); Reed, Wright & Co., Whitewater, Wis. (26 head); total, 95 head. The most extensive exhibitor in the list was Reed, Wright & Co., who won all first in classes except in sows six months and under one year, also in sows under six months, winning all championships and two-thirds of the prize winners in all classes on descendants of Sensation Jr. 22461, sold in December, 1905, for \$400. His quality is stamped on his offspring. Three aged boars came out for awards. First went to Reed, Wright & Co., on Perfection Chief by Ideal Perfection 27415 and out of Creole Belle 43286. This boar was also first and championship at Des Moines and Hamline. Second went to Sandy Andy 38231 by Bob and out of Lady Broadback.

Sandy Andy is owned by E. Crall & Son. Reed, Wright & Co. again came first on yearling boars on Sensation Prince 43039 by Sensation Jr. 22461 and out of Nerissa 43208. Reed, Wright & Co. were equally as strong on sows, winning first in aged class on Sensation Lady 97876 by Sensation Jr. and out of Vivian; also first in yearlings on Golden Beauty 124024 by Ideal Perfection and out of Red Riding Hood. This sow won championship at Des Moines and Hamline, as well as this show. E. Crall & Son following these in both classes. Six months' sow went first and second to Crall & Son. Wondermaid by Sensation Jr. and out of Reed's Favorite, with her litter of twelve, owned by Reed, Wright & Co., won first on produce of sow. Awards as follows:

Aged Boars—First, Reed, Wright & Co., on Perfection Chief; second, Crall & Son, on Sandy Andy; third, Patten.

Yearling Boar (9 in class)—First, Reed, Wright & Co., on Sensation Prince 43039; second, Crall & Son; third, Reed, Wright & Co.

Boar Six Months and Under One Year (9 in class)—First, Reed, Wright & Co.; second, Bartholf; third, Martin.

Boar Under Six Months—First, Reed, Wright & Co.; second, Crall & Son; third, Patten.

Aged Sow (3 in class)—First, Reed, Wright & Co., on Sensation Lady 97876; second, Crall & Son; third, Reed, Wright & Co.

Yearling Sow (8 in class)—First, Reed, Wright & Co., on Golden Beauty 124024; second, Vaughan & Son; third, Crall & Son.

Sow Six Months and Under One Year (6 in class)—First and second, Crall & Son; third, Martin.

Sow Under Six Months (10 in class)—First, Vaughan & Son; second, Reed, Wright & Co.; third, Crall & Son.

Produce of Sow (4 in class)—First, Reed, Wright & Co., on Wondermaid and litter; second, Patten; third, Vaughan & Son.

Champion Sow (6 in class)—First, Reed, Wright & Co., on Golden Beauty 124024.

Champion Boar—Reed, Wright & Co., on Sensation Prince 430.

Aged Herd—First and second, Reed, Wright & Co., first headed by Sensation Prince 43039; second headed by Perfection Chief; third, Patten.

BERKSHIRES.

The Berkshires were an exceptionally strong feature of the hog show. All classes except aged boars were well filled, many coming direct from Hamline. With two exceptions each exhibitor is a Wisconsin breeder. These classes especially were filled with typical and up-to-date animals. Sows showed prolificacy and in most cases well fitted, but not overdone, and a better-marked lot never came together at any show. The entire lot numbered 140 head as follows: G. E. Kelly, Mineral Point, Wis. (15 head); H. P. West, Ripon, Wis. (9 head); A. J. Benedict, Bristol, Wis. (18 head); A. A. Arnold, Galesville, Wis. (18 head); Jno. F. Weaver, Sussex, Wis. (16 head); W. D. Becker, Ft. Atkinson, Wis. (20 head); Etzler & Moses, Decatur, Ind. (20 head); C. D. Johnson, Nashua, Iowa (16 head); L. P. Martin, Chippewa Falls, Wis. (8 head). Some decisions were reversed from those placed at Hamline. W. D. Becker won in aged boar class, in which there was no competition. His animals showed careful breeding, but competition was too strong for his herd in many classes. Johnson's yearling boar, King Starlight 168376, by General Starlight 64940 and out of Starlight's Best 63731, won first in class, also sweepstakes. This boar, although only in moderate fitting, will win in any competition. He has a strong, broad back and, as all others of Johnson's herd, stands well on his legs. He has also a typical Berkshire head. Etzler & Moses were close contestants for this desirable place with a very deep, typical boar, but was not as good on his legs and lacked width of head. First on aged sows went to Lady Vic 15th 93431 by Logan 3d 63607 and out of Lady Vic 4th. This sow also won sweepstakes, holding those desired places at Des Moines, as well as Hamline, Etzler & Moses again following with Decatur Belle. Yearling sows class brought out a select lot,

Big Buggy Bargains
For 30 DAYS.

Speak quick, if you want to take advantage of the special bargain sale of Kalamazoo Carriages, Concordes and other styles, now going on. We guarantee positively the lowest prices ever made in the U. S. while these "jobs" last. **BUY DIRECT FROM FACTORY** and get astonishingly big buggy values. We make the cut to push business "between seasons." 30 days free trial. Absolute high quality guaranteed. If you have a note for a genuine bargain, here's your chance. Don't miss it! Write at once for special circular giving money saving list. Don't delay, or you will be too late.

Kalamazoo Carriage & Harness Co., Box 214, Kalamazoo, Mich.

Etzler & Moses standing first and Johnson second. Awards as follows:

Aged Boar—First, Becker, on Colonel Lee by Baron Lee 8th, dam Princess Belle.

Yearling Boar (10 in class)—First, Johnson, on King Starlight 86876; second, Etzler & Moses; third, Kelly.

Boar Under One Year and Over Six Months (8 in class)—First, Etzler & Moses, on Starlight Premier 93751; second, Johnson, on Merger Star 78435; third, Weaver.

Boar Under Six Months (9 in class)—First, Etzler & Moses; second, Weaver; third, Arnold.

Aged Sow (8 in class)—First, Johnson, on Lady Vic 15th 93451 by Logan 3d 63607; second, Etzler & Moses, on Decatur Belle; third, Weaver.

Yearling Sow—First, Etzler & Moses, on Starlight Lady 93749; second, Johnson, on Lady Vic 18th 93434; third, Kelly.

Sow Six Months and Under One Year—First, Johnson, on sow by Merger Star 78435; second, Etzler & Moses; third, Johnson, on sow by Merger Star 78435.

Sow Under Six Months—First, Etzler & Moses; second, Arnold; third, West.

Produce of Sow—First, Martin, on Logan Lady and produce; second, Weaver; third, Kelly.

Get of Sire—First, Etzler & Moses, on get of General Starlight 64940; second, Johnson, on get of Merger Star 78435.

Champion Boar—Johnson, on King Starlight 186876.

Champion Sow—Johnson, on Lady Vic 15th 93431.

Boar and Three Sows Over One Year—First, Johnson, on King Starlight and Lady Vic 15th, 18th and 19th; second, Etzler & Moses; third, Kelly.

TAMWORTHS.

The judging of the Tamworths required only a very short time, as A. N. Kelly, of Mineral Point, was the only exhibitor, except in aged boars. Here E. Crall & Son, of Wisconsin, exhibited a 955-pound hog, winning second place. All other awards fell to A. N. Kelly, who had a herd that would make warm competition in any company. Mr. Kelly was one of the losers on account of the intense heat, losing his aged sow.

MISCELLANEOUS BREEDS, COMPRISING VICTORIAS AND SMALL YORKSHIRES.

On account of the fact that exhibits in these classes have been uncertain in the past, the management decided to place them in one class. The animals exhibited were not in any sense tail ends. They were not in high fitting, but in good breeding condition. There were three exhibitors, H. P. West, Ripon, Wis. (15 head); Geo. Quelchen & Son, Bryant, Ind. (17 head), and A. T. Hill, Brookfield, Wis. (18 head). Classes were well filled, the majority of the firsts going to the Victoria herd owned by H. P. West. Judge R. A. Jones gave his decisions on these from a hard type standpoint as follows:

AWARDS.

Aged Boar—First, Quelchen & Son; second, Hill; third, West.

Yearling Boar—First and second, West; third, Quelchen & Son.

Boar Six Months and Under One Year—First and second, West; third, Hill.

Boar Under Six Months—First and second, West; third, Hill.

Aged Sow—First and second, Quelchen & Son; third, West.

Yearling Sow—First, West; second, Hill; third, Quelchen & Son.

Sow Six Months and Under One Year—First and second, West; third, Hill.

Sow Under Six Months—First and second, Quelchen & Son; third, West.

Produce of Sow—First, West; second, Hill; third, Quelchen & Son.

Get of Sire—First, West; second, Quelchen & Son.

Champion Boar—West.

Champion Sow—Quelchen & Son.

SHEEP.

The magnitude and quality of the sheep exhibit is considered the best in its history, and in comparing the list of entries with the exhibit it is found almost every exhibitor has appeared with his intended number. It is a striking fact that almost the entire list is made up of Wisconsin breeders, a few, however, coming from Iowa, Illinois and Indiana, also one of the leading Shropshire breeders coming direct from Toronto. There were representatives of the fine, medium and coarse wooled breeds, namely, Delaines (26 head), Rambouillet (37 head), Southdown (25 head), Shropshire (150 head), Hampshire (43 head), Oxford (51 head), Cotswold (37 head), Lincoln (24 head), Cheviot (39 head).

In spite of the extreme heat and the fact that still a few coming from long distance had not arrived, the judging began Tuesday morning, Professor Klemheinz, of Madison, Wis., the sheep specialist, acting as judge. The classes are so arranged that every exhibitor has a fair chance to get an award. In Shropshires three classes were provided, open class, American bred and Wisconsin. This liberal arrangement brought out lots of well-fitted Shropshires, imported and American-bred, as well as two Canadian flocks.

SHROPSHIRE.

The largest and best lot of Shropshires ever collected at Wisconsin State Fair was

ENTERPRISE WIND MILL CO.
Sandwich, Ill.
Dept. 24

exhibited this year. Many of these were imported and were exhibited at the Royal, England, as well as Des Moines, Iowa, and Hamline, Minn. Exhibitors were Geo. McKerrrow & Sons, Pewaukee, Wis., showing thirty-three head, twenty-two of these coming direct from Hamline and eleven shipped from their farm, about half of these imported sheep; F. W. Harding, Waukesha, Wis., showed twelve head, mostly imported; Renk Bros., Sun Prairie, Wis., forty-five head, imported and American bred; Weaver Bros., Pewaukee, Wis., 11 head; F. B. Woodward, Bloomer, Wis., thirteen head; E. Crall & Son, Evansville, Wis., fourteen head; G. C. Robinson & Son, fifteen head; Lloyd Jones, Paris, Ont., Canada, four head, making a total of 150 head. For this large and fine exhibit a liberal arrangement was made. First, the open class, in which imported and American-bred sheep came into competition; second, an American class in which imported sheep were barred, and third a class entirely for Wisconsin breeders. Every class of these sections was well filled in the open class. The awards fell with only a few exceptions to imported sheep, going to McKerrrow & Sons and F. W. Harding chiefly. Lloyd Jones getting a few third places in American and Wisconsin classes. McKerrrow & Sons won more than any other single exhibitor. The Shropshire judging occupied all day Wednesday on account of the many full classes and also due to a protest raised against Renk Bros. for not having their exhibit on the grounds at the time regulations state. This caused nearly the entire American classes to be judged a second time, and even at the close the awards on pens of four lambs were awarded under protest and at time report was taken was still unsettled. Professor Klemheinz handled these with great care and independent of many suggestions offered by various exhibitors who would have placed awards otherwise. The judge was in no way responsible for the protests entered. Imported sheep were in almost every case much better fitted than American-bred animals, having much heavier fleeces and had the usual imported bloom and finish. The animals were from the noted flocks of England, many of them winners at the Royal. McKerrrow & Sons' imported flock in general were large and growthy, but in some cases a trifle open fleeced. Harding's were closer in fleece and a little more typical Shropshires. Renk Bros.' imported flock were hardly as well fitted as the former two, but showed lots of quality. Lloyd Jones arrived after four days' travel from Toronto just in time to show, and they showed very much the effect of their long, hard trip. The aged ram class had six contestants, about half of which were imported, McKerrrow & Sons winning first on their Gwynne ram, a 300-pound stylish sheep; Renk Bros. falling in second and third on two American-bred sheep. Renk Bros.' second place ram won first in both special classes. Still stronger were the yearlings. Eleven animals showed, the first two falling in the same order as they did at Des Moines and Hamline, first to Harding's Corbett ram, every inch of him a Shropshire and covered all over, McKerrrow & Sons' Beamhouse ram is a large, stylish fellow, but a trifle open fleeced. Third went to Jones on a Minton ram that was first and champion at Toronto, 1906. Ram lambs came in ten strong, Judge Klemheinz selecting three imported lambs, Harding's Simon lambs first and third and McKerrrow & Sons' Nock, second. The ewe classes were no exception. Ten lined up, all well fitted and required considerable time for placing. It was thought that McKerrrow & Sons were going to get all three, but third went to Jones in preference to McKerrrow & Sons' imported ram that won at Des Moines and Hamline; first to a dark-headed Everal ewe, second American-bred by Dixon. Harding's yearling Cavendish ewe winning first and champion at Des Moines and Hamline was similar awarded here. This ewe is ready for any competition, is well covered, stylish, strong in back and neck; McKerrrow & Sons' Pulley ewes falling in second and third. Eight appeared in this class. Ewe lambs were no exception, ten coming out for awards, but three imported lambs were selected. The judge very quickly set aside Harding's Simon lamb for first. Best flock was headed by Harding's yearling, followed by McKerrrow & Sons, headed by aged Gwyn ram.

CHEVIOTS.

This breed of sheep, for which no class was arranged until two years ago, came right to the front as far as individual merit is concerned. G. W. Parnell, of Wingate, Ind., exhibited twelve head of imported and American-bred sheep. These came with Lewis Bros., of Cotswolds and were in charge of Lewis Bros. At Des Moines and Hamline they were given leading places. M. P. & S. E. Lentz, of Illinois, showed eighteen animals. Many of these were also imported, but previous to 1906 they were not as well fitted and had been shown much later than Parnell's, yet were close contestants for first place in many classes, and in a few received the better awards. W. L. Houser, of Mondovi (Ethelwold Farms), exhibited twelve. These are bred from imported sheep and show typical Cheviot characteristics, but lack of fitting proved very much to their disadvantage among the well-fitted flocks. In general, where Parnell had more than one entry in a single class the placing was the same as at previous fairs excepting in sweepstakes ram. Here Parnell's yearling ram was awarded championship, while at Des Moines and Hamline this award went to his aged ram. Four came up for awards in aged ram class. Parnell's sheep won this easily. This is a strong, rangy sheep with a heavy fleece, but a trifle open. Second went to Lentz Bros. on a closer-made, smaller-boned sheep. In yearling class there were seven contestants. Here the judge found the champion ram, a solid, broad and heavy-fleeced ram, owned by Parnell. Lentz Bros. followed closely, and had this sheep the same fitting as his superior the decision might have been different. Awards as follows:

Aged Ram—First, Parnell; second, Lentz Bros.; third, Ethelwold Farm.

Yearling Ram—First, Parnell; second, Lentz Bros.; third, Ethelwold Farm.

Ram Lamb—First, Lentz Bros.; second, Parnell; third, Lentz Bros.

Aged Ewe—First and second, Lentz Bros.; third, Ethelwold Farm.

Yearling Ewe—First and second, Parnell; third, Lentz Bros.

Ewe Lamb—First, Parnell; second and third, Lentz Bros.

Flock—First, Parnell; second, Lentz Bros. Champion Ram—Parnell, on yearling ram.

Not only the house, but on all the buildings, the roof is the hardest part to protect. That is the place where weather strikes its hardest blows and does the most damage. Yet lots of people put on a flimsy lightweight roofing and expect good protection. They don't get it.

They build the walls of stone or brick or wood and plaster and then expect to get equal protection, from a roofing $\frac{1}{16}$ of an inch thick weighing a few ounces to the foot. You can't make a durable roof of

that kind. There must be some body to the roofing—some stuff in it, some weight and solidity to it. That's why Amatite succeeds where others fail. It weighs nearly a pound to the square foot.

Moreover Amatite requires no coating. It protects without the expensive paint or varnish that other roofings constantly require. It is waterproof in itself and depends upon its mineral surface for its endurance.

Send for a free sample to the nearest office of the Barrett Manufacturing Co., Amatite Department, New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Cincinnati and Boston.

Champion Ewe—Parnell, on yearling ewe. Pen Four Lambs—Lentz Bros. Wisconsin Special, Pair Lambs, Ram and Ewe—Ethelwold Farm.

HAMPSHIRE.

In Hampshire classes there appeared two highly-fitted flocks and two field flocks. Exhibitors were Telfer Bros., of Canada, showing nine imported and highly-fitted animals, also Renk Bros., of Sun Prairie, Wis., nine imported, well-fitted animals. Both of these flocks were from prize-winning flocks at the Royal, some of these being Royal winners. W. G. Bartholf, Burlington, Wis., showed ten and F. H. Patten, Lyons, Wis., showing fifteen head, making a total of forty-three on exhibition. Blue ribbon in aged ram class fell to Telfer Bros., on a Stevens ram true to type, with lots of scale, weighing upwards of 400 pounds. He was easily first in class. Yearling ram class was a hard one to decide on, the judge examining them very carefully, finally placing the blue on Renk Bros.' Stevens ram, but the Telfer sheep was a very close contestant, standing second, the former having a trifle more depth. Telfer Bros., aged ewe, bred by Canaroan was first and champion, and championship on rams went to Telfer Bros.' aged Stevens ram. These awards aroused lots of interest among all sheepmen and was very similar to the Southdown classes previously shown. Awards as follows:

Aged Ram—First, Telfer Bros.; second, Bartholf; third, Patten.

Yearling Ram—First, Renk Bros.; second, Telfer Bros.; third, Renk Bros.

Ram Lamb—First, Telfer Bros.; second and third, Renk Bros.

Aged Ewe—First and third, Telfer Bros.; second, Renk Bros.

Yearling Ewe—First and second, Telfer Bros.; third, Renk Bros.

Ewe Lamb—First and third, Renk Bros.; second, Telfer Bros.

Flock—First, Renk Bros., headed by yearling ram; second, Telfer Bros., headed by aged ram.

Champion Ram—Telfer Bros.

Champion Ewe—Telfer Bros.

Pen of Four Lambs—First, Bartholf; second, Patten.

SPECIAL PREMIUMS.

Four Lambs Either Sex—First, Bartholf; second, Patten.

WISCONSIN SPECIALS.

Pair Lambs Either Sex—Bartholf.

SOUTHDOWN.

Only two flocks competed in these classes, but there never came together two flocks more evenly matched. Geo. McKerrrow & Sons, of Pewaukee, Wis., exhibited twenty-five head and Telfer Bros., of Canada, thirteen head. Both flocks were prominent at the Royal this year and were shown at some of the best fairs on this side of the Atlantic this year. Every sheep was fitted to perfection, but Telfer Bros.' looking slightly the worse for their tedious trip from Toronto. Although this breed does not enjoy the popularity it previously did, it was quite evident from the fitting these flocks were shown in that they are still favorites. Telfer Bros.' aged ram, bred by Colonel Calmott, was first in class and champion and is considered by Judge Klemheinz the best Southdown he has ever seen. Also McKerrrow & Sons' aged ewe, which was first and champion, stands equally as high in this judge's opinion. An importer also remarked that this was the best pair of Southdowns that came out of England this year. These sheep are typical, well covered, solid and as beautiful as sheep can be. The yearling ewe class was a difficult one to decide, with just the two in the ring, but Telfer's ewe was a trifle overdone. Telfer Bros.' flock was in charge of the well-known flockmaster, Geo. Allen. Awards as follows:

Aged Ram—First, Telfer Bros.; second, McKerrrow & Sons.

Yearling Ram—First, Telfer Bros.; second, McKerrrow & Sons.

Ram Lamb—First, McKerrrow & Sons; second and third, Telfer Bros.

Aged Ewe—First and second, McKerrrow & Son; third, Telfer. Yearling Ewe—First, McKerrrow & Sons; second and third, Telfer Bros. Ewe Lamb—First and third, McKerrrow & Sons; second, Telfer Bros. Aged Flock—First, McKerrrow & Sons; second, Telfer Bros. Champion Ewe—McKerrrow & Sons. Champion Ram—Telfer Bros. Pen Four Lambs—Telfer Bros. In Wisconsin classes all awards fell to McKerrrow & Sons.

RAMBOUILLET.

Rambouillet were judged first and consisted of the same flocks that were at Hamline a week ago. The sheep were nicely fitted, well developed and in each case classes were well filled. Professor Klemheinz handled these with great care, spending the greater part of the day in handling this single breed. The exhibitors were W. L. Dixon, Brandon, Wis. (12 head); F. W. Harding, Waukesha, Wis. (14 head), and E. M. Moore, Orchard Lake, Mich. (14 head). Dixon's sheep are an even and smooth lot, close, compact fleeces and show evidence of long and careful preparation. Harding's flock were also nicely fitted, but in a few cases, especially ewes, considerable coarseness of the wool was a failing that the judge could not overlook, and for this reason the Harding flock stood third in class. Moore's flock lacked uniformity and style. Five came before the judge in aged rams. First fell to Dixon, on his championship ram at Des Moines and Hamline, and afterwards was awarded champion at this fair. This is a sheep ready for the best competition, with a remarkable fleece, excellent quality throughout. In aged ewes, first and went to Moore. This ewe was also awarded championship. First in aged flock went to Dixon, headed by his aged ram. The complete awards are as follows:

Aged Ram—First and third, Dixon; second, Moore.

Ram One Year Old—First, Dixon; second and third, Harding.

Ram Lamb—First and second, Dixon; third, Harding.

Aged Ewe—First and second, Moore; third, Dixon.

Yearling Ewe—First, Dixon; second, Moore; third, Harding.

Ewe Lamb—First, Moore; second, Dixon; third, Harding.

Flock—First, Dixon; second, Moore; third, Harding.

Champion Ram—Dixon.

Champion Ewe—Moore.

Pen of Four Lambs—Dixon.

DELAINES.

This breed was represented by twenty-six head owned as follows: W. L. Dixon, Brandon, Wis. (7 head); E. Moore, Orchard Lake, Wis. (10 head); A. E. Green, Orchard Lake, Wis. (9 head). These three flocks also met at Hamline, being the only exhibitors there also. Some excellent types appeared in each class and although hardly as well fitted as the Rambouillet they made a good showing. The awards were pretty evenly divided between the exhibitors, each one getting about all he expected, Green winning first in both flocks and Moore winning second in both flocks. Championship in rams to Dixon; championship in ewes to Green. Judge Klemheinz placed the awards as follows:

Aged Ram (3 in class)—First and third, Moore; second, Dixon.

Ram One Year and Under Two (3 in class)—First, Dixon; second, Green; third, Moore.

Ram Lamb (4 in class)—First, Green; second and third, Moore.

Aged Ewe (5 in class)—First, Green; second and third, Dixon.

Yearling Ewe (5 in class)—First and second, Dixon; third, Green.

Ewe Lamb (4 in class)—First and third, Green; second, Moore.

Aged Flock (3 in class)—First, Green; second, Moore.

Young Flock (3 in class)—First, Green; second, Moore.

Ram Any Age (4 in class)—Dixon.

COTSWOLDS.

Again the classes were filled with select

animals. Lewis Bros., of Camp Point, Ill., who won honors at Des Moines and Hamline, exhibited twelve head. F. W. Harding also showed eighteen good ones. F. A. Coreill, of Stockport, Iowa, a new exhibitor, showed seven, and Jewell & Son, Mineral Point, Wis., seven head, making a total of forty-four. The former flocks were especially well fitted, each making several important fairs before this one. Lewis Bros.' aged ram was placed first, but was beaten in sweepstakes by Harding's imported Garne yearling ram. Harding also won first in aged ewes and first and sweepstakes on yearling ewes. These two flocks were pretty evenly balanced. Lewis Bros. having a little more flesh than Harding's. Judge Klemmholz noticed carefully the character of the fleece and in several cases consumed much time over the first and second animals. Awards as follows:

Aged Ram—First, Lewis Bros.; second, Harding; third, Jewell & Son.

Yearling Ram—First, Harding; second and third, Lewis Bros.

Ram Lamb—First and second, Lewis Bros.; third, Harding.

Aged Ewe—First and second, Harding; third, Lewis Bros.

Yearling Ewe—First, Harding; second and third, Lewis Bros.

Ewe Lamb—First, Harding; second and third, Lewis Bros.

Flock—First, Harding, headed by yearling ram; second, Lewis Bros., headed by aged ram.

Champion Ram—Harding's yearling ram. Champion Ewe—Harding's yearling ewe.

Pen Four Lambs—Jewell & Son.

Pair Lambs, Ewe and Ram, Owned by Exhibitor—Jewell & Son.

OXFORD DOWNS.

The awards in Oxford classes went chiefly to one exhibitor, McKerrow & Sons, of Pewaukee, Wis. Other exhibitors were F. H. Coreill, Stockport, Ill., and W. G. Gill, Menominee Falls, Wis. McKerrow & Sons had a number of sheep they brought for sale purposes only, besides their regular show flock, making a total of forty-three head. Having recently imported some Royal winners they were ready for good competition. Their sheep were well fitted, strong and heavy, having the usual show-yard bloom. F. H. Coreill's flock numbering eight head, were all imported, but lacked the same quality, as well as the finish of McKerrow & Sons' flock and were awarded accordingly. W. G. Gill's flock were only in field condition and received awards in lamb classes among Wisconsin sheep. McKerrow & Sons winning all other awards in these special classes. McKerrow & Sons won all firsts and all championships in open class, also many seconds and thirds. Championship fell to their yearling Stigloo ram. This ram also headed their aged flock.

LINCOLNS.

A. A. Arnold, of Trempealeau, Wis., was the only exhibitor in the Lincoln classes, therefore receiving all awards. His flock consisted of twenty-four head. Although not highly fitted, yet in good breeding condition, they made a fairly good exhibit. This flock was also shown at Des Moines and Hamline, winning the best awards at both shows.

ANGORA GOATS.

Only one flock of goats, consisting of eleven animals, was exhibited, owned by J. McD. Handies, of Waukesha. As no class was arranged for wethers the judge considered they belonged with the does and awarded them accordingly.

On account of no class catalog issued it was impossible to obtain the breeding of many important animals, but this was secured wherever possible from the exhibitor. Reporters wish to express their appreciation for much information rendered by the superintendents and their assistants.

OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

THE FIGHT AGAINST BACTERIA.

Whether the dairyman has any scientific knowledge of the subject bacteriology or not, one thing is certain, namely, that if he makes a success of his business he must have a somewhat comprehensive knowledge of "practical" bacteriology. The chief task of the dairyman who manufactures his own products or sends high-class milk to the factory is to kill off the undesirable organisms, or bacteria, before they are born, as it were. Milk as it comes from the cow is not absolutely sterile, as germs enter the milk ducts ready to be washed into the pail at milking time. Tests have been made to ascertain the number of bacteria in the first milk taken from a cow, and it has run as high as 55,000 in a single drop, while at the close of the same milking not a single organism was found. This only suggests that it might be practicable, where one is bent on producing a high-class product, to not save the first milk that is drawn from each teat.

But the bacteria that are actually found in the milk when it is drawn are not the chief sources of trouble for the dairyman. It is almost impossible to prevent dirt from falling into the pail, so that large numbers of undesirable germs enter during the milking process. It is their progeny that the milker has to deal with later. His chief weapon is a knowledge of the fact that organisms do not thrive in a cold medium, that is, they do not propagate rapidly, if at all. Having this knowledge, he will lose no time in immediately cooling the milk. As it is taken from the cow, milk is apparently an ideal medium for the growth of organisms. The very fact that it is almost a perfect food for man would seem to fit it admirably for the support of bacterial life, and this is actually the case.

Taking it for granted that the principles of cleanliness are complied with at every point from the time the milk is drawn until it is sent to market, we believe that cold may be made to solve the balance of the difficulties.

Instead of allowing milk to stand around in the stable until all the milking is done and the cows turned to pasture, it should immediately be strained and run through the separator or placed in cold water. Sometimes two or three cans are stood in a barrel and the barrel filled with cold water. The milk is possibly allowed to remain there until the next milking time, and what is the result? The milk itself will warm the water to a temperature of possibly 70 or 75 degrees, and there it stands furnishing ideal conditions for the development of bacteria. If there is no ice available let the first water in the barrel be changed after the milk has been reduced in temperature to the extent of 25 or 30 degrees. When this is done the second water, if added at a temperature of 50 or 55 degrees, will keep the milk in good condition until the next milking time. Even where cellars are used it pays to chill the milk with water before giving it a place in a cool cellar. Water is a much more rapid cooling medium than even cold air, and the thing aimed at, as said before, is to chill the organisms that are there so that they will not propagate.

To go one step further, it should be said that it is not desirable to allow milk to stand too long before skimming. If it is kept cool the cream will nearly all be up in twenty-four hours, or at the outside thirty-six hours. If left longer under ordinary circumstances the milk sours, and the constant addition of sour cream to the cream supply will make a batch possessing too much activity to insure a good product when it is made into butter. The cream itself, also, should be churned before it is too old, otherwise there will not only be difficulty in bringing the butter, but the product will not be first class when it comes.

STANDARDS OF PURITY OF DAIRY PRODUCTS.

The association of official agricultural chemists of the United States were commissioned some time ago by an act of congress to establish standards of purity for food products and to determine what constitutes adulteration. Recently a report has been submitted to Secretary

"You Can Try Before You Buy"

That's what we say.

What other maker uses that expression in selling a Separator? It's our offer to any farmer, who inquires about the

National Cream Separator

This is a brand new selling plan which we began this year, and has proven so successful, and so greatly increased our sales that we know the National is the separator that farmers want if they can just have a chance to try it before they buy.

The old way was to buy and then try, but we like our new plan best and so do our customers—not because it is necessary to try the National first, but because we know it is all we claim for it—does the work perfectly and saves its users so much time and money, that we say to you—"Take it and try it; if you like it, pay for it; if you don't like it, ship it back. Trial will cost you nothing."

Would we dare?—Would we be so willing and eager to make such a proposition if we did not know the National Cream Separator to be absolutely the best, or could we afford to if we thought our machine was only fairly good? No, we could not run the risk if our machine were back—as a matter of fact, not one in 500 is returned.

If you only have four cows, you need a National Cream Separator—it will pay for itself in a short time—if you have more cows you need it even more.

You need one this fall more than you did last spring because cream is worth more money. You need all the cream there is in your milk and the National Cream Separator will get it all, and quickly, too. You may have all other kinds of labor-saving farm machines, but your equipment is not complete without a National Cream Separator.

Would you go back to the early days of Hand Hoe, Scythe, Cradle and Flail? Then why be behind times in the care of your milk? Those old-fashioned tools were slow—hand skimming of milk is not only slow but wasteful.

Why don't you write us today—now, while you think of it, and ask for full particulars of our "free trial" plan? Tell us how many cows you have; then we can tell what size machine your work requires.

Our catalogue and Dairy Guide is the handsomest and most complete book of the kind ever published. We will be glad to send you a copy FREE if you will only ask for it.

Address either office and mention Catalogue 87.

National Dairy Machine Co., Goshen, Ind.
The Hastings Industrial Co., Chicago, Ill.

Wilson and it has now been published in bulletin form, known as Circular No. 19. The standard of purity as applied to milk and its products is set forth in this circular as follows:

1. Milk is the fresh, clean, lacteal secretion obtained by the complete milking of one or more healthy cows, properly fed and kept, excluding that obtained within fifteen days before and ten days after calving, and contains not less than 8.5 per cent of solids not fat, and not less than 3.25 per cent of milk fat.
2. Blended milk is milk modified in its composition so as to have a definite and stated percentage of one or more of its constituents.
3. Skim milk is milk from which a part or all of the cream has been removed and contains not less than 9.25 per cent of milk solids.
4. Pasteurized milk is milk that has been heated below boiling, but sufficiently to kill most of the active organisms present and immediately cooled to 50 degrees Fahr. or lower.
5. Sterilized milk is milk that has been heated at the temperature of boiling water or higher for a length of time sufficient to kill all organisms present.
6. Condensed milk, evaporated milk, is milk from which a considerable portion of water has been evaporated and contains not less than 23 per cent of milk solids of which not less than 27.5 per cent is milk fat.
7. Sweetened condensed milk is milk from which a considerable portion of water has been evaporated and to which sugar (sucrose) has been added, and contains not less than 23 per cent of milk solids, of which not less than 27.5 per cent is milk fat.
8. Condensed skim milk is milk from which a considerable portion of water has been evaporated.
9. Buttermilk is the product that remains when butter is removed from milk or cream in the process of churning.
10. Goat's milk, ewe's milk, etc., are the fresh, clean, lacteal secretions, free from colostrum, obtained by the complete milking of healthy animals other than cows, properly fed and kept, and conform in name to the species of animal from which they are obtained.

CREAM.

1. Cream is that portion of milk, rich in milk fat, which rises to the surface of milk on standing, or is separated from it by centrifugal force, is fresh and clean and contains not less than 18 per cent of milk fat.
2. Evaporated cream, clotted cream, is cream from which a considerable portion of water has been evaporated.

BUTTER.

1. Butter is the clean, non-rancid product made by gathering in any manner the fat of fresh or ripened milk or cream into a mass, which also contains a small portion of the other milk constituents, with or without salt, and contains not less than 82.5 per cent of milk fat. By acts of congress approved August 2, 1886, and May 9, 1902, butter may also contain added coloring matter.
2. Renovated butter, process butter, is the product made by melting butter and reworking, without the addition or use of chemicals or any substances except milk, cream or salt, and contains not more than 16 per cent of water and at least 82.5 per cent of milk fat.

CHEESE.

1. Cheese is the sound, solid and ripened product made from milk or cream by coagulating the casein thereof with rennet or lactic acid, with or without the addition of ripening ferments and seasoning, and contains, in the water-free substance, not less than 50 per cent of milk fat. By act of congress, approved June 6, 1896, cheese may also contain added coloring matter.
2. Skim milk cheese is the sound, solid and ripened product, made from skim milk by coagulating the casein thereof with rennet or lactic acid, with or without the addition of ripening ferments and seasoning.
3. Goat's milk cheese, ewe's milk cheese, etc., are the sound, ripened products made from the milks of the animals specified, by coagulating the casein thereof with rennet or lactic acid, with or without the addition of ripening ferments and seasoning.

The definitions as given above are of interest to every dairyman; not that they convey much that is new to the experienced man, but rather that the tendency will be to unify men's opinions

Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

Iowa Dairy Separator

Write today for catalog 25, and let us send you plenty of proof to back up all we say in this advertisement. Separator made in all sizes from 250 to 750 pounds. Invest one cent in a postal card and learn how to save \$100. Do it today.

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

How's Your Separator?

WE will take your old separator in exchange on purchases of either new or second hand machines. We also sell you direct, a good as new second hand, or a new separator, any make, cash or time and save you money. Write for list and prices.

Richmond Cream Separator Co.,
Richmond, Missouri.

as to exactly what is called for in the naming of certain products. It will be noticed, for example, that pasteurized milk is heated to a degree below the boiling point and suddenly cooled, while sterilized milk has been heated to a temperature of boiling water or higher, thus killing all organisms that are present.

Cleanliness in Milking.

To the Editor of The Homestead:

The more a cow is deprived of exercise, the greater the need of keeping the pores of the skin open by daily carding and brushing. This is not only a question of health, but also of cleanliness. It is a wonder to me that the

Cleveland Cream Separator

Reasons Why You Should Buy a Cleveland

Direct to you 30 Days Test

You want an easy running separator and the Cleveland is the only all ball-bearing separator made.

You want an easy cleaning separator and the Cleveland is the first separator and the only one that uses aluminum in its skimming device. The only metal that milk will not stick to. No coating to wear off. Non-corrosive, non-poisonous. The metal recommended by scientists for cooking utensils.

You want a long lived separator and the Cleveland has the fewest parts of any separator made and gets results at slowest speed. Fewer parts, less wear, less repairs. The Cleveland is a guaranteed perfect skimmer.

You want to save money and the Cleveland is the only high grade separator that is sold at a reasonable price. And we'll let you prove this for yourself before you invest one cent by trying a Cleveland on your own farm. No money in advance. Our catalog tells you how to get a Cleveland and save money. Write for it.

THE CLEVELAND CREAM SEPARATOR CO.

farmer who will give his time willingly to keep his horse clean begrudges it to his cows. It is a question of health in both cases, but in the latter it is also a question to his family and those who may drink the milk, not to speak of the quality of the butter. Both on the farm and in the creamery, cleanliness means dollars and cents. The manner in which milking is done has also an influence on the cost of production. Regular hours and kindness are two important things to be observed.

The importance of milking the very last drop is due not only to the fact that the last pint is richer in butter fat than the first, but also that it helps to keep up the flow of milk and extend the milking period. This is especially important in developing heifers. The money lost in the United States by poor milking can hardly be estimated.

Cleanliness in milking means quality in the butter. If the cows are cleaned and brushed an hour or so before milking, so as to let the dust settle, the only precaution needed is to dampen the udder with a wet cloth so as to prevent scales and dust from falling into the pail. Many milkers have the bad habit of wetting their fingers, sometimes dipping them into the milk, so as to make them slide down the teats. The proper way is to milk them with perfectly dry hands by squeezing, not sliding. Only in stripping to start the flow and to get the last drop of milk is it necessary to slide the fingers down the teats. Hands and finger nails must be clean and all utensils used must first be rinsed with cold water, then washed and scrubbed, using soda or some other washing powder (never common soap), and finally rinsed with boiling water.

These rules for producing clean milk are not new; over a hundred years ago they were observed by good butter-makers, but it remained for the last decade of the last century to explain the reason why. Souring of milk, and indeed most of the taints from which milk may suffer, have been shown by our scientists to be due to various bacteria. These bacteria thrive in the excrements and dirt and they float on the dust and drop into the pail while milking; they abound in the little specks of dried milk left in the crevices in badly soldered cans, in poorly cleaned strainers, in rags used for wiping the cans after washing (which should never be done), under the finger nails of the one who milks, and in fact everywhere. Every bacterium that is in the milk as it leaves the teats will multiply twenty-three times in two hours at 95 degrees, while if the milk is cooled to 55 degrees it will multiply four times only in two hours, and if

the milk is chilled on ice it will hardly increase at all.

It is not so hard to convince the private dairyman of the need of all these precautions, as he will at once see their value in a better product, which means a better price. But the farmer should also be willing to acknowledge their need when sending his product to the creamery. He is just as much interested in the final result, whether the creamery be run on a strictly co-operative basis or by an individual. As the cream or milk has to be transported when sold to a creamery, the bacteria get a better chance to develop than if the butter be made on the farm. So handling the milk for the creamery really requires more care. If farmers understood this and acted accordingly it would be easy to increase the value of our creamery butter from one to two cents a pound, or for the United States, say from three to six million dollars.

DIRECTOR O. D. SMITH ON SEED CORN QUESTION.

Elsewhere in this issue will be found a communication from Prof. C. D. Smith, director of the Michigan Experiment Station, on the selection of seed corn. Professor Smith's plan is, from the theoretical standpoint, beyond criticism. No one has claimed that the selection of seed based on perfection of the ear alone was a perfect system, though we differ radically from Professor Smith when he states that the selection of corn according to the empirical standard of the score card is utter folly. We know of many instances where men have purchased prize-winning seed and have increased their yield all the way from 10 to 50 per cent by its use. It is therefore anything but folly to choose ears that are standard in length; that show kernels of regular size and of good depth; that are well filled out on the ends; that are of uniform color; nicely matured, etc.

Let us not too hastily establish the pedigree craze among our farm crops. Pedigree has run riot in some breeds of our live stock, with the result that we are making progress in the building up of pedigrees but are going back in the improvement of our animals. We cannot be far wrong if we assume that an animal or an ear of corn must be nearly right in its pedigree if the individual in each case approaches nearly the standard of perfection. Certain students of the subject have gone so far as to state that in the animal world if the individual is right this is proof positive that the pedigree is right, regardless of what men think of it. This may not be absolutely true as applied to corn, as there is much more out-crossing; but even as applied to corn there is more than a grain of truth in it.

Nevertheless, we have no hesitation in advising all who can possibly find the time to do it to take up the plan suggested by Professor Smith. It will pay almost from the start in the increased yield per acre and in the improvement in the quality of the crop.

BOY'S TERRIBLE ECZEMA.

Mouth and Eyes Covered With Crusts
—Hands Pinned Down—Miraculous Cure by Cuticura.

"When my little boy was six months old, he had eczema. The sores extended so quickly over the whole body that we at once called in the doctor. We then went to another doctor, but he could not help him, and in our despair we went to a third one. Matters became so bad that he had regular holes in his cheeks, large enough to put a finger into. The food had to be given with a spoon, for his mouth was covered with crusts as thick as a finger, and whenever he opened the mouth they began to bleed and suppurate, as did also his eyes. Hands, arms, chest, and back, in short the whole body, was covered over and over. We had no rest by day or night. Whenever he was laid in his bed, we had to pin his hands down; otherwise he would scratch his face, and make an open sore. I think his face must have itched most fearfully.

"We finally thought nothing could help, and I had made up my mind to send my wife with the child to Europe, hoping that the sea air might cure him, otherwise he was to be put under good medical care there. But, Lord be blessed,

TRADE IN YOUR INFERIOR SEPARATORS

Many users who would like to change their inferior machines of various kinds for a new

DE LAVAL CREAM SEPARATOR

do not understand that while such second-hand machines have no salable value the De Laval Company makes very fair "trade" allowances for them, just to get them out of the way and through this illustration of the difference between good and poor separators stop the sale of others like them in the neighborhood. Nobody is defrauded by their re-sale as they are simply "scrapped" at their real value.

Then there are thousands of DE LAVAL users who should know that they may exchange their out-of-date machines of ten to twenty years ago for the very much improved and larger capacity ones of today. These old machines are refinished and sold over again to those who don't think they can afford the price of new ones.

Write in a description of your old machine—name, size, serial number, and date purchased—or else see the nearest DE LAVAL agent about it.

BUTTER-BRED Holstein bull calves, 6 to 8 months old, bred by Prince Duke, (18 A. R. O. daughters), and out of A. R. O. dams, \$50 each. No females now for sale. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

matters came differently, and we soon saw a miracle. A friend of ours spoke about Cuticura. We made a trial with Cuticura Soap, Ointment, and Resolvent, and within ten days or two weeks we noticed a decided improvement. Just as quickly as the sickness had appeared it also began to disappear, and within ten weeks the child was absolutely well, and his skin was smooth and white as never before. F. Hohrath, President of the C. L. Hohrath Company, Manufacturers of Silk Ribbons, 4 to 20 Rink Alley, South Bethlehem, Pa., June 5, 1905."

NEW LAND BEING OPENED UP IN TEXAS.

Along the line of the Texas & Pacific Ry., between Ft. Worth and El Paso large acreage land owned by private parties and corporations being thrown on the market; this country is fast becoming the fruit, vegetable, grain and cotton country of the Southwest; it will pay you to investigate.

School lands, several million acres on the market at one to three dollars per acre on 40 years' time.

As an illustration: Mr. N. Kedesli, one mile out of Staunton, Texas, bought of George Walsh 320 acres of land, 50 head of cattle and horses and a few farm implements, for which he paid \$2,680; he put in cultivation last year 105 acres of land and he derived from same \$3,084.75 and reserved enough feed stuff to make a crop on this year.

Low rates are in effect the first and third Tuesday, at less than one fare, with stopovers, to those who desire to make the trip to look over that wonderful country; the

Iron Mountain has two solid through trains a day from St. Louis to Western Texas without change.

If you will write to ELLIS FARNSWORTH, D. P. A., 186 Clark Street, Chicago, Ill., he will mail you, free, booklet giving full information in regard to that country.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. Rate one fare plus \$2. Liberal limits and stop-over privileges. For rates and further particulars call on agents or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

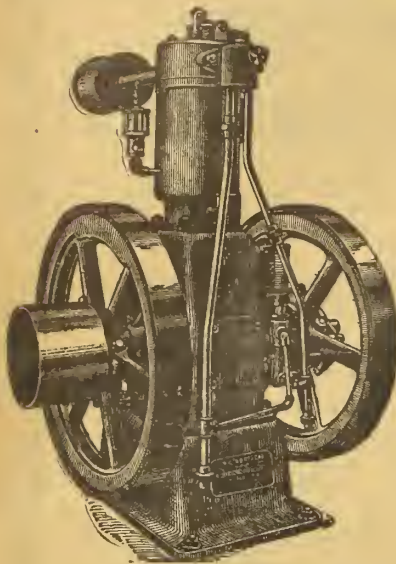

AMERICAN ROYAL LIVE STOCK SHOW, KANSAS CITY, MO.

For the above occasion THE CHICAGO GREAT WESTERN RAILWAY will sell round trip tickets to Kansas City and return at rate of one fare plus \$2 for the round trip, tickets being on sale October 5th to 9th and good to return until Oct. 15th and by an additional payment of 50 cents until Oct. 31st. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

CHEAP RATES TO PACIFIC COAST.

Commencing September 15th and continuing until October 31st, the Iowa Central will have on sale reduced rate one-way tickets to California, Oregon, Washington, British Columbia, Utah, Montana and Idaho. Rates \$15 below regular fare. Call on Agents for particulars or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

A MINOR'S CONTRACT.

Mr. X. Y. Z., Crisp, Mo.—A. is a minor. B. is the agent of a book company. A. made a contract with B. to purchase from the company a set of books. This was done without the knowledge or consent of A.'s father. When the father found it out he wrote to the company, telling it not to send the books, and stating that his son was a minor. The company sent the books, but they have never been called for by A. Will A. have to pay for the books?

Answer.—He will not, if he promptly repudiates the contract. He should without delay inform the company that he will not receive nor pay for the books, upon the ground that he was a minor when he contracted for them, and that the contract is therefore not binding.

BREACH OF CONTRACT.

A Subscriber, Hartwick, Iowa.—Last February I hired a man to work for me for nine months at \$26 per month, beginning on the first day of March and ending on the last day of November. He has worked for two months and nineteen days. I owe him \$14. He wants to quit and has no reason for it whatever. Our agreement was verbal. I have one witness to it. Will I have to pay him his wages in full?

Answer.—The law on your case is as follows: The hired man has a claim against you for the unpaid balance of whatever he can prove his services were worth, up to the time he quit work. Then you have a lawful claim against him for whatever damages you can prove you suffered on account of his violation of the contract by quitting before the time agreed on. It makes no difference that your contract was only verbal, it is good if you can prove it. One account can be set off against the other—for instance, if the hired man's services were worth \$20 and your damages amount to \$15, you would have to pay him the difference, \$5.00.

CONCERNING STALLIONS.

Mr. Richard Horswell, Armstrong, Iowa.—Kindly give the law which requires the owners of stallions to inform the public as to their pedigrees.

Answer.—There was a law passed on the subject of breeding stallions at the last session of the legislature, but it has not yet been accessible to the editor. Section 3457 of the Iowa Code provides that the owner or keeper of a stallion who represents him to be pure bred, thoroughbred, or standard bred of any breed of horses that has a stud or herd book for the registration of pedigrees, shall place a copy of the certificate of registration on the door of the stall or stable where such animal is kept, giving the registration number, name of breeder, name of animal, and the volume and page of the stud or herd book in which such animal is registered, and when requested, shall give to any patron a copy of such certificate. This law applies to bulls as well as to stallions. A violation of it is a misdemeanor.

BOND FOR ALIMONY.

A Subscriber, Anchor, Ill.—A. is a married man with six children. He left his family and went away with a lewd woman. His wife obtained a divorce and an order of court allowing her alimony of \$5 per week. A. was ordered under bonds to pay the alimony, and in default was put in jail. He persuaded B., an old friend living 100 miles away, to go on his bond, and B. procured C. and D., residents of A.'s county to also sign the bond, with the understanding that B. was to be liable for two-thirds of the amount of the bond. C. liable for one-third of it and D. a mere figurehead without liability. A. promised B. that he would do right, pay the alimony promptly, and abandon the strange scarlet woman, etc., all of which he has failed to do. (1) Can B. return A. to jail at the latter's expense and have the bond canceled? (2) B. now feels unsafe as A.'s bondsman. What can he do?

Answer.—(1) He cannot. Although you do not say so, we suppose the bond was given by B., C. and D. to secure the payment of the alimony allowed to A.'s divorced wife. The bondsmen are or course liable for whatever the bond requires them to do, and no agreement among themselves can change that. They are all liable on the bond, whatever their relations to each other may be. (2) B. should employ a lawyer to institute the necessary proceedings to

THE NEW MOLINE THE IRONCLAD WAGON!!

Five hundred men, masters of the wagon-maker's craft, put the best efforts of their hands and brains into the making of New Moline Wagons.

With its gearing of select Hickory and tough White Oak and its box with Yellow Pine Bottom, grooved and matched, the New Moline Wagon has a foundation that will last for years.

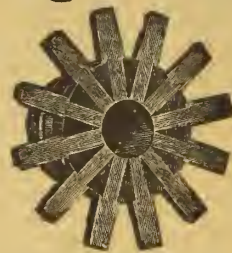

It's so strongly reinforced with extra heavy iron throughout, that farmers call it the "Ironclad" Wagon.

Pole, doubletrees, singletrees, gearing and box are so thoroughly protected and strongly braced with heavy ironing that its solidity and durability defy the test of time.

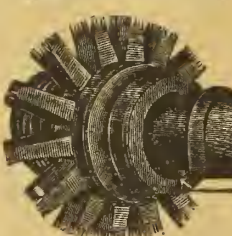

Its dust-proof skeins keep out every particle of dust and dirt.

Lightest Running Wagon in the World

Section Hub and Spokes. Practically One Solid Piece.

Note Dust-Proof Skein.

The New Moline is built right, from the ground up. It's a light-running Wagon, and the longer you use it the better you'll like it, for it's got more up-to-date features, and gives more years of satisfactory service than any ordinary wagon. We've been perfecting this wagon since 1854.

We fully guarantee every New Moline Wagon that leaves our works.

The demand for New Moline is enormous—taxing the full capacity of our immense factories.

GET THIS BOOK! We want every farmer to have a copy of our wonderful Wagon Book. It don't make any difference whether you are thinking of buying, or not—and for it anyway! It tells just how the genuine "Ironclad" Wagons are made. Shows all the parts SEPARATELY; and you can SEE how they are IRONED and BRACED and DOUBLY REINFORCED, making THE NEW MOLINE the most durable as well as the lightest-running wagon on earth. The book tells you more about a wagon than any other Wagon Book in existence. It is FREE, postage prepaid by us.

MOLINE WAGON COMPANY
MOLINE, ILL.

put an end to his future liability on the bond.

TAX TITLE—LIMITATION.

A Subscriber, Avery, Iowa.—A. died, leaving an estate. There were four children, two of whom were minors. B. was appointed guardian for these minors. Forty acres of A.'s estate were sold for taxes. The certificate was assigned to B. as guardian. When the minors became of age B. turned over to them their property, including the certificate, and was discharged as guardian. The land was again sold for taxes and B. bought it and two years afterwards he assigned it to one of A.'s heirs, who got a deed for it from the treasurer. This heir then sold the land to B. and conveyed it to him by deed. (1) Is B.'s title good? (2) Would B. be safe in making a warranty deed for the land? It has been twenty years since the first sale and ten years since the second sale.

Answer.—(1) We think B.'s title is good. (2) He would be safe in making a warranty deed to the land.

LAWFUL FENCE—DAMAGES.

A Subscriber, Wadena, Iowa.—A. and B. own adjoining farms. B.'s part of the partition fence separates A.'s pasture field from B.'s oatfield. A.'s cattle reach through the fence, break down the wires and pull out the staples and get into B.'s field. The fence consists of white oak posts fourteen feet apart, and four barbed wires. (1) Is B. required to put more wires on the fence? (2) Can B. recover damages from A.?

Answer.—(1) If B.'s fence is a lawful one, he is not required to put more wires on it. Whether it is lawful or not, depends somewhat upon how it is constructed. There seems to be enough posts and wires. The law describing a lawful fence has been published in these columns a number of times within the last two years, and is doubtless well-known to subscribers. (2) If B.'s fence is lawful, he can recover damages from A.—otherwise not.

A TOOL CABINET FOR THE HOME.

The reason ordinary home tools become nicked and battered sooner than shop tools of equal quality is because they are not properly kept.

The best tools will be ruined in a short time if they are thrown in with others.

Each tool should have a place of its own so that it will not come in contact with another.

Keen Kutter Tool Cabinets have been designed containing just the tools that are needed in every home, each in a place of its own, carefully separated from every other tool.

The cabinet itself is made of natural oak, beautifully finished and polished, and the tools are the very best that are made.

The Keen Kutter Tool Cabinet is the only one made which contains a set of trade-marked and guaranteed tools, the only one that can be bought without risk. If anything goes wrong with any tool, it will either be replaced or money refunded.

Keen Kutter Tool Cabinets and Tool Boxes come in different sizes and contain various assortments of tools, ranging in price from \$7.50 to \$100.00.

These Cabinets contain in different numbers and varieties, Saws, Brace, Bits, Chisels, Drills, Gimlets, Brad Awls, Scratch Awls, Planes, Hammers, Hatchet, Files, Pliers, Drawing-knife, Screwdrivers, Wrenches, Nail-set, Reamer, Rules, Squares, Tape, Measure, Level, and many accessories, such as Vise, Clamps, Oilstone, etc.

Besides the racks for tools, there is ample drawer room, so that not only the tools but the entire working outfit may be kept together.

The Keen Kutter Tool Cabinet Booklet will be sent free to any one by the Simmons Hardware Company, St. Louis and New York, U. S. A.

HOMESEEKERS' RATES.

Every Tuesday, via the C. & N.-W. R'y, until December, 1906, to authorized homeseeper points in Wisconsin, northern Michigan, Minnesota, South Dakota east of the Missouri river, North Dakota, Alberta, Manitoba, western Ontario and Saskatchewan. Full information at C. & N.-W. passenger station or 401 Walnut St.

VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

UMBILICAL HERNIA.

I have a gray colt just weaned, bought from my next neighbor a week ago. It has a lump where the naval is. This neighbor assured me it was nothing but the naval, but others think it is a rupture. Will you kindly advise me what to do, as I paid a good price for it and have had no experience with colts before?

After manipulating parts for return of bowel, enclose the loose skin and sac between wooden clamps, as for castration, and allow the enclosed parts to slough off. The clamps should not be tied too tight; just sufficiently tight to shut off circulation and cause parts to swell.

ABORTION—FOOT ROT.

(1) Last November I bought a pair of young registered Short-horn cattle. The heifer was to have been pregnant by the bull, but she took the bull twelve days after I got her home, and twenty-eight days later she took my neighbor's bull and carried a calf about 207 days and aborted. She also has sore feet and is lame. I have isolated her. Do you think this is contagious abortion? How should it be treated, and how long? Without treatment would it be safe to put her with breeding cows or breed her again? After how long would it be safe to breed or let her run with cows? (2) More than 25 per cent of my thirty-nine head of sheep and lambs that run on high land got lame during a very wet spell in July. The foot smells bad, gets wet and sticky between toes at first, later swells up into the joint and bulges between toes and cracks open with "proud flesh." Lameness becomes very acute and pus oozes out between toes and at hoof head. Some respond readily to antiseptic treatment at first, and some relapse? What is wrong? What is the most practical treatment?

(1) We have no means of telling whether the cow is affected with contagious abortion, but we certainly would keep her isolated and treated with antiseptics until she has carried a calf the full length of time and has been again treated until in calf. The treatment should consist in giving an injection of yeast mixture twice a month and daily washing or spraying external genitals with a 2 per cent solution of coal tar disinfectant. Breed her again when she arrives at the time when she would have been bred had she carried her calf the full length of time. As to recompense, that is a matter for the lawyer, and we presume that you would have to prove presence of contagion and show actual damage following her entrance into the herd. She should have been quarantined for a month or two when first purchased. (2) The sheep have foot-rot, and all lame ones should be treated as follows: Cut away all loose and under-run horn, right down to the blood; then immediately set the foot into a saturated solution of sulphate of copper as hot as can be borne by the hand,

and stir about for a few moments; then place the sheep in a pen on the floor of which slacked lime has been thickly spread. Keep sheep there for two days. Repeat the treatment as required. Keep sheep off wet land and out of mud and filth.

SORE THROAT.

I have had four hogs affected with some kind of throat trouble in the last two months. Two died and two recovered. They wheeze, and when they try to eat or drink, they choke. They do not see sick, but try to eat. Had one take it since morning and when I fed tonight choked and died in five minutes. They are in thrifty condition and seem to be doing well. What is the trouble and remedy?

This is of the nature of quinsy or sore throat and indicates in many instances contaminated drinking water or some other source of germ infection, so that it would be well to remove the hogs into clean pasture; keep them away from the yards and sleeping quarters and provide pure drinking water. Feed light slop of milk, middlings and flaxseed meal along with green foods. Treat by blistering from ear to ear with cerate of cantharides well rubbed in. Mix together equal parts of honey and pine tar and put a tablespoonful on tongue twice daily. In each dose mix a quarter teaspoonful of chlorate of potash and five drops of fluid extract of belladonna leaves for an adult hog; less the dose for a young pig.

EYE DISEASES OF CATTLE.

I would like to know what to do for my cattle. I castrated two yearlings about the 1st of June, last, and they swelled very badly, one died from the effects of same, while the other seems to be affected with sore eyes, and now I notice several of the other young stock are taking the disease. This one has been allowed to run with the other stock. The eye seems to become inflamed and water drips from it at first, while a little later the eye ball looks as though a sore had formed on it about the size of the end of finger. This sore is like a white spot. The stock, when affected, don't eat much and do not thrive. Any information will be gratefully received.

So-called "pink-eye"—properly termed "contagious ophthalmia," has appeared among cattle in this and other states and presents the following effects: Symptoms: Adult young cattle and calves first show swelling of the eyelids accompanied by weeping. Redness of membranes of eyelids and "haw" becomes apparent, creamy discharge follows and in three or four days a clouded spot shows in center of eye and gradually spreads until "sight" of eye becomes milk-colored. Changing from milk color to pearl tint, eye may become yellow, bulge, show blood-shot streaks, form an abscess and burst, leaving a ragged ulcer, or commence to clear up and finally recover. Sight ulcers may heal by granulation, but expensive ruptures and ulcers often lead to loss of sight. Fever and some loss of appetite is present, especially in young cattle, for a week or more from time of first attack and dairy cows may shrink in milk production. Treatment: The disease being "catching," and doubtless due to a germ which leads to its spread from one animal to another, affected cattle should be separated from unaffected; eyes of latter should be washed once or twice a week with a solution of two drams of boracic acid in a pint of water as a possible preventive and pastures bordering on rivers, ponds and sloughs should be abandoned, as the disease seems most liable to attack cattle grazing on such low, wet ground. Place affected cattle in a darkened shed or stable. Give each adult animal a one-pound dose of epsom salts with one ounce of saltpeter and one ounce of ground ginger root in two quarts of warm water as one dose, and follow with a tablespoonful of saltpeter twice daily in drinking water or soft food. Younger cattle should have the same medicine in smaller doses according to age and size. While under treatment, do not feed grain, but give soft and green food; allow all the cold water animals will take. At the commencement of an attack, puff between eyelids by means of a clean insect powder bellows a mixture of equal parts of finely powdered calomel and boracic acid, or cover eyes with a soft cloth to be kept wet with a 1-2,000 solution of bichlorid of mercury (corrosive sublimate). This treatment may prove sufficient in a majority of cases, but should the disease persist and aggravate, substitute for above lotion one consisting of a dram each of sulphate of zinc and fluid extract of belladonna leaves with twenty drops of carbolic acid in a quart of clean, soft water with which to keep cloth over eyes continually wet. When inflammation subsides, should eye remain milky-appearing, paint once daily with 1-1,000

To Insure Jellies and Preserves

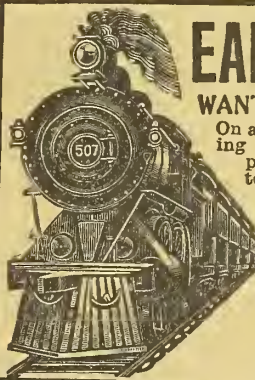

Your jellies and preserves will keep perfectly if you seal each glass or jar, with a thin coating of Pure Refined Paraffine. Easiest way in the world to keep fruit, and the surest. Simply pour a little melted paraffine over the contents of the glass, or, if it is a jar, dip top in melted paraffine.

PURE REFINED PARAFFINE

is odorless, tasteless, acid-proof, and will positively exclude outside air from fruit jars, or jelly glasses. Useful in numberless ways—in the laundry, when ironing, to make wood tubs harmless to butter, as a wood filler, a floor wax, etc.

Sold in cakes of about one pound weight by all dealers—full directions with each cake. Write for attractive little folder telling about Pure Refined Paraffine and its many uses.

solution of bichlorid of mercury or 3-per cent solution of boracic acid. In bad cases, which are tardy in responding to treatment, give—except to pregnant cows—one dram of iodid of potash twice daily for adult animal and from ten to twenty grains for calves and yearlings, continuing its use for one week. Ragged ulcers may be with benefit painted with a solution of three grains of nitrate of silver in an ounce of distilled water two or three times a week. Lastly, quarantine animals bought at stock yards shipped in or from infected herds.

PIKE'S PEAK CELEBRATION.

For the above occasion the Chicago Great Western Railway will sell round trip tickets from Des Moines to Denver, Colorado Springs and Pueblo at rate of \$19.25. Tickets good to leave September 19th to 22d and return until October 15th. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

ST. JOSEPH AND RETURN.

Account of Interstate Live Stock and Horse Show the Chicago Great Western Railway will sell tickets to St. Joseph, Mo., and return at rate of one and one-third fare on September 22d to 29th, with good return limit. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

VERY LOW RATES TO BUFFALO, N. Y., Via the North-Western Line. Excursion tickets will be sold at one fare for round trip October 10th to 12th, inclusive, with favorable return limits, on account of International Christian Convention. Apply to agents Chicago & North-Western R'y.

AMONG OURSELVES.

Today I feel envious of the skill of the driver of the big wagon at the Iowa State Fair. The man managed six horses with seeming ease and played the reins so skillfully that the team went through gyrations and maneuvers which were really wonderful. We have so many subjects under way that to do justice to them all, to give due place to each and so work out a balanced attractive whole, is no easy task. Suppose we ask Miss Nettie Kimmer to open the program:

I see that Miss Nellie Schain asks for the poem, "Keep A-go-in'." Perhaps this is what she wants:

If you strike a thorn or rose,
Keep a-go-in'!
If it hails or if it snows,
Keep a-go-in'!
Tain't no use to sit and whine
When the fish ain't on the line;
Bait your hook an' keep on tryin'—
Keep a-go-in'!

When the weather kills your crop,
Keep a-go-in'!
When you tumble from the top,
Keep a-go-in'!
S'pose you're out of ev'ry dime,
"Gettin' broke" ain't any crime;
Tell the world you're feelin' prime—
Keep a-go-in'!

When it looks like all is up,
Keep a-go-in'!
Drain the sweetness from the cup,
Keep a-go-in'!
See the wild birds on the wing;
Hear the bells that sweetly ring;
When you feel like singin', sing—
Keep a-go-in'!

I think I must thank Miss Nellie for asking for this poem, for it has done me much good, as I hope it will do others. In writing it for her I have committed it to memory and when things go wrong I just think of this little poem and "keep a-go-in'." I never knew there was so much common sense in the little jingling rhyme. That is the trouble with a good many of us, I think. We read things over too hurriedly and do not get the full meaning of the piece. I know I do. As I heard a preacher once

say when some members of his congregation were sleeping in church, "If they only knew what hard study it took to get up a sermon they would appreciate it more." He said he knew what was in the sermon, for he knew what it took to get it out. But I must stop as I am taking up too much space and in imagination I see Mrs. Walker looking over this way with her hand on the bell ready to ring me off.

Several of the friends rose in response to Miss Schain's call. I thank them on her behalf. Enjoying Miss Kimmer's comments on the poem they will understand why she was given the privilege of the floor.

Harking back to find the order in which subjects should be given place I rather think that of early marriages should have preceded the verse we have just had, but if Calista Carbeth will forgive us we will venture to forgive ourselves:

I quite agree with those who say that girls of eighteen should not marry. A girl should have some girlhood, as Mr. Young says. And eighteen is much too young to assume charge of a household, much less a family. I know a man who had five daughters, and he said he never would give his consent to any of them to marry until they were twenty-five years old. Well, I guess they were afraid to brave his displeasure, for the three who are married waited until they were just twenty-five and the result is that they married well. I do not mean to say that their husbands are financially well off, but they are honest, industrious, and loving husbands, and with such they stand a better chance of living a happy life until death shall part them than they would perhaps if they married "the president of a base ball club," or even some of our "American millionaires," at the age of "sweet sixteen." I used to think their father was an "old crank," but I can see now where his wisdom and sound sense comes in and even if I had the chance I do not think I would care to marry until I, too, am twenty-five.

Calista Carbeth's philosophy is sound, but I can't help wondering if it would be a shield and buckler should Mr. Right come along one of these days and open fire with impetuous and insistent ardor. Just how it happened I've never been able to explain with any degree of satisfaction, but the fact is that the Only Man induced me to do a number of things which previous to his arrival upon the scene I had always declared I never would, could or should be induced to do.

As a rule I keep recipes in the Home and Homemaking section of the Home; occasionally they justify place in the club circle. In response to a request we recently had a recipe for canning corn. Mrs. Dee, who is interested in the movement for pure food, comes with a criticism of this recipe:

Does the sister who sent the recipe for canning corn in her letter of August 9th know that salicylic acid is one of the preservatives that our food inspectors condemn? "Gentlemen:—We have made careful analysis of samples of your brand of food products. We find the preserved blackberries and Maraschino pineapple, which we purchased from you not long ago, contained a large amount of glucose, this being a substitute for cane sugar sirup, and that both samples are preserved with salicylic acid. This salicylic acid is injurious to health. We hereby give you notice that you must discontinue the use of salicylic acid as a preservative and glucose as a substitute for cane sugar. Otherwise it will be necessary for us to prosecute you. P. J. Murray, chief food inspector. Approved—Director of the laboratory." Will give you my way of pickling corn. Cook corn on the cob until tender; cut off and to every four cups of corn take one of salt; place in alternate layers until jar is full; use weight to keep corn under the brine. Some use six cups of corn to one of salt, and it keeps well. To freshen, put on back of range and cover with water, changing the water as soon as it boils; add a little sugar when seasoning, and your corn is as good as canned corn. However, before seeing the above article in the paper I canned two gallons by the recipe, but found after cooking three hours the cans were not nearly full. I filled with boiling water and as an additional precaution against souring I dipped the cans in melted paraffin about one inch below rubber.

Sometimes people say, "Oh, the little acid I use will not do any harm," but in these days of adulterated food and of canned goods preserved by means of deleterious substances it is the little things which count. Nature is long suffering, but she always exacts payment, hence we cannot be too careful about taking liberties with her. I should be glad if friends who keep in touch with the pure food movement would talk to us much oftener than they do. Perhaps Mrs. Dee herself will come again soon.

Yes, we are coming to it, friends, and the girls themselves will talk to us about their working in the fields. "An Oklahoma Girl" and a Kansas girl, "Sister Lucy," who arrived together, were hardly here before Cousin Eunice appeared. We shall hear all three—Cousin Eunice first:

I am glad that Mrs. Walker has thought of the young folks and wants us to write. I think Aunt Ruth is right, as I do not believe in the girls doing a man's work. I help my papa make hay and help do the milking, and sometimes I wish I didn't grow and the cows gave butter instead of milk. I think it is the man's place to do such work. If a man can't support his wife

O K WASHING

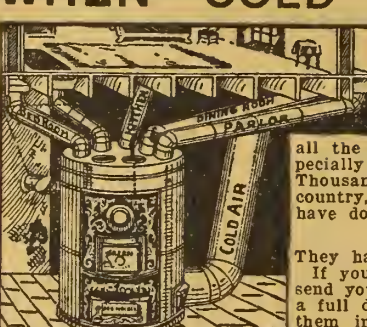

The Easy Way

A child of ten can run an O K washer, standing or sitting, and do the work right. It is just simplicity itself. No complicated and expensive parts like machines that squeeze, pound and force water through the clothes. Fly wheel turns either right or left—pin wheel reverses automatically. Clothes are turned back and forth through the hot suds, dirt is dissolved and they are cleaned thoroughly and perfectly and quickly.

O K washers are sold on their merits alone. We make no "free" offers. So is every other washer sold. Do not be caught by "free" talk. If you don't believe it just try to get one of our machines for nothing.

O K sales have increased in six years from 25 a week to 350 a day. Sold, mind you, not given away. It's the washing machine people are glad to buy when they know it. And it's sold at a fair price. Our free book explains. Write for it.

GREEN FURNACE

WHEN COLD WEATHER COMES

You Want to be Comfortably Warm. Get a **GREEN FURNACE**

Clean, pure, warm air, no dust in your rooms, no gas, no smoke. Keeps your house evenly warm all the time. Large fire bowls, large ash pits. Built especially to take care of the western fuel. Long smoke travel. Thousands of Green Furnaces are in use all over the country, giving satisfaction. They will do for you what they have done for others. Be sure you get a **GREEN FURNACE**.

They have been tested. You don't want an experiment. If you will send us the name of your dealer, we will send you FREE one of our handsome new catalogs, giving a full description of our furnaces, and telling how to put them in. Address,

GREEN FOUNDRY & FURNACE WORKS, DEPT. F, DES MOINES, IA.

Save \$25.00 On FUEL this Winter

\$25.00 is the wages of one man for 30 days. It is 5 per cent interest on \$500.00 for one year. You can save this amount this winter, and every winter that your home is heated with a Cole's Hot Blast Stove.

The big expense in heating your house is the fuel, not the first cost of the stove.

You are wasting DOLLARS in high priced hard coal through leaky joints and poor radiating surfaces. You also waste HALF the Gas Heat, the best heating help of soft coal, by imperfect combustion.

Cole's Hot Blast Stove holds fire over night with any kind of fuel; even corn cobs, chips, rotten and waste material. You always have warm rooms in the morning in which to dress the children and eat breakfast without building a new fire. Our Free Booklet on Scientific Combustion explains fully. Send postal for it today. Tell us all about the nature of soft coal, hard coal and other fuel, and why

Cole's Hot Blast Stove
saves all heat and fuel wasted with other stoves.
Cost of Stove More Than Saved
In Fuel Each Winter

Olives cleanliness and even heat day and night with soft coal you never dreamed possible. Use less hard coal and gives more heat than any base burner. Your home dealer will set one up in your house on our guarantee backed by his guarantee, at **\$10 and Up** prices.

- GUARANTEE**
- 1.—We guarantee a starting of one-third in fuel over any lower draft stove of the same size with soft coal or stick.
 - 2.—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same size fire pot.
 - 3.—We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
 - 4.—We guarantee that the stove will hold fire with soft coal, thirty-six hours, without attention.
 - 5.—We guarantee a uniform heat day and night, with soft coal, hard coal, or lignite.
 - 6.—We guarantee every stove to remain absolutely airtight as long as used.
 - 7.—We guarantee the feed door to be smoke and dust proof.

Built on Honor—Cole's Original Hot Blast was invented after 12 years' continuous experimenting to find a way to save the enormous waste in fuel through the escape of gas and heat up the chimney in the ordinary stove. Our reputation as manufacturers of the Original Successful Hot Blast goes with every stove; and will not be sacrificed by the use of inferior material or cheap workmanship.

Would You Lose \$50 in Fuel to Save \$1.00 on the cost of Your Stove?
That is what you do when you buy a cheaply constructed, poorly jointed, showy made stove.

Like all successful inventions Cole's Original Hot Blast has many inferior imitations, avoid them. They all lack our patented top Hot Blast construction, the patented steel collar connection for the above casting to stove body, making an everlasting tight joint which can not open by action of the farthest heat; the patented compound hinge for ash door, the guaranteed smoke-proof feed door, which prevents dust, soot or smoke from escaping when fuel is put into the stove, and other patented features which are essential to the success of our stove. Do not let any dealer persuade you to buy anything but Cole's Original Hot Blast. See the name "COLE'S HOT BLAST from Chicago" on the feed door of each stove. None genuine without it.

The best dealer in your town generally has the agency for Cole's Original Hot Blast Stove. Write us for name of local agent and for FREE BOOKLET on the scientific combustion of fuel, which also tells about Cole's Hot Blast. In towns where there is no agent, mail order purchasers are protected by the above guarantee.

COLE MFG. CO., 3334-3244 S. Western Ave., Chicago

without having her trudging around like this he had better remain single and let the girls live a better life.

I have been reading with interest the letters in reply to Aunt Ruth, and Mrs. Larsen on the subject of "Girls assisting with the outdoor work." I was born and have lived all my life in Oklahoma, where they think it is no disgrace to do honest work. I have worked ever since I was large enough to in the cotton fields, and now in the harvest and hay field; plow and work in the garden some; go to school in the winter. I have taken a term of music this summer and with the help of my eleven-year-old sister did most of the hoeing in a field of seven acres of cotton; besides, assisting with the hay harvesting and tending the corn. I am sixteen years old, the oldest child in a family of six children, and it has always fallen to my lot to do about as much work outdoors as house work. I think it is more healthful to be in the field at work than it is to be on the piano stool all the time and never take exercise or help lighten anyone's burdens. Although I like to practice on my music I find it more interesting to have something to do besides practicing all the time, and more healthful, too. Some of my lady friends think it would break their poor backs or tan their poor hands and face, but with sunbonnet and gloves they will not be less beautiful after a week's work in the field; besides, saving \$4, which would be paid to a hired hand, and that amount will buy a country girl a respectable dress or hat, and possibly save papa or brother extra labor. I am quite sure they will be as well respected by the opposite sex. As to milking the cows, I have never seen any drudgery in that, and I have milked them ever since I was large enough. I do not think the brother can love the sister as he should when, after a long day's work, he returns to find the sister at ease on the sofa reading a book, as if dainty feet could not be seen in the cow's pen or pretty hands could not feed the calf. I will close for fear of crowding someone.

Mrs. Walker has been very kind in inviting the young people of the Home Department to take part in discussing this all-important subject which Aunt Ruth has suggested, whether or not the farmer girls should do the men's chores, generally speaking. Being a young girl myself and having had considerable experience in that line I shall say a girl has no right in the hay field, although I would rather be one of the judges should any be needed. It seems that several of the ladies in last week's paper think it all right for young girls to rise at 4 o'clock in the morning, milk a herd of cows, get breakfast, separate the milk, do up the morning work, then go to the field and pitch hay until almost noon, then come in and get dinner, perhaps with two extra hands to cook for, when one is so tired one can hardly stand. If any of you ladies lead such a life I pity you. No girl should be looked down upon if she does such work. All honest work is honorable. Such work is all right in cases of emergency, for I pride myself on being a good hay loader. But no girl if she has any pride about her enjoys going out to an evening gathering of young people and wear her dainty dress with

short sleeves and low neck, and have her neck sunburned a dark red, her face covered with freckles, her shoulders stooped and her hands blistered by constant use of the pitchfork. I am waiting patiently to hear from all our girls and boys too. I know of several young ladies that are looking for model young men. This is the first time I have ventured Among Ourselves, but I couldn't refuse the kind invitation to come and dine and I feel doubly sure we will have a grand reunion and every one will come.

Where are the young men? It would be interesting to have their views upon this important subject. Can't you stir them up, girls? Do, please. And, as we have heard from mothers and wives, we should surely have a word from fathers and husbands. There are several women willing to speak about out-of-door work for women. Mrs. DeBok will represent them this week:

When I read the remarks about women working out of doors I would say by all means let the girls work out of doors and also let the boys work in the house. I think each one should learn to do the other's work, for we never know what the future has in store for us. I have four girls and three boys. The oldest is a girl eleven; the baby, a boy of eleven months. I do all my own work except the washing and ironing, and help milk twelve cows. I raised over 200 chicks, took care of the garden and have had several days of outings which we all enjoyed. I think it is silly for women to be so afraid that they will do more than their share. Husband and I always help each other. If I am sick he will do my work and when he is sick I do his and I don't think it is a burden either. If husband and wife love each other with an unselfish love it will not be hard to help each other. I pity the woman that can't milk a cow or harness and hitch up a team. Do the work with a cheerful spirit, friends, and it won't be near so hard.

Perhaps it will have been noticed that I have had very little to say upon this subject. It is not because I have no opinions. I am saving myself. After the circle has thrashed the matter out and it comes to summing up the arguments pro and con I shall say my little say. While at the State Fair I interviewed a score or so of men and women on this matter. What they said bore out my opinion which is based upon observation made both here and in Europe.

Last week I announced that we should introduce for discussion a topic which is closely related to the one we have been considering for the past few weeks. In stating her topic Mrs. Eugenia throws a flood of light on the whole subject of women working in the field.

As our editor has given us the privilege of sending in subjects for discussion I should

like to see this subject discussed Among Ourselves. "Should our American girls marry foreigners?"—that is, foreign-born men? For my part I should say no, most emphatically. Not because there could not be any good husbands born on foreign soil, but from my observation, their ways are not our ways. I perhaps had better tell of neighbors on each side of me, then you may understand why I am "soured" on foreign husbands. The American husband from all appearance seems to think if his wife attends to her housework, poultry, etc., and rears his children—that is enough. On the other side, the foreign husband thinks it is nothing but the proper thing for his wife to do the housework, milk the cows, slop the hogs, raise chickens, garden, and work in the field when he needs her, and add a new babe to the household every two years, sometimes oftener. I once heard a foreigner say he believed all American women were lazy. I don't believe any such thing, but one thing I do believe—that the American women are the most independent race of women on earth. Don't misunderstand me, and think I mean our women should sit around with their hands folded, and be waited upon, for such is not the case, for a reasonable amount of work should be done by every one; only I think an American husband would not ask his wife nor expect her to work as the foreign women do.

Now we shall surely hear from the young men, and from more of the young women, and from women who are the wives of foreign-born men, and from foreign-born men who have married American women. It seems to me that Mrs. Eugenia has given us a very live topic for discussion. I hope that the circle will take it up and make the meeting in the near future even better than the good ones we have been having.

If time permitted we should have another word for John's Wife, and something about "stingy farmers;" these and several other good things are in store for next meeting. Meantime there are a couple of requests and a little matter of business.

Mrs. Olaf is in distress over her bread which, a few days after baking, becomes like dough in the center of the loaf and has a disagreeable odor. Who will help her to remedy the trouble? Another member of our circle wishes to know what use to make of tame huckleberries. A reply to this question may be helpful next season. "Mrs. Elderberry," "Grandma Ray," "Lola," "Mrs. Leta Ford" and "Mother Smith" seem not to have been Among Ourselves the day I spoke of the necessity of writers for the press giving full name and address as a matter of good faith. A word to the wise is sufficient.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

I sowed a seed in the heart of the soil—it lived and grew, and the harvesting was such as I'd sowed in the days of spring.

And, on through the years, in response to my toil,

The seed brought forth, in abundant gain, A million seeds of the self-same grain.

I sowed a seed in the heart of a friend— 'Twas only a deed, but it kept on growing;

W. L. DOUGLAS

\$3.50 & \$3.00 SHOES FOR MEN

W. L. Douglas \$4.00 Cilt Edge Line cannot be equalled at any price.

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD.

\$10,000 REWARD to anyone who can disprove this statement.

If I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. Douglas Strong Made Shoes for Men, \$2.50, \$2.00, Boys' School & Dress Shoes, \$2.50, \$2.15, \$1.50

CAUTION.—Insist upon having W. L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom. Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

W. L. DOUGLAS, Dept. G, Brookton, Mass.

And down through the years it has still been showing That whate'er is sowed shall be reaped without end.

And the little deed that I did, one day, Is growing in thousands of souls, I say. —Benjamin Keech, in Ram's Horn.

FOR MARRIED FOLKS.

The sanest and safest way is for neither side to expect too much nor to be satisfied with too little. In that way a happy medium may be struck, wherein men are satisfied with lovable womanly women, and women with everyday, manly men, even though not impossible heroes.

For we are all of us so constructed that we cannot live in too rarified an atmosphere. The man or woman who gets too far away from our level is apt to get out of the orbit of our human affections.

It is well to stop prating about impossible ideals and to make the most of each other just as we are—ordinary men and women, full of faults and unrealized aspirations. If we can love each other in spite of the failings common to us all, we may find out what real love is.

HAVE FAITH IN YOUR BOY.

Do not think because your boy's bent is not your bent that he will therefore not "amount to much." Do not be discouraged if, indeed, he does not seem to have any bent at all. The tendencies and powers are there—tendencies and powers which perhaps you lack, and which you would give much to possess; but the time is simply not ripe for their manifestation. Perhaps you worry because he is not so precocious as some children. Well, look at the after-lives of so-called dullards in school and college; "end-of-the-class-men;" butts of ridicule, perhaps; subjects of doleful prophecy surely—and possibly your anxiety may give way to something else.

FOR THE COOK.

Chicken Rolls—Mince sufficient cold chicken to measure one cupful. Melt four tablespoonfuls of butter, add to it a little salt, a shake of pepper, two tablespoonfuls of lemon juice, the minced chicken and one-third cupful of milk; thicken with a little flour; mold into rolls or croquettes and fry in hot fat. Serve with a white sauce seasoned with lemon juice.

Mayonnaise Dressing—A good mayonnaise dressing without oil is made in the following manner: Mix well and place on the fire to boil three-quarters of a tablespoonful each of flour, sugar, butter, and dry mustard and one-half cupful of milk and one-half cupful of vinegar. Allow this to boil until quite thick, stirring constantly. When cool beat into it the yolk of one egg. If too thick, thin with equal parts of vinegar and milk.

Tomato Omelet—Scald and skin three tomatoes, melt a small piece of butter in a saucepan, to which add a teaspoonful of chopped onion, and another of chopped parsley, season with pepper and salt, put in the tomatoes, and let them remain in the butter for two minutes. Turn out the mixture and set it aside until quite cold. Beat up three whole eggs and mix in the cold tomatoes. Place a lump of butter, about the size of a walnut, in a frying pan, and when it dissolves, pour in the mixture, leave it over the fire until the edges are firm, and then hold the pan in front of the fire until it rises to the top. It should be served at once.

Scotch Broth—One quart of strong mutton stock, from which every particle of fat has been removed. The liquor in which a leg of mutton has been boiled will do well for this purpose. Boil it down for an hour before making the broth, as it should be strong.

One cupful of barley that has been soaked in tepid water for three hours. One large carrot, one turnip, two onions, four stalks of celery, half a cupful of green peas and the same of string beans, parsley and four or five leek tops.

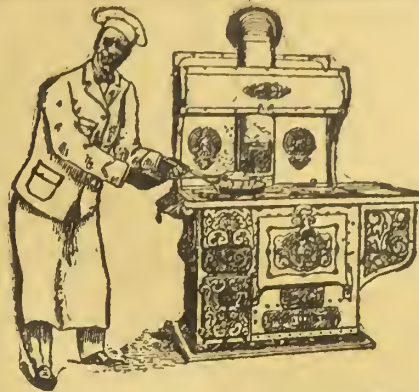

Cut the vegetables up small and parboil them for ten minutes. Drain and put over the fire in the stock. Simmer slowly for three hours. Have ready a good white roux, made by heating a heaping tablespoonful of butter in a pan and stirring into it a tablespoonful of flour. Add a few spoonfuls of the soup to thin it, and stir into the broth. Boil one minute and serve.

Self-Made Pickles—Take cucumbers, any quantity; pour scalding water over them; add a slight sprinkle of salt; when cool, cover closely with grape leaves and also tie up closely and set in a cool place for a week at least. They will become pleasantly sour without the aid of vinegar. Change the leaves occasionally.

Baked Beets—Wash tender young beets without breaking the skin, lay in a baking pan with a little hot water thrown over them and bake, turning and basting frequently. When tender, peel, slice in circles or lengthwise, dress with oil and lemon juice, or butter, salt, pepper and vinegar, and serve hot. A seasoning of nutmeg is also often added by English and German cooks; but this is a matter of individual preference.

Beets With Sour Sauce—A somewhat unusual dressing is this, commonly known as "sour sauce." Having boiled or baked the beets until tender, peel and slice. Put a half cup of vinegar over the fire with a tablespoonful butter, a teaspoonful of sugar, a half teaspoonful of salt and a good dash of pepper. When it boils thicken with a tablespoonful corn starch dissolved in two of water. Stir constantly until smooth, pour over the beets and serve at once.

Bottled Pickles—Cucumbers for hotting should be small, well shaped and of uniform size. To insure the proper size, pick them every day—the larger ones can be used for pickling in jars—wash, place in stoneware, pour boiling water over them and let stand until cold; then wipe them dry and place in wide-mouth bottles, and fill up with hot vinegar, prepared thus: To one gallon good vinegar add not quite a cupful salt, two cups granulated sugar and a few whole cloves. Boil vinegar and spices and pour over boiling hot. Have the corks well softened in hot water, press in tight and seal. Prepared in this way they will be just as nice and crisp as the commercial ones and far more wholesome. A teaspoonful of grated horseradish put in mouth of bottle gives a good relish, and a liberal amount of full-grown green

nasturtium seeds mixed with the cucumbers make a very toothsome variety.

Dressmaking and Millinery—No. 534.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Of the hats it has been remarked that they are either very large or very small, but a study of the numerous types proves that the assertion may be greatly modified, for there are certainly hats in all the usual variety of sizes. One of the leading types is a modification of the sailor that found much favor through the summer, being the short front broad hack type, and in this the brim is usually straight, although in some there is a turn of the brim somewhere

(No. 5306 Eton Jacket, 32 to 42 bust.)

to suit it to the face of the wearer. The little round toque that has a flat circular top, about which is a straight band of varying depth is one of the leaders in the small hats. This shows little trimming, perhaps only a twist of velvet surrounding the crown, and two rosettes of velvet with an upstanding cluster of stiff feathers between directly at the front. The flaring wings and sweeping plumes or feathers adorn many of the hats, and as to plumes and tips of ostrich some of the hats will be almost laden with them. However, we recognize that hats

so trimmed are designed only for very dressy wear. Also that for correct effect they must have other parts of the outfit to correspond.

So many of the fall suits will be made up with the Eton jacket as part of it that I give herewith a design that is proving very popular. The pattern number is 5306, and its lines are so simple that even the novice may undertake it without fear as to results, especially if light weight suiting is used in its construction. The body portion has fronts and side fronts, hacks and side hacks, the overlapping edges at the joining

(No. 5430 Loose Pleated Coat, 32 to 40 bust.)

of the two parts suggesting the outward turning pleats that are on the "Gibson" type and are very popular in the various waist garments. The collar is of the "shawl" type, and is one of the most easily managed, requiring very little skill in its adjustment. The sleeves are in elbow length, or perhaps three-quarter length expresses it more clearly, and there is provision made in the pattern for adding the extra length when this is preferred. This added portion should be made separate, and arranged to

fasten in the permanent sleeve by means of buttons or hooks and loops that are not seen. As shown in the illustration the Eton is worn with the Princess skirt, but when worn with the skirt that is adjusted at the waistline the girdle may be worn, and this should match the skirt when skirt and jacket material vary even a little. Pattern No. 5306 is cut in sizes for 32, 34, 36, 38, 40 and 42 inches bust measure. Give size when ordering.

The Empire coat design shown in a recent paper seemed to meet the requirements or quite a number of the readers, while to others it suggested that there might be other designs that would be better adapted to their

individual needs. Probably Pattern No. 5430 is the type these are looking for, this being a full length garment, or as nearly a full length as we are likely to find among the season's leaders. Garments like the one pictured will be worn for all-occasion purposes, and when made of light weight or loose weave material are not difficult to manage. These are of course not a costume garment. Pattern No. 5430 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering.

Send eleven cents in money (not stamps), for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

The International Sunday-School Lesson.

Third Quarter. Lesson XIII. Mark. XII, 13-27. September 23, 1906.

The Review.

If the Bible is a ring of gold, Jesus is its solitaire. He is worth all the rest. In point of fact all the rest is for Him. Its glory is that it holds and displays Him. All the prophets give witness to Him. They mark stages in the evolution of the ideal life, which is clear and incapable of erosion—the life of a man filled with God.

Jesus is the unapproached Teacher of men, not so much for what He said as for what He was. In point of fact, what he said, He was. His life is a Divine comment upon His Divine words. His own character is the irresistible, irrefutable argument for His doctrine. Incidentally it may here be noted that the true defense of religion still takes this form. It is not a book, but a life. It is not a philosophic statement, but righteous conduct. Ethical living is the "salt" and "light" of the world. The true defender of the faith is armed with neither pen nor sword. He just lives the good life.

The training of the twelve apostles taxed the skill and endurance of Jesus. The controversy as to which should be first is an example of the misconceptions of which they were full. It was a master stroke when He placed a child in their midst. It was a living tableau of docility, self-oblivion and love. And from the parable, as was His wont, Jesus passed to practical development and application of the principles of His kingdom. (Lesson I.)

As was His custom, Jesus used a current event for purpose of illustration. Rulers of Palestine were often summoned to Rome to make an accounting. Such an instance had just occurred. Jesus likens the accounting to God to it. It is not the last judgment that is here referred to. The preliminary accounting reveals insolvency, and is the occasion of Divine forgiveness. Application is made to man's forgiveness of his fellows. Forgiveness showing unforgiving spirit is paradoxical. (Lesson II.)

The parable of the Good Samaritan is the pearl of the parables. With the freedom of Oriental audiences one injects

a question. It proves to be only a dialectic gauntlet. Jesus, with consummate skill, takes the man on his own ground, and has him answer his own question. The attempt to refine upon the term neighbor is the immediate cause of the parable. The term is not defined, but the subjective state which makes a man neighbor to everyone is superbly illustrated, and the terse application, "Do thou likewise!" is made. (Lesson III.)

The request which the disciples made for a form of prayer was natural. They had observed Jesus in prayer, and John the Baptist had set the precedent of teaching his followers a formula. It remains for the universal Teacher to give the universal form. The first part relates to the Father, His name, kingdom, will. The second relates to man—bread, forgiveness, deliverance. From the form Jesus proceeds to the spirit of prayer, which He illustrates by a parable, the force of which is its marked contrasts. (Lesson IV.)

Sociability was a marked trait of Jesus. Asceticism finds no support in Him whatever. In this instance He is guest of a Pharisee who covets His table talk. A sufferer lies in the vestibule. Jesus does not avoid him. He does not merely toss a small coin to him. He determines to heal, but forestalls criticism by asking: "Is it lawful to cure on the Sabbath?" He answers His question by curing. Later He has a word for guests and another for host. (Lesson V.)

The strength of Jesus' parable of the great supper is its improbability. The preposterous inadequacy of the excuses shows at a glance the disinclination to accept the invitation. It is a deliberate insult. The Master dwells upon the practical rather than the speculative phase—namely, upon the personal attitude of the individual toward the Messianic kingdom rather than the accidents of that kingdom. (Lesson VI.)

The parable of the two sons is the "pearl of parables." Its primary object was to justify Jesus' attitude towards publicans and sinners by picturing them as the subjects of Divine compassion. The secondary object is to picture sin as a revolt against a beneficent Father. The incidental lessons are: The freedom of the will; folly of sin—its unsatisfying nature, and desperate consequences; the nature of evangelical penitence, as discriminated for legal penitence; the process and course of recovery; the Divine compassion. (Lesson VII.)

The parable of the Pharisee and publican is one of the most pictorial of all. Two sorts of worshipers are made to fairly live before the reader. The one is false and fruitless; the other true and successful. The one haughtily denies all gross sins and affirms all active pieties. The other is penitent, makes no comparisons, attempts no palliation. The Pharisee's exit is not so much as noted, while the publican goes out justified—his misdeeds transposed to a hallelujah. (Lesson VIII.)

The incident of the "rich young ruler" is the record of a subtle interview, the meaning of which has universal application. This knight of legality betrays a disquiet spirit, in that he approaches Jesus at all. Jesus meets him on his own ground and uses his own methods. Relative goodness is made to face absolute goodness. The legalist is bidden to do and live. Obedience is averred, but the weak spot is touched in the crucial command: "Sell and give!" Self is revealed. Lordship of mammon is recognized, but the subject fails in the final test. (Lesson IX.)

Grace was magnified in the salvation of Zaccheus. The corrupt child of an age of corruption and fraud, steeped in an atmosphere of oppression, social sus-

STEEL FRAME PITLESS SCALE

30 DAYS
FREE TRIAL

Best all steel, ball-bearing pitless scale made. Made of structural steel throughout—no gas pipe or other inferior material used. Very rigid and firm. Scale sets on ground—no expensive pit to dig. No costly repainting to be done on account of decayed timbers, etc. Cost of installation is only about \$5—\$30 to \$40 less than for old style, unreliable pit scales. Possesses numerous advantages over all other scales—is accurate, reliable, strong and durable. Will give a lifetime of constant service and still retain its accuracy. Weighs only 1200 pounds—can be easily loaded on wagon and moved from place to place as desired. Saves time, trouble and expense of unnecessary hauling to and from scales. Made in four and five ton capacity. No better scale on the market.

GUARANTEED FOR FIVE YEARS

Shipped anywhere in the United States on 30 days free trial, complete and ready to set up except flooring lumber.

KANSAS CITY, MISSOURI

picion, national aversion; confronted for the first time in his life with absolute personal honesty, transparent truth, and singlemindedness—heart and life were changed at a stroke before the burning gaze of incarnate honor. (Lesson X.)

Jesus' triumphal entry into Jerusalem was no mere incident. It was an event of large degree. It was not accidental, but designed. It was consistent with Jesus' plan to present Himself to the nation for acceptance or rejection. It presents points of contrast to other "triumphs." It was characterized by meekness, a lowly equipage, absence of captives and spoils. It was accorded by the common people, not by church or state. Yet it was the most significant triumph in all history. No similar spectacle was ever fraught with such influence upon the destiny of the human race. (Lesson XI.)

Jesus' moral agony was greater than any physical pains He ever suffered. The cause of it was the contradiction of sinners against Himself, their effort to entangle Him in His words, their refusal to accept Him or His message. Jesus was crucified again and again before He came to His cross. In this instance the effort is to elicit from Him a categorical statement which can be used against Him in His trial, then impending. Jesus' answer is a miracle of genius, a flash of inspiration. He escaped the snare. He allied Himself with no faction. He carried the question over into an entirely new realm, where there are no disjointed commands or sacramental offices, but where there is a life which gives continuity, vigor, progress to the whole. With one splendid flash, Jesus discloses the fundamental element in religion. Absent, it makes the Christian a heathen; present, it makes the heathen a Christian. This disputatious coterie fades. Jesus is speaking to the universal human heart. The man of today, even though technically rated an unbeliever, recognizes the Divineness of the message, and receiving it, begins the life of love toward God and His fellows. And that is religion. (Lesson XII.)

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

A STEP IN THE RIGHT DIRECTION.

We have frequently called attention to the improvement in making pictures of poultry. The improvement in making such illustrations has been even greater than the improvement in some of the breeds of poultry. It has grown to such a state that it is next to impossible to get a true likeness of a fowl. This kind of illustrating has been termed "fake poultry pictures," and we are glad to see some of the poultry papers taking a stand in this matter. In an announcement of the Reliable Poultry Journal, that paper takes the following stand: "In future, all illustrations of prize-winning or other meritorious specimens of fowls that appear in these columns and are signed by R. P. J. artists—Messrs. Franklane L. Sewell and Ralph D. Collins—will represent our artists' best efforts in the line of actual reproductions of the live models."

"We have decided that the best condition in which breeders and exhibitors are able to show their birds, either in competition for prizes or before the camera, is precisely what our readers want to see and have the right to see; hence in future it will be the sole aim of R. P. J. artists to 'do the birds justice' by reproducing each specimen 'true to nature.'"

"And this also will be doing strict justice to the breeder, owner and exhibitor or likewise to poultry culture as a progressive art. By adopting and adhering to this method of faithful reproduction all such likenesses will produce real value; they will then show what is what and thus come somewhere near enabling interested persons who cannot visit the big poultry shows season after season, to 'see for themselves' what the best birds on display really look like."

MOVING HENS.

Fowls are very fond of their home and they very much dislike to be moved. It is not a profitable business to move them unless it is absolutely necessary. If eggs are the object sought it is very important that laying hens should not be moved from one location to another while laying as it will diminish the supply of eggs. Where it is possible to do so pullets that are intended as layers should be brought up within sight of the location they are to occupy when they begin laying. On the contrary, if it is desirable to delay the laying of a hen or a pullet for any reason all that is necessary is to move them from one locality to another and the business is done. This is sometimes done among fanciers when it is desired that they put their energies into growth instead of eggs. Sometimes a broody hen may be broken up by removing her nest from one locality to another. And especially is this true where new companions are given her.

Shade and Water.

To the Editor of The Homestead:

The absence of shade and the neglect to provide fresh water during the hot months will cause great suffering among fowls. The humane poultryman will not neglect these two important items. The water-pail should make the rounds as frequently as the feed-pail, and in very hot weather fresh water is more important than the mid-day meal.

An ideal range upon which to rear young stock would be an orchard or lot covered with small trees or brush having a living spring near by, with pastures, meadow lands or grain fields adjacent and over which the chicks might have free range. With such a location the hen man is on easy street in many respects, as it will only be necessary for him to feed regularly and protect the flock from their natural enemies which are very likely to abound in such a location. Not all of us, however, can have such a range made to order, consequently deficiencies must be provided for artificially. A substitute may be arranged by driving four stakes in the ground and covering over the top with limbs or boughs cut from trees or pieces of old boards may be used for a covering.

STEEL ROOFING

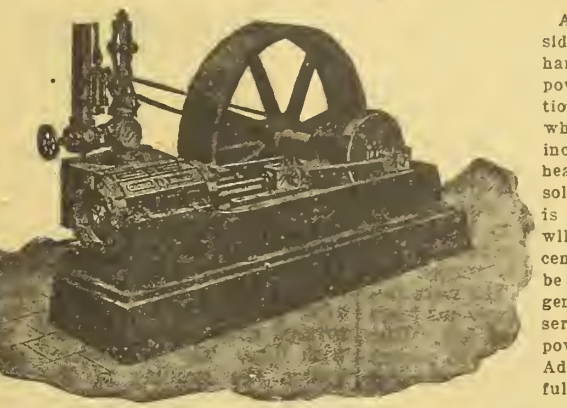

PER 100 SQUARE FEET

\$1.50

FIRE WATER AND LIGHTNING PROOF

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not taint rain-water. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration, sheets 22 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or "V" Roofing. **WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO** except Oklahoma, Texas and Indian Territory. Quotations to other points on application. Satisfaction guaranteed or money refunded. We will send this roofing to any one answering this advertisement C. O. D., with privilege of examination if you will send us 25 per cent of the amount of your order in cash; balance to be paid after material reaches your station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. W-500. Lowest prices on Roofing, Eave Trough, Wire, Pipe, Fencing, Plumblings, Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales. **CHICAGO HOUSE WRECKING CO., 35TH & IRON STREETS, CHICAGO**

STEAM ENGINE FOR SALE AT A BARGAIN

A Frost, automatic, side crank, 8x13, left hand, rated thirty horse power, speed 250 revolutions per minute. Fly-wheel drive, 48x19; three-inch throttle; outboard bearing with adjustable sole plate. This engine is in prime condition, will operate on a 2 per cent variation and would be suitable for belted generator or any other service where steam power can be employed. Address for price and full particulars,

Homestead Co., Des Moines, Iowa.

These sheds may be low and need not be more than three feet from the ground, requiring very little work to make them and no expensive materials. Have plenty of them so the chicks will not be obliged to crowd together when trying to escape the hot sun.

In the production of fine exhibition fowls shade and plenty of it is a necessity, as all white fowls and all party-colored ones will become brassy or faded if allowed in strong sunlight. Many of the winners at Madison Square and other large eastern shows are said to have been raised entirely in the shade; and there is no question but that the fancier who is planning for a long string of premiums will greatly improve his chances for the same by giving due attention to the matter of shade for the growing chicks and adult fowls as well. Under such treatment the plumage will retain all its natural brightness and the fowls will present a much neater and cleaner appearance than if allowed to become faded and dingy.

No need of the knife or burning plaster, no need of pain or disfigurement. Cancerol is soothing and balmy, safe and sure. Write for free book, address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

The Week in Kansas.

To the Editor of The Homestead:

At last we have enjoyed a week that the weather sharps cannot say is very unusual. It has been a representative week for this season of the year. The first two days were quite warm, followed by a nice shower, then cooler weather. The shower, which came on Tuesday, was just what we needed to make seeding and the preparation of the ground for seeding go off in fine shape. This morning it has spit a few drops of rain again, but the sun shows signs of overpowering in an hour or two, so it may let us off this time, as we sincerely hope it will.

The people of Kansas have thought they were busy at different times this summer, but busy times of the past have been as nothing compared with now. Threshing has not yet been completed, seeding is here, corn is ready to cut, and all the other countless chores have made their appearance all at once. Everywhere everyone has too much to do.

Up to the shower of Tuesday the fall

plowed fields have been dry enough so the disks have done good work tearing out the immense growth of crab and water grass that grew on all the earlier plowed land. In some places the grass had grown to a height of two feet, but where the plowing had not been harrowed down level, the disks turned it out in good shape. Had it kept on raining last week, as it has in the weeks past, it would have been impossible to put the earlier plowed fields in shape without reploting. Thus a little dry weather in "semi-arid Kansas" is often a good thing.

Corn cutting is now here, but there will not be the usual acreage put in the shock. In the first place, there are not the usual number of cattle in the country, and then the hay crops were extra good this season, especially tame hay, so roughness will be plenty without cutting so much corn. The average Kansan is not in love with husking corn out of the shock, so take advantage of getting any good substitute for corn fodder.

Every grain drill in the country for miles around is kept busy from early morning until late at night. There are still a large number of farmers here who depend upon hired tools to work with, some of them putting in a larger acreage than those who have all tools necessary, and it is this class of farmers who are always on the lookout for a tool as soon as the owner is through with it. However, if it does not rain, as we hope it will not for a few days, all will be through. It is the every-day work in the field that counts. Henry Hatch.

Coffey Co., Kansas, Sept. 14th, 1906.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points in Indian Territory, Arkansas and Missouri, and \$25 from Chicago to Pueblo, Colorado Springs and Denver, with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory, which are limited to thirty days, stopovers going and returning.

Mexico: Less than one fare on the first and third Tuesdays, with stopovers.

California: Low round-trip rates on sale daily to September 1st.

Hot Springs, Ark.: Commencing June 1st to September 30th, one fare plus \$2, good thirty days, on sale daily.

Remember the Missouri Pacific Railway and Iron Mountain Route reach the principal points in the above-named states without change of cars.

For descriptive literature and other information address, Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

LAYING DOWN PEACH TREES.

In the northern part of the corn belt, as well as in the wheat belt, peach trees are not always sufficiently hardy to pass through the winter without great danger of winter-killing. The effect of frost is sometimes overcome by dividing the roots at planting time so that they are spread out at right angles to the direction the trees are to be laid down. By digging down the side of the trees to be bent over the stem is crowded over when young, and when it gets larger the previous crowding, bending and breaking of the roots favor the continuance of the operation.

According to Budd & Hansen's Manual trees should be encouraged to make an upright growth the first year. A strong one-year-old tree should be about six feet high when planted, and by pinching the lower limbs it may be made to grow two feet more in height when ready for laying down in the fall. Late in autumn trim off all the side limbs and dig away the earth on the side it is to be turned over. By pressing at the crown and gently crowding the tree downward, the cane can be laid flat on the ground and pinned fast. Then cover with straw, with dirt enough on top to hold it in place. The next spring the cane is left prostrate, but the point is turned upward and tied to a stake. The next fall the top attached to the stake is cut loose and turned to the right or left. The spring of the prostrate stem will permit a child to bend the top to the ground at this stage of growth.

Later, as the stem attains greater size, it will need more strength, but if always turned in the same direction the top can be turned over after the tree has produced several crops. The prostrate stem and the crown must be covered as well as the tops. Before covering the top, cut back fully one-half of the new growth and take out also the weak inner shoots and the unripe twigs.

For this plan of growing, select such varieties as Bokhara No. 3 or No. 10, that will ripen up the wood well in autumn. Farther south, where the wood is relatively unharmed in winter, but where the fruit-buds or blossoms are liable to be killed by frosts, spraying with milk of lime towards spring has proven an advantage, as the white color is less affected by heat-rays and the blossoming period is slightly retarded. But in north

Get Ready to Fight Hog Cholera

Kills Hog Lice

It is coming. In hundreds of places hogs are dying. Yours may be attacked tomorrow.

The time to begin the fight is right now, before it gets into your herd. It is a much easier thing to ward off hog cholera than to cure it when it once gets a start.

It is known that cholera is produced by a little germ. It is a mighty difficult thing for this germ to get a hold if the hog's general health is really good and his surroundings perfectly sanitary.

It's the unsanitary pen and the hog out of condition that disease germs start upon. That is not only the teaching of the books, but it is common experience and it is common sense.

That's why the cholera attacks one herd of hogs and skips the next. It doesn't just happen so; you can see the reason for it.

And you can see, too, how you may surely enable your hogs to escape the plague by a little care and attention.

Zenoleum Creates Anti-Cholera Conditions.

It is sure death to disease germs wherever it is used. It not only prevents cholera but it arrests its progress and cures when it has once taken hold of the herd.

For many years it has been the remedy employed by farmers, feeders, veterinarians and others to create and maintain healthy conditions in animals and their surroundings and to ward off contagious diseases.

Forty-three Agricultural Colleges are now using and recommending Zenoleum.

Can you afford to take the chances of losing the whole or a part of your herd from the disease now going the rounds?

Zenoleum gives you assurance of safety. The cost of what you will use is nothing compared to what you will lose if the cholera strikes your herd.

Most Dealers Sell Zenoleum.

One gallon Zenoleum, Express prepaid, \$1.50
Five gallons, freight prepaid, \$6.25

Buy a gallon and note its effects. Don't fail to ask for copy of "Piggie's Troubles," a 64-page book filled with valuable information.

ZENNER DISINFECTANT CO.,
31 Lafayette Avenue, Detroit, Michigan.

Silesia, a far better plan for retarding the blossoming period was observed. In frosty localities amateur growers adopted the cordon system of training of the cherry, plum, apricot, and peach, and after pruning in the fall the tops were covered with gunny sacking whitened with lime. The light-colored cloth prevented the swelling of the fruit-buds during warm spells in winter and very much retarded the opening of the flowers in spring.

The Morning Glory Pest.

To the Editor of The Homestead:

I have been reading an article in your paper on how to get rid of the morning glory pest. Years ago I had an experience of that kind. A field adjoining my own farm had been in the hands of renters for several years, and being cultivated in corn all that time became so badly infested with morning glories that the vines would actually tie the ears tight to the stalks so that they could be shucked off only with the greatest difficulty.

Finally this field came under my management. A large part of it was as

thickly set with cockleburrs as the other part was with morning glories. I raised one crop of corn by keeping the burs down with plow and hoe, letting the morning glories entwine themselves about the corn all they pleased. When the corn was in proper condition I cut it with a corn binder and in the fall and winter fed the stalks, corn and morning glories to a bunch of steers. By this means I saved a lot of morning glory seed from falling back into the ground, and besides that, the glories made excellent feed in themselves.

That same fall I sowed the field in rye and the following year to oats, so

Red Tag Trees

Our assortment of fruit trees, ornamental trees, shrubs, plants and novelties, for Fall planting, is the most extensive and complete in the West.

This beautiful roan herd bull, illustrated above, is Imp. Clan Craibstone, a roan, calved March 1, 1902. His dam was the beautiful cow, Imp. Craibstone Beauty 6th. Both this bull and his dam are two of the many attractions in the sale of Messrs. R. G. Robb & Son, at Morning Sun, Iowa, October 18th, at which time their entire herd will be dispersed, including twenty-three head of Scotch cattle, three being imported. This sale affords an opportunity seldom equaled for lovers of Scotch cattle to replenish their herds, as well as for the beginner to secure some splendid foundation stock for the nucleus of a new herd. This date should be borne in mind and application made for a catalog at once, to Messrs. R. G. Robb & Son, Morning Sun, Iowa.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

SUMMER CARE OF SHEEP.

An experienced sheep breeder has the following to say in the Country Gentleman of the summer care of sheep: "In summer the sheep thrive on pasture where there is plenty of room and good feeding. The shepherd, however, who thinks that because his flock is safe in pasture he need give them no attention until fall, will find himself in possession of a lot of diseased and unprofitable sheep in a few years, and his farm infested with germs. Most of the trouble will be from internal parasites. In our country there are only two or three species which cause much trouble; among these the twisted stomach worm is by far the worst. This lives in the fourth stomach of the ewe, and she carries it through the winter, even though she shows no signs of it in her condition. In the spring, and summer the worms 'ripen' and pass away, and right here the danger lies, because the little worms hatch in shallow pools or on the moist grass close to the ground and are taken in by the young lambs in feeding and drinking. The stomach worm has done more to discourage sheep raising than all other causes put together. The symptoms of the presence of the stomach worms are: The wool appears lusterless and does not spring out when pressed by the hand; the red veins about and in the eyes seem pale; the skin, on parting the wool, will be found to have lost its pinkness; a disordered digestion and depraved appetite may follow. Before death there will be 'black scours.' The best preventive is to separate the lambs from the ewes as soon as weaned, and put them into a fresh pasture which has not had sheep on it for a year. The mature sheep should have a change of pasture every two weeks. This will not be much trouble after the fences are once in place. Of course if a shepherd and dog attend the sheep, they will move to fresh grounds naturally. One of the best remedies which has been successfully used is a 1-per-cent solution of coal tar creosote, made as follows: Coal tar creosote, one ounce; water, ninety-nine ounces (six pints and three ounces). The dose given is usually, for lambs four to twelve months old, two to four ounces; for yearlings and above; three to five ounces. Be careful not to get the liquid into the lungs, or the animal may die in a few minutes. Before the flock goes to pasture, be sure to ... and shorten their feet. This can be more easily done after the sheep have been in wet grass for a day or so. Look out for foot rot and foot scald. There is often a distinction drawn by shepherds between these two ailments, although the latter is usually, if neglected, the forerunner of the former. There is an inflammation of the skin in the cleft of the hoof, which does not go in very deep, and yields quickly to an application of carbolic acid or coal tar dip. The sheep should be kept on a dry footing for a short time. When the inflammation goes beneath the shell of the foot and gives out a watery, bad-smelling matter, it is real foot-rot, and should be carefully treated at once or it may spread to the rest of the flock. First pare away all the horn that hides the diseased surface, as the disease is of parasitic origin—the germ must be removed before a cure can be effected. When the diseased surface has been laid bare, wet it well with a strong solution of blue vitriol. Bind up the wound if the horn has been cut away much. To prevent the spread of the trouble, make a trough six inches wide at the bottom and twelve at the top and ten feet long. Put this in front of the gate where the sheep will have to pass through it when leaving the yard every

morning for a week. In the trough put a plain lime whitewash, with enough blue vitriol to give it a blue color. Don't shear the sheep too close, or they will suffer from the flies, and consequently be restless and poor in flesh. A little attention to the comforts of the flock will make sheep raising both a pleasure and a financial success."

Sheep on Small Farms.

Many farmers entertain the opinion that it is not profitable to raise sheep on a small farm, but they are unable to give a satisfactory reason. Those who have tried it find that there is nothing else they can raise that produces so much profit, for the sheep is the cheapest animal in the world to grow and gives the producer a double compensation—mutton and wool. A good ewe will produce a lamb worth as much or more than herself every year and besides supply enough wool to more than pay for her keep. At the same time she consumes weeds, brush and other troublesome things about the farm which other animals will not touch. If a cow would produce a calf worth as much as herself every two years, most farmers would feel satisfied, yet there are farmers who go on feeding cattle at a loss when they might get rich raising sheep. It must be conceded, of course, that a small farm is not as good as a big one for sheep to run on, for it is best to change the pasture every year if possible. Again, sheep may be grown profitably on cheap and rough ground not fit for agriculture. On the farm where land is worth \$100 or more per acre it is a serious problem what to grow to give the best returns. Raising and feeding cattle one year with another gives poor results. Hogs sometimes are profitable, but sheep are money makers all the time and at the same time enrich the soil as no other animals do. If you are a sheep raiser on a small scale, double it. If you are prejudiced against sheep, get over it and fall in line with the times.—Shepherd's Criterion.

The Wisner Stock Show.

That this is the age of advancement and progression was never more clearly proven than by the live-stock show held at Wisner, Neb., last week, a small town on the C. & N. W. Ry., located seventy miles from Omaha. A few years ago this same section of country was not heard of as a live stock center. Now they have some of the best in the world. Some time ago there was formed here an association known as the Wisner Live Stock Association and they built a stock pavilion and erected stalls for about 200 head of cattle, besides pens for sheep, swine, etc., and a building for agricultural products. Their first annual show was held last week and it was one of the great successes of the year. Fully 4,000 people were on the grounds the second day, and had it not been for a downpour the last day the attendance would probably have surpassed the preceding days. The cattle show was far ahead of some of the state fairs, especially in the Short-horn section. There were nearly 200 head of cattle on the grounds, mainly

DAY BY DAY

Agricola

September 12. Corn is maturing nicely. We have already selected some for seed, which are dry and hard. Ever since we settled on this patch we have found that in the spring more than one farmer about us bought seed corn. This is especially so with tenants.

So we have concluded to try and meet a portion of these wants by selecting the best ears and hanging them up to the joist in the barn.

The madam thinks boiled pumpkin is an egg-producing feast. Just as much so as oyster shell is necessary to make shell.

I started some sensitive rose seed in a pot. They will be a great curiosity to most folks hereabouts. We are fond of curiosities. Have quite a collection.

Received some Filipino lace from a nephew, a lieutenant in the Philippines. It is very fine, and as delicate as a happy dream. The folks who conceived and manufactured it must be an enlightened people.

Such fabrics throw more light on the condition of a people than forty lectures.

Besides from the same source we have other articles characteristic of the civilization of those islanders.

We Americans are the progeny of the emigration of the best people of the old lands. This is the cause of our smartness.

People are rendering out grape juice and canning it. Sweetened Concord juice, slightly diluted, makes an excellent drink. It does not inebriate. Besides we are told that it is very healthy.

Every garden should have plenty of grapes and of various kinds. Some are better to eat than other varieties. Black, red and white grapes are all good.

A red clematis at the porch is a prolific bloomer, but its day for this year is over and gone. It is, we are told, the only real red clematis variety known.

The recent rain has started plowing. There will be, around here, more than usual. Somehow, though we don't know the reason, our corn does best on fall plowing.

We planted quite a patch of sweet corn. We have it all in shock, having husked it. Close to a city as we are, rats abound. They forage the suburbs thoroughly. Hence one don't want to

O. L. Chase

I Am the Paint Man

EIGHT-YEAR GUARANTEE—TWO GALLONS FREE TO TRY—6 MONTHS' TIME TO PAY

MY PAINT is a new paint—made in a new way—sold on a new plan. It is unique.

My paint is unlike any other paint in the world.

It is made especially for you after your order is received, and I pack your order in hermetically sealed cans.

I ship my thick pigment, which is double strength, freshly ground, in separate cans, and in another can I ship the pure, old process Linseed Oil—the kind you used to buy years ago. Any child can stir them together.

This is the only possible way that you can get fresh paint for your work, and fresh paint is the only good paint.

I sell my **O. L. Chase Made-to-Order Paint** direct from my factory to you at a very low factory price.

You pay no paint dealer's or middle man's profits. It is the most economical good paint made, for first cost, and because of the extraordinarily long wear, it reduces the average of your painting bills at least fifty per cent.

I pay all freight on six gallons or over. I allow you to try the whole

order to paint your buildings. After you use it, stand off and look at it. If it is not entirely satisfactory and as represented in every way, the paint will be yours free.

No other paint manufacturer ever made such a liberal offer, and I make it because I manufacture the best paint ever put on the market.

I go even further. I will sell my paint on six months' time to responsible people if desired. This gives you ample time to test of its value.

Back of my agreement for quality, I also put a guarantee for eight years, the longest ever put upon a paint, and back of that is my \$50,000 bond.

Before buying paint, be sure and send for my paint book. It will not cost you a cent. It is the finest paint book ever issued. It tells the whole of my paint story in the most convincing and common sense argument, and with it comes big samples of all colors to choose from. Drop me a line at once. I will be glad to forward you the booklet, with a copy of my written guarantee, etc.

Yours truly, **O. L. CHASE, The Paint Man,**

701 Olive Street, St. Louis, Mo.

cut up unhusked corn and leave it in the shock any length of time.

Then there is the vole, or short-tailed mouse. They are very destructive also. They are the connecting link between the rat and mouse, so naturalists say. We don't pretend to know.

We farmers have enemies on every hand. But everything worth having requires struggling and labor. In the "sweat of the brow," we are to eat bread, says Holy Writ. The saying is literally true with the majority of men.

Some are prophesying frost daily. There is no need of uneasiness. We never knew it to catch the Spanish needle in flower. It postpones its appearance until it is sure of lots of the seed which will grow.

Spanish needles and cockleburrs mature with the corn.

When a boy, one of our tasks was to ride a horse hitched to a brush between the corn rows to break down the burs so the huskers could get along. This was in the bottoms of the Big Miami river, near the city of Hamilton, Ohio. The yield of corn was immense too. The corn was laid by clean.

The biggest cockleburrs, however, that we ever saw were in the bottoms of the Yazoo river in Mississippi. We saw the fourth Iowa infantry disappear in them at the battle of Chickasaw Bayou. The burs completely hid the men. The bayonets only were visible.

THE DES MOINES DAILY NEWS

MAKES AN EXCEPTIONAL OFFER OF 25c FOR THREE MONTHS TO TRIAL SUBSCRIBERS.

The News is the only paper published at the Capital City that is not controlled by party politics. All the news is published in a condensed and readable form in an independent and fearless manner. If you would know the facts about all state and national questions, just as they are, you will enjoy reading The News.

Daily market reports, farm news, household hints, sporting gossip, and everything that goes to make a complete metropolitan paper are regular features.

Every reading person now has an opportunity to see just how good The News is by sending 25c to the Des Moines Daily News, Des Moines, Iowa, for a three months' trial subscription. The paper will be stopped promptly at the end of the three months unless you decide to renew. Send today, as this offer will not appear again.

IN THE GREAT SOUTHWEST.

The Santa Fe's train service north of Ardmore, I. T., was completely tied up on the 12th inst., on account of heavy rains which washed away a portion of the track.

Purcell, I. T., is partially under water as a result of terrific rains on the Canadian river, which is out of its banks. Six hundred yards of the Santa Fe were submerged and washed out when the course of the swollen stream was changed. The company will immediately begin construction of a new roadbed at Purcell. The precipitation lasted six hours and amounted to five inches.

A heavy gust of wind at Joplin, Mo., leveled the big arena tent of a circus. The wind came from the west, and seemed to pass over the top of the menagerie tent, but the "big top" was split and torn into ribbons, while the heavy poles fell with a crash over the seats.

FREE U.S.
Gov't LANDS

WRITE to C. L. Sengraves, General Colonization Agent A. T. & S. F. Ry., 1117 Railway Exchange Chicago, for free copy of new folder, telling all about Government lands along the Santa Fe in western Kansas, eastern Colorado, New Mexico, Arizona and California, subject to homestead entry. In that region are millions of unoccupied acres. Much of this land can be irrigated, or crops grown under the Campbell system of "dry farming." It costs you only a postal card to find out the facts.

Southwest and in
California

royalties by mail. These letters come from every point of the compass, but the climax was reached yesterday when Needles Walters, operators, received a request from an Indian to send his royalties to Jerusalem. He did not inform them as to what he was doing in the holy city, but requested them to address all communications to Jerusalem in the future.

Nineteen white-haired veterans of the Mexican war answered roll call at Chillicothe, Mo., at the national encampment. The youngest man on the roll is 78 years old. Joseph A. Smith, of Lawson, Mo., has the distinction of being the oldest, whose age is 83. Mayor Hirsch delivered the address of welcome to the veterans at the city hall and was responded to by Colonel D. C. Allen, of Liberty. Captain W. Boon Majors, of St. Joseph, is presiding over the convention.

At Coffeyville, Kansas, the other day a farmer and his mule got tangled up with a "Katy" switch engine, but prompt action on the part of the engineer saved the engine.

Oil operators who have been taking oil leases in Indian Territory for the past four years frequently receive requests from Indians who own land on which white men have leases, to send their

ADVERTISING NOTES.

How about booking that sale you are going to have with Mr. O. L. Mossman, of Polk City, Iowa? This auctioneer's terms are right, as well as his services. Breeders desiring a conscientious worker will find him worthy at all times. Mr. Mossman has held successful sales in every instance and is booking orders daily. Try him for your next sale. His card will be seen on page 32.

Mr. S. K. Noland, of Des Moines, Iowa, the well-known live stock and real estate auctioneer, announces a special \$50 term in auctioneering in his advertisement on page 31 of this issue. The special price is made for a short time only and those wishing to avail themselves of the opportunity to learn auctioneering at a low price should read the advertisement and write Mr. Noland at once, mentioning The Homestead.

We take pleasure in calling the attention of our readers to the new advertisement of Mr. Geo. H. Heafford, of Chicago, Ill., that appears on page 23 of this issue. Mr. Heafford is interested in fruit and tobacco lands located in Houston county, Texas. He is sending free for the asking a new map of Texas, showing the location of these lands and will also send a descriptive circular, from which those interested can obtain some valuable information. He is selling land from \$8, \$10, \$15 and upwards per acre.

Mr. Frank Pearce, of Fredericktown, Mo., in furnishing copy for his advertisement found on page 23 of this issue says: "The land advertised for sale by me will produce the same crops under the same conditions and cultivation that can be raised in Iowa or Illinois. Some have condemned this land without seeing it, and others who have looked it over have generally thought, 'I have no kick on Iowa, as I farmed there for over thirty-five years. The opportunity to get a cheap farm here now is about the same as it was in Adair county, Iowa, twenty-five years ago.'"

We are advised by Mr. W. H. Grassmeyer, of Riverdale, Neb., whose advertisement appears on page 23 in which he is offering his 720-acre farm for sale, that there will be harvested on his farm this year 18,000 bushels of corn, 2,500 bushels of wheat, 2,500 bushels of oats, 200 tons alfalfa hay, and 100 tons of wild hay. This farm is located within one mile from school and if any reader of The Homestead wishes to purchase a fine home, here is the chance of a life time. The owner lives upon the farm and he desires that prospective purchasers call and look the land over and be convinced of the big bargain he is offering.

A stove that will save 25 per cent of the fuel as compared with other stoves ought to attract to itself considerable attention. Such a stove is Cole's Original Hot Blast, made by the Cole Manufacturing Company, Southwestern avenue, Chicago, Ill. The advertisement of this firm will be found on page 14. Readers who expect to purchase stoves this fall or winter are requested to inquire of their dealers about Cole's Hot Blast stoves. They sell from \$10 up. If upon application to your local dealer you do not find Cole's Hot Blast kept in stock, write for a free booklet on the scientific combustion of coal, addressing Cole Manufacturing Company, Southwestern avenue, Chicago, Ill.

The real merit of steel roofing has been known by builders for a number of years and it is no more than right that farmers who have buildings to roof should know that it is one of the best and safest materials from which a roof can be constructed. The Chicago House Wrecking Company, 35th & Iron Sts., Chicago, Ill., whose advertisement appears on page 17, have a large quantity of this material that can be procured very cheap. This material is new and is well preserved with paint. It is fire proof and water proof. This company will pay the freight to all points and a privilege to examine the goods at your railroad point before paying for them. Send for their catalog No. W-500.

An advertisement of the Northwestern School for Stammerers, of Minneapolis, Minn., will be found on page 20 of this issue of The Homestead. This school gives thorough and careful individual treatment founded on eighteen years of scientific and careful study in the treatment of defective speech by the principal, Mr. Wald M. Duke. This school has made many permanent cures, and has secured recommendations and endorsements of their work from public officials, educators and professional men. The principal of the Minneapolis East High School has the following to say of Mr. Duke's treatment: "Mr. Wald M. Duke has had two of our school pupils to cure of stammering. He has done it in both cases. One of them seems little less than marvelous. Mr. Duke knows what to do, having had the advantage of the best European schools in studying this difficulty. I cordially recommend him to anyone wishing the services of a thoroughly competent gentleman—one who is successful in his chosen work."

The National Railway Training Association, of Omaha, Nebraska, and Kansas City, Missouri, was organized for the purpose of preparing young men for railway work by a course of instruction by mail. Railway employing officials are too busy to properly train applicants for positions as firemen and brakemen and this school gives them a preliminary course of training, preparing them to perform their duties in a satisfactory and economical manner. Any young man physically sound, with good sight and hearing, and from eighteen to thirty-five, is eligible to either one of these positions, and if he is willing to devote one hour a day or evening from four to six weeks in preparing himself, there is no limit to the advancement he may make, depending entirely upon himself. Nearly all high salaried railway officials, such as superintendents, general man-

agers, up to presidents of the leading railroads of the country, are men who commenced at the bottom and have worked their way up the ladder of success, step by step. In addition to these high offices, there are other positions, such as train masters, master mechanics, yard masters, division superintendents, superintendents, traveling engineers, etc., receiving from \$300 to \$500 a month, all of which have been and are being promoted from the ranks. If interested and desiring to become a railroad man, the reader should refer to the advertisement of The National Railway Training Association which appears on page 13 and send in a coupon to the nearest office named in the advertisement.

GRANULATED OR INFLAMED EYE LIDS CURED BY "OCTAMI."

Parties afflicted with sore eyes should look up the advertisement of the Idanha Company, Box 363, Kirksville, Mo. These people guarantee their Octami to give satisfaction or money refunded. See page 17 for advertisement.

A LICE, MANGE AND SCAB DESTROYER.

No doubt every reader of this paper is familiar with Kreso Dip—familiar at least with the name if not with the product. It is used in diluted form to kill lice, mange and scab. When applied to cuts, wounds, sores and ringworm it results in destroying all germ life, after which nature soon restores the normal tissue. It is harmless, inasmuch as it does not blister the skin nor remove hair, though, as said before, it will destroy germs. It is used around cattle sheds, sheep pens, horse stables, poultry and hog quarters. If placed in wallows and in bogs sleeping quarters it will possibly prevent cholera from attacking the herd by destroying germs in advance. Kreso Dip is manufactured by Parke, Davis & Company, of Detroit, Mich. They will furnish booklets about this Dip free upon application. The advertisement will be found on page 17 of this issue.

A CAN OF DIP ON TRIAL.

There are thousands of farmers in the corn belt who would eventually become constant users of a good dip if they could only be induced to give one a trial. Dipolene, manufactured by the Marshall Oil Company, of Marshalltown, Iowa, is a guaranteed product, and in order that men may give this dip a trial without cost if it fails to do the work, the company agrees to let you use it thirty days on trial, after which time if it fails to do the things claimed for it the purchase price will be refunded. Disease germs of all kinds are killed by coming in contact with a weak solution of Dipolene. There will be considerable cholera in the corn belt during the next two or three months, and we suggest that hog quarters be disinfected regularly in order to destroy germs. Dipolene will destroy them instantly. For booklet stating what Dipolene is good for application should be made to the Marshall Oil Company, Department Y, Marshalltown, Iowa. See advertisement on page 3.

HEBRON INCORPORATED COMPANY.

The Hebron Incorporated Company, located at Hebron, Neb., are building a very fine factory for the manufacturing of the celebrated Hatch All incubators and brooders. This firm is making one of the successful incubators on the market today. The name, Hatch All, is quite appropriate, as the incubator certainly returns the goods. The machine is built of select redwood and is very neat in all respects. The company will be in their new building by October 15th and work will start from that date. The Hatch All brooder is one that meets with the approval of all who see it. It is as simple a brooder as one would want, as well as being one that handles the little chicks successfully. The sanitary conditions of the brooder have made it a winner. We will give a full description of the incubator and brooder in a short time. If you are open for an incubator it might be of interest to you to write them for a catalog and other particulars. Watch our columns for their advertisements.

NOVINGER & SONS OFFER CHOICE MISSOURI LAND.

In our land and home department on page 23 will be found the advertisement of Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo. These gentlemen are advertising their own lands and are offering such farms as the Illinois or Iowa man should look after if they wish a home at a moderate price. Last week the writer, in company with Mr. S. J. Miller, of Kirksville, Mo., the gentleman who imports Percherons and French Coaches, drove over these lands and we must say that Messrs. Novinger & Sons are offering them at such prices as look good to us. It will only be a question of a few years until lands in the neighborhood of such towns as Kirksville will be off the market, as the corn belt of America is limited. Messrs. Novinger & Sons report many inquiries. Some are coming soon to see these lands and the first to pay down a part of the purchase price will be the lucky man. The descriptions in the advertisement are such that we can add nothing to them other than to say that if anything, the prices are too low, considering the way lands in the West and in Illinois and Iowa are selling.

REAL ESTATE AUCTION SALES PROVEN POPULAR.

On page 31 of this issue will be found the announcement of Mr. S. K. Noland, the live stock and real estate auctioneer, of Des Moines, Iowa. Mr. Noland states that he has sold \$3,000,000 worth of real estate at auction in the past few years, selling property of various kinds, during this time, for railroads, bankers, capitalists and others. He makes a specialty of selling farms at auction, and will be glad to furnish a partial list of those for whom he has sold property to anyone interested. He says: "Recently I handled a large sale in a prominent Illinois town for a large property owner, receiving for my day's work \$750 in commission. On the 22d of September I will conduct another sale, fully as large, in the same town, for parties who were so well pleased with my former sale that they lost no time in making a contract with me to conduct their sale also. I believe that I can furnish all the references that anyone would desire as to my capability to conduct any kind of an auction sale. Will go anywhere to conduct sales, and always make reason-

Five First-class Newspapers and Magazines for

\$1.25 a Year.

COMPRISING OUR MAGNIFICENT RED LETTER COMBINATION FOR 1906.

Delightful Reading Matter for the Farmer and his Wife, Sons and Daughters--Something Good for Every Member of the Family.

1. The Homestead, universally recognized as the foremost agricultural weekly published. Every issue worth the price of a year's subscription to the practical farmer.
2. The Chicago Weekly Inter Ocean, a large family newspaper of twelve pages, with abundance of fine literary matter, prose and poetry, reliable market reports, etc.
3. The Kansas City Weekly Star, one of the ablest general newspapers in the West.
4. The Farm Gazette, a monthly magazine of profitable agriculture, printed on fine, heavy paper, with elegant illustrations and a cover in colors.
5. The Homemaker, a delightful monthly magazine for farmers' wives, daughters and children; enlarged, improved and full of good things.

All of these valuable periodicals for the low price of \$1.25 a year, if ordered within a reasonably short time, as for sufficient reasons, we must reserve the right to withdraw this unusual offer at any time.

To secure this great bargain you must clip out the following coupon:

Date1906.

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaker, as per your special offer to Homestead readers.

Name

Rural Route No. State

If you are already a subscriber to any of these publications, your time will be extended for one year.

able terms consistent with the quality of my work."

THE PAINT QUESTION.

As our readers will be doing considerable painting during the next few weeks, we believe that we are doing them a favor when we advise that application be made to Mr. O. L. Chase, 1 Olive St., St. Louis, Mo., for a new book on the paint question. This book contains many suggestions for those who expect to do the painting themselves, and a number of the suggestions which, if carried out, will enable the amateur to inspect the work of a professional painter with much more intelligence. Mr. Chase not only prints an excellent catalog, but he is in the paint business. He will send six gallons on trial and pays the freight in advance. If it does not come up to the guarantee in every way it will not cost you a cent. It is sold directly from the factory to the user and consequently cuts out all the profits of the middlemen. As said before, address Mr. O. L. Chase, the paint man, 1 Olive St., St. Louis, Mo. See advertisement on page 20.

A VALUABLE USE OF ASPHALT.

Asphalt is a product of the earth just the same as coal, iron, or any of the valuable minerals. It "grows" in the same way as coal, too—in veins or streaks—although an equally common way it manifests itself in lakes of the molten material. Indeed, some of the most valuable deposits in the world today are those of the lakes, whose thick, semi-liquid mass has oozed up from deep down in the earth just like a lake of water fed by springs.

The most famous lake of this character is the Trinidad Pitch Lake, on the Island of Trinidad down in the group of the West Indies.

Even in that hot country this asphalt is "not runny," but just soft enough to make anybody that stands on it keep moving. The fellow who proverbially lets the grass grow under his feet wouldn't feel very comfortable on its surface, for before he got ready to move he might find himself waist deep in the sticky mass.

It is hard enough, though, to enable workmen to dig it in the cooler hours of the day—before sunrise.

The material is carried by carts to the side of vessels where it is loaded into the hold of ships and brought to this country to be refined for commercial purposes.

About 100,000 tons of asphalt are taken out of the lake every year without making any noticeable difference in the quantity that remains. When asphalt is dug from any portion of the deposit, in the course of a few days the hole is again filled up by new material coming from subterranean asphalt springs, as inexhaustible as the water springs that form the Great Lakes of North America. Borings have been made to the depth of several hundred feet, in an unsuccessful effort to find the bottom of the lake. The constant motion of the asphalt made it impossible to go deeper.

The composition of the asphalt is of remarkable uniformity, no matter from which portion of the lake it is taken. Samples taken 135 feet deep at the center do not differ in composition from those taken from the sur-

CANCER

face of a few feet from shore. This shows the uniformity of the entire mass.

The asphalt is in constant motion. There are on the surface of the lake a half dozen, or more, islands, from fifty to 150 feet in diameter, bearing vegetation, with trees thirty or forty feet high, and a dense undergrowth. These islands are constantly moving or floating about, imperceptibly, yet constantly changing their position. From levels which were taken in 1893 and 1894 it appears that the center of the lake is a foot higher than the edges. This is due to the exhalation of the soft asphalt near the center.

For the practical uses which are now made of this product mankind is indebted to The Barber Asphalt Paving Company more than to any body else. This company mines, refines and sells more natural asphalt than all the rest of the world put together.

One of its refineries, the largest of its kind extant, is at Maurer, N. J. Here this company makes Genasco Ready Roofing from the refined asphalt, and in doing so they put the material through a special secret process which keeps the pliable qualities of the asphalt in the roofing indefinitely, unchanged by the action of the cold of winter, or the heat of summer, or acids, alkalis, gases, or any of a roof's common enemies.

The natural asphalt is the thing that gives the roofing power to combat all these elements, but in order to make this power stay in a roof, knowledge is necessary. This knowledge was acquired by The Barber Asphalt Paving Company by the continued use and study of asphalt for twenty-five years, so that having had more to do with asphalt, and having more asphalt to do with, than anybody else, they are authority on the subject, and whatever use they make of this valuable product of the earth, it is safe to assume that it has particular merit and is worthy of attention.

Genasco Ready Roofing besides being valuable on account of its resisting and lasting qualities, is low in cost. It can be put on by anybody, and does not require a roofer or experienced man of any sort.

Anyone who has knowledge enough to do farm work has knowledge enough to lay Genasco.

VERY LOW RATES TO NEW ORLEANS, LOUISIANA.

Via the North-Western Line. Excursion tickets will be sold October 11th to 15th, inclusive, with favorable return limits, on account of K. P. Supreme Lodge. Apply to agents Chicago & North-Western Ry.

STEEL WHEELS

with wide tires double the usefulness of the farm wagon. We furnish them any size to fit any axle. Cheaper than repairing old wheels. Catalogue free.

EMPIRE MFG. CO., Box 103A, Quincy, Ill.

Echoes From a Kansas Farm

By Henry Hatch

Crab grass is getting help in its mission as a "cover crop" for the soil. It is barn grass or small fox tail.

A very few years ago there was no barn grass in this country, now it is getting thick. We made a trip through Iowa three years ago, and every pasture and meadow looked like a field of barn grass. It is not quite that bad here yet.

Our native grass has a wonderful hold on the soil. By taking all stock off a pasture that looks to be nothing but weeds, and mowing the growth for hay for two years, and you again have a thick growth of grass, and no weeds. We believe no other grass in the world will recover and take complete possession as quick as Kansas blue stem.

These times tax the patience of the man who seems determined to hold onto his cattle until he can get what might be called "a good price." We know of men who have been keeping cattle they would have sold three years ago, and they say will keep on keeping them until the price justifies selling. When will the raise come, is the question asked by all cattlemen.

Other than cattle and wheat, prices are good. With wheat selling for close to fifty cents a bushel, and cattle for only two-thirds of what they should, there can be no great prosperity for the cattle-wheat raiser. But there is this much to be said about all western farmers, very few are in shape so they have to sell.

Three years ago, if a man wanted to get the laugh on himself, all he had to do was to mention to a crowd that he was going to sow some wheat on upland. Now, if you tell the same crowd you're going to stick to corn, they will argue with you in favor of wheat. But, then, the destiny of a nation has changed in shorter time.

We no longer depend on the stalk fields for even a part of the winter's roughness for stock. Having no "champion" corn huskers on the place there is not much grain left in the fields after husking, and the danger of loss of stock and the tramping of the fields overbalances everything else. We always put up enough fodder now to carry all stock through the winter, fed in lots around the buildings.

We have found that corn fodder bound into bundles by a corn binder is not as liable to mold in a shock as that cut by hand and set up loose. There is air space between the bundles of a shock, while loose fodder almost excludes the air from the center of a good sized shock. Binding is the only way to handle any kind of fodder that can be handled with a binder.

The man who "cut and covered" when plowing, two months ago, is now wondering whether he plowed at all.

Another instalment of western horses were shipped into a nearby town, and sold to the highest bidder last Saturday. It called together a large crowd, many of them young fellows looking for something to "break." They found it. Some of the unbroken brutes, and some of them are probably unbreakable, sold for as high as \$125 to \$150, and one brought the top-notch price of \$175. We never have felt any hungry desire rising within us to own a western horse.

It certainly is unexpected the way horses hold to the present high price, and the surprising part of it all is there are any number of men who have made themselves believe that horses will never be lower in price than they are now. We do not believe we are given to looking for lower prices always ahead, but it does seem reasonable to expect cheaper horses as soon as the present large crop of colts have grown into usable horses.

Since Kansas has passed stricter hunting laws rabbits have been on the increase, and reports of their damage come from all parts of the state. Every evening, as we drive the milk cows from pasture, we see several, and occasionally kill some with a rifle. A good dog keeps them from doing much damage close around the buildings, but it is out of the question to raise a garden away

from the house, unless fenced rabbit-proof. Our only trial with soy beans was untimely ended by the rabbits. We planted four acres, and the rabbits keep the whole field pastured down to the ground. One would rarely see a rabbit in the field during the day, but they must have held carnival there at night. They would gather for the feast just at sun down.

Some say to cut fodder as you would hay, before it is drying a great deal; others advise waiting until a great part of the leaves are brown, and one man says if some of the leaves have blown off it suits him all the better. We know this much; fodder can be cut too green in this climate. We cut some too green last year, and it moulded in the shock. This refers to Indian corn.

The practice of a good many who use road graders is to roll all the weeds and grass into the middle of the road with the dirt, but a neighbor who has lately been doing some grading has shown some sense about such work. He first mows the roadway, and when the weeds and grass are dry, burns them. This gives a clean place to work, and it takes less power to move the same amount of dirt. Dead weeds are not needed in a grade, either.

AN EVENING SPOILED.

Gertrude Atherton, the novelist, was condemning the Mormons and their ways.

"Imagine," she said, "a Mormon wife and husband, on a cool autumnal evening, sitting by their cozy grate, she with her knitting, he with a book or a newspaper. The wife looks up affectionately every little while, thinking that she is lucky to have secured such a considerate, home-loving chap for a mate, when suddenly the man rises and takes his hat and gloves.

"Where are you going, dear?" the wife asks gently.

"To see young Miss Smith," the husband replies. "I have an appointment with her. She is to give me her answer tonight."

TENNYSON'S MANY LOVES.

In discussing little oddities and peculiarities in connection with the works of various writers, and more especially poets, an official of the Congressional library recently said:

"I was talking with a publisher not long ago about a new edition of Tennyson's poems which he proposes to bring out. He showed me a sample of the type which he intended to have cast for the edition, and I asked: 'Have you given an order for an additional lot of i's and v's?'"

"Why, no; why should I?" he asked. "Because you will have to have them," I told him. "The word 'love' occurs so many times in Tennyson's poems that the usual percentage of i's and v's is far short of the number required."

THE MARKETS.

Clay, Robinson & Company, under date of Sept. 14th, send in the following summary: Monday of this week we had a strong active market for beef cattle at prices generally 10c to 15c higher. Our sales included a two-load drove of branded western bred white-faces fed by Fred V. Stowe, of Grimes, Iowa, at \$6.75, which was the extreme top of the market for the entire week and also the highest price of the season for branded westerns. These cattle were bought for Mr. Stowe as feeders by our South Omaha house last October at a cost of \$4.10. Monday's advance, however, was all wiped out on Wednesday, so that present prices stand just about the same as a week ago. It takes a choice to extra prime class of beefs to bring \$6.25 to \$6.75; good to choice steers are quotable at \$5.60 to \$6.25, medium to good at \$4.90 to \$5.60 and common to fair at \$4.15 to \$4.90.

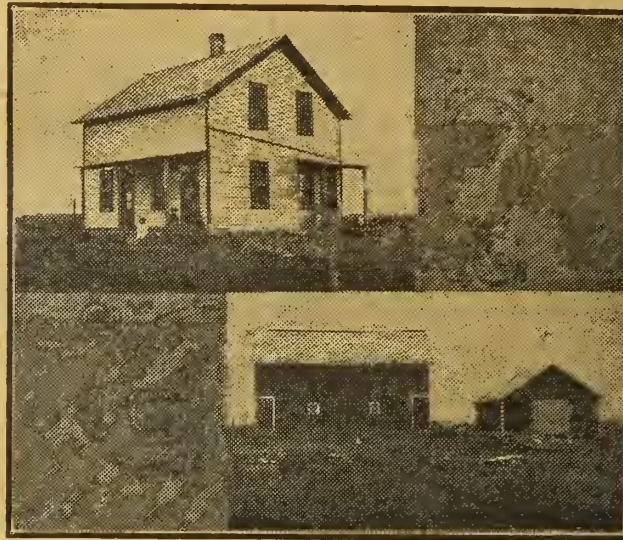

We had had liberal receipts of butcher stock this week and all grades of native cows and heifers have been very slow sale excepting the real choice ones, which are about steady. All other grades may be quoted 10c to 15c lower. There has been a strong inquiry for yearling heifers both medium and choice grades, and a good shipping demand for good fleshy grass heifers, which have been selling around \$3.50. This class has been selling steady compared with a week ago. Cannors and cutters have been very dull sale at the decline. Bulls show very slight change in prices from last week. Veal calves are 25c to 50c per hundred weight lower.

Receipts have been sufficiently liberal in the stocker and feeder division this week to supply all the demands for both stockers and feeders except for the choice and fancy selected grades of all weights. All other grades sold strong Monday and Tuesday, while Wednesday the trade was slow and the last day's of the week show a decline equal to the lowest days this season with one exception. Stocker and killing heifers sold about steady. Quotations on feeding bulls are unchanged. Not enough spring calves to supply the demand.

Receipts of hogs have been just about the

LANDS AND HOMES FOR SALE

A Missouri Farm Bargain.

300 Acres in Mercer County, Missouri

THIS FARM is located only four miles from a good railroad town and about ten miles from the county seat. It is well improved with a good house, barn 30x50 and other buildings; a fine well and windmill. There is also a good bearing orchard and the place is well fenced and cross fenced.

The land is rolling enough for good drainage and the soil is rich and productive. It is the very best corn land, producing from fifty to seventy-five bushels to the acre. Two hundred acres are in cultivation, the balance in good tame meadow and blue grass pasture. There is some timber, sufficient for fuel and posts.

Mercer county is one of the best farming counties in Missouri and this farm is in the best part of the county. The owner will sell right, on favorable terms, or might consider a smaller farm, live stock or other property in part payment.

Send for our new illustrated catalog of improved farms. It is the most attractive list we have ever issued and offers many unusual bargains. The descriptions are complete and the illustrations are from actual photographs of improvements on the farms described. It is printed in handy folder form on good paper and contains a large map of Iowa.

We have a few good farms to exchange for city property, merchandise, etc.

NORTHERN IOWA LAND COMPANY,
INDEPENDENCE, - - IOWA.

same as last week, but prices are 5c to 10c higher. Extreme top today was \$6.65, bulk of the good hogs selling at \$6.50 to \$6.60. A week ago today top stood at \$6.62½, which price was obtained by us for eighty head of Tamworths, averaging 187 pounds, sent in by Ex-Governor Packard, of Marshalltown, Iowa, and was 5c above any other sales for the day.

With liberal receipts of sheep this week the market has declined 10c to 15c on practically all classes and in some cases the loss has been more. Extreme top for western lambs has reached \$8.00, which price we obtained on Tuesday for 572 head averaging sixty-eight pounds, shipped by Noble & Bragg, Nowood, Wyo. This is the highest price ever paid for Wyoming lambs at Chicago. There are not many good native lambs coming, but choice fat natives are quotable at \$7.75 to \$8.00, fair to good at \$7.00 to \$7.50, common to fair at \$6.00 to \$7.00. Good to extra choice wethers are selling at \$5.35, to \$5.65, fair to good at \$5.25 to \$5.35, good to choice fat ewes at \$5.35, to \$5.50, good to choice feeding lambs at \$6.75 to \$7.00.

MOVED TO CHICAGO.

The Jones National School of Auctioneering and Oratory, 231 Ashland Boulevard, Chicago, Ill., Carey M. Jones, president, have sent out the following announcement: "The superior advantages which are afforded by the city of Chicago as a location have induced us to move there in order to give our students all the advantages and opportunities which arise from such a location. It has been our endeavor in the past to offer every advantage to students attending the school, regardless of what the expense might be, and we feel that by having the school located in Chicago, and close to the Union Stock Yards, the greatest live stock market in the world, we will be better enabled to give each and every student a better education than could be afforded in any other city in the United States. The live stock supremacy of Chicago is established. It is preeminently the live stock market of the world, and has no serious rivals either in magnitude or volume of business transacted. Chicago's influence is national. At the present time there are 300,000 cattle, 600,000 hogs, 400,000 sheep and 8,000 horses sold at the Union Stock Yards every month. Auction sales are held daily at the stock yards, sales of fancy cattle of all descriptions, and there are scores of real estate, jewelry and merchandise auctions of all kinds conducted in Chicago from day to day, and the advantage of being able to attend these sales while taking a course at the school cannot be too highly estimated, and it would be hard to find a better location anywhere for a school of auctioneering. All roads lead to Chicago, and it is aptly said Chicago feeds the world. All the great east and west transportation lines have their terminals in Chicago, so have also the southern railways and lake transportation lines. Each term of school will hereafter consist of six weeks, instead of four, and although the term is lengthened, the tuition remains at \$100 for the entire course, including all branches of auctioneer-

740 ACRES, Chautauque County, Kansas. This is a fine grain and stock farm. Is all good, rich, productive land. About 400 acres in cultivation, including 30-acre orchard; balance is in excellent pasture. Can all be cultivated. Good improvements. Railroad station adjoining the farm. Good prospects for oil. Will sell on favorable terms or will take good small farm or other property in part payment. **BOX 151, INDEPENDENCE, IOWA**

A NEIGHBOR, living near the half-section of land we are offering for sale, just thrashed a field of oats at .95 bu. per acre. Our land is equally as good. \$31.50 per acre will buy it, and \$5,500 handle it. **Paul S. Stearns, Westhope, North Dakota.**

....LANDS AND HOMES FOR SALE....

Missouri Farms

I have a large list of farms for sale in Vernon, Bates and adjoining counties at \$30 to \$50 per acre; nice lying country; just as good as Iowa or Illinois; good climate; good water. Am a farmer, born in Fulton County, Illinois, and lived 38 years near Prairie City, Iowa. Come to my house and I will show you my list of bargains free, and will sell you land at owners' prices. Can show you as big corn all over this country as you ever saw grown in Illinois or Iowa. Can show you more hay in a half day's drive from Statesbury than you ever saw before in the same territory. Lots of fruit of all kinds. Think of it; only 80 or 90 miles from Kansas City. If you don't receive prompt replies send registered letter at my expense. For price lists, maps and particulars, write,

A. F. Wilson, Statesbury, Mo.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 669 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, eastern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

HOMES AND FORTUNES

are both to be had in the fertile Panhandle of Texas. There is no better climate or soil to be found on the face of the earth than that of the Panhandle. You can raise just as large crops on its fertile acres as you can in Iowa or Illinois, and you can get better prices for them. There is no better place to live—water is good and plentiful, winters are mild, and everything works to the success of the farmer and stock raiser.

A few years ago land in your locality was selling at half, or less than half, what it is bringing today, and many people you know have made fortunes by their investments in lands. Those same opportunities are now to be had in the Panhandle of Northern Texas. If you buy here at once for investment you are sure of doubling your money in the next two or three years, for the immigration coming here now is bound to bring prices to much higher levels.

Satisfy yourself that the panhandle is the garden spot of the earth by seeing it, but first write for our literature which tells you how to see it to the best advantage and at the least possible expense. We don't want you to buy our land until you are satisfied, because a well-satisfied customer is the best advertisement we have. We can offer you your choice from 100,000 acres in the very Garden Spot of the Panhandle at attractive prices and terms. Write for pamphlet to

THE NORTH TEXAS LAND COMPANY, 100 Market St., Texline, Texas

I Can Sell Your Real Estate or Business NO MATTER WHERE LOCATED. I have a large list of properties and business of all kinds sold quickly for cash in all parts of the United States. Don't wait. Write today describing what you have to sell and give cash price on same.

If You Want to Buy

any kind of business or real estate anywhere, at any price, write me your requirements. I can save you time and money.

DAVID P. TAFF, THE LAND MAN, 415 KANSAS AVENUE, TOPEKA, KANSAS.

COME WHERE CROPS NEVER FAIL.

FREE information about irrigated land in the Gridley Colonies, Butte Co., California. No crop failures on irrigated land. Five to six crops alfalfa every season. Dairying and stock raising highly profitable. Peaches, grapes, figs and English walnuts give big profits. Abundant water for irrigation at low rates. A fertile and prosperous section, with good schools, churches and good roads. Two railroads. Good market. One hundred families have settled at Gridley the last year. Many more coming.  FIELD NOTES.
 Mr. Geo. H. Lawsbe, of Harlan, Iowa, offers Chester White boars for sale.
 Mr. Albert Bell, of Lake City, Iowa, offers some good Duroc Jersey boars for sale.
 Proud Advance boars are offered for sale by Mr. Grant White, of Afton, Iowa.
 Ohio Chief boar pigs are offered for sale by Mr. W. D. Pittman, of Lake City, Iowa.
 Tamworth boars are offered for sale by Messrs. Norrish & Bevington, of Kingsley, Iowa.
 Messrs. J. W. Knowles & Son, of Craig, Neb., are offering choice Poland China boars for sale.
 Write Mr. Henry Dorr, of Remsen, Iowa, if you want a toppy Poland China boar at a living price.
 Some good Duroc Jersey boars are offered for sale by Messrs. J. W. Reynolds & Son, of Defiance, Iowa.
 Messrs. A. A. and W. G. Karschner, of Wilcox, Neb., will hold a public sale of Duroc swine, October 23d.
 Messrs. Stow & Gingrich, of Hamburg, Iowa, are offering a splendid bunch of Duroc Jersey boars for sale.
 Good Ohio Sunshine Poland China boars are offered for sale by Messrs. Wm. Ube & Sons, of South Omaha, Neb.
 Three strong and very growthy fall Poland China boars are for sale by Mr. W. W. Wheeler, of Harlan, Iowa.
 A few good Oxford Down rams are offered for sale by Mr. S. S. Stolt, of Kiron, Iowa. Also a few good Duroc Jersey boars.
 A good bunch of Hereford bulls and a few good cows and heifers are offered for sale by Mr. W. L. Dodge, of Hubbard, Neb.
 Two cracking fall Duroc Jersey boars, good enough to head herds, are offered for sale by Mr. W. W. Wheeler, of Harlan, Iowa.
 Thirty good Poland China boars, nice, stretchy fellows, are offered for sale by Messrs. Reubel Bros., of Rockwell City, Iowa.
 Mr. A. C. Lanham, Battle Creek, Iowa, won second on his yearling boar, L's Sunshine 37308 at Sioux City last week, and he now offers thirty choice boar pigs for sale, mostly all sired by him. He sold the highest-

priced pig at the same show last week, so you know be bas some good ones.

The advertisement of Mr. E. R. Smith, of San Francisco, Cal., on page 31 will be of interest to Scandinavian girl readers.

Messrs. J. & I. D. Godden, of Bradgate, Iowa, name November 14th as a date for holding a public sale of Short-born cattle.

October 20th is the date named for a Poland China bog sale to be held at Corning, Iowa, the property of Messrs. G. H. & J. L. Mabre. Mr. S. S. Stolt, of Kiron, Iowa, offers to sell a few good Oxford Down rams, and he will also price a few good Duroc Jersey boars.

Some good Oxford Down rams are offered for sale by Mr. S. S. Stolt, of Kiron, Iowa. He also has a few good Duroc Jersey boars for sale.

Mr. H. S. Allen, of Russell, Iowa, owns the sweepstakes boar at the Iowa State Fair, and Duroc Jersey breeders who want the tops should write him at once.

Good Poland China boars of the very best blood are offered for sale by Messrs. Wm. Ray & Son, of Defiance, Iowa. Read their advertisement on page 34 and write them.

Announcement is made in our Date Claim columns this week that Messrs. J. R. Mills & Son, of Perry, Iowa, will hold a public sale of Percheron horses and Short-horn cattle on December 19th.

Mr. H. C. Glissman, of South Omaha, Neb., will make a public sale of Holstein-Friesian cattle at that place on February 12th. As he has one of the very best herds in the West, it may be expected to be a good one.

Mr. Chas. Van Patten, of Sutton, Neb., has some choice spring pigs that will be worth your time to look at. He has a few fall animals sired by Red Reuben. Mr. Van Patten will sell these at prices suitable to purchaser.

Duroc Jersey breeders can now buy spring boars and gilts, sired by Tom Davis, the second-prize boar at Des Moines, of Mr. W. J. Prather, of Russell, Iowa. Now is the time, boys, to get the pick of his herd and get them right.

Mr. U. G. Davidson, of Manson, Iowa, has some good spring boars and gilts for sale sired by Crimson Wonder I Am, the sire of the sweepstakes boar at the Iowa State Fair. You can't see Mr. Davidson too soon if you want this breeding.

A number of thick, growthy, Angus bulls, that are just right for service, may be had by writing to Messrs. Rosenfield & Siverley, of Kelley, Iowa. This firm is located a short distance from the Iowa Agricultural College, and visitors are always welcome.

Mr. W. C. Smith, of Melbourne, Iowa, announces a sale of Chester White swine in his advertisement on page 31 of this issue of The Homestead. The sale will take place on September 26th and therefore those of our readers interested should send at once for catalog.

Mr. J. M. Mayor, of Defiance, Iowa, purchased the Poland China boar pig, Keep On Jr., of Mr. A. C. Lanham, of Battle Creek, Iowa. This pig won third in a class of twenty-nine at Sioux City last week. His sire is owned by Mr. W. N. Booth, of Danbury, Iowa, and his dam by Mr. Lanham. He is a good pig and he goes to the head of Mr. Mayor's herd.

Messrs. L. W. Cross & Son, of Mason City, Ill., well-known breeders of Duroc Jerseys, have decided to hold a public sale on October 17th. Fifty head have been included in the offering, consisting of yearling fall and spring sows and a number of extra good spring boars. Watch these columns for further particulars and write for catalog, kindly mentioning The Homestead.

Mr. V. A. Lathrop, of Marion, Iowa, in starting his advertisement on page 31 of this issue of The Homestead, writes: "I have good March pigs of both sexes large enough for service at prices lower than when pork was worth only half as much as it is now. My stock is very growthy and thrifty and there is no disease in this part of the country. Descriptions and prices will be given upon application."

Chester White fanciers can find good individuals at the proper prices by writing to Messrs. E. L. Nagle & Son, of Deep River, Iowa. The herd boar weighs 900 pounds in breeding condition, and moves as easily as a pig only a year old. A nice lot of spring pigs to select from, over 100 head. Better write today, as Messrs. Nagle & Sons are selling them rapidly. See advertisement on page 34.

Mr. F. E. Garrett, of Lohrville, Iowa, offers some good Duroc Jersey boars for sale sired by Proud Advance and Orion, and he will offer for sale a half interest in I Am a Wonder, a litter brother to the sweepstakes boar at the Iowa State Fair this year. He is a son of Crimson Wonder I Am, the sweepstakes boar last year at the same show. Here is a good chance for some wide-awake breeder to get an interest in a well-bred boar and a good individual.

A Duroc Jersey sale which should interest western breeders is that of Mr. H. E. Watson, of Edinburg, Ind., to be held on Saturday, October 20th. Mr. Watson has one of the best herds in Indiana and has at the head of his herd Great High Chief, a World's Fair boar and a son of Ohio Chief. Twenty yearling sows and boars, the get of this noted boar, are included in the offering. Further particulars will appear in these columns, but if breeders wish to add new blood to their herds they should write Mr. Watson at once for catalog, kindly mentioning The Homestead.

Mr. Carl Hansen, of Herman, Neb., one of the best of the younger Duroc Jersey breeders in the West, starts his advertisement with this issue. He writes: "I have about thirty-five male pigs for the season's trade. We do not claim to have anything in the line of world beaters, but take the bunch as a whole and we will make most any of the herds go some to beat us. The pig crop is sired by such boars as Bar-None 30241, Bar-None 2d 4131, Grant Hero 40413, Critic's Echo 43005. My sows represent such breeding as Gold Dust Jim, Surprise, Surprise I Am, Young Grant, Monitor, Gold Dust Jim II, Glendale Chief, and others. Here is also a fall boar sired by Bar-None, dam Hansen's Beauty by Surprise I Am, while this hog has hardly got the size I like to see, he has plenty of quality and

should be good enough for anybody. My gilts are all reserved for my bred sow sale February 15th."

Chester White boars, and good ones, from the best of prize-winning stock, are offered for sale by Mr. J. L. Barbor, of Harlan, Iowa.

Mr. Austin Renshaw, of Blair, Neb., offers spring boars for sale by Junior Jim, the second-prize aged Duroc Jersey boar at Des Moines.

Mr. Geo. A. Hans, of Newton, Iowa, announces a public sale of cattle, October 8th, at the Plainview Stock Farm. He reports his cattle doing fine.

The Roycroft Farm, of Des Moines, Iowa, name the price on Duroc Jersey boars in their advertisement that appears on page 35 of this issue of The Homestead.

Two hundred top Duroc Jersey spring boars and gilts are offered for sale by Mr. W. J. Wendt, of Marcus, Iowa, and the price is certainly right. They are the very best of breeding.

If you want the blood of Crimmon Wonder write Mr. H. L. Cantine, of Quimby, Iowa. He has more of this blood than any other breeder, as he owned the sire, Tolstoy. He can fit you out with a herd header if you are looking for one.

Mr. A. T. Sundell, Paton, Iowa, is making prices on eight fall boars, sired by Lord Roberts 17329. They ought to go rapidly, as prices are reasonable. Send in your order for spring pigs, sired by King West 26163. They are good ones. See card on page 36.

The Armour-Funkhouser sale of imported and home-bred Hereford cattle will take place at the Kansas City Stock Yards sale pavilion, Kansas City, Mo., December 11th and 12th, at which time they expect to make as strong an offering of well-bred cattle as in the past.

Geo. Kerr, of Sabetha, Kan., has about 200 head of spring pigs. His crop of youngsters are good and with the blood lines should be easy sellers. He will use a son of Ohio Chief in his herd this fall, also a Crimmon Wonder boar. You can't go wrong on buying here. Try him once.

Mr. C. C. Keil, the live stock auctioneer, of Ladora, Iowa, has had fifteen years' experience in that business and has a thorough knowledge of live stock pedigrees. He is also a breeder of Short-horn cattle and Duroc Jersey hogs. Write him for dates, mentioning The Homestead. His advertisement appears on page 32.

On page 35 of this issue you will find the advertisement of the T. L. Livingston herd of Durocs. This gentleman has made his reputation on a class of hog that meets with the approval of the hog men in general. His crop of spring pigs have made a good growth and are now ready to be shipped out on mail order. Watch The Homestead for a fuller report of the herd.

Mr. John Blain's herd of elephants are coming along in nice shape. He has as much quality as ever and all indications point to a cracking sale on October 17th. Blain breeding was among the winners at Nebraska this fall, Oakland Prospect winning second in a large class. Watch for Mr. Blain's advertisement in our columns. Write him at Pawnee City, Neb., for full particulars, etc.

Mr. Wm. Malcolm, of Worthington, Minn., one of The Homestead's advertisers, and a leading Duroc Jersey breeder, won first and sweepstakes on Dale, a son of Orion's Profit, at the Minnesota State Fair. This boar is a grandson of old Orion and is a good one. Mr. Malcolm has a splendid bunch of boars for sale sired by this sweepstakes hog, and he is very reasonable in his prices. Write him at once and get his best.

Messrs. Hanks & Bishop, New London, Iowa, are prepared to fill orders for spring and fall hogs. Duroc breeders can find something to their taste out of the Pleasant Grove herd. Boars by Top Notcher Again, Proud Advance, and other noted sires are placed at very reasonable prices. Visitors are extended a cordial invitation to inspect this herd at any time. If impossible to tell, just drop a card, describing your boar desired, and prompt attention will be given. See card on page 37.

Mr. Alec Calder, of Fremont, Neb., one of the best known and most popular horsemen in the West, showed horses at the Nebraska State Fair and got the following prizes: First and fourth on aged Shire stallion, fourth on three-year-old stallion, first and second on two-year-old filly, also sweepstakes. At Sioux City he got first on coach stallion four years and over, second on three-year-old Clyde stallion and first and second on Clyde mares. He has a few good Clyde stallions for sale at prices that will move them if taken soon.

Mr. H. S. Allen, of Russell, Iowa, breeder of Duroc Jersey hogs, in sending in copy for his new advertisement on page 35 writes: "In calling attention to the boars we are offering for sale, would say that there are some good herd headers in the lot. They are big, strong, lusty fellows, have never been crowded, and so are in condition to do the buyer good. There are three especially big, fine, strong fellows by the 915-pound sire, Top Notcher Again, that should go into good herds, and they will be priced very reasonable. We invite inspection and guarantee every man a square deal."

The Ardmore Stock Company, of Holstein, Iowa, were out in full force at Sioux City and secured the following prizes: Sweepstakes boar any age, Typesetter 3d, a yearling boar by St. Patrick of Ardmore, out of a choice Royal Majestic Sow; first prize aged boar, Royal Improver 78454, a two-year-old, sired by Royal Majestic 63234. They have used Royal Improver extensively in their herd the past two years and he has proven on exceptionally good sire. He has for his dam a daughter of old Columbia 33769, dam of the World's Fair (Columbian) champion, Columbia Duke. Royal Improver is a very showy boar. He won first in class and sweepstakes at Interstate Fair, both in 1904 and 1905. They also have the second-prize yearling boar of this year's fair, Stumpy Pat 91065, a son of St. Patrick 60424 (sweepstakes boar at Iowa State Fair, 1902) and out of Senorita 47938, a great brood sow bred by Mr. Reuben Gentry. Stumpy Pat and his litter mate were also prize winners at the 1905 fair. They have a lot of good pigs by him this year. They won sweepstakes boar, nine first out of fourteen, seven seconds, a third and two fourths. The four high-priced

sows were directly descended from Royal Majestic. The sweepstakes boar was a very close call.

Mr. F. H. Long, of Manning, Iowa, showed his big Polands at Sioux City last week and got second on aged sow, second on sow two years and over and fourth on his 900-pound boar, Monarch 2d. He has thirty-six fall and spring boars sired by this same boar, and for size and bone they are hard to beat. Try him with an order if you want a big fellow.

Forty choice Poland China boars are offered for sale by that old, reliable breeder, Mr. W. N. Booth, of Danbury, Iowa. They are sired by Keep On Jr., a son of the great Keep On; also by Standard Tecumseh and by Unedda Thickset, a son of the Ohio sweepstakes boar, Thickset. These are out of very large sows, most of which are strong in Tecumseh blood. If you order a boar of Mr. Booth he will treat you right and give you a square deal.

An excellent opportunity is afforded readers of this paper to secure a number of well-bred Galloway cattle by writing to Mr. S. D. Miller, of Wellman, Iowa. Mr. Miller has eight bulls, six cows and three heifers that he wishes to close out. They will be either sold singly or in a bunch. Prices are low enough to make it worth while to anyone interested in this breed. Look at the advertisement on page 33 and when writing mention this paper.

In the Duroc Jersey advertisement of Mr. A. L. Mossman, that appeared on page 29 of The Homestead in its issue of September 13th, a slight error crept in as to the day of the month. The advertisement stated that the date the sale would take place was Tuesday, September 26th, when it should have been Tuesday, September 25th. The correct date appears in the advertisement on page 35 of this issue of The Homestead. Homestead readers will please bear in mind that the date is Tuesday, September 25th.

Mr. R. C. Poston, of Corydon, Iowa, has seventy-five extra good Duroc Jersey spring pigs that he is offering for sale on page 31 of this issue of The Homestead. In furnishing copy Mr. Poston writes: "These pigs are a healthy, vigorous lot, in good condition, and in fact I think the best I have ever raised. The blood lines they carry are first class and will satisfy the most exacting. I will be glad to send copies of pedigrees and answer any questions that may be desired by anyone who is looking for a good

Look up this gentleman's advertisement on page 26 and write him for prices.

The firm of Messrs. Norrish & Bevington, of Kingsley, Iowa, showed Duroc Jerseys at Sioux City, Iowa, and got their share of the prizes. They got second on Pericles, and this is the second time he has landed the same ribbon at this show. They also got second on their yearling boar, Cedar Lawn Model, and he showed against the first-prize boar at Des Moines and Hamline, and this was one of the strongest classes in this show. They also won second on get of Pericles H. They have some good boar pigs ready for sale that are sired by these two prize-winning boars. Write them at once if you want the best.

Mr. Wm. Sutter, of Liberty, Neb., with Mr. T. L. Livingston, of Burchard, Neb., purchased the grand sire, Liberty Challenger by Duroc Challenger, at the Geo. Horning dispersion sale. The hog was a bargain at the price paid, \$125. These gentlemen are well posted and would undoubtedly have paid double that amount for the hog. He is a two-year-old and is one of the best sires in the state. Mr. Horning could have shown him with satisfaction at Nebraska State Fair. The hog goes into the hands of two well-known and reliable breeders. Both gentlemen are well established here and both appreciate the use of a good medium to sell the surplus stock. You will find their advertisements on page 35. Write them for prices on choice stock. They are among the foremost Duroc breeders.

Mr. B. G. Stark, of Livermore, Iowa, one of the oldest breeders of Short-horn cattle in the state of Iowa, will make a public sale of fifty head at the fair grounds, Humboldt, Iowa, on October 16th. The offering will include a number of good yearling bulls, two of which are grandsons of Imp. Leybourn, a bull that brought Mr. Stark quite prominently before the Short-horn public a number of years ago. A dozen of the cows will have calf at foot by Commodore 2d and Standard Fibre, both richly-bred Scotch bulls. He is putting in some good cows and a nice bunch of heifers, and the offering as a whole is made up of very useful and money-making cattle. We want to say to those who are looking for some good cattle that they will be able to get them in this sale, and they will certainly get a square deal if they are present on the above named date. Mr. Stark has made a reputation for treating the public fairly and squarely and every animal that

CORRECTION IN DATE

In the Poland China Sale advertisement of Mr. Jas. B. Turbett, of Eden, Peoria Co., Ill., which appeared on page 31 in our issue of September 13, the date was printed as Dec. 27; it should have been Sept. 27. The correct date appears in the advertisement this week on page 38.

young boar or gilt that will develop into a first-class hog."

Mr. C. S. Buckley, of Holstein, Iowa, showed Berkshires at Sioux City last week and secured second prize on boar six months and under one year; first and second on boar six months; first on sow two years and over; first on sow one and under two; fourth on six months sow and under year; first on under six months gilt; third on boar and three sows under one year; second on boar and three sows bred by exhibitor; third on four swine get of same boar; first on four pigs get of same sow, and sweepstakes on sow, any age. He also got second on yearling Short-horn bull in a strong class.

The Homestead takes pleasure in calling the attention of its readers to the advertisement of Mr. C. F. Shaffer, of Wellman, Iowa, which appears on page 34 of this issue. Mr. Shaffer is a breeder of Poland China swine and Short-horn cattle. At the present time he is offering 110 pigs of March and April farrow for sale. They are sired by his herd boars, G's Perfection, Jr. 89471 and Black Chief 99855. He also has ten head of Scotch and Scotch-topped bulls for sale, all straight reds. His Short-horn herd is headed by the prize-winning bull, Laurel Knight 170762. Write him for pictures of his herd bull and boars which will be sent free on application.

W. J. East & Son, of Clay Center, Neb., are recognized as one of the best Duroc breeders in the state of Nebraska. Mr. East has established himself by using only top-notchers and the most of his herd represents some prize-winning family. Mr. East believes in using the best and consequently his herd will show only choice hogs. He started out by using Ray's Choice, by Imp. 2d. This animal was a winner at Nebraska. He died before Mr. East was through with his services, but left some choice get that proved him a grand sire. Bezdek, a winner of first, at Nebraska, and third prize winner at St. Louis, has been in service for some time. He has done well and his get have been ready sellers. Mr. East started things some last winter, when he purchased the highest priced Duroc sow ever sold in Kansas. She was sired by Field Marshall and safe in pig to Improver 2d. He paid over \$300 for her in the well-known herd owned by C. E. Pratt, of Frankfort, Kansas. Mr. East has a herd of sows that have passed through cholera and are now immune to the dreaded disease. He is using a son of Billy K., as well as Frank's Choice, by Belle's Echo.

goes into the sale ring will be sold without a by-bid or any protection. We therefore urge those who want a good young bull or a few cows and heifers to remember this sale.

Among sheep owners throughout the world it is now generally known that Messrs. William Cooper & Nephews, of Chicago, Ill., manufacturers of the well-known Cooper Sheep Dip, have reached a very high position as sheep breeders, and their success at the recent royal show of England certainly placed them in a foremost position, their Shropshire sheep capturing on the occasion six first premiums, practically sweeping everything before them and establishing a prize-winning record never approached by any other exhibitor. From the Cooper flocks last year sheep were shipped to every part of the world to the value of half a million dollars.

Messrs. Chandler Bros., of Kellerton, Iowa, breeders and importers of Shropshire sheep, write us that they have sold over 200 head of sheep since making their importation in August, and that they are being complimented everywhere on the good stock they succeeded in disseminating. Not long since they sent one sheep to a certain town and when breeders saw it was the means of causing sales of \$900 worth in that place. Messrs. Chandler Bros. have a number of good rams of the character that can be recommended, weighing up to 265 pounds, that will make rapid improvement on any flock. Those wanting good Shropshire sheep will do well to consult their advertisement on page 19 and in the meantime write them for information.

Messrs. Osborne Bros., of Osborne, Iowa, in furnishing copy for their advertisement found on page 31 of this week's Homestead, write: "The Poland China pigs we are offering for sale are a very good lot. They have extra good size and length of body with good quality. There are a few good show pigs among them that will make good boars to head herds with. They are from large, prolific sows and are sired by as good boars as any man owns, namely, Osborne's Sunshine 90981 and Onward 102447. We are offering this last boar for sale, but for no fault in him. We have so many sows that are akin to him that we cannot longer use him to advantage. He is a show hog from end to end with good size and good bone. The man who gets him can make a creditable showing anywhere. His pigs are among the best we ever raised and they all have good color and coats and are extra good feeders. We guarantee that all

No matter how good your lamp, a MACBETH chimney makes it better.

They are made to fit, and do not break from heat.

My lamp-chimneys offer the only practical remedy for all lamp-ills—good glass properly made. That's why they make good lamps better.

My Index is free.

Address, MACBETH, Pittsburgh.

the pigs we sell will fill the description we give. We send pedigrees with pigs and will price them to sell them right."

Mr. E. Z. Russell, of Blair, Neb., will make a fall Duroc Jersey sale on October 8th, at which time he will sell a half interest in his great show and breeding boar, Glendale Critic, considered one of the greatest sires now living. He won third this year at Des Moines, second at Nebraska State Fair, and was the sire of the first prize boar pig and first prize sow pig at the Iowa and Nebraska State Fairs last year; also at the Interstate Fair, and this year one of his sons won second in the yearling show at Lincoln, and another won third. The latter boar, Critic's Echo, will also be included in this fall sale. There will be a lot of other good things in the sale, and breeders will do well to keep his sale day in mind and be present on that occasion. He will offer one of the best lots of winners and prospective winners that will be sold this fall.

The advertisement of the Chicago House Wrecking Company, 35th & Iron Sts., Chicago, Ill., will be found on page 17, and we desire to call especial attention to the roofing and other material they advertise which will be of interest to those contemplating building. This firm sell steel roofing and siding at prices that are most economical. This roofing will outlast any other material and is suitable for covering any building. It is cheaper and more durable than shingles. It makes the building cooler in summer and warmer in winter. This firm will send goods C. O. D. to any person answering this advertisement, thus allowing a chance to examine them before paying for them. Write them for their catalog No. W-500, which gives a good deal of information about many kinds of building material. Any person who is contemplating building cannot afford to not know their prices on building material of all kinds.

Messrs. W. L. Addy & Son, breeders of Duroc Jersey swine, of Farnell, Mo., write: "Our pigs are coming on nicely and we have some good young males fit for any herd in the land. We recently put into one of the coming Missouri herds a fine young fellow carrying the blood of Ohio Chief, Top Notcher and Proud Advance, a splendid combination and a grand, good individual. We yet have some toppers, one a son of Proud Advance from a sow carrying the blood of American Royal. This is indeed one of the best sons of Proud Advance. We can make it interesting to correspondents wanting males carrying popular blood and in the best possible condition for usefulness. We offer no "cheap John" pigs. Have castrated unusually close. We have one son of W. L. A.'s Choice Goods for sale for which we have refused \$100. He will make somebody a great hog. Correspondence solicited." See advertisement on page 36.

Mr. Charles M. Hulbert, of Oakland, Neb., one of the best Poland China men in Nebraska, writes: "I have eighty fine March hogs and the pick is choice. Fully one-half of these are sired by Oakland Prospect, the 780-pound two-year-old and second prize in grade class at Nebraska State Fair this year. My pigs are doing fine and I will sell some choice March gilts. I also have 100 March sows that I will breed and the fifty tops will sell at Oakland some time in February, date to be announced later. It will be a roaring sow sale, as many of them will be bred to the great L. & W.'s Advertiser, the first-prize under a year boar at Nebraska." These boars that Mr. Hulbert offers are very good. They have ample size and lots of bone. Their sire is Oakland's Prospect, the second-prize aged boar at Nebraska State Fair. He now offers to price this great boar, as he has a lot of his get. Write him and mention The Homestead.

A SUCCESSFUL AUCTIONEER.

Many readers of The Homestead are acquainted with Col. C. C. Keil, of Ladora, Iowa, one of the successful auctioneers of the middle West. Colonel Keil has been a breeder of thoroughbred stock for a number of years and is well posted on pedigree. He is a hard worker and his patrons are well pleased with his efforts. Colonel Keil has a few dates left and breeders intending to hold sales should write Colonel Keil at once for terms. Kindly mention The Homestead when writing.

TRUMANS' WINNINGS.

Many of the readers of this paper inspected the Shire and Hackney horses exhibited by Trumans' Pioneer Stud Farm, of Bushnell, Ill., at the Iowa State Fair, and noted the excellent lot which are characteristic of this firm. Every first prize in Shire and Hackney stallion and mare classes at the Iowa State Fair was won by Trumans' Pioneer Stud Farm. At the Indiana State Fair the past week the following prizes were awarded to Messrs. Truman: First, second and third aged Shire stallion; first and second three-year-old Shire stallions; first and third aged Shire mares; first three-year-old Shire mare; first two-year-old Shire mare; first and second aged Percheron stallions; champion gold medal for best Percheron stallion; first and second aged Hackney stallions; first three-

year-old Hackney stallion; first aged Hackney mare; first two-year-old Hackney mare. Messrs. Truman will show their horses at the Illinois State Fair and will be pleased to meet their many friends and former customers, as well as the readers of this paper. A cordial invitation is extended to readers of this paper to visit the barns at Bushnell if interested in good Shire, Hackney or Percheron horses.

CORN SHOCK COMPRESSOR.

For the small sum of seventy-five cents our readers can purchase a corn shock compressor. A boy can use this compressor and it is guaranteed to do the work. It will pay for itself twice over every day that it is used. It is self-locking and made of iron, though it is easily released and lasts indefinitely. It is manufactured by the William Galloway Company, Waterloo, Iowa, whose advertisement will be found on page 20 of this issue.

COTTINGHAM'S SALE.

An extra good lot of Short-horn cattle and Poland China swine have been selected for the public sale of Mr. Ira Cottotham, of Eden, Ill., which will be held on Tuesday, October 9th. The writer representing The Homestead recently inspected the offering and is pleased to recommend it to readers of The Homestead. Catalogs are now ready and will be mailed to all who write for same, kindly mentioning The Homestead. Further particulars regarding this offering will appear in these columns next week.

MCNEIL BROS.' HORSE SALE.

On Thursday, September 27th, Messrs. McNeil Bros., of Bowen, Ill., will offer for sale at public auction seventy-five head of standard bred and draft horses at their barns, commencing at 10 o'clock. The lot will consist of several high-class actors—stallions, brood mares, colts and fillies. Messrs. McNeil Bros. are well-known breeders of Duroc Jerseys, as well, and will be pleased to have any of their friends and customers spend the day with them. As is the case with their Durocs, their horses are of the best and will merit the requirements of the most careful buyers. Plan to spend the day with Messrs. McNeil if in search of good horses.

SHORT-HORN BREEDERS, ATTENTION!

One of the most important events in Short-horn circles this year will be the dispersion of the well-known herd of Short-horns owned by Mr. W. I. Wood, of Williamsport, Ohio. Mr. Wood has long been identified with the Short-horn interests and has at the head of his herd one of the best bulls of the breed, Imp. First-in-the-Ring. This bull was the sire of the three highest-priced bulls bred and sold in the United States in 1902, the get of one sire. A number of his get are included in the offering. If any of the readers of this paper are not on Mr. Wood's mailing list they should write him at once for illustrated catalog. It contains numerous photographs of the cattle offered for sale and is beautifully arranged. Kindly mention this paper when writing and plan to be at Washington C. H., Ohio, where sale will be held. Further particulars regarding this sale will appear in our next issue.

ANGUS AUCTION AT THE AMERICAN ROYAL.

Leading western breeders of Aberdeen Angus are consigning to the auction under the auspices of the American Aberdeen Angus Breeders' Association on October 9th, during the American Royal. The sale is not crowded with entries, but the quality of the offering is believed to be rather better than has usually been offered at Kansas City. About thirty head are cataloged and they are such as to credit to this celebrated breed, and include representatives of the Blackbird, Queen Mother, Coquette, Nosegay and other noted strains. Several show animals are cataloged. The following consignors contribute the cattle: Messrs. T. J. McCreary, Highland, Kan.; Omer Catterson, Maryville, Mo.; R. S. Williams, Liberty, Mo.; W. J. Miller, Newton, Iowa; Paul M. Culver, Edgerton, Mo.; Berry Lucas, Hamilton, Mo.; W. F. Eckles, Green City, Mo., and McAdam Bros., Holton, Kan. The catalog can be secured by addressing Mr. W. C. McGavock, of Springfield, Ill.

THE OSBORN DUROC SALE.

On October 4th, the day following the R. J. Harding sale, and at the same place, Carson, Iowa, will occur the Duroc Jersey sale of Mr. O. E. Osborn, of Weston, Iowa. He sells forty head, and thirty of these will be hogs, and six of this number will be fall hogs. He is selling some good Ohio Chief gilts and three yearling sows bred to Ohio Chief. These sows are sired by R. L.'s Perfection, a grandson of his famous old sweepstakes sow, Red Lady, and one is sired by Malcolm's Model and is out of a Crimson Wonder dam. There will be a daughter of Indicator in the sale, and she will have a litter of pigs by Ohio Chief, and another sow, called Young Anna (an Orion-bred sow), will be bred to Ohio Chief. Here will be the place to get some good Ohio Chief gilts to found a herd on, or to put in a spring sale. He has picked out about eight of his best Ohio Chief boars for this sale, and there are herd headers among them. There will be ten Indicator hogs in the sale, eight boars sired by Brigg's Prince and two hogs by Miss Bob's Wonder. There never was a better time to buy Ohio Chief boars or gilts than will be found in the Osborn sale, and he will be pleased to have the boys with him at that time. His cat-

alog makes pleasing reading to lovers of Duroc Jerseys, and it contains the pedigrees of some of the best things to be found this to those who want it. However, you in the breed, Mr. Osborn would like to send must write for it if you would be sure of getting it, as the call is very strong. Kindly mention this paper when writing.

EVERGREEN CHESTERS ARE GOOD.

The Chester Whites raised by Mr. E. J. Trumbauer, of Patterson, Iowa, are growthy individuals. Mr. Trumbauer needs no introduction to breeders of Chesters in Iowa, and is known in other states as well. He raises the kind that have bone and smoothness combined. In starting his advertisement, which appears on page 31, Mr. Trumbauer writes as follows: "I come before the public again for my fourteenth year with as good a crop of improved Chester White swine as can be found in any herd. Nearly all of my young stock is sired by my great herd boar, weighing over 600 pounds at fourteen months old. He is a large bony fellow, yet smooth as silk. Just the kind to make a man money. I will also have for sale some yearling sows and an extra good lot of this fall's pigs. Anyone needing something good should come early." Better write for his prices, as they are made to sell them rapidly.

E. E. ETTER'S DUROCS.

The Durocs owned and raised by the above named gentleman, at Utica, Neb., have always pleased those who have purchased stock from this herd. Mr. Etter has recently purchased a son of Won't Be Beat, to be used in his herd. This pig comes from the W. H. Taylor herd and is one of the choicest raised by Mr. Taylor this season. Mr. Etter paid a good, long price for him. He will use this pig on some royally-bred sows and good results are anticipated. The herd of sows represent the blood of Red Jumbo by Jumbo Red, Prince Morton by Morton Prince, Glendale Critic by Tolstoi, Paul Improver by Improver 2d, Miss Surprise by 2d Surprise, and others as well bred. His entire herd shows the good care and good blood represented. Mr. Etter is making tracks toward the top row and in less time than some of our older breeders you will find him recognized as one of them. You will notice that his herd embraces the choicest blood lines. If interested in good Durocs write him at Utica, Neb. Look up his advertisement on page 36.

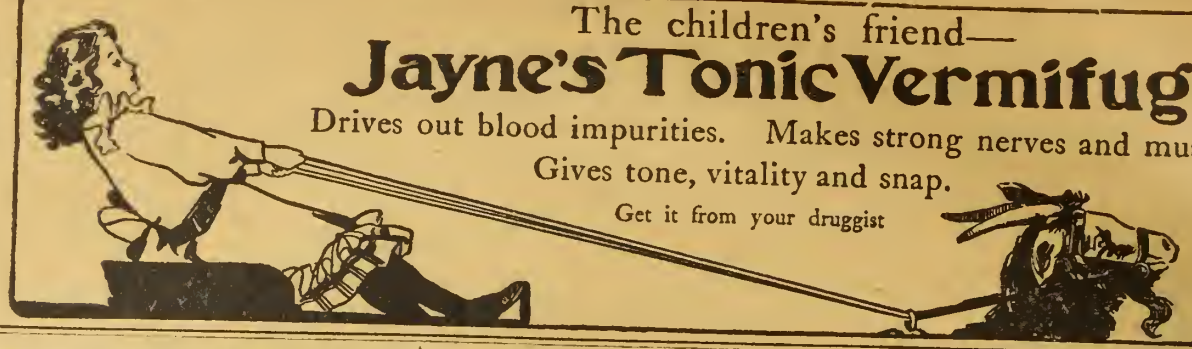

WILLIAMS' SHORT-HORN SALE.

At Oakland, Iowa, on October 8th, Mr. R. E. Williams, a well-known farmer and breeder of Pottawattamie county, will sell a draft of forty head of Short-horn cattle. There will be eight yearling bulls in this sale, all red in color and all sired by Prince Airdrie. There will be about fifteen cows in the sale and all except four will have calf at foot by Grand Champion 151488. This bull was bred by Mr. T. J. Ryan and is out of 66th Duchess of Gloster by King James, one of the greatest cows they ever owned. There will be nine yearling and eight two and three-year-old heifers in the sale. Everything old enough that goes into the sale will be bred to Grand Champion. Among the females are some well Scotch-topped cows and there are a few straight Bates in the offering. Mr. Williams has owned one of the business herds, in fact a money-making herd, and he now makes a draft sale because he has not room enough for all, and as they are increasing at a rapid rate, he therefore decided to make this sale. Anyone who wants a good, vigorous young bull can get it at the Williams sale or they can get a nice, useful bunch of heifers or some good cows with calves at foot. Write him at once for catalog and kindly mention The Homestead.

BURR OAK POLAND CHINAS AT AUCTION.

Mr. John Tuttle, of Fillmore, Mo., proprietor of the Burr Oak herd of Poland Chinas, announces a sale of Poland Chinas to be held at his farm on Monday, October 8th, at which time forty head will be sold. Mr. Tuttle is one of the men who has stayed with the big kind, such as the Tecumseh U. S. and Wilkes strains and has used just enough Perfection blood to add the quality of this great family. His leading herd boar and the sire of the larger part of the offering is the boar, Fillmore 2936, got by Chief Tecumseh 3d and out of Queen Perfection by Chief Perfection. Fillmore is of the larger type and with his size has the desired quality. Few stronger-backed hogs are found. He is evenly-balanced and stands on four extremely good legs. These qualities are transmitted to his get and the number of these listed for sale will give buyers an excellent opportunity to get the blood of old Tecumseh 3d through one of his good sons and only a few of these are left. The second herd boar and a good breeding boar, too, is Oak Post 3442 got by Harry Wilkes. Oak Post's dam, Wayside Mollie, was by Expectation and out of Madam Harris II. Here, too, is breeding that is thought much of by those who appreciate the larger kind. Two sows, Belle of Burr Oak and Belle of Burr Oak 4th, were among the foundation sows bought by Mr. Tuttle, and from these most of the sale stuff descends. Belle of Burr Oak was got by America, he by old Columbus, and her dam was a Wilkes sow. Belle of Burr Oak 4th was got by Highland Chief, he by Chief Tecumseh 3d. Mr. Tuttle has listed seven fall boars, five spring boars, three fall gilts, eighteen spring gilts and five mature sows, all with litters by the two herd hogs. Cat-

alogs will be mailed to all who write and Mr. Tuttle invites all who can to be with him sale day. The location of the Burr Oak farm is found in the advertisement on page 31. When writing Mr. Tuttle kindly mention The Homestead.

A STRONG TESTIMONIAL FOR WRIGHT'S FEEDERS.

Among the many testimonials received by Mr. C. A. Wright, of Rosendale, Mo., the stock feeder man, is one of very recent date that we take pleasure in reproducing: "Hays, Kan., Aug. 20, 1906. Mr. C. A. Wright, Rosendale, Mo. Dear Sir:—We have received in good condition the ten-foot feeder ordered from you and are favorably impressed with it. At present we are feeding from it some fourteen pigs that have just been weaned and it proves to be a most convenient and economical feeder. It prevents any great waste of feed, as is often the case when feeding out of an ordinary trough. It being so constructed as to keep the pigs out of the feed is certainly a great item. Of course we have not had time yet to thoroughly test the feeder, but we think we will find it satisfactory in every way, also economical. We will take pleasure in explaining its merits to farmers and recommending it to their use. Very truly, Ft. Hays, B. Experiment Station, Hays, Kan. By O. H. Elling, Acting Supt." Mr. Wright's feeders are no longer an experiment. The best stock raisers are using them and are loud in their praise of them after having used them a full season. Remember that the raise in cost of material forces Mr. Wright to discontinue paying freight after October 15th, so you had better order today when \$10 buys a feeder, either for hogs, calves or chickens with farm right to make any or all of the three and Mr. Wright will pay the freight. See page 3 for advertisement of the Wright feeder and do not forget to mention The Homestead when writing.

POLLED DURHAMS AT AUCTION.

On Oct. 5th, at the South Omaha Stock Yards, will occur a very important sale of Double Standard Polled Durham Short-horns. They are the property of Shaver & Deuker, of Kalona, Iowa; John Renswick, of Boyden, Iowa; M. Rau, of Harlan, Iowa, and D. L. Pond, of Inman, Neb. The above breeders have associated themselves together in this sale for the purpose of giving the breeders of western Iowa, Nebraska and South Dakota, an opportunity to buy some choicely-bred Polled Durham cattle right at their own door. The offering has been selected with due reference to being good representatives of the breed, cattle that any of the breeders contributing can ill afford to part with. However, the sale is made for the purpose of further introducing this very popular breed of cattle into the hands of farmers and breeders in the center of the corn belt. Mr. L. G. Shaver, of Kalona, Iowa, has been selected as general manager of this sale, and to him should be made all applications for catalog or other information relative to this sale. We can say without any fear of successful contradiction that the sale is in good and responsible hands and that it will be conducted on straight and honorable lines, the buyers being thoroughly protected in every way. Mr. Shaver is one of the most reputable, as well as one of the best, breeders of Polled Durham cattle in America. The Homestead bespeaks for this sale that large measure of success to which it is entitled, and trusts that all our readers that may be interested in Polled Durham cattle will send to Mr. Shaver at once for a catalog, mentioning The Homestead.

THE LAST CALL FOR THE ROOD-FESSEMYER SALE.

On Saturday, September 29th, at Clarinda, Iowa, is where the "Big Poland China" can be bought. This sale will be made by Messrs. Fred Rood, of Clearfield, Iowa, and H. Fessenmyer, of Clarinda, Iowa. Mr. Rood became noted as a breeder of the big ones through his great brood sow, Giantess, and she is possibly one of the most profitable Poland China sows in this country. Mr. Fessenmyer has also bred along the same lines and between them they are offering fifty head. Of these twenty-five are boars and twenty-five are sows, the cream of their two herds. There will be several sons and daughters of old Giantess in the sale and there will be a lot of granddaughters. Mr. Rood sells a fall boar sired by Longfellow H. and out of old Giantess, that has the size and bone that will please those who want a big boar. He also sells a good Proud Corrector show boar in this sale. Another fall boar by Longfellow H. will weigh 400 pounds. He has a lot of other good hogs that will make great big ones. A daughter of old Giantess and sired by P. W. Perfection is called Giantess Best, and she is one of the best in the offering. She is a brood sow and no one need hesitate on her nor stop on the price. Mayflower 3d also goes in and she is very good. Two good ones by Pawnee 2d go in, as does also two by Guy's Best 2d. Mr. Rood always puts in good stuff, and his offering this year is in keeping with what he has sold heretofore. He will not put in a boar that is not fit to head a herd. Mr. Fessenmyer will sell one yearling sow bred to P. W. Perfection for fall litter that will weigh 600 pounds. She has a great, big bone and is a great foundation sow for someone. He also sells six fall sows. Four of these will weigh 400 pounds or better by sale time. These are extra good, with lots of quality, broad backs, wonderful length and have from seven and one-half to seven and three-quar-

ter inch bone. The balance are February and March pigs, and some of these will weigh from 250 to 270 pounds. They are stretchy, with plenty of bone and are of the large type of Poland Chinas. Breeders of Polands who are looking for the big kind will not be disappointed in either the Rood or the Fessenmyer offering. Write either party for a catalog and attend the sale.

WEIGHTON'S DUROC JERSEY SALE.

On October 2d, Mr. John Weighton, of Audubon, Iowa, will sell fifty head of Duroc Jersey boars, gilts and brood sows at his farm adjoining town. The spring hogs in his offering are mostly sired by Proud Advance 40997, the sire of the first-prize gilt and the second-prize litter at the Iowa State Fair this year. One of the chief attractions is a boar pig sired by the great Proud Advance and out of the noted brood sow, S. E.'s Model, one of the highest-priced sows in the West, and one of the best daughters of Ohio Chief. There will be eleven yearling and twenty-three spring boars in the sale—seven open gilts and eight sows with litters. Mr. Weighton is also offering his herd boar, Audubon 21969, a three-year-old boar of great substance and finish, and twice a winner of sweepstakes over all breeds at the Audubon County Fair. The Weighton herd is strong in the blood of Ohio Chief, Orion, Proud Advance and Top Notcher, and the present offering is one of the best that has ever been sold from this well-known hog farm. Mr. Weighton is putting quite a number in this sale that are just as good as the first-prize state fair gilt and as good as the second-prize litter. They only need a little attention to repeat the thing in next year's show. Write Mr. Weighton for catalog at once and mention The Homestead.

ED HOLMES CLOSES OUT HIS POLAND CHINAS.

September 27th, at Bedford, Iowa, marks the closing out of the entire herd of Mr. Ed Holmes, and there will be disposed of one of the best herds in southern Iowa. Herd boars and brood sows that have never before had a price put on them go to the highest bidder and nothing is reserved. It is the United States' loss and Canada's gain, but the public get the benefit in being able to buy good hogs at their own prices. Mr. Holmes is moving to Canada and therefore the dispersion of the herd. Here is the home of the noted boar, Mo. Perfection, the boar that had them all going at the Iowa State Fair in 1905, and he will be sold with the rest. Four sows that go into the sale will have litter at foot by Mo. Perfection. Autumn Maid, one of the best daughters of old R.'s Claud, will have a litter of nine by Mo. Perfection and here will be a real bargain for some good breeder who will take care of them. Black Beauty, another sow of the same breeding, will also have a litter by him. One of the tops is a big daughter of P. W. Perfection, now three years old, and she is out of Anna Price, a litter sister to Mr. Fred Rood's famous sow, Giantess. There are a grand lot of summer and fall sows, mostly sired by Mo. Perfection. Old Darkness 3d, a daughter of Crescent Tom, and one of the largest sows in the sale, should be an attraction to those who are looking for the big ones. In fact, there will be a whole lot of good sows go under the hammer in this sale. Mr. Holmes sells Big Shamrock, a son of Mr. Moats' old Shamrock, and he also sells two good fall boars in Orphan Boy and Clean Sweep. These two are sired by Mo. Perfection and the last named one will undoubtedly make as good a boar as his sire, if taken care of. The spring stuff is sired by Shamrock and Giant Killer, the latter boar being a son of old Giantess. There is no gainsaying but here will be an excellent place to buy Poland Chinas. Write for catalog and mention this paper.

JANES' SHORT-HORN SALE.

Forty-five head, thirty-five cows and heifers and ten bulls, make up the offering of Short-horns to be sold at public auction by Mr. A. M. Janes, of Lafayette, Ill., on Saturday, October 6th, at his breeding farm adjoining the corporate limits of that city. It is one of the best opportunities of the year to secure good Short-horns at your own figures. Mr. Janes secured from Messrs. I. M. Forbes & Son the bull, Baron Champion, one of the best sons of Baron Gloster, and crossed him on cows from some of the best herds in the central West. In 1904 he secured the highest priced bull sold at the International, Gwendoline Victor 208932, a son of Knight of Meadow Farm 3d, he by Victor Baron by Knight of the Thistle, dam Gwendoline of Meadow Lawn. This bull has proven himself a show bull, having won second in the Missouri display at the St. Louis Exposition; sixth in general display, fifth at American Royal and fourth at International. He is a bull of real merit and faultless breeding. It would be very difficult to find a pedigree with more ancestors that were bred by Mr. Amos Cruickshank. This will be one of the last opportunities to buy granddaughters of old Baron Gloster, the bull that made Mr. I. M. Forbes famous as a Short-horn cattle breeder. The herd bull, Baron's Champion, was Baron Gloster's last and one of his best bull calves. The heifers in this sale will be bred to the chief herd bull, Gwendoline Victor, which was the highest priced bull sold at the International show in Chicago. Everything will be guaranteed a breeder. In our issue of next week we will give more particulars in regard to the offering. They have been grown in a way to insure future usefulness, not pampered nor loaded down with fat. Representing as they

do some of the best blood of the breed, and being good individually they should attract all farmers and breeders of Short-horns, Lafayette has very good train service and parties will be met at Galva, which is six miles northwest of Lafayette on the main line of the Burlington on sale day. Plan to be present and secure some of the good things to be offered sale day. Catalogs will be sent to all who write as per the advertisement on page 31, kindly mentioning The Homestead.

DICE & GARBER'S DUROCS.

The old, reliable firm of Messrs. Dice & Garber, located at Beaver Crossing, Neb., are still doing a good business with the Durocs. This firm have always held their place among the top by square dealings and today you will find as strong a lot of pigs as have ever been offered by them before. 2d Surprise has sired some choice pigs and the class of pigs by him have marked him one of the best sires of this breed. They have several of his get and would now part with him on a liberal offer. The crop of pigs are coming along nicely. Look up their advertisement on page 37.

THE LAST CALL FOR DR. PRITCHARD'S BIG POLANDS.

At Wisner, Neb., on September 22d, is big Poland China day, and Dr. Pritchard will sell fifty head of his best. The offering will be largely the get of his noted boar, Big Tom 2d, Wisner Chief and Perfection Keep On. There are some splendid fall and spring hogs in this sale, as well as a grand good lot of good gilts and hood sows. It is an offering that appeals to practical Poland China men, and if our readers want the real thing they will not make a mistake if they attend this sale.

AMERICAN ROYAL HEREFORDS.

Regarding the sale of Herefords to be held October 12th at Kansas City, Mo., during the American Royal Live stock show, not very much need be said, as the cattle will speak for themselves and one needs only to see them to appreciate them. Much care has been exercised in selecting the animals for this important sale and breeders who are contemplating buying a few heifers or a good herd header can find just what they want by attending this sale. Every bull that appears in the catalog is good enough to go to the head of some herd and the females will be a credit to any herd to which they may go. If you would like to have a catalog descriptive of these animals, Secretary C. R. Thomas, 221 West Twelfth St., Kansas City, Mo., will take pleasure in sending one upon application. See advertisement on page 35.

LYNDALE SHORT-HORNS AND POLAND CHINAS.

Some extremely good Short-horn bulls—one a pure Scotch, one a pure Bates, and a few nicely-bred Scotch-topped fellows—are to be found at Mr. A. F. Graves' Lyndale farm at King City, Mo. Poland Chinas that are the kind now in such demand are bred by Mr. Graves. The blood of the Tecumsehs and Wilkes predominates in these Poland Chinas. For well-sprung ribs, strong backs, good hams and the prolific kind the Lyndale Polanders are hard to excel. Mr. Graves invites inspection of the herds and prospective buyers can do no better than to make a trip to King City, Mo., and see the Short-horns and Poland Chinas quartered there. See page 33 for the advertisement and when writing Mr. Graves kindly do not forget to mention this paper.

REGISTERED AND HIGH-GRADE SHORT-HORN SALE.

On October 8th Mr. George Hans, of Newton, Iowa, the well-known Short-horn breeder, will sell at his farm two and one-half miles northeast of town twenty-two head of registered Short-horn cattle, divided as follows: Eleven hells, all yearlings, and eleven choice cows and heifers, six of them with calves at foot, calves by or the cows bred to Victor Alexander 2d. Mr. Hans will sell at the same time and place twenty high-grade Short-horns, fifteen of which are cows and five steers, practically pure-bred, unregistered Short-horns. He did not care to draw on the breeding herd for a full quota for one day's sale of pure-breds, hence this combination of pure-bred and high-grade cattle to be sold in one sale. Address Mr. George Hans, Newton, Iowa, for sale catalog.

LAST CALL FOR MERRYMAN'S DISPERSION OF HEREFORDS.

On next Friday, September 28th, at his farm, near Laredo, Mo., Mr. W. A. Merryman disperses his herds of pure-bred and high-grade Herefords. Those who are interested in the "white faces" should not overlook this opportunity. It matters not whether you want pure breeds for breeding purposes or high grades for the production of beef, Mr. Merryman has the cattle and will sell to the highest bidder. The pure-bred herd is composed of individuals that are as well-bred a lot as are often found. As individuals they rank with the better offerings, and as this is an absolute dispersion sale the best go in the sale. The herd of grades have always been quartered on a separate farm. A pure-bred bull has been kept in service for the fifteen years that Mr. Merryman has been breeding for the market and as a result he will on sale day sell a herd of high grades that look like pure hreds. From this herd of grades Mr. Merryman has during the past

six years produced several car loads that have topped the Chicago market on days they were sold. Ninety head will be sold and the buyers of car lots will find this the opportunity of the year to get cattle of high individual merit. The last announcement of Mr. Merryman's sale will be found on page 36. If you have not received a catalog write Mr. Harry W. Grabam, Chillicothe, Mo., for one and arrange to attend the sale. The cattle will not disappoint you.

JNO. J. SCHMAL'S POLANDS.

The older breeders of Poland will soon be watching a new man in the business. Mr. J. J. Schmal, of Sutton, Neb., has gathered one of the good herds of Poland and we predict success for this young breeder. At the head of his herd stands one of the best sows of Nemo L's Dude. This yearling met with a misfortune and was lamed so badly that the owner could not show him. He had intended to show this hog at Nebraska and with good luck would have made a strong impression on the judge. His boar is a show hog and one that wins some place along the line. Not alone a show hog, but a sire of good pigs of his own type. Mr. Schmal has the blood of Mogul, Nemo L's Dude, Chief Tec. 3d and very much more of the royally-bred ones. He is now offering choice spring pigs sired by his different herd hogs. Look up his advertisement on page 35.

WATT & FOUST'S DUROCS.

At the recent Ohio State Fair Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, the well-known breeders of Duroc Jerseys, won the following prizes: Second on boar two years old and over; first on boar one year old and under two; first and second on boar six months and under one year; first on boar under six months; first and second on sow two years old and over; first and second on sow one year old and under two; first, second and third on sow under six months; first on four pigs under six months; first on boar and sows under one year; first and second on boar and three sows under one year. Messrs. Watt & Foust have an excellent lot of spring pigs of either sex for sale that will please discriminating buyers. A yearling boar by Kan't Be Beat, dam Red Jewel by Chicamanga will please someone looking for a herd boar. Another yearling boar by Orion Chief and out of Mayflower will prove a fine boar to head some good herd. Write this firm at once, or, better still, visit them and make your own selections, as per the advertisement on page 36, kindly mentioning The Homestead.

AN IMPORTANT HEREFORD SALE.

Messrs. W. E. Hemenway & Son, Morris Cook and J. M. Grimes, of Steward, Ill., have selected a very good lot of Hereford cattle from their respective herds for their forthcoming public sale, which will be held at the home of Messrs. Hemenway, on Wednesday, October 3d. Sixty head have been consigned forty-five cows and heifers and fifteen hells. The get of the International winner, Masquerader, are numerous and a better lot of heifers and bulls the get of one sire are seldom offered for sale at public auction. During the past few years the sales held by these parties have been successful, both as to class of cattle offered and the good resulting to breeders and farmers who have secured stock at these sales. The writer, representing The Homestead, has inspected a number of consignments for public sales, and but few compare with this one in quality, uniformity of type and breeding. The catalogs will be sent to readers of The Homestead as per the announcement on page 31 of this issue. Plan to attend this sale, one of the most important events of the year. Kindly mention The Homestead when writing.

MR. SEIBEL'S DODDIES AND POLANDS.

On page 31 of this issue will be found the advertisement of Mr. C. H. Seibel, of Paton, Iowa. Mr. Seibel on account of ill health is obliged to dispose of his Aberdeen Angus cattle and Poland China hogs. He has on hand about seventy doddies of the very richest breeding, representing such families as the Prides, Ericas, Princesses, Blackbirds, and Coquettes. He has twelve or fourteen extra good young bulls that are now old enough for service. He has been using in the herd King Ito, an extra good son of the famous Prince Ito, owned by Mr. Martin, of Churdan, Iowa. The cows and heifers are nearly all bred to this great son of a famous sire. Those who would like to add a few females to their herd or those who desire to make a start along the doddies line, beginning right at the top in blood lines, cannot do better than look into the merits of Mr. Seibel's herd. In addition, he is offering some very richly-bred Poland Chinas, both gilts and males. These are all richly-bred coming as they do directly from Keep On 61015, Chief Perfection 2d and Chief Tecumseh 3d. The young males that Mr. Seibel is offering combine size and quality in a marked degree, and as he is going out of business permanently they will be sold reasonably. For further information concerning Polanders or doddies write Mr. C. H. Seibel, Paton, Iowa.

THE HARDING FALL DUROC JERSEY SALE.

Mr. R. J. Harding, of Macedonia, Iowa, one of the best-known breeders of the reds today in this country, will sell a draft of forty-five head of spring boars and gilts and a few good fall sows at his sale at Carson, Iowa, on October 3d. These will be the very tops of his herd, and will be sired by the great Ohio Chief, Proud Advance, Brighton Wonder (a full brother to Crimson Wonder), and a number will be sired by other hogs noted as sires of the very best standing. Mr. Harding is putting his best foot foremost in this sale, and he will sell a few choice hogs sired by old Orion and out of Proud Lady, the highest-priced sow of the breed. Then he will sell the best boar out of Nebraska Belle this year, and he will be sired by Ohio Chief. Here is a combination of blood lines, having on both sides the leading winners of the present day. It is a happy combination that should breed on and on. Then he is putting in a splendid litter; in fact, one of the best, by Belle's Perfect King, a son of the great sweepstakes sow, Nebraska Belle, and they are out of Lady Surprise. He will sell four good boars sired by Proud Advance and out of Queen Perfection by the great Perfection Chief. There are several other good things in the sale, but the thing to do is to go and see them. The catalog tells the story, and the buyers must do the rest.

PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 242-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.
DRS. THORNTON & MINOR, 3969 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

If any of our readers want something that will do their herd good they had better make sure to be at the Harding sale. In fact they cannot afford to not be there. When writing for catalog kindly mention this paper.

FIGHTING HOG CHOLERA.

It is to the interest of every man in the corn belt who raises hogs to co-operate with his neighbors in destroying cholera germs. It is too late after the disease breaks out, and if there ever was a case where an ounce of prevention is worth many pounds of cure, hog cholera furnishes that case. The germs of cholera are not visible to the naked eye, and therefore their destruction must be wrought with an agent that is deadly when brought in contact with them. Such an agent is Zenoleum, a coal tar product manufactured by the Zenner Disinfectant Company, of Detroit, Mich. This company have been in the business for many years and have established a remarkable record for the virtue of their product, Zenoleum, as a disinfectant. If every farmer in a given locality before cholera enters would make a practice of disinfecting his hog quarters with Zenoleum, using the same around wallows and occasionally in the slop, there is no question but what cholera could be kept down. It costs but \$1.50 a gallon and when mixed with fifty gallons of water makes an inexpensive and highly valuable deodorant, disinfectant and antiseptic. The company tell their own story in their advertisement found on page 18 of this issue. Send for their sixty-four-page book entitled "Piggie's Troubles." It contains much valuable information. Address Zenner Disinfectant Company, Detroit, Mich.

THE LAST CALL FOR THE PFANDER POLAND CHINA SALE.

On September 26th, at their farm home, near Gravity, Iowa, Messrs. J. W. Pfander & Son will sell forty-five head of Poland China hogs, made up of fall boars and sows, aged sows and spring hogs and gilts. This sale is composed of the larger type of Poland Chinas and very largely of the Giantess strain. This strain of hogs has become quite popular in southern Iowa and northern Missouri, because they are what the people want. The greater part of the offering will be sired by Klever's Thicket, a son of the Ohio sweepstakes boar, Thicket, and by Size Me Up, a son of Double Chief. We called attention heretofore to the two-year-old brood sow, Model Giantess, which goes into this sale. She is one of the best daughters of Mr. Fred Root's famous old sow, Giantess, and she will sell with a litter of pigs at foot. Included in the sale will be a spring litter of hers—four boars and four sows—that are strictly all right, and there will also be a fall litter out of the same sow. She is one of the most profitable sows to be sold this season. She is not a show sow, but is an animal that carries lots of scale and considerable finish for her size and she certainly is a brood sow that raises pigs that in turn add to the bank account, because they are always in demand. There will be a fall litter in the sale out of Crescent Giantess, a litter sister to Model Giantess, and there will be a good spring gilt of hers in the sale sired by Klever's Thicket. There will be a daughter of R's Claud in the sale with a litter of eight pigs, and the fall boars and spring boars, as well as the sows and gilts, are of decidedly a useful and money-making type. If our readers want this kind of profitable Poland Chinas it will pay them to be at the Pfander sale. Write for catalog and mention this paper.

SANDQUIST BROS.' POLANDS.

Messrs. Sandquist Bros., of Oakland, Neb., write as follows: "We have an excellent lot of Poland boars for sale. We still have ten fall boars sired by Dandy Chief 2d, a grandson of Chief Tecumseh 3d, and has for dam the great producing sow, Columbia 2d. Others are sired by King Lamplighter by Lamplighter, dam Proud Ethelyn by Proud Perfection, and the dams of these fall boars are daughters of such noted sires as Chief Tecumseh 3d, Kenyon's Medium, Best Price, etc. These are growthy, rangy fellows and will be sold very reasonably. One in particular is very good, having heavy bone and standing on his pins; is as good as any hog could be. He is sired by King Lamplighter and out of a Chief Tecumseh 3d sow. If not sold soon we may keep him for our own herd, as he is well worthy of doing service at the head of a good herd. Our Spring pigs are sired by Perfect Quality 36322, Nemo Perfection 35078, a son of the great double sweepstakes hog, G's Perfection, and still others by Mo's Top Chief, also one litter by the great Nemo L's Dude. Our herd hogs now are Perfect Quality 36322 by First Quality by Modern Perfection, dam Maud Perfection 3d by Highland Chief. Perfect Quality, we think, is all that his name implies, as we have yet to hear the first man to find fault with him. He is a large, heavy-boned hog, with two good ends and a good middle. Is very prolific and sires big, strong litters that always please the good hog men. And we expect to keep Perfect Quality at the head of our herd for some time yet, as one don't come across such boars every day. Our other herd boar is Mo's Top Chief 32191 by the great International champion, Top Chief, and for dam he has the fine brood sow, Hegley's Pride, sold to Mr. G. W. Null, of Odessa, Mo., for \$231. Grand Chief, the sire of Mogul, the sweepstakes hog at Nebraska State Fair, 1905, was also sired by Top Chief. Now, let us say a word or two about Mo's Top Chief. He was used in the herd of Mr. George Null

and he thought so much of him that he mated him with the great \$1,575 brood sow, Anderson's Model. This cross must have been good, for Mr. Null considered them \$1,000 hogs. And you know he is using a boar, Null's Top Chief, in service in his herd. Mo's Top Chief is a large hog, with much quality and bone, like a cow. And when it comes to judge him as a breeder he is great, and we think ourselves fortunate in possessing such a great sire. We think his get will be heard from at the fairs in another year. He is also a very prolific breeder and gets very large litters; have two fall litters by him so far with eleven pigs to the litter. Our Short-horns are doing well and a little later will have some fine bull calves to offer the readers of The Homestead. We now have the assurance of one of the best corn crops we ever raised; in fact, crops of all kinds have been good with us this season."

WATSON BROS.' DUROC JERSEY SALE.

On October 3d, at Creston, Iowa, will occur the fall sale of Messrs. Watson Bros., when they will sell forty-five head of the tops of their spring boars and gilts. This sale will be held in town and will be accessible to everybody, and nearly everybody will want to be there because they are selling some choice Durocs. They are selling fifteen spring hogs and twenty choice gilts. The rest will be matured sows with litters. They are now using at the head of their herd a boar called Echo by Decatur King by Echo King, and he has proven an excellent breeder. They have not much to offer by him, as he was used on all the sows in their spring sale. However, there will be a few hogs in the sale sired by him and a number of the gilts will be sired by Matchless Chief, formerly used at the head of their herd. Among the good things they will sell will be two gilts sired by the old, reliable Proud Advance, and one boar and two gilts by the prize-winning boar, Keep On. There will be two boars and one gilt by Addy's Choice Goods out of a sow called Topsy Jane. There will also be a few choice boars and gilts in the sale sired by Harding's Proud Advance. They are also putting in a line-bred Proud Advance boar and gilt that should make something good. In fact there will be some hogs and gilts in the Watson sale that are good enough to go anywhere. The sows will be sired by old Parnell Banner and Matchless Chief, and these will have litters at side by Echo. There will be some sows in the sale sired by a boar called Red Lack. The offering is a good one throughout and they never sent a better bunch of hogs through a sale ring. The boys would like to send you a catalog and will do so if you will only send them your name. Kindly write for one and then be present at their sale. Please mention The Homestead when writing. See page 39.

J. B. BROWN'S SHORT-HORNS.

For the second time we call attention to Mr. J. B. Brown's big sale of Scotch and Scotch-topped Short-horn cattle to be sold at his farm four miles from Solon, Iowa, on Thursday, October 4th, at which time Col. Griff Johnston will be called upon to part ownership with this choice bunch of Short-horn cattle, now the property of Mr. Brown. These cows included in this sale are bred largely to Golden Rod, a splendid Cruickshank bull sired by Imp. Golden Measure, a son of Golden Count and out of Imp. Mistletoe 5th, she by the great Scottish Archer. Golden Rod belongs to Mr. Cruickshank's famous Claret family. However, the imported cow to which Golden Rod traces is Imp. Columbia 2d, by the Duthie-bred bull, Banner Bearer. This is one of the best-bred Scotch bulls ever used by Mr. Brown and he has proven himself a breeder of more than ordinary merit. A splendid daughter of this bull will be found in Lot 1 of the catalog, Waveland Gwendoline; she is a three-year-old red cow out of the famous Gondola's Gift. She is exceptionally attractive at this time by having a bull calf at foot sired by Pride's Victor. Lot 2 is Waveland Lovely 4th; she is a daughter of the great Scotch bull, Sunrise, he by Sunset and he by Gaveston and out of Imp. Sunbeam, a Cruickshank Secret cow. This beautiful cow, Waveland Lovely 4th, is only four removes from Imp. Lovely 25th by General Windsor. The Lovelies are rated among Mr. Cruickshank's very best cattle. A plump among the Scotch females will be found in Lot 3, Waveland Louisa. She is by the famous bull, Golden Rod, and out of Louisa 3d, she by Sunset, tracing to Imp. Louisa by Nobleman. The Louisas are simply another name for the Miss Ramsdens, all founded on the same cow, Miss Ramsden, by Duke. This is a splendid cow in every respect and is one of the leading attractions of the sale. Another choice Scotch cow of the thick-fleshed variety is Waveland Acanthus, being Lot 4 of the catalog. She was sired by Prince Missie and traces directly to the Imp. Acanthus by Barmpton. This cow has in the top of her pedigree several of the most prominent Scotch bulls ever imported to America. A very attractive cow is Lot 5, Waveland Rose 2d. She is a daughter of Golden Rod and out of a dam by Prince Nonpareil. She belongs to the Scotch family of Raspberries. She has a good bull calf at foot dropped in July by Royal Victor, hence is one of the attractions of the sale. Lot 6 is almost a full sister in blood to the above cow, but is only a yearling, her sire being Golden Rod and her dam was by Royal Prince of Maine Valley; second dam by Imp. Confessor. Lot 7 is Orange Blossom 8th, a richly-bred Cruickshank Orange Blossom, tracing to Imp. Orange Blossom 18th by Viceroy.

AKIN HUSKER

Now, husk corn in comfort. Send 25c for the Akin Husker that fits the hand snug and solid. New adjustable peg is made of cold drawn steel and mounted with a spring.

NO BLISTERED HANDS and fingers. Relieves strain on wrist and hand. You can husk rapidly and easily. If your dealer hasn't it send 25c right off and learn how to enjoy husking more.

25c

Sent postpaid.

SMITH AND DAVIS
Box 2 - Ames, Ia.

This cow, however, has well down in her pedigree a Bates cross. Lot 3 is another of this same family sired by Sunrise. This heifer is a little too thin in flesh to bring her real worth, but is nevertheless a well-bred one. Aside from these Scotch cows are some splendid individuals that have been perpetuated on the farm for twenty years or more. Waveland Jubilee 6th is one of these and bids fair to be ranked as one of the best cows in the herd. In fact this may well be termed a breeder's herd, as the entire offering, aside from three head, have been bred on the farm. Some sample pedigrees will appear in next week's issue, which will convey a more intelligent idea of the breeding and blood lines of these cattle to be sold than can be done in a written article. In the meantime, application for catalogs should be made to Mr. J. B. Brown, of Solon, Iowa.

SOME GOOD CLINTON COUNTY, IOWA, SHORT-HORNS AT AUCTION.

On October 11th Messrs. Lanagan Bros., of Charlotte, Iowa, will hold a public sale of fifty-five select Short-horn cattle at their farm three miles east of Charlotte, and two miles from Lake. There will be twelve bulls in the consignment, including four sons of the great Imp. Merry Hampton. Two of the Merry Hampton bulls are consigned by Mr. Frank Hunter, of Creston, Iowa, who purchased the residue of Mr. James McLaughlin's herd when he sold Imp. Merry Hampton to the Illinois Agricultural College. Mr. Hunter sells a red son of Imp. Merry Hampton and out of an imported Scotch cow. Here is an opportunity for someone. The other Merry Hampton bull offered by Mr. Hunter is white, but is a very good young bull. Messrs. Lanagan Bros. are selling their show herd of 1906. They have met with signal success at Dubuque, Iowa, at Morrison, Ill., and at De Witt, Iowa, capturing a great majority of the first and second prizes at Dubuque and Morrison. At De Witt they won first and championship on cow; second on cow, Julia, included in the sale. Irish Girl won second in two-year-old class. Lake View Vaunesea, a beautiful red yearling, won first, as did Lake View Vaunesea 3d in heifer calf class. They are full sisters. Commodore Archer and Robin O'Day, two beautifully balanced red bull calves, have won first and second at all three of the fairs named. Among the twelve bulls to be sold are some extra good ones. The beautiful roan son of Imp. Merry Hampton is included, called Hampton's Lad. A number of the cows are bred to this bull. Others are bred to the Imp. Miss Ramsden bull, Royal Archer, the best sire ever used by this firm and a bull that will be retained in service as long as he is useful. This is a business lot of cattle, including heavy milkers and deep, thick-fleshed ones. Address Messrs. Lanagan Bros. for catalogs.

CEDAR COUNTY SHORT-HORNS.

Attention is again called to the splendid offering of Short-horn cattle offered by Mr. E. Cosgriff, of Clarence, Iowa, on Oct. 2d, at his farm two miles south of Clarence, at which time he will sell forty head of as good individual Short-horns as are likely to be sold in eastern Iowa this fall. Mr. Cosgriff opens the series of sales held in eastern Iowa and is followed on Oct. 4th by Mr. J. B. Brown, of Solon, Iowa, and on Oct. 5th by Mr. Geo. H. Burge, at Mt. Vernon, Iowa. In these three sales there will be something like 150 head of good cattle pass under the auctioneer's hammer. Mr. Cosgriff is the proud possessor of one of the best Scotch Short-horn bulls in Iowa. We refer to Victor Fashion 194906, a red bull calving June 10, 1901. He was sired by Double Victor, a Double Victoria bull, got by Victor's Lad and out of Victoria of Linnwood 3d, by Baron Gloster. Victor Fashion's dam belongs to the famous Cruickshank Acanthus family, tracing in direct line to Imp. Acanthus by Brampton (27763) 20239, being by the same sire as Imp. Spartan Hill, Baron Victor, Confessor and a host of other great Cruickshank bulls got by this famous sire. A good illustration of Victor Fashion appears in the sale catalog which will probably convey a better idea of this splendid bull than any pen picture that we might draw in this article. He is a low, thick, red bull of proper conformation and is a typical Short-horn in every sense of the word, and above all he is one of the most prepotent and impressive sires of which we have any knowledge. The bulls from this great sire are just like their old dad and can readily be picked by a novice in a bunch of bulls sired by other sires. A splendid bull has been secured from the Cookson Bros. to follow on Victor Fashion's heifers. This bull is Scottish Spartan, sired by Young Commodore and out of Pro. Brampton, Susau, by Pro. Brampton, she out of Spartan Susan, by Imp. Spartan Hero, her dam being Imp. Lady Susan by the Cruickshank bull, Balfour. The sire of this young bull, Young Commodore, is beyond question the best individual bull in the state of Iowa. He belongs to the Lady Fragrant family; he was got by Commodore, a bull bred by Mr. H. D. Parsons, sired by Imp. Bandmaster and out of Clementine Queen 3d, by Imp. Master of the Mint, she out of Imp. Clementine Queen by Gravesend. When it is considered that all of the females in the sale are bred to the above described bulls, it stands to reason that some good bargains are in store for the wise buyer. Mr. Cosgriff at this writing has just returned from the Cedar County Fair, held at Tipton, Iowa. At this fair he won first and sweepstakes over all bulls of any age or breed, and there were seven entries. He also had the sweepstakes herd with four herds competing. The yearling and two-year-old heifers shown in the herd are also included in the sale. The two-year-old is Sadie May. She was by Victor Fashion, and out of Mischief Maid, by Royal Chief. Royal Chief was a splendid Scotch bull by Royal Gloster, and out of Scottish Lady 5th, by Scottish King. The third sire being Duke of Clarence, by Royal Aberdeen. This is a splendid heifer with neat head, strong back and well-sprung ribs and is a show heifer beyond any question, as the results of the judges' decision at the Tipton fair well demonstrate. The other heifer which was a member of the sweepstakes herd, is Lady Ellen, also a daughter of Victor Fashion, her dam being Lulu, by Dauntless. We speak of these winnings, not in a spirit of boastfulness, but to bear out the statement previously made that Mr. Cosgriff's

herd, from an individual standpoint, was one of the good herds of Iowa. There can be no question of this when he enters his cattle for competition with four herds competing and carries off the highest honors possible with cattle all but one of his own breeding. We were much impressed recently in reviewing this herd to note the scale as well as the thick-fleshed qualities of Mr. Cosgriff's cattle. Also the heavy milking qualities of all cows that had calves at foot. Mr. Cosgriff finds no place for a Short-horn cow that will not rear her calf and do it well and at the same time get fat enough for export beef on his Iowa blue grass when dried off. This is an opportunity for the man in quest of useful, practical, rent-paying Short-horns, and he should keep this sale in mind.

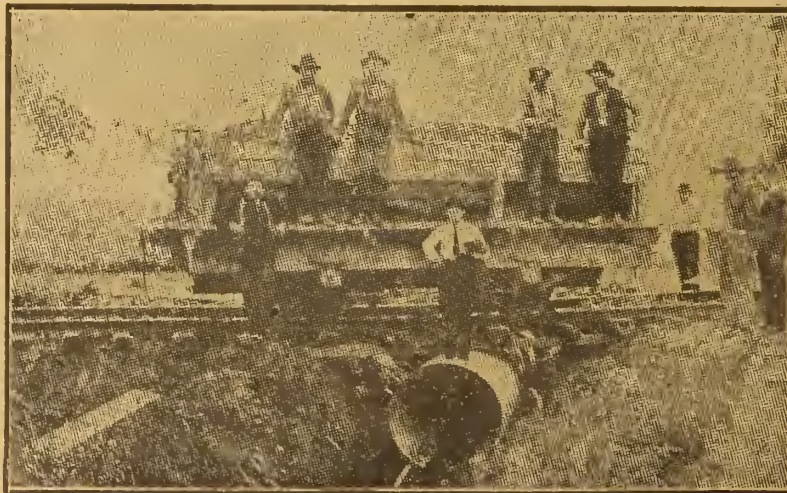

TURBETT'S POLAND CHINA SALE.

The forthcoming Poland China sale of Mr. Jas. B. Turbett, of Hanna City, Ill., contains a number of choicely-bred yearling fall and spring pigs of either sex, as well as a few extra good tried brood sows, five of which have litters to be sold with them. Mr. Turbett is also offering his herd boars for sale. Woodview Keep On is a son of the noted breeding boar, Master Keep On, he in turn sired by the International winner, Keep On. The dam of this boar is Rural Maid, she by King Perfection. Woodview Keep On is a smooth, growthy hog. Practically the entire lot of spring pigs are sired by him, thus affording those present sale day an opportunity to judge for themselves the manner in which he produces. This boar is sold for no fault, but simply because Mr. Turbett has a large percentage of his herd related to him. A yearling boar used to some extent in the herd is Meddler Boy 112745. His sire is the World's Fair boar, Meddler 99999, and his dam was Beauty Corrector 278060 by Corrector. In point of breeding and individuality this boar should suit the most discriminating buyer. As is the case with the older boar, a number of his

JAS. B. TURBETT, HANNA CITY, ILL.

get are included in the sale. Some breeder in search of an extra good herd boar will not be disappointed in the two mentioned above. Bell 226355 is a good two-year-old sow by Big Chief Perfection 2d 78111 by Chief Perfection 2d and out of Belle Corwin by Ideal Corwin. She will have a litter of pigs at side sale day, the get of Woodview Keep On. Another good sow with litter at side by same boar is Eden Belle 205178. She was sired by U. S. Perfection 65013 and her dam was Fancy Perfection by King Perfection 54843. A daughter of this sow, Eden Belle 2d, is also included in this sale. Five of her get go in the auction of spring farrow. Queen Keep On 281728 by Master Keep On is a fine brood sow. She is a half sister to Woodview Keep On and is fit for any company. The spring pigs

CORRUGATED METAL CULVERTS.

Every road supervisor should be interested in the new metal culverts that are now being manufactured by the Iowa Metal Corrugated Culvert Company with factories at Independence, Oskaloosa, Council Bluffs, Marshalltown, Ft. Dodge, Iowa, and Lyle, Minn. These culverts are the most practical and durable of anything that has ever been made for this purpose. They will hold up enormous weight, as is demonstrated by the illustration on this page. And then besides, they are not affected by heat and cold or moisture. They never need any repairing and floods cannot injure them. Their great strength is demonstrated by the corrugation, for each

corrugation is a perfect arch. They are not an experiment, but have been in use for many years and have been found to outwear every other material ever used for culvert purposes. The price is most reasonable and every man who has anything to do with country roads should certainly hail with delight a culvert that he knows will answer the purpose for which it is intended as long as he lives. These corrugated culverts are very popular wherever used and the county boards all over the state are investigating them. Write your nearest factory for catalog. The address of each factory is given in the advertisement on page 26 of this issue.

LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose If You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

J. BOYD, M. D., 505 Locust Street, Marquardt Block, Corner Fifth and Locust Streets, DES MOINES, IOWA

are a very uniform, growthy lot and a good herd boar or extra good young gilt can be selected from this lot without any trouble. Mr. Turbett will be pleased to send catalogs to those who are interested in Poland Chinas if they will write as per the advertisement on page 38 of this issue. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Turbett, will be properly handled. Please mention The Homestead when writing.

FINAL ANNOUNCEMENT OF PRAIRIE GLENN DUROC BOAR SALE, TUESDAY, SEPTEMBER 25TH.

Do not fail to attend the fall Duroc boar sale of Mr. A. L. Mossman, Radcliffe, Iowa, on Tuesday, September 25th. A splendid opportunity is offered here to secure sons of Tientsin, the sire of the first prize junior yearling sow at the Iowa State Fair this year. Breeders of Durocs know the one in mind, the sow that was a warm competitor of the champion sweepstakes winners. A representative of The Homestead was most royally entertained at Mr. Mossman's recently, not only in taking a substantial dinner, but he had a feast in looking over the boars that go in Mr. Mossman's sale. When sires like Tientsin and A. L.'s Advance are used in a herd they leave their stamp, and good individuals are sure to follow. There will be thirty-five head to go under the hammer, the greater portion of which are sired by the above boars. A number also included are sired by A. L.'s Chief and King Al, both excellent boars. In the catalog listed as No. 1, 2 and 3, are good specimens of what are to follow. These are sired by Tientsin 17261, by Tolstoy. There were thirteen in this litter, showing they came from prolific strains. No. 4, 5, 6 and 7, also out of a litter of ten, are sired by Tientsin, while 8, 9, 10, 11 and 12 are out of a litter of nine and sired by Radcliffe's Boy, by Tientsin. Here are five large, heavy-boned fall boars. There will be two in the sale by Chief Promoter 23313 by Topnotcher Again 10687 (A.) and out of a dam known as Malcolm's Cherry Blossom by Grainger, the sweepstakes boar at the Minnesota State Fair last year. These two boars offered are blue blooded on both sides. Three nice ones to go are by A. L.'s Chief 43327 (A.), and their dam being All Choice Again 126020, a first prize, six months old sow at the Hardin County Fair in 1905. Nos. 18 and 19 are also of the same breeding on the sire's side and out of Gold Choice 126018, by Tientsin. Gold Choice was second prize sow at Hardin County Fair in 1905 in six months class. Mention is also made here of No. 21 by Pleasant Hill Advance, and out of All Choice 2d 110172, the first prize sow in 1905 at Eldora, and the one that topped Mr. Mossman's sale in the early part of February, 1905. It has been noticeable

throughout the offering that litters in every instance were large, and it is believed that no sale this season will contain boars from such large litters. This spring Mr. Mossman's sows averaged ten pigs to the farrow. Now is the time to get blood from these prolific sows. An Ohio Chief boar of last March farrow, weighing nearly 200 pounds will be a special attraction to those desiring this breeding. Mr. Mossman will place him in if not sold before the sale, provided their is a demand for him. Breeders will do well to attend this sale, as it contains topsy stuff, all bred in the blue. Catalogs are now ready for distribution. Colonels McIlrath and O. L. Mossman will conduct the sale, and bids sent to them will be given fair treatment. Trains on Iowa Falls & Northern and Chicago & Northwestern will be met. Free dinner at the farm. Sale promptly at 1 p. m., Tuesday, September 25th. See sale announcement on page 35.

WAYSIDE SALE OF SHORT-HORNS.

This is our second attempt to call attention to the very choice string of Short-horn cattle that will be sold at Mt. Vernon, Iowa, October 5th, the property of Mr. George H. Burge. These cattle will be sold at Mr. Burge's farm, one mile south of Mt. Vernon. This is Mr. Burge's sixth annual sale and is unquestionably the choicest offering that he has ever made; in fact, it is considered by those in position to know the best offering of cattle ever made from Linn county. The offering includes Mr. Burge's show herd at Des Moines, with one or two exceptions, one of these being the herd bull, Money Musk, with which Mr. Burge secured second prize at the Iowa State Fair in the open class, the world competing. Money Musk was by Raphael and out of Missie's Queen by Commodore. Hence Money Musk is a Marr Missie and is only four removes from that grand cow, Imp. Missie 99th, by Elucationist. Raphael was by Victor Mysie 2d, dam Rosie Gem 5th by Cruickshank bull, Blue Valley Duke 3d. This is the greatest bull that Mr. Burge ever owned and he takes much comfort in the fact that he himself was the breeder of this great bull. The splendid show heifer exhibited at Des Moines, Floradora, Lot 1 of the sale catalog, is a daughter of this bull and is a splendid Scotch heifer, full of quality and show-yard character, her great thickness and substance being incorporated in her through the long line of splendid Scotch bulls and cows that appear in her pedigree. She herself is a Scotch heifer, tracing to Imp. Beauty 15th by Heir of Englishman. The sale catalog shows her list of winnings at Iowa, Nebraska and Sioux City fairs of 1904 and 1905. Lot 2 is a beautiful Scotch heifer, Louisa of Wayside 3d. She is a daughter of Acrobat and out of a daughter of Imp. Anchorite. Lot 3, Beauty of Wayside 3d, is a daughter of Money Musk out of Beauty of Wayside by that grand, thick-fleshed old bull, Orange Chief. She belongs to the famous prize-winning family of Nerissas, which in the hands of Mr. George Bothwell, H. D. Parsons and others, were such noted prize-winners. Lot 4 is a Booth Pauline called Lady Booth, her sire being Acrobat. Her dam, Hester 2d, was by Waverly, a bull bred by Colonel Harris and sired by the best bull ever used at Linnwood, Baron Lavender 2d. A splendid heifer will be found in Lot 5, Nonpareil of Wayside 3d. She, too, is sired by Acrobat and belongs to the Campbell Nonpareils. Lot 7 is of this same family, but is sired by Money Musk and is a splendid specimen of the Scotch Nonpareils. Lot 9, Rose Mary of Wayside, is also by Money Musk and out of Lassie of Maple, she by Field Marshal. This heifer belongs to the famous Cruickshank family of Rose Marys by Bread-albaine. A good Cruickshank Acorn is Princess of Wayside, Lot 10 of the catalog. She is a daughter of Money Musk and is one of the choicest-bred Cruickshank females to be found. Lot 13 is another of the Nerissas, sired by Raphael. Mr. Burge, in making this offering, has listed forty-four head of the best cattle that he has ever been able to place before the public. Included in the sale is the splendid show bull, The Trumpeter, a red bull calf dropped Dec. 5, 1905, got by Money Musk out of Nonpareil of Wayside 2d by Orange Chief, she out of Nonpareil of Meadow Lawn by Prince Nonpareil 2d. Her dam, Glen Nonpareil, was by Imp. Prince President and she out of Imp. Nonpareil 39th by Vermont, the last two bulls being bred by Mr. Amos Cruickshank at Sittytown. Lot 38 is Knuckle Duster, a son of Acrobat, and traces to Imp. Beauty 15th by Heir of Englishman. The remainder of the bulls are Scotch-topped, but are splendid individuals and worthy of consideration at the hands of intending purchasers. Mr. Burge's sale is the last of the circuit of Short-horn sales for that week and as the crowd is liable to get filled up on cattle before his sale day arrives, there will probably be some bargains in store for those who go to Mt. Vernon October 5th. Mr. Burge's sale catalog is now out and ready to mail. It should be

remembered that he is no novice in the Short-horn business and further that he is a self-made man, breeds, feeds, develops and exhibits his own cattle with his own hands, and is thoroughly practical in all the various lines of the Short-horn business. Mr. Burge was for a long time secretary of the Iowa Short-horn Breeders' Association, and did his work with much credit and dispatch. These cattle listed in this sale are practically all of his own breeding and no breeder in Iowa has a greater fixture of type than has Mr. Burge. He has a model in his mind after which the modern Short-horn should be fashioned and has striven for years to bring his herd up to his model, which is an ideal one. The great success which has crowned his efforts was thoroughly noticed by that late and lamented breeder, Mr. Martin Flynn, who said to the writer that Mr. George H. Burge was one of the young breeders of Short-horn cattle of Iowa with whom all the older breeders would be compelled to reckon. Said he, "When you see one of Mr. Burge's animals you can without difficulty pick out any number because the type and family characteristics are the same." Said Mr. Flynn, "I have known men who have bred cattle for forty years and never achieved anything like the success that this young and energetic breeder has in a half dozen years." The final details of this important sale will be found chronicled in our next issue.

LAST CALL FOR THE HATCHER-PFANDER-MCCLELLAND DUROC JERSEY SALE.

At Clarinda, Iowa, on September 27th, will again be held the sale of Messrs. H. H. Hatcher, Harry Pfander and W. W. McClelland. These well-known breeders of Page county always put up a good and useful offering of Duroc Jersey hogs at their annual sales. We will not attempt to say that they are putting up show stock for sale, but we will say that if a man wants a right good boar or a few choice gilts they will find them in this offering. Mr. Hatcher will sell fifteen head, all boars except one gilt. He puts in his first-prize litter at Shenandoah, sired by Hatcher's Marti, and they are good enough for anybody. He also puts in some good boars sired by Glendale Critic, Gem's Critic and Isaac's Prince. The Hatcher offering is good in color, very growthy, ample bone and are the best, taking them all in all, that he has ever sold from his herd. Mr. McClelland sells about the same number, all spring boars and gilts, except two sows with litters. One will have litter by Stout's Advance, the other by Golden King, a Watt & Foust-bred boar. He sells two spring boars sired by Improver II, and a number by Stout's Advancer. One of these is out of a daughter of Glendale Critic, another out of a daughter of old Orion and one, a very growthy fellow, is out of a daughter of Mogul by Tom Watson. He is a double-bred Top Notcher boar. All Mr. McClelland's gilts are sired by Perfection Chief, a son of Proud Advance. Mr. Harry Pfander's offering is sired by Red Knight, the Nebraska State Fair sweepstakes boar in 1905, Duroc Standard and Belle's Corn Cracker. He sells two good gilts sired by Duroc Standard and one sow, a daughter of Paddy Orion. The most of his boars are sired by Duroc Standard and Corn Cracker, and are well grown out and very good in color. In fact the offerings of the above three breeders are very uniform and they are selling a lot of excellent spring boars and some nice gilts. Those who cannot attend the sale should send a bid to Mr. E. Z. Russell, president of the National Duroc Jersey Association, who will be present at the sale. Write for catalog to any of the above breeders and kindly mention The Homestead.

C. F. HEWITT'S DISPERSION SALE OF ANGUS CATTLE.

Homestead readers will do well to bear in mind that on October 2d will occur the dispersion of Mr. C. F. Hewitt's choice herd of Aberdeen Angus cattle, at the new sale pavilion in Morning Sun, Iowa, commencing at 1 o'clock p. m. Mr. Hewitt has been many years in the business of breeding doddies and has found it profitable and pleasant. For various reasons beyond his control he finds it necessary at this time to disperse his entire herd. Mr. C. F. Hewitt is the senior member of the firm advertising as Messrs. Hewitt Bros. However, the herds of Messrs. C. F. and J. T. Hewitt have always been separate in ownership, as well as being kept on separate farms, the herd bulls alone being owned jointly. The junior member, Mr. J. T. Hewitt, will continue breeding Angus cattle. While the breeding of the cows in Mr. Hewitt's herd are possibly not of the most aristocratic families, yet from the standpoint of practical utility none are more valuable. During the years 1900, 1901 and 1902 the entire crop of bull calves reared by Mr. Hewitt sold for an average of \$100 each. A large per cent of the herd are of the rapid-breeding, heavy-milking Ruby family. They combine quality, size and thick-fleshed quality, of which few cattle can boast. Mr. C. F. Hewitt started eleven years ago with twelve breeding cows and from this little nucleus the herd has developed to its present proportions. These cows are styled Rubies or Brucehill Violets because they are direct descendants from Weetamoo and Weetamoo 2d and they of the Violet or Brucehill and she of Ruby or Campfield. Weetamoo's sire was Basuto, one of the greatest show bulls that the world has ever produced, he being a Blackbird bull. From this start, Mr. Hewitt used a grandly-bred Erica bull, Emperor of Estill, he by the 2d Mayor of Estill and he by the great Heather Lad 2d. Emperor of Estill had for a dam the splendid Erica cow, Erina 3d, her sire being Moss Creek Etouliam 2d, he by Etouliam and he in turn by Elko out of Eva. Hence he is a double-crossed Erica. Following this bull Mr. Hewitt secured from Mr. W. A. McHenry the splendid Blackbird bull, Barter. This bull is four years old, sired by the pride bull, Imp. Proteros, and out of the Blackbird cow, Blackbird of Denison 32d, she by McHenry King 2d, he by Heather Blackbird and he by Heather Lad 4th and out of Blackbird of Burlington 6th. Thus it will be seen that Barter is a richly-bred Blackbird and being sired by the imported Pride bull, Proteros, his breeding is all that could be exacted. Proteros' grandam is Pride of Dalraddy, she being a full sister to the dam of Prince Ito, the Highland champion which sold in America for \$9,100. Parties desiring more information concerning this dispersion

sale will receive the same by dropping a postal card to Mr. C. F. Hewitt, of Morning Sun, Iowa.

THE TIGHE-WALLACE DUROC JERSEY SALE.

At Wisner, Neb., on October 2d, in the new sale pavilion, will occur the Duroc Jersey boar sale of Mr. John Tighe, of Stanton, Neb., and Mr. Clarence Wallace, of Wisner, Neb. These two well-known breeders are putting in the pick of their fall and spring boars, and it is an offering that will strongly appeal to prospective boar buyers. Mr. Tighe's offering is composed solely of spring boars, except a couple of herd boars that he is selling. His spring boars—nineteen in all—are sired by Surprise Chip 37597, he by old Surprise, Belle's Echo Prince, Glendale Critic and Echo King. No. 3 of catalog is a big, rangy, March pig by Surprise Chip out of Topsy's Best by Data Raja Muda. The dam of this pig is a half sister to the dam of Red Knight, the Nebraska State Fair sweepstakes boar. This is a good colored pig and will make a good hog. Nos. 4 and 5 are by the same sire and are out of Belle of Pilger by Orion. The first of these two is a large, smooth, pig and should go to some good herd. They are full brothers to the highest-priced gilts in his last winter sale. No. 6 is out of Belle of the Valley by Proud Advance. He is not large, but is an easy-maturing pig, and short of leg. No. 7 and 8 are by Belle's Echo Prince, dam Molly Orion by Orion. Here are two good pigs of the Orion-Dandelion and Nebraska Belle blood. Their dam topped the Mihill sale last winter. There are two pigs in the sale by Glendale Critic, the noted show boar and sire of winners, and there are two boars in the sale by Echo King. Two other pigs are out of a Crimison Wonder sow. He also sells Surprise Chip, his herd boar, and Roh Rob, a son of Proud Advance. Mr. Wallace sells nine good strong fall boars, all sired by Col. Van Patton, and these all have good arched backs and have plenty of bone. These are all out of sows who carry the blood of the boars sired by Col. Van Patton, Billy K. II., great Jumbo Red. He sells fifteen spring Hamilton's Improver, Lady's St. Paul by old St. Paul, and Red Chief Protection by Red Chief I Am. These pigs are out of sows sired by Wallace's Jumbo Red, Medoc, Indicator and Red Chief Brown. Mr. Wallace is putting in an excellent lot of boars, and has been very careful to only select his best things for his sale. Seven of Mr. Wallace's fall boars are out of one of his best foundation sons, Pride of the Elkhorn, by Wallace's Jumbo Red. Mr. John O'Kane, of Bancroft, Neb., the man that breeds the prize-winning Short-horn bulls, comes up smiling in this sale with a half dozen boars sired by a son of old Duroc Challenger. All in all it is a good, useful offering, and there are many boars in this sale whose blood lines and individual merit well entitle them to go to the head of some good herd. Read the advertisement and write either Mr. Tighe, or Mr. Wallace for catalog and kindly mention The Homestead.

STATE CENTER SHORT-HORN BREEDERS' SALE.

On September 27th, at State Center, Iowa, will occur a prominent sale of Short-horn cattle by the State Center Short-horn Breeders' Association. The contributors are Messrs. P. A. Fricke, C. H. Fricke, F. E. Fricke, S. P. Gilton & Sons and other. The sale will be held at the farm of Mr. C. H. Fricke, four miles south of State Center, and a short distance from Rhodes, so that the sale can be reached easily either on the main line of the Chicago & Northwestern Railway or on the main line of the Chicago, Milwaukee & St. Paul. Mr. E. A. Fricke, the sale manager, will sell eight females, all Scotch topped, with as many as five good Scotch bulls on the tops of their pedigrees. Two of his females are bred to 2d Baron and the remainder to the splendid young Cruickshank Sweet Brier bull, Royal Knight. Mr. Fricke will also sell four bulls, including the splendid Scotch bull, Royal Aberdeen. This bull is by the Cruickshank bull, Glen Aberdeen 2d, a son of Imp. Aberdeen and out of Glen Yphan 7th by Royal Consul 2d. The dam of Royal Aberdeen is Queen Bessie by Victorious. She is out of Imp. Roan Bessie 2d by My Lord. Royal Aberdeen is a rich red roan, calved Sept. 3, 1905, and is probably the best Scotch bull that Messrs. Fricke Bros. have ever bred. While we have listed him as Mr. E. A. Fricke's bull, he is in reality owned by Messrs. Fricke Bros. It has never been their good fortune to be able to offer so good a Scotch bull to the public. They had contemplated sending this bull to the International stock show at Chicago, exhibit him and place him in the Short-horn sale at that point, but in order that this sale might be made the more attractive, they decided to list him and he is cataloged as Lot 11. Someone will find a good herd bull in this fellow and we trust that he will be appreciated sale day. We omitted to state that the other breeders contributing are Messrs. C. E. Klump, of Nevada, Iowa; G. T. Easton and A. F. Pike, of Rhodes, Iowa. Parties coming over the C. G. W. Ry. should leave the train at Mel-hourne, which is but three miles from Mr. C. H. Fricke's Even Park Stock Farm, at which place the sale will be held. Mr. C. H. Fricke sells six bulls, three of which are Scotch. One is a Butterfly, one an Orange Blossom and one an English Lady. The Orange Blossom is by Earl's Fame, he by Imp. Golden Fame. The English Lady bull is called English Count and is a very large and well-formed yearling by Scottish Count. Those in quest of good Scotch bulls will find the three consigned by Mr. C. H. Fricke to be the proper stamp and type. Mr. F. E. Fricke consigns five females and two bulls, three of his five females having calves at foot. Two of his yearling bulls are by 2d Baron and one by Oakland Cup. Messrs. Pierce Gilton & Sons sell two females, while Messrs. Klump, Easton and Pike furnish the remainder of the offering, which will number something over fifty head. It is a very practical, useful lot of cattle and is the natural accumulation of the various herds which they have selected to make their annual Short-horn breeders' sale from. It has been the custom of the State Center Short-horn breeders for a number of years to hold these annual festivities and in order to keep them up they sometimes have to draw some animals from their herds that they would far rather keep. The sale is very easily reached by being close to three main lines of railway, namely, the C. & N. W.,

Home Seekers' Rates

ONE FARE PLUS \$2.

THE LAST CALL FOR THE RANKIN DUROC SALE.

At Carson, Iowa, on Sept. 23, 1906, Mr. W. A. Rankin will sell fifty head of richly-

bred Duroc Jerseys. Among these are boars by Ohio Chief, Glendale Critic and other great boars. It will be a good offering and it will be a well-bred offering. In a recent letter to The Homestead Mr. Rankin says: "There will be thirty-five boars—twenty-eight spring boars, five fall boars, one yearling and one two-year-old—nine spring gilts and six yearling sows. There will be two Ohio Chief boars, one that I had at Des

Molnes. His ears are coming down all right again and he has done well. The other is also a good pig. I will sell one boar pig sired by Glendale Critic. His dam is a granddaughter of Gold Dust Jim. He will make somebody a good boar. There will be fourteen sired by Miss Bob's Wonder, and there are several good ones among them. Three of these are out of a Gold Dust Jim sow, and she is a good one. One of the boar pigs I had up to Des Moines. Jim's Gold Dust will be represented in this sale by some big, growthy boars that will stretch out into big hogs. One yearling boar I got of Messrs. Geo. Briggs & Sons last fall. He was sired by Higgins' Model and is a good hog. There will be one two-year-old boar sired by Improver 2d that is a good hog and has sired me some good pigs. He is the sire of the gilt that Messrs. Manley & Co. gave \$150 for in my last winter sale. There will be nine spring gilts sired by Jim's Gold Dust, Miss Bob's Wonder and Higgins Jr., and there are some good prospects for brood sows among these. There will be six head of yearling sows. These are a little thin and all open. Two will have pigs with them. I want to call attention to Punch 2d that will have a litter of seven pigs with her. Here is something that will make the man money that gets her." Breeders should attend this sale, because Mr. Rankin will have some good boars and sows to offer. Some of these are good enough to head herds. Write for catalog and go to the sale.

JOHN HUGHS SELLS SHORT-HORNS.

Amidst the numerous sales of Short-horn cattle to be held this fall one of importance is that of Mr. John Hughs, of Belle Plaine, Iowa, who will sell at his farm, adjoining Belle Plaine, on October 6th, forty-three head of good, useful Short-horn cattle, including a liberal consignment of Scotch cattle. The offering is made up as follows: Eleven bulls, the remainder females. Included in the offering are eight splendid yearling heifers, twelve cows with calves at foot and everything offered is of the useful type. The heavy-milking quality of Mr. Hughs' Short-horns is one of the points to recommend them. Due care has been observed in building up a herd of cows that would each and every one rear her own calf abundantly, and where the cows have been milked they have shown themselves to be regular milkers. Mr. Hughs is also offering some exceptionally well-bred bulls, two of which are Scotch. He is selling one good Scotch three-year-old bull called Strawberry Lad 247700. His sire is Village Nonpareil and his dam that most excellent cow, Imp. Seeding Strawberry. This bull has been used with marked success, but can be spared and will be sold at whatever price the public sees fit to put on him. It might be observed at this juncture that Mr. John Hughs bred and sold to Professor Curtiss the present college herd bull that heads their most excellent herd of Short-horns. This is quite an honor to be able to breed a bull to fill the eye of so good a judge as Prof. C. F. Curtiss, and one that is deemed worthy to take a place at the head of the college herd. Mr. Hughs is selling a full brother to this calf out of Simplicity 4th. Simplicity 4th, it will be remembered, belongs to the famous Cruickshank Secret tribe, descending from the imported cow, Simplicity, for which Mr. C. W. Norton paid Mr. Luther Adams, at auction in his West Liberty sale of 1887, \$1,200, which was at that time the record price for a Cruickshank female. There are several of this family included in Mr. Hughs sale. Aside from the stock above mentioned are the following Scotch families to be included: Emma, Strawberry and Secret, and a choice lot of American-bred sorts, such as Young Mary, Rose of Sharon, Jubilee Gwynne, Zella, Iantha, Adelaide, etc. Mr. Hughs is making an offering of Short-horns that is well worthy the attention of the breeders of Iowa and the middle West and as his sale is sandwiched between so many other important sales, it is altogether probable that some bargains will be in store for the wise buyer who attends this sale. The catalog will be ready by the time this article is read and will be sent free upon application to Mr. John Hughs, Belle Plaine, Iowa, mentioning The Homestead. See page 38.

CRAVER'S DUROC JERSEY SALE—LAST CALL.

Again we wish to call the attention of our readers to the Duroc Jersey sale of Messrs. W. A. Craver & Son, of Fillmore, Ind., which will be held on Wednesday, September 26th. The offering is composed of sixteen extra good fall yearlings, thirty spring gilts, six yearling boars and twenty head of spring boars, many of them sired by Messrs. Craver's herd boar, One Such, a brother in blood to Hanley, the double first-prize winner at Ohio and Indiana State Fairs last year and the property of Messrs. McNeil Bros., of Bowen, Ill. Very few sales are held in which a better lot of gilts are included. The fall sows and yearling sows are large, smooth and growthy. They are in prime condition for breeders to secure to breed to their own boars, thus giving new blood for the next season's trade. The writer, representing The Homestead, is pleased to recommend this sale consignment to readers of The Homestead. A litter of six fall sows sired by One Such and out of Ripley Queen 4th, she by the noted boar, Sure Winner, now owned by Messrs. Arch Brown & Sons, of Waterloo, Neb., are fit to go into any herd. They are of show-yard type and conformation and contain the blood of some of the best breeding boars as are found in the East. A spring litter out of same sow by One Such cannot help but please discriminating buyers. Another litter of practically the same breeding is out of Elsie Winner 11. 33900, she by Sure Winner. There are five sows and one boar in this litter and they were farrowed Sept. 25, 1905. A litter by High Notcher, he by Top Notcher Again, a World's Fair winner and producer of much good stock, is out of Cordelia 30318 by King Watt's Last 10053. This litter consists of five sows and one boar of September, 1905, farrowed. This litter has the growth, quality and style which predominate throughout the en-

tire offering and should not be overlooked by discriminating buyers. The boar in this litter was a prize winner at the Indiana State Fair this year and should go to head some good herd. The spring pigs are an unusually uniform lot and will do to go into good herds. Messrs. Craver won nine firsts and four seconds at Crawfordsville, Ind., this year; all firsts at Shelbyville, Ind., and were successful at the Indiana State Fair as well. They will be pleased to send catalogs to readers of The Homestead and if any breeder cannot be present sale day bids sent to Mr. D. M. Pierce, in care of Messrs. Craver, will be properly handled. See advertisement on page 39 and plan to be present in person or represented at this important sale. Mention The Homestead when writing.

LAND TO EXCHANGE.

Mr. T. E. Laurence, of Portsmouth, Iowa, announces on page 22 that he will exchange a quarter section of land in Sargent county, North Dakota, for good registered cattle.

LAST CALL FOR GARRETT & SONS'

GREAT SALE OF POLAND CHINAS.

When the breeders and the farmers interested in the Poland China hogs have gathered at Messrs. W. T. Garrett & Sons' farm, near Maryville, Mo., on Next Tuesday, September 25th, to attend their sale, we predict that without a dissenting voice they will pronounce the Garrett offering the greatest in point of size, individual excellence and quality that they have seen in some time past. The writer has just received a catalog of the sale. It is such a catalog as should be in the hands of every breeder. The illustrations, thirteen in number, are of hogs that go in the sale and of breeding stock that is now in service at Messrs. Garrett & Sons' farm, or hogs that have been used within the past few years. The illustrations of those that go into the sale are but fair samples of what the entire offering will be found; in fact, when we visited the herd recently and were shown the individuals that had been sketched, it was our opinion that the best individuals had not been used as subjects. The attractions throughout the offering are numerous and the buyers of either boars or sows will find that he has no easy task to select the best. Last week we spoke of the great sow, Miss Allerton 65230 and of her two sons and her six daughters that go in the sale. Breeders who want a profitable proven brood sow should remember Miss Allerton. Should you fall on her, remember the six daughters are her equal as individuals and promise to make as good brood sows. These and the two boars are of fall farrow and got by the late I Am Sunshine. Another pair of fall boars are sons of Proud Monarch, one out of Royal Perfection, an Allerton-Tecumseh sow, the other out of Flossy Perfection, got by Nodaway Perfection and out of Fossy, a daughter of the great Doyle's Tecumseh. Here, too, is a pair of boars that should appeal to the more critical buyer. Each has a sister in the sale and they, too, should find good homes. Three daughters of Rose Ruby will be found just as good as is found in Messrs. Garrett & Sons' herd. They were got by Proud Monarch. Their dam, Rose Ruby, was got by Allerton's Tecumseh and out of Ruby's Rose by Royal Osgood and out of Rose Glen by Chief Tecumseh 2d. Nothing better will be found this year. Plenty of other good ones are listed among these fall sows. In spring boars and gilts Messrs. Garrett & Sons have a great lot listed. They, too, are from Allerton-Tecumseh sows and the man who looks for size, quality and good bone will miss it if he is not on hand next Tuesday when Messrs. Duncan Bros. start the sale. See page 34 for the last announcement of this sale and if you have not yet received a catalog just get on the train and go to the sale, as the hogs are there, the breeding is right and Messrs. Garrett & Sons will appreciate your attendance.

THE LAST CALL FOR THE PETERSON BROS. SHORT-HORN SALE.

In previous issues we have called the attention of our readers to the dispersion sale of Messrs. Peterson Bros., which takes place at Lamoni, Iowa, on September 27th, and we again repeat that here will be a splendid place to get some well-bred Short-horn cattle. In the bull offering in this sale will be their two herd bulls. One of these is Gay Hampton 212202, a son of the great Hampton's Best, considered the greatest son of Imp. Merry Hampton, and his dam is a daughter of the Harris-bred bull, Gay Lad-die, a son of the well-known Galahad. This bull is a red in color and is one of the very good sons of this famous sire. He has been a good breeder and had it not been that they are selling out he would not leave the farm at any price. His calves in the sale will show what he is as a breeder. The other bull is Fairholm Jewell 228970, a pure Bates, and as well-bred a Bates as has ever gone through a sale ring. As a breeder they consider this bull one of the best that they have ever had in their herd. His calves this year are doing well and they prize this bull very highly. Among the females are some richly-bred Scotch cows and some of these have cost them considerable money. Imp. Crescent 8th is a Marr-bred cow and was imported by Mr. W. D. Platt. Her sire was Prince of Fashion, a son of the noted bull, Scottish Archer, and her dam was sired by the well-known bull, Sovereign, also bred by Cruickshank. This cow is a good breeder and some of her heifers will be included in the sale. Imp. Princess Fame, another imported Scotch cow, also goes in and she will also have a daughter in the sale sired by the Scotch bull, Stakeholder. There are some very excellent Scotch-topped cows in this sale of the Young Mary, Young Phyllis and Rose of Sharon families. There are also some well-bred Bates cows and heifers to be sold in this sale and we doubt if any sale of the year can show any Bates pedigrees that are any better than what the boys will offer in this sale. No. 33 of catalog is Tulip, a straight Bates cow, and she is suckling one of the best calves in the sale. This cow is an extra heavy milker, as is also Lady Sharon of El Maiz. They say of this cow that she is one of the best breeders they have in the herd. Many of these cows are of the milking strain and they always raise good calves. There will be an excellent bunch of heifers in the sale, of uniform type and color. They also sell a good bunch of young bulls. Gay Hampton will weigh over a ton, and Fairholm Jewell will tip the scales at 2,500 when matured. If any of our readers are looking for Scotch cattle, or Scotch-topped and pure Bates cat-

THE NORTH-WESTERN LINE

NEVIUS' SHORT-HORNS AT OTTAWA, KAN., FAIR.

Under date of September 8th Mr. C. S. Nevius, of Chiles, Kan., writes of the first show in which his Short-horns competed this year. "We made the show at Ottawa, Kan., this week. They had a grand fair, a fine lot of cattle, a number looking like the American Royal kind. This was especially so in yearling heifer, heifer calf and champion female classes. Mr. H. C. Duncan, of Osborn, Mo., tied the ribbons to the entire satisfaction of all. In aged bull class we landed first with Prince Payonia 207316, Mr. O. O. Wolf won second on Wanderer. In two-year-old class for bulls Mr. Wolf won first and in yearling class he again won first with Mr. Perkins second. In bull calf class Mr. Wolf again won first and second. We had no entries in these classes. In aged cow class we won first on Lovely Princess. In two-year-old heifer class Mr. Stratton won first and we second on Victor's Rose. In yearling heifer class Mr. Wolf again won first on Scotch Josephine; we won second on Knight's Luster. In heifer calf class we won first on Secret Knight. We also won championship on female, Lovely Princess. Our next show will be at Hutchinson, Kan. Our stock at home is doing fine and we have some choice bulls ready for service."

WOOLLESS SHEEP.

The following from the American Agriculturist will interest sheep breeders: "If found practicable and economical, a breed of woolless sheep will be introduced into the United States. On a farm maintained by the bureau of animal industry, near Bethesda, Md., is a small flock of woolless sheep that was brought from the West Indies last summer by the bureau of animal industry. It is hoped these sheep may prove valuable for mutton-raising purposes in the extreme southern parts of the United States, where heavily woolled sheep often suffer on account of excess fleece. The attention of the department was called to these woolless sheep by Sir Daniel Morris, imperial agricultural commissioner for the West Indies. In 1903 he visited Washington and told of the animals, which are greatly esteemed in the Barbadoes for mutton. It is thought the woolless sheep are of African origin. They are medium-sized, upstanding, practically without wool and hornless, or nearly so. In general appearance they somewhat resemble at a distance diminutive hornless Jersey cattle or deer, the color being exactly the shades of fawn seen in Jerseys. The sheep are decidedly "leggy," but have fairly deep bodies and quite well-sprung ribs. They appear to be hardy and of good constitution. There is fair width

of back and loin, but a very deficient hind quarters. The rump is quite steep from the hips to the tailhead and the tail is set very low. The thighs are "cat-hammed;" there is little rotundity of buttocks, very little depth of twist, and the flesh is not carried down on the hocks as one sees in the best mutton breeds. The sheep are active and lively. Ears are somewhat large and drooping, much like those of a Suffolk or Hampshire. There is also a slight tendency to a Roman nose, especially in the buck. The ears are peculiarly marked with a light fawn-colored line close to the outside edge, and extending about two-thirds of the way around. They generally have black hairs among the fawn-colored sheep on the outside and a few fawn-colored hairs near the head on the inside. The body is covered with a thick, pliable and generally soft skin, which carries an abundant coat of coarse hair. The hair seems coarser on the light-colored sheep than on the darker ones. In three of the ewes there are traces of wool. One shows white wool fibered over the tops of the shoulders, over the crops and upper ribs and extending about half way over the back. The second shows the same tendency, but with a more limited area. The third shows brown wool fibers on the back and outside of the hind quarter, about half way between the hock and the point of the buttock. The hair always lengthens in this part in all specimens. The buck has a decided beard, which extends from the angle of the jaws almost to the brisket. The color of the beard is black, with a few brown hairs. The hair fibers are about three-fourths of an inch long over the most of the body, increasing in length on the back of the hind quarters to as much as one and one-half inches. Where wool is present it is longer than the hair. The sheep are said to be very hardy and in dry districts are profitable. They are not kept in large flocks on the island of Barbadoes, but according to authorities nearly every peasant proprietor in the drier districts around the coast has a few head. They are tethered to a peg while pasturing during the day and are placed under cover at night. It is stated their habits are very much like those of the goat, as they browse to a considerable extent and are thus very easy keepers. These recommendations seemed to indicate that the introduction of this breed might prove useful to the farmers of states in the extreme South. However, the department will thoroughly investigate the breed's worth."

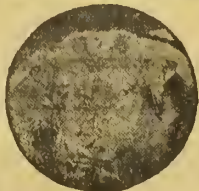

TO LATE TO CLASIFY.

30 CHESTER WHITE BOARS 30

An extra choice lot of young boars, including more extra good herd headers than ever. Give careful description of what you want or come and see an up-to-date herd at Inwood, Lyon County, Iowa. A. A. ROGERS, Owner.

TOO LATE TO CLASSIFY.

Three Million Dollars' Worth Of REAL ESTATE AT AUCTION

THAT is the amount of real estate I have sold at public auction in the past few years. During this time I have sold in nearly a score of states and territories, have sold property for bankers, trust companies, railway companies, capitalists, farmers, real estate men and others. I have sold all kinds and classes of real estate at auction, including farms, city residences, vacant lots, stores, office buildings and prairie land. Am fully acquainted with land values in all parts of the country, and will go anywhere to conduct sales. Terms on request.

John Tighe, Stanton, Neb. Clarence Wallace, Wisner, Neb.

Col. J. L. Luther, Auctioneer.

HORSES.

THE WENONAS' GREAT STUD

HAVING concluded a change in placing stallions before the public on account of the unsatisfactory business methods by the so-called salesmen, we will sell entirely from the barns. Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and the great expense of selling also the unsatisfactory manner in which sales have been conducted. The long time notes, from three to five years have to be discounted enormously or carried by the seller making the cost of the stallions to the buyers or the companies from \$2,500 to \$4,000. Our desire now is to sell our entire STUD at our barns in Kansas, Pullman, Washington, and at our headquarters at Wenona, Illinois.

From \$800 to \$1,800 Good American Bred Stallions from \$800 to \$1,000
First Class Imported Stallions from \$1,200 to \$1,600
Choice \$1,800

THESE are the prices at our barns in Kansas and Illinois. Prices at the Great Western Barns, apply to M. C. Grey, Pullman, Washington. We ask all intending purchasers to visit our stables where we have over 300 head of stallions to select from and do not be misled by the so-called salesmen who have been the cause of the unsatisfactory business done in the stallion trade to the buyer as well as the seller. We have told you of our change of selling stallions, now we will tell you what we have on hand, SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS, over 800 of the BEST. We will show at Springfield, Ill., SIXTY HEAD and at Hutchinson, Kan., of which THIRTY HEAD will be two-year old PERCHERONS and we know no one on earth can show colts of such size, weighing now after just landing over 1,800 pounds each. Come to Wenona and deal with BOB BURGESS who has been in the business over 32 years, longer than any one man in the stallion business and we guarantee to make every deal satisfactory to you and save you from \$1,000 to \$1,500 by dealing with us. Get your guarantee and insurance direct from headquarters. Visit our barns, see our exhibits at the different state fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that BOB BURGESS is the oldest importer in the business, the largest importer and have the quality of stock that will suit the people, perfectly good for their guarantees and will sell to you cheaper than anyone in the business. COME TO THE BARN AND GET THE MOST REASONABLE TERMS THAT CAN BE OFFERED.

ROBERT BURGESS & SON, WENONA, ILL.

W. A. LANG & CO., - - GREELEY, DELAWARE COUNTY, IOWA.

IMPORTERS AND DEALERS IN
CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH
AND STANDARD BRED STALLIONS.

WE have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No odd, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more ton horses than any other place in America. Write.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home bred draft stallions, \$250 to \$300. Hurt Bros., Osceola, Iowa.

DISPERSION SALE OF THE ELM GROVE HEREFORD CATTLE

AT LAREDO MO., FRIDAY, SEPTEMBER 28 1906.

45 Head of Recorded Herefords 45

::::

90 Head of High Grade Herefords 90

THE PURE BRED CATTLE.

8 BULLS My herd bull, Prince 182194 got by the prize-winning Prince Rupert that made circuit in 1905, and seven Short-horn yearlings. These are of the herd-heading sort.

37 FEMALES Twenty-four cows, seventeen with calves at foot, seven two-year-old heifers and six yearling heifers. All females of breeding age will be bred to Prince or will have calves at foot. Many of these are rebred. Several of show-yard character. Twenty-four head of the offering were got by Kruger, he by Improver and out of a daughter of Corrector. Others are rich in the blood of Beau Brummel through Beau Donald, Gentry Briton 6th, Wilton Anxiety, Pablo and other noted sires. Many of the cows were bred by such breeders as Overton Harris, C. G. Comstock & Son, Cornish & Patton and W. H. Curtis. The individuality of the entire herd will compare favorably with any lot to be sold this year. Not a shy breeder or an inferior animal is cataloged.

HORSES

Consist of ten head well bred and a useful lot. Two draft brood mares, seven and eight years old. One family driving horse seven years old. One high-class driving mare five years old. Three two-year-old high-grade colts and one eight-year-old saddle pony; no better saddle and cattle pony in northern Missouri. These horses are in good market condition, sound and well broken, excepting the two-year-olds.

THE GRADE CATTLE

Are the fruits of fifteen years' experience in breeding up a set of brood cows, the product of which have been market toppers for the last six years on the Chicago market.

30 BREEDING COWS That look like pure breeds, with good backs and individual merit. Every one a prolific breeder.

30 YEARLINGS Eighteen head of steers and twelve head of heifers that will make car lots of show stuff.

30 CALVES All like "peas in a pod," and with quality unsurpassed.

This sale is the final wind-up of my fifteen years as a breeder of both registered and high-grade Herefords. I would not part with them, but my business interests in town compel me to leave the farm. My entire herds of pure bred and high-grade Herefords go, and at your price. You are cordially invited to be with me sale day. The sale will be held under cover. For catalog address Harry Graham, Chillicothe, Mo.

W. A. MERRYMAN, LAREDO, MO.

COL. HARRY W. GRAHAM, SALE MGR.

BELLOWS AND GRAHAM, ASSISTED BY CARPENTER AND BAILEY, AUCTIONEERS.

W. J. WENDT, MARCUS, IOWA.

CHOICE OFFERING OF DUROC PIGS
I AM making very good prices on my spring pigs and fall sows. Very strong lot of boars and gilts. Good color, strong in bone, with neat head and ears. Pigs sired by Red Reuben and others.
CHAS. VAN PATEN, SUTTON, NEB.

When writing please mention this paper.

DUROC JERSEY HOGS.
Dispersion of the Famous Gold Dust Herd of Durocs.
HAVING decided to close out my Gold Dust herd of prize winning Duroc Jerseys, I now offer to the public, at private treaty, my entire crop of spring boars. They are sired by Tip Top Notcher, grand champion at World's Fair, acknowledged by most competent judges to be the best Duroc boar in America, and sold at the record breaking price of \$5,000; Ohio Chief II, one of the best sons of Ohio Chief; Champion Paul, a son of the noted Oom Paul; and Fancy Orion, an exceptionally good son of the World's Fair winner, Orion Chief. I am keeping my sows and spring gilts for closing out sale on October 24. I am keeping nothing back and my entire herd will be disposed of at private and public sale. Write for prices and descriptions at once if you want a herd boar from Gold Dust herd. Address,
GEO. W. SECKMAN, RIPLEY, ILLINOIS.

40 DUROC-JERSEY BOARS 40
SIRE BY
JUNIOR JIM, 1st prize yearling boar at the Nebraska State Fair.

Boars and sires of 1st prize litter at Iowa-Nebraska State Fair.
Pigs by other well-known boars. If you want a herd-header, write me.
AUSTIN RENSHAW, BLAIR, NEB.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.
70 Head of the Toppiest Duroc Jersey Pigs.
I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Al-Sar-Ber 4th. I also have pigs by Crimmon Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address
W. D. PITTMAN, LAKE CITY, IOWA.

125 Duroc Spring Pigs For Sale Cheap
I AM making very reasonable prices on our crop of spring pigs. The pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Red Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.
O. E. MICKEY, OSCEOLA, NEB.

STATE CENTER SHORT-HORN BREEDERS' SALE.

FIFTY HEAD OF SHORT-HORN CATTLE

WILL BE SOLD AT AUCTION SEPTEMBER 27, 1906,

At C. H. Fricke's Eden Park Stock Farm

four and a half miles south of State Center, Iowa, by the State Center Short-horn Breeders, as follows: S. P. Girton & Sons, C. H. Fricke, F. E. Fricke, E. A. Fricke, C. E. Klump, G. T. Easton and A. F. Pike. Included in the offering is a number of good straight Scotch bulls suitable to head herds. The females are a Scotch-topped lot of choice breeding matrons, bred to the best of Scotch bulls. All females of breeding age have calves at foot or show in calf to the service of good Scotch bulls. All cattle bought by parties from a distance will be placed on the cars free of charge on the C. & N. W., Iowa Central, C. M. & St. P., C. & G. W. Terms cash or twelve months time with 8 per cent interest.

E. A. FRICKE, SALE MANAGER,
STATE CENTER, IOWA.

AL P. MASON AND ROBERT S. GOWDY, AUCTIONEERS.

DISPERSION SALE OF ABERDEEN ANGUS CATTLE

I will disperse my entire herd of Aberdeen Angus breeding cattle at Morning Sun, Iowa, Tuesday, Oct. 2, 1906. The herd embraces 51 head, including 6 bulls and 45 females. The present herd bull Bantor is included, sired by Imp. Proteros, dam Blackbird McHenry 17th, also one choice yearling bull by Emperor of Estill, dam by 2d Mayor of Estill. Twenty cows with calves at foot will be sold. Nine yearling heifers. Two two-year-olds and 5 cows due to calve before sale day. The herd is pre-eminently a business herd. They will be in prime breeding condition but not excessively fat. I am retiring from the breeding of Angus cattle, but my brother, J. T. Hewitt, who contributes some 5 head to this sale, will continue breeding Angus cattle. This sale offers the best opportunities in recent years for the young breeder to found a new herd with strictly breeding cattle. The sale will be in the new pavilion in town with Cols. W. K. Henss and Silas Igo officiating as auctioneers. Write for catalogs to

C. F. Hewitt, Proprietor,
Morning Sun, Iowa.

DRAFT SALE OF SHORT-HORN CATTLE AT SOLON, IA., OCT. 4th.

42 Head From Waveland Herd. 42

Scotch and Scotch Topped, Lavenders, Gwendolines, Columbia or Claret, Miss Ramsden, Lovelys, Acanthus, Raspberry, Orange Blossom, Princess Royal, etc. Have been breeding short-horns 20 years. My entire Show Herd is included, 30 Females 12 Bulls. The best lot of bulls I ever offered.

Sale will be held at the farm 4 miles southeast of Solon.

J. B. BROWN, Owner,
SOLON, IOWA.

COL. GRIFF JOHNSON, AUCTIONEER.

E. Cosgriff sells Short-horns at Clarence, Ia., Oct. 2d.

G. H. Burge sells at Mt. Vernon Oct. 5th.

... SIXTH ... Annual Sale of Short-horn Cattle From ... THE WAYSIDE HERD ...

Of Geo. H. Burge at Mt. Vernon, Iowa, October 5th.

On the above date I will sell 44 head of the choicest Short-horns ever offered in Linn County. Thirty-five head are females and 9 head are bulls, the larger portion of the females being straight Scotch or of Scotch extraction. Included in this sale will be the major portion of my show herd at the Iowa and other State Fairs for 1906. I will sell the get of and cows bred to the 2d prize winning bull at the Iowa State Fair of 1906, Money Musk. As this is the best offering of cattle that I have ever been able to put before the public, I trust that lovers of Short-horns will find time to attend this sale and if they cannot help me, they will at least help themselves to some of the many plums that I am listing in this sale. I have no apology to make for this sale. I simply need the money that these cattle represent and trust that all my friends and neighbors, as well as my enemies, will come and buy these cattle just as cheap as they can. All parties from a distance will be entertained at the beautiful Altoona Hotel at Mt. Vernon and will be taken to and from the farm free of charge. Dinner will be served at noon at the farm. Sale will commence at one o'clock sharp.

Write for catalog to

GEO. H. BURGE.

Col. Griff Johnson, Auctioneer, assisted by E. S. Johnson.

THE PREVENTION OF THUMPS.

The following communication has been received from a subscriber, Mr. L. S. Windland, of Madison county, Iowa:

I was much interested in an article that recently appeared in your paper on the question of thumps in pigs. I have been handling hogs all my life and have never had a pig with the thumps. My plan is to give the growing pigs and hogs plenty of pasture composed of mixed grasses. Corn is my main feed, though I use it sparingly for brood sows. I feed considerable shorts and oil meal and also use oats and barley. I make a practice of dopping my slop from time to time with turpentine as a worm preventive. It is my opinion that worms cause more trouble in hogs than all other ailments combined. It is my candid opinion that even thumps are due to the presence of worms.

We know of a number of instances where men of broad experience claim that the loss attributed to cholera and swine plague is in practically all cases due to the presence of worms. While we admit that the loss from this source is very large, yet at the same time there is such a thing as a cholera germ and when it gets established in a herd of hogs it is very likely to cause a good deal of loss. Nevertheless, it is an excellent idea to do a little dopping as a preventive against worms. The use of a little turpentine in the slop or a good coal tar product is excellent for this purpose. If hogs do not take to their feed when it is so treated they will be brought around in due time if they are starved for a period of twelve or twenty-four hours. The amount to use is generally learned through experience. There is practically no danger of hurting a hog, because not enough will be consumed to do harm if one happens to get too much in the slop.

HANGING CORN UP EARLY.

The following communication has been received from one of our subscribers, Mr. P. F. Mally, of Polk county, Iowa:

There is a good deal being said in your columns about the matter of saving seed corn, and as you request me to give my method I will say that it is my plan to go into the field as soon as the corn husks begin to dry out on the outside. At that time the kernels are dented or at least they have started to dent. I go through the fields picking out the ears that suit me, place in a sack and carry them to a wagon. I then carry them to a corn crib, strip the husks back, remove all but enough to tie two ears together and they are then hung in a dry place in pairs. By throwing the pair over a six-inch board you will find that they dry out perfectly.

I would advise no man to hang his seed above oats or wheat, as the moisture from the grain will sometimes spoil it. This plan that I have described I have followed for thirty-five years and have never had a failure, and bear in mind the seed is allowed to remain all winter just where it is hung up in the fall, and of course never feels the effect of fire.

I appreciate the fact that my plan differs radically from the plan that is being advised by Professor Holden and others who are engaged in educational work along agricultural lines. The plan of selecting corn after the seed has become thoroughly hard in the field may be all right in theory, but I have found that seed selected early, that is, just when it is denting, will germinate from three to four days quicker than corn that is thoroughly mature. The reason for this is, in my opinion, that corn saved early does not become as hard as mature corn, and consequently it will absorb moisture faster and thus send up its sprouts earlier.

In closing, let me say that where the method I have advocated is adopted pains must be taken to hang it up the day it is picked. Do not allow it to remain in the field or out on the ground for a single night.

This testimony comes from an exceedingly reliable source, and when it is considered that thirty-five crops have been grown from seed handled in this way without a failure it must be acknowledged that there is some virtue in the method.

It is doubtful, however, if Mr. Mally's

plan could be carried out in every instance, because much depends upon the variety of corn that is used. A reasonably early corn picked just as it begins to dent will, if hung in a dry place, become thoroughly air-dried during the next month or six weeks, and of course dry corn cannot freeze. However, when we turn to those corns that mature two or three weeks later than the one under consideration we meet quite a different proposition, because such corn if picked while it is denting may not dry out before freezing weather, and in that case there is considerable danger that the germination qualities will be impaired.

We would like to hear from others who have had experience in saving seed corn according to Mr. Mally's plan, or to have the plan criticized by those who do not believe it to be orthodox.

CATTLE FEEDING EXPERIMENT.

The Nebraska Experiment Station has just issued Bulletin 93, which gives the results of cattle-feeding experiments carried on at that station last winter.

The experiment entitled "Roughness Supplementary to Corn for Two-year-old Steers" is a continuation of the series begun three years ago to compare the efficiency of three forms of roughness common in Nebraska, viz., alfalfa, prairie hay, corn-stover, when each is fed in connection with corn. The last winter's experiment deviates slightly from former tests in certain particulars—the corn was all fed as snapped corn rather than shelled, and the period of feeding was but three months instead of six, during which time grain was used sparingly and roughness liberally, the cattle being finished in a second experiment in which heavy grain rations were used.

In the experiment with snapped corn (ears in the shuck, or husk) the roughness in each lot was as follows: Lot 1, prairie hay; Lot 2, prairie and alfalfa hay; Lot 3, alfalfa; Lot 4, corn-stover (stalks without ears); Lot 5, corn-stover and alfalfa, and Lot 6, corn fodder (stalks with ears attached) and alfalfa. Ten steers were fed in each lot and these were selected to make the several lots as uniform as possible. The steers were two-year-old grade Short-horns and Herefords, from the northwestern part of the

state, where they had been reared under semi-range conditions.

The steers fed snapped corn and alfalfa hay made the largest gains, amounting to 2.06 pounds per day, average for the three months, while those on snapped corn, alfalfa and prairie hay gained 2.01 pounds per day; those on snapped corn, alfalfa and stover, 1.96 pounds; those on corn fodder and alfalfa, 1.81 pounds, while the steers fed snapped corn and prairie hay gained but 1.2 pounds per day and those fed snapped corn and stover 1.02 pounds per day. It will thus be seen that in each case where alfalfa formed a part or all of the roughness, the gains were materially increased. This accords with former experiments and emphasizes further the importance of supplying in the ration all the nutrients needed. Alfalfa, being high in protein, supplies that lacking in corn and that lacking in prairie hay and corn-stover. Not only were larger gains made in the lots fed alfalfa, but much less corn was required for each pound of gain when they were thus supplied.

But the vital thing for the consideration of the feeder is the relative cost of gains. In the lots fed corn, alfalfa and stover, in the one case with corn attached to the stalk as fodder, the cost of gains was the lowest, being 4.11 cents per pound of gain in both lots. A little more pork was made where the corn was fed on the stalk and the net profit per steer in that lot was \$4.59, as compared with \$4.20 on corn, alfalfa and stover.

On snapped corn and alfalfa, each pound of gain cost 4.49 cents (net profit per steer, \$3.56); on snapped corn, prairie hay and alfalfa, 4.77 cents (net profit per steer, \$3.10); on snapped corn and stover, 6.97 cents (net profit per steer, 13 cents); and on snapped corn and prairie hay, 7.58 cents (net loss per steer, eight cents). The cheaper gains made with stover and alfalfa rather than with alfalfa alone or with prairie hay are explained by the fact that corn-stover was figured at \$2.50 per ton compared with prairie hay and alfalfa each at \$6.00 per ton. The snapped corn cost 35 cents per bushel of 80 pounds, and that fed on the stalk, unhusked, was figured at 31 cents. The results were slightly in

favor of feeding as much corn as is possible on the stalk, though this is the first experiment covering this particular question, and other tests should be made, as is intended, to make it all conclusive. Other comparisons in the experiment, inasmuch as they agree with former results, would seem to make the following deductions safe, viz.: First, that prairie hay and corn without further supplements is an unsatisfactory combination, both from the viewpoint of gains and that of profits; second, that alfalfa and corn are capable of giving large gains without additional foods, but that the substitution of corn-stover which has been cut and shocked immediately after the ears ripen may be substituted for half of the alfalfa with greater economy because of the low market value in the corn belt of such roughness.

SOME POINTERS ON GOOD PLOWING.

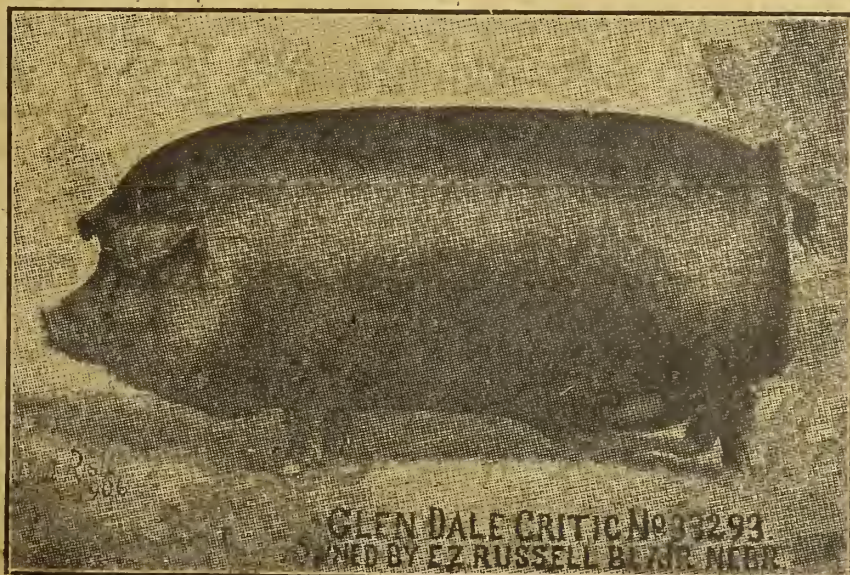

Some time ago we gave directions for plowing land in a certain way so that the ridge would not appear higher than the rest of the plowing when the work was completed. We claimed that this could be done by plowing the first round shallow, the next one a little deeper and the third one the full or normal depth. Mr. Wm. Oxley, of Hancock county, Iowa, a man recognized to be a skillful plowman, submits a different plan for making the ridge on stubble land. Instead of throwing together the first two furrows, he throws them away from one another, thus making a deep double furrow, after which this loose soil, together with the normal furrow, is turned back. Mr. Oxley describes his method as follows:

In order to plow land and not leave a high ridge one should plow straight as a line the first furrow the full depth and in coming back run the cutter exactly where it went the first time. Throw as big a furrow as you can opposite the first, just as wide as possible—the wider the better. Then give your clevis more land and keep the right hand a little the highest, just so you don't plow too wide, but the full depth. Much of the loose soil falls back into the furrow. Coming back hold the plow in the same position. Take a moderate furrow, but just as deep and lay it even with the other. These two furrows make your first round. Now you start on your third and fourth furrows on the second round. Alter your clevis, giving it but little land so you cannot cut a full furrow without holding your left hand the highest. As this round is where the mistake is made, be very careful to lay it even with the first two furrows. Then go your third round, but fix your clevis first just right for a full furrow, and if you have started straight keep on doing so all the time. When I see a man start a straight furrow and then get as crooked as a dog's hind leg I know that man is not doing his best, has no pride in his work, and cannot or don't drive his team straight. You will say that we all use riding plows. In that case plow the first furrow and then let your middle horse walk in it coming back and shift your clevis if it needs it, but I don't think it will. However, see that it is all right for closing in the first round and see that it is just right for the next round or you may make the old mistake. See that the horses pull good and true or you will soon make crooks. Our land is plowed too little for good farming.

On this same subject, Mr. J. H. Co-burn, of Comalby, Okla., says:

I have just been reading in the last issue of your paper about the plowing contest and was considerably interested in the plans you suggest of starting the land. Some years ago I was given some instruction along this line by a Nebraska farmer and have followed it ever since, though I have never seen another man adopt the same plan. After running the first furrow turn and let the near horse walk in the furrow and turn the second one out to the right hand. Your first round in this way simply gives you an open ditch. You are ready then to go ahead and you will find that you can run your plow to the full depth from the beginning without making a high ridge. I am a firm believer in good plowing and believe that we would raise better crops if we used a little more skill in plowing the land.

The plan of throwing out the first

A half interest in this splendid breeding animal, also a yearling boar, Critic's Echo, and about twenty spring pigs sired by Glendale Critic will be sold at Mr. E. Z. Russell's sale at Blair, Neb., on October 15th.

two furrows instead of piling one on top of the other, as is commonly the case, is one that we can heartily commend to our readers. It means in the first place that all the surface is cut and that this in itself is important, especially where perennial weeds are present in the soil. In the second place, it enables one to do the work without piling up a high ridge.

MEETING OF NATIONAL DUROC JERSEY ASSOCIATION.

The following notice has recently been issued by the president and secretary of the National Duroc Jersey Association:

The last annual meeting of the stockholders voted to hold the next annual meeting in Kansas City during the American Royal Show. At a meeting of the board of directors held in Des Moines, Iowa, on August 28th, it was agreed to hold the meeting on Thursday evening, October 11th, at the Stock Exchange, Kansas City.

It has just recently come to our notice that we are incorporated under the laws of Illinois as the National Duroc Jersey Record Company, and all our shares have been issued in the name of the National Duroc Jersey Record Association, consequently we have not a legally incorporated association by reason of the fact as above stated. We are incorporated in one name, and the shares have been issued in another name.

The board have fully considered this matter and find that there is but one way out of the dilemma, and that is to re-incorporate. When we do incorporate, new shares will be issued to each party holding a share in the old company.

Owing to the above fact, no proxies can be used at this meeting, as the shareholders have no shares in a legally incorporated company. It is highly important that every member of this association be at the meeting in person, as at that meeting articles of incorporation, by-laws, etc., must be adopted, and a full organization perfected, such as the selections of officers, directors, etc.

The board very much regrets that it is necessary to do this, but these are the facts, and they must be met.

Let us again urge upon you to let nothing prevent your being at this meeting and taking an active part in the affairs of our association. It is business, so don't neglect it.

By order of the board of directors.

E. Z. Russell, Pres.

H. C. Sheldon, Secy.

We desire to call attention to the fact that the date mentioned, namely, October 11th, comes during the week of the American Royal show to be held in Kansas City on the dates from October 8th to 13th. The American Royal is one of the most up-to-date live stock exhibitions held in the corn belt, and we have no hesitation in advising those who are interested in the Duroc Jersey Association to attend their meeting and incidentally take in the American Royal.

KEEPING MANURE NEAR THE SURFACE.

The following communication has been received from one of our subscribers:

I am a firm believer in the practice of keeping manure as near the surface as possible. My plan is to plow the stubble ground just as soon as small grain is harvested and afterwards top dress it with manure. Last winter I cut and fed to my cattle eleven acres of corn. Had my fields plowed so that I put the manure from the yards on the plowed land during the winter. Any man can go out to that corn field today and tell just where the manure is spread, as the crop will yield considerably more where the land was manured. I would repeat the advice to keep the manure as near the surface as possible so that it will not leach down beyond the roots of plants.

The plan here suggested is a good one under ordinary circumstances. The only objection to it would be in the case of very coarse or strawy manure. If manure of this character is applied during the winter it may dry out to such an extent that it will give a little trouble in working the soil in the spring. Ordinarily, however, there is not enough straw used in the corn belt to make this problem a very serious one.

When cockleburrs or morning glories infest a soil the plan suggested by this subscriber is an excellent one, namely, that of plowing the soil as soon as possible after harvest and applying the manure any time during the fall or winter.

PAVING HOG YARDS.

A Nebraska subscriber, Mr. G. W. Albert, asks for information relating to the paving of hog yards. It is his intention to pave his yards with brick, but he would like to know before taking up the work, from those who have had experience, whether it is advisable or not to prepare a foundation of gravel before putting down the brick. If gravel, sand or cinders are necessary, what would be the advantage of these over the plan of placing the brick on a smooth soil?

We shall be pleased to hear from those of our readers who have had experience along this line. No doubt others besides Mr. Albert will read with interest what experienced men have to say on the subject.

Selecting Seed Corn In the Field.

By George Steen.

Much has been written about picking seed corn, but the subject has not yet been exhausted. The bulk of the seed to plant next year's crop will be picked when the crop is husked, as heretofore. This method is a good one, inasmuch as picking out choice typical ears are concerned, which are more readily found at such a time than at any other. Selecting seed ears from the wagon or the crib is all right as far as type is concerned. There are some other things it is well to take into consideration, namely, the stalk, the leaf and the husk.

Many people say that corn is getting taller. The reason assigned for this is the importation of seed from other states. These, in many instances, being larger and later corns, naturally make more growth. In order to adapt these or any other corn to a given locality, or, in fact, to your farm and individual taste, some selections will be necessary.

A few things I would look for in making selections would be a strong, sturdy stalk, thick at the base, not excessively tall, with an ear not half way up the stalk. Tall, spindling stalks with ears high up are more apt to blow down in a storm. Select ears with short shanks, say about six inches long and not so thick but what they will easily break when husked. Avoid ears with a large amount of husks, preferring those that are barely covered over the tip, as it seems these are the best. Also avoid ears that do not hang down. They catch the rain and may rot. Do not pick ears from broken or down stalks, as they have some inherent weakness. In regard to the leaves, prefer a wide leaf placed not too far apart on the stalk and usually from thirteen to nineteen in number.

Regarding some of the things that determine the earliness or lateness of corn, will say that tall corn is late maturing and tall ears the same; also deep-grained varieties and those that produce big cobs. For instance, if my corn matures too late I must understand how to select in order to make it earlier, picking the first ears that show ripened husks, together with the other points that make for earliness. Late corn is the best yielding and huskels are what we want, but it must mature.

If, however, my corn matures in good time, I would select for larger yields, stronger stalks and uniform maturity. Uniform maturity means much to the corn crop. Soft ears often spoil, requiring sorting, or they lower the grade on the market. If every stalk of corn had a well developed ear of uniform size and maturity it would mean a larger yield and a better grade.

The time to pick is when nearly mature, that is, when you are able to distinguish between the mature and the late ears. Do not pick too early. There is no better place to keep corn than on the stalk and yet pick before frost if you can. A common practice, and one to be avoided, is the custom of picking seed and hanging it in some tree or on a wire outdoors. I have known such corn to be injured in vitality by late fall rains, followed by a freeze.

It is hardly possible to select all seed corn before husking time on account of the time it takes and the inability of finding the best ears. At husking time more attention can be given to proper type and better ears can be found. However, no very critical selection is possible at this time and several times as much seed as needed should be picked. A splendid selection will thereby result when the final preparation for planting is made.

OPPOSITION TO SHIPPING CORN IN EAR.

Our attention has been called to the fact that the railroad classification committee has ordered that railroads under its jurisdiction shall not receive seed corn in crates for shipment. The action of the committee is based upon the fact that a crate is not considered a safe carrying package for ear corn, as it presents too great an opportunity for pilfering as well as the shelling of the corn from the ear.

We feel assured that the committee has made this ruling without full knowledge of the facts in the case. The plan of shipping seed corn in the ear is being

advised by every experiment station in the corn belt. The reason for this need hardly be discussed here; suffice it to say that is the only way by which the purchaser of seed can learn of the general character of his corn. By the old method corn was shelled and placed in a sack, thus affording the best possible opportunity for the scallawag to shell and ship a grade of corn that no man would plant were he given the opportunity to inspect it in the ear. Without question, the plan of shipping seed corn in the ear has done much to increase the yield per acre, as well as improve the quality, and we feel sure that railroads would take no step backward in a matter of this kind.

Just why a crate instead of a tight box should be used in shipping ear corn is apparent only to those who understand the nature of corn. It is almost impossible to air-dry corn perfectly before it is shipped. If it is placed in a tight box more or less moisture is liberated and being confined soon works injury to the germ. On the other hand, with the crate, ventilation is perfect and there can be little danger of damage to the seed en route.

As for pilfering and the action of vermin, it can only be said that those who have been shipping corn extensively in the crate during the last few years report that there is little or no complaint on this matter; that corn properly crated goes to its destination in ideal condition.

THE KIND OF YOUNG MEN WANTED.

An exceedingly small percentage of our young men have the opportunities afforded by a college education. Here and there, however, throughout the central West, you will find homes where one or more members are away at college. In many instances the parents and possibly the brothers and sisters at home are sacrificing in order that the advantages of a college course may be reaped by this member or these members of the family. A considerable number more in the homes of the corn belt have the question of taking a college course under consideration, and therefore we assume that it is the proper function of an agricultural paper to discuss the kind of young man that is most in demand in these days.

One thing that may be kept in mind is this: that there never has been nor never will be enough of the right kind of educated men. The demand for them is growing faster than the colleges can produce them. We do not refer to the especially brilliant kind, but rather to men of average ability who have acquired the faculty of doing things well.

We believe in the boys and girls acquiring all the culture possible during their college course, but let this be incidental to that of acquiring the faculty of being useful. The world is not interested in what you know, but in what you can do. If it is the intention to return to the farm one's education period should keep him constantly imbued with the spirit of farm life. It may be important to learn how to balance a ration, but in learning do not forget that it is a more important thing to feed live stock regularly. We have known more than one man to sit pondering over scientific books while his calves were bawling and his pigs squealing. His theoretical knowledge and his practical ability did not coincide, and the result was failure.

Men who employ help on the farm will be surprised if they stop to consider what a small percentage of their employees can be trusted month after month to keep plows and cultivators from rusting. The labor involved in a matter of this kind is of no importance whatever, as an instant's time will be enough to grease a plow or a cultivator. It is the matter of having the instinct or the ability to see that under certain circumstances these plows and cultivators need the grease. Of course any man will occasionally see the necessity of it, but it is the exceptional one who will always attend to this duty without being told about it. It is this exceptional man that the world is looking for, and in the strenuous struggle he will always outstrip his fellows.

This homely illustration might be taken to heart by every boy who is

EDUCATE YOURSELF AT HOME

Forty courses of study in Normal, Academic, Commercial and Pharmacy Departments. No other school can offer advantages of affiliation with a great university, courses of such strength that they receive university entrance credits, annual scholarships in the university for best work in correspondence courses. Instructors are college graduates who give their entire time to our work. Inquiries invited.

spending money on his own education or spending his father's to the same end. Remember that about nine out of ten of the other fellows will let the old plow rust occasionally, and employers in the agricultural world and in the manufacturing industries are waiting for this tenth man.

Sensible education emphasizes the importance of doing the little things and doing them well and on time. The more skill that is put into the doing the higher the price will one's labor command. The average farm boy with average talents who has the opportunity to acquire the useful kind of education that is now being given in our agricultural colleges, especially, should find his talents multiplied five and possibly ten-fold at least. Every walk in life is full of men who can do things nearly well enough, and the supply of that kind is greater than the demand. As said before, however, employers of all classes are waiting with capital to pay for the talent of the man who can carry responsibility gracefully.

A Good Dairy District.

It is not generally known that there is a large area in western Nebraska, northern Kansas and eastern Colorado that is admirably adapted to the dairy industry. This region is diversified by the valleys of the North and South Platte and the Republican rivers and their numerous tributaries. In 1904 land in this region sold from \$1 to \$2 per acre, while in the spring of 1906 it was changing hands at from \$3.50 to \$5 per acre. There is many a man located there who started a few years ago with no assets but strong hands and who is wealthy today.

To insure success a dairyman going into this country should have enough ready money to put up farm buildings and some fences, should have from ten to twenty cows, a team and some poultry. If equipped in this manner he is as certain to succeed, if the elements of success are in him, as if he lived in the corn-belt area. Indeed, he is much more liable to succeed because his investment in the land is but a small fraction of what it would be in the central West.

The range of land prices is wide, running from \$1 per acre for raw grazing land to \$150 per acre for irrigated lands. The Burlington railroad has recently prepared an attractive pamphlet giving full information concerning this promising dairy district. This pamphlet contains a description of the land in a large number of counties, enumerates the crops that are grown in each and gives purchase and rental values in each locality. It also contains a list of land agents specially selected by the Burlington railway on account of their reliability.

Every one of our readers can secure this splendidly illustrated pamphlet free of charge by writing to Mr. P. P. Fodrea, care Burlington Route, Chicago, Ill., if the letter states that the writer is a reader of The Homestead.

ARE YOU GOING ABOARD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Cheeseman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

HOMESEEKERS' RATES.

Every Tuesday, via the C. & N.-W. R'y, until December, 1906, to authorized homeseeper points in Wisconsin, northern Michigan, Minnesota, South Dakota east of the Missouri river, North Dakota, Alberta, Manitoba, western Ontario and Saskatchewan. Full information at C. & N.-W. passenger station or 401 Walnut St.

REUNION ARMY OF CUMBERLAND, CHATTANOOGA, TENN.

The Chicago Great Western Railway will on October 14th, 15th and 16th sell tickets to the above point at rate of one fare plus \$2.00 for the round trip. Tickets will be limited to October 30th to return, with privilege of extension to November 30th on payment of fifty cents additional. For full information call on E. J. Sawyer, C. T. A., 614 Walnut St., Des Moines, Iowa.

Farm Furrows

Turned by a Practical Farmer.

I spent a good deal of time admiring the steam plow at one state fair. Somehow or other it looked about right to me, but it is far beyond the reach of the ordinary farmer.

If you want tulips the last of September or the first of October is the time to plant the bulbs. Excepting the crocus it is the earliest flower and for beauty it has the crocus beaten a mile.

As I look from the ear window I observe that almost all the corn is standing up straight. There have been but few wind storms to blow down or tangle the corn. This means mighty good husking.

It is really inspiring to go to a fair and see the ap-pul cider man making apple cider out of real apples. In these days of graft and adulteration one scarcely sees any pure apple cider at a fair.

The alfalfa business is yet in its infancy. There seems to be so many things that one can learn about it. This can be learned best by trying a small acreage, though it is too late to sow this year.

At one of the state fairs I saw a man feeding pieces of pine scantling 2x4 and 4x4 in size into a thrashing machine and the cylinder took them in with apparent relish. Good advertisement, it seemed to me.

Some of the best looking corn I have seen this year is in the Missouri Valley. The land is very rich there and the rainfall this season was just about right for that locality and the yield certainly looks like a hundred fold.

A friend tells me that he has succeeded in keeping some large, ripe watermelons until Christmas by placing them inside of a large shock of corn at cutting time. He says they keep well there, provided they are unmolested by melon eaters.

I have observed that a man sometimes builds a double crib in instalments; that is, he will build two cribs side by side, letting the studding project upwards for the support of the roof. Sometimes it is several years before a crib of this kind is finished.

In looking over some fields of corn where very poor stands are apparent it occurred to me that there is slipshod work somewhere. Now I believe one can afford to get some variety of early corn and after the crop has come up and found wanting it will pay to go over with a hand planter and plant in the missing places an early variety that will catch up and ripen with the remain-

der of the field. Try this and see if you like it. Of course it is better to get a good stand in the first place.

The present day haying machinery has taken a great deal of sweat out of the business. In looking at some of the machinery manufactured for this purpose it almost makes one feel that it would be a pleasure to have haying the whole year around.

I recently crossed the Missouri river and while looking into the surging, thickening mass of yellow mud and water I was impressed with the belief that the river would have to be irrigated before it could be navigated. It is neither a stream nor a swamp.

I have seen men sweat and even swear when trying to get salt out of a little shaker in hot weather. A little corn starch mixed with the salt will obviate this trouble. One part of corn starch to two of salt will not be far wrong, and will prevent the sticking.

A pig will get more satisfaction from a shingle or a piece of lath in the hands of its owner in scratching his back than can be imagined. There is a sort of an acquaintance that can spring up that will be both advantageous and profitable. How a pig enjoys it, and it is good for him.

I have seen pigs that acted almost human-like. I have seen them with all the symptoms of the human stomach-ache. I know how they feel and they can't call a doctor. For that reason it is always advisable to keep some wood ashes in the salt so as to correct any trouble of this kind.

The best way to keep up the credit of a farm is to never send anything to market that is not in the very best condition. An unsound cow, horse, pig or a bushel of anything that is not in a strictly first-class condition should never be marketed. Get the highest prices by selling the best. That is the rule.

I recently saw a potato planting attachment that can be attached to an ordinary corn planter and it will elevate the pieces of potatoes and drop them down in very much the same manner as corn is dropped and from what I could see it looked as if it would do good work. I did not price it, but it looked good to me.

I met a man recently that did my first job of thrashing in Iowa. This was in 1869. He had an old "down power" thrasher, where all the hands had to be called when unloading the horse power and that power did not have any eveners, and a free horse could be easily hurt on the power. "Them days are gone."

By having the residence high on the hilltop of cheerfulness no shadows will rest upon it. The morning will come early and the day will be full of golden hours. I do not like the life that reflects a long night and a short day. A home gets cheerfulness from within and this cannot be supplied by the application of paint without.

There is one thing in favor of the compressed air system of water works not always to be found in the gravity system. One can control the pressure and can elevate the water to be used in any part of the house and the boiler and pipes can be located in a frost proof place in the cellar. There should be more complete systems of water works on farms. The best is none too good.

One thing has suggested itself to me while attending the fair and that is that it would be a most excellent plan if fair managers would arrange to let the people see the prize animals more after the awards are made and not be in too big a hurry to get them back in the stalls and pens. The exhibitor is not the only man interested. Fairs are largely held for the benefit of visitors and not solely for the convenience of exhibitors.

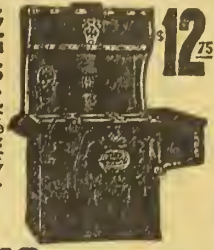

I once thought it very good hog farming to let a lot of hogs hog down a field of corn. I was ungenerous enough at one time to condemn the practice at all times. I have now come to the conclusion that there are conditions where it may pay well to resort to this practice. A small field near the barn planted to corn can be made richer and more productive and be planted to corn

GREAT STOVE OFFER

WONDERFUL REDUCTION IN PRICES

Steel Ranges Reduced to Prices Heretofore Unknown or Unthought of. OUR BEST STEEL RANGE, the Acme Triumph, reduced in price from \$5.37 to \$7.17, according to size. Wonderful reductions throughout the entire line of steel ranges, cast iron stoves and heaters. If you have one of our big catalogues, received by you before September, and you are thinking of buying any kind of a stove, don't fail to write for our latest big Special Free Stove Catalogue, showing all the big price reductions, marvelously low price quotations, many improvements, astonishing inducements. By the introduction of the very latest, best and modern steel range and stove making machinery, we have just now made a most wonderful departure in low price making, which is all explained in our free Special Stove Catalogue.

\$12.75 buys this big handsome, new 1907 model, full nickel trimmed, full size, 6-hole steel range, exactly as illustrated, complete with big deep porcelain lined reservoir, high shelf, warming closet, etc. Very much lower prices if you do not need the reservoir, shelf or warming closet. All shown in our big, free, new, marvelously low priced Special Stove Catalogue.

\$16.95 buys the new extra large, 1907 model, improved ACME HUMMER Steel Range, exactly as illustrated; 6-hole top, deep porcelain lined reservoir, nickel trimmed, high shelf, back and closet, one of the best ranges made. All these great price offers, big reductions and big offers will be sent you on application in our latest Free Stove Catalogue.

\$18.87 buys this extra large, beautifully finished, nickel trimmed heavy steel range, our ACME RENOWN, exactly as illustrated, complete with deep porcelain lined reservoir, high shelf, warming closet, etc. Very much lower prices if you do not need reservoir, shelf or closet. This shows a great reduction in price from what appears in the big catalogue you have. Price reductions on stoves are shown in our big, free Special Stove Catalogue.

\$22.58 buys this ACME TRIUMPH, the highest grade and best steel range made in the world, the equal of any range you can buy anywhere for \$50.00. Just reduced from \$27.95 to \$32.05 to the now heretofore unheard of and unthought of price of \$22.58; and remember this steel range carries every up to date feature found on any other steel range and many features found on no other ranges, the very best of everything throughout, the best money can buy: 6-hole top, porcelain lined reservoir, high back, big shelf, big closet, everything the best, and prices reduced from \$5.37 to \$7.17. We give you the price advantage as worked out by new automatic stove making machinery as developed only in our big Newark, Ohio, foundry. If you have any use for a stove DON'T FAIL TO WRITE FOR OUR FREE STOVE CATALOGUE.

\$19.06 buys this extra large, heavy, self feeding, double heating, return flue base burner Hard Coal Heater, the most elaborate, large, swell, silver nickel, ornamented dome, elaborate nickel base, rim, frame and other trimmings with mica (singlase) swing doors, every known up to date feature, the best base burner made, combining all the good qualities of every other extra big, high grade base burner you can buy for \$50.00. Our new prices, the great reductions and wonderful offers are all in our latest Free Special Stove Catalogue. Don't fail to write for it.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Roultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

BARREN STALKS IN CORN FIELDS.

In a count made in a corn field on one of the poor farms operated under the direction of the Iowa Agricultural College it was found that 14 per cent of the stalks in one field were barren. The seed from which this crop was grown was obtained from a farmer living within the limits of the same county. The corn planted was a representative sample either taken from this farmer's planter boxes in the field or from the sack just as it was ready to plant. As the soil was well handled on the poor farm, it is free to assume that the crop was fully as good as would be the case on the farm of the man who owned the seed originally.

What the acreage planted to this seed by the farmer in question was we do not know, but we do know that 14 per cent is a very large loss to suffer from such a cause. Every field of corn has its enemies of one kind or another, so it may be depended upon that this 14 per cent would be doubled by the combined operation of all other enemies of a good yield.

What causes barren stalks? To this question in part an answer may be given based on some work done at the Illinois Experiment Station. It was found there that by removing the tassel before the pollen was shed from all stalks that did not produce ears greatly reduced the percentage of barrenness. There are those who take no stock in the soundness of this theory. However, there are other causes to which no exception can be taken. If, for example, the seed planted is not uniform in quality it will come up irregularly and as a result there might be a considerable percentage of belated stalks. These are shaded by the vigorous plants and as a result we have there barren dwarfs taking up the place of good plants, but producing no corn. The cure is found in the planting of good, sound, uniform seed. Just how to handle corn so that it will be good, sound and uniform next spring is a problem large

You cannot be well unless your stomach and bowels are right.
The thing to right them is
At your druggist's.

Jayne's Sanative Pills

enough to perplex in some instances even our best and most intelligent farmers.

Another cause of barren stalks is the poorly prepared seed bed. As a rule, men are too anxious to get their corn into the ground. Corn stalk ground is plowed, harrowed once or twice and the seed is planted. What could one expect under such circumstances but that the seed bed would lack in uniformity! In some instances the seed will be dropped in a bed of clods. Then again, owing to the fact that the soil has not been worked down so that it is firm, the seed will fall into a regular pocket between the furrows, then a jolt of the planter may leave it near the surface, with the result that the crop stands unevenly. We then encounter the same conditions as that enumerated in the case of the poor seed. The large plants shade the smaller ones and in their struggle for existence they fail to produce ears, but bear in mind they use the fertility and the labor of cultivating them is just as great as it is to cultivate producing stalks.

The problem of barren stalks for next year is to a large extent solved during the next few weeks. We mean that if the crop is to be uniform next year seed must be properly selected in the near future and handled in such a way so that it will all germinate vigorously next spring. Just how and when to pick the seed and where to put it is not a settled question. It will be discussed in these columns during the coming weeks by advocates of various methods.

Dr. Pritchard's Poland China Sale.

One of the most successful sales held so far this season was that of Dr. H. Pritchard, at Wisner, Neb., on September 22d. Forty-nine head sold at an average of \$34.16. It was a particularly good boar sale, the sixteen head averaging \$37.87. P.'s Sweetheart, a fall yearling sow, topped the sale at \$100, and was purchased by Mr. J. G. Von Seggern, of Wisner, Neb., who was one of the very best buyers in the sale. The offering was largely sired by Wisner Chief, a son of Chief Tecumseh 3d, Big Tom 2d, his 900-pound boar, and Perfection Keep On. Below is a list of the entire sale:

No.	BOARS.	Price.
1	Excellence, Wm. Reece, Pilger, Neb.	\$42.50
2	Nodine Perfection, White Bros., Perry, Iowa	60.00

53	sow, David Herner	35.00

CHICAGO MARKET LETTER.

Clay, Robinson & Co. write as follows under date of September 22d:

The supply of native beef cattle has been moderate this week and while the market has shown no particular strength values are about the same as a week ago. One of the highest sales of the week was that made by us on Monday for J. Q. McPherrin & Son, of Oakland, Iowa, of two cars of branded westerns, averaging 1,331 pounds, at \$6.60. There has been a scarcity of really choice, well-fattened heaves and a good demand for that class, but the common and inferior grades, as usual at this season of the year, have felt the effect of the increasing competition of the western range cattle which are now in very liberal supply and coming in good flesh so that they are attractive to the dressed beef men. Some of them are even good enough for eastern shipment. We do not look for much change in the native cattle market, at least not in the direction of higher prices for the next few weeks, or until the run of range cattle is over. We therefore think that parties having corned cattle that are ready for market and which they intend shipping within the next few weeks may as well let them come forward one time as another, unless prepared to hold them until after the 1st of November, by which time the range run will be practically over.

All grades of killing cows and helpers have been in good demand and are somewhat higher than the close of last week, extra prime corn-fed heifers being quotable at \$5.25 to \$5.75, medium to good at \$3.65 to \$4.65, with a fair class of corn-fed heifers at \$3.35 to \$3.50. There has also been a very good demand for good fat grass yearling heifers, which have been selling at \$3.50 to \$3.80, which is fully 10 to 25 cents higher than a week ago. Best cutting cows are in good demand at the advance, while canners, as has been the case for a long time past, are in poor demand and hard to sell. Best cutting cows are quotable at \$2.35 to \$2.50 and common kinds at \$2.15 to \$2.30, while canners range from \$2.00 per cwt. for the best down to 75 cents per cwt. for very common stuff. Best fat and bologna veals are in good demand at a shade stronger prices, viz.: \$2.25 to \$2.75, according to quality; veal calves about steady, best bringing \$7 to \$8, and inferior to good kinds \$5 to \$6.50.

Liberal receipts of western cattle now coming to hand afford a very good selection of stockers and feeders and demand has been satisfactory at steady prices. Good to fancy selected native feeders are quotable at \$3.90 to \$4.75 and good to fancy selected native stockers at \$3.60 to \$4.30.

The hog market has held remarkably steady for some time past and present prices are very little different from a week ago, although receipts have shown a considerable falling off. There appears to be a good demand for hogs at present prices and we do not look for any special change outside of the ordinary fluctuations for the near future. Top today is \$6.70, with bulk of good hogs selling at \$6.50 to \$6.65.

There are plenty of sheep and lambs coming just now, bulk, however, being western range stock. While sheep prices show but little decline during the past week, the lamb market has gone off 25¢ to 50¢ on the top grades and 50¢ to 1¢ on the medium and inferior grades, as compared with the recent high time.

The following quotations represent the present market for native sheep and lambs and also for western feeding stock:

FAT STOCK.	
Good to choice export wethers	\$5.50 @ 5.65
Fair to good wethers	5.25 @ 5.35
Good to choice heavy ewes	5.15 @ 5.25
Choice breeding ewes	5.25 @ 5.65
Medium ewes	4.50 @ 4.85
Culls and tail ends	2.50 @ 3.50
Choice yearlings	6.40 @ 6.50
Culls	4.50 @ 5.25
Choice spring lambs	7.65 @ 7.75
Fair to good spring lambs	7.00 @ 7.40
Common to fair spring lambs	6.00 @ 6.75
Cull spring lambs	5.00 @ 5.75
FEEDING STOCK.	
Choice feeding wethers	\$5.10 @ 5.25
Fair to good feeding wethers	4.85 @ 5.00
Choice two and three-year-old

Some Principles of Concrete Construction.

BY G. W. MILLER.

Concrete construction, while we think of it as being one of the newest forms of construction, is, as investigation will show, one of the oldest. We are today beginning where the ancients left off and our engineers and architects are devising methods of construction and modes of reinforcement so that concrete today withstands the ravages of time, floods, earthquakes, fires, etc., better than any other building material available.

Concrete is composed of cement, sand, broken stone or gravel. Both natural and Portland cements are used for concrete, but Portland is preferable because of its greater strength and also when exposed to the weather deteriorates less. Within the last few years American Portland cement has shown superiority to the imported and the use of any of the first-class brands now on the market will insure success.

Sand for concrete should be sharp, clean and of graded sizes to give the best results. Pit or bank sand is preferable to river because of its sharpness. If mixed with clay or loam, better results will be attained if washed before using. Both broken stone and gravel are used for concrete and the superiority of either material depends on the material itself, rather than upon the class to which it belongs. In any case, the use of soft sand stone, soft limestone, slate and shale should be avoided, as well as gravel or stone mixed with clay or earth unless washed before using. In size, neither should be used larger than two or two and one-half inches in greatest dimension, unless in very heavy construction. The stone or gravel is better if graded in size than if uniform.

The proper proportions of cement, sand, and stone or gravel to use for any work, can best be determined by an analysis of the material at hand. To determine the amount of sand, ascertain the percentage of voids in stone or gravel. This can be done by filling a box a foot square full of the gravel or stone and then filling level full of water. The weight of water divided by the weight of a cubic foot of water (sixty-two and one-half pounds) gives the percentage of voids in this aggregate. To determine the voids in the sand, weigh a cubic foot of same and subtract weight from 165 pounds, which is weight of a cubic foot of quartz, and this divided by 165 gives percentage of voids in sand.

For example: Assume stone to contain 45 per cent of voids and sand 32 per cent, and we wish to determine amount of sand and stone to use with one sack of cement. A sack of cement contains approximately one (1.03) cubic foot; then the amount of sand would be 3.12 cubic feet, obtained in the calculation by dividing 100 by thirty-two. The amount of stone per cubic foot cement would be 6.92 cubic feet, obtained by multiplying 3.12 by 100 and dividing by forty-five. Ordinarily one sack of cement requires three cubic feet of sand and five of broken stone or gravel.

In fabricating the mixture, the following procedure should be followed: First, the proper amount of sand should be spread uniformly upon a tight platform about eight or ten feet square, and then the cement added. These should be mixed until a uniform color is secured, then stone or gravel thoroughly wet should be added and the mass mixed, after which clean water should be added and mixed until mass appears uniform throughout.

The amount of water to be used de-

pends somewhat on the character of work intended. For most work wet concrete is to be preferred, because a dense mass can be secured with less tamping than with either dry or medium. It has the disadvantage, however, of taking longer to "set" and where forms are to be used over and over again it is better to use a dry or medium mixture.

In placing the concrete in molds, not over six-inch layers should be placed and these layers thoroughly tamped. Dry and medium concrete require much more tamping than wet in order to get as dense a product.

The amount of water to use cannot be stated in definite percentages, but a dry mixture is compared with damp earth, while a wet mixture is defined as "slushy."

After concrete is placed in molds it should always be protected from the sun and should be kept damp after setting either by sprinkling at intervals or by covering with damp earth for a period of a week or ten days. This insures a more uniform "set" and prevents checking or scaling of exterior.

Concrete posts, watering troughs, are growing in favor in recent times. A few tests have been made to determine the relative strength of concrete posts compared with wood, but the following conclusions are from comparative tests made by Prof. C. J. Zintee, of the farm mechanics department of the Iowa State College:

These tests show that white pine is five times as strong as the cement posts tested for steady load, while for sudden jar, there is simply no comparison.

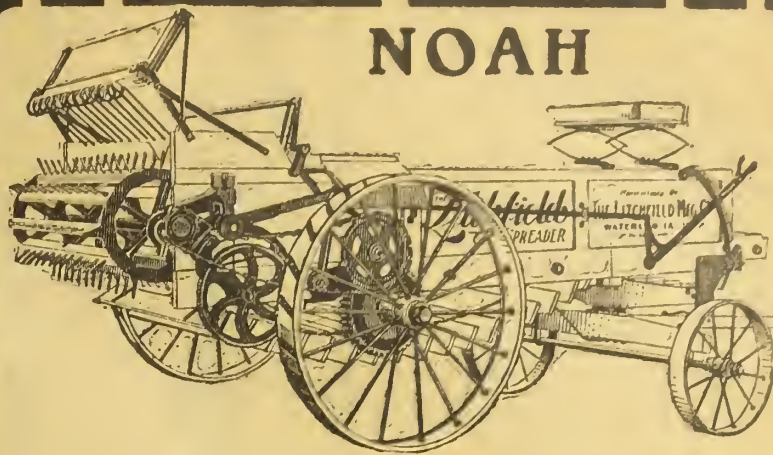

We would very much like to know what is the actual pressure to which fence posts in the field are subjected and how often new posts are broken by animals running against them, as this is the only practical comparison between the strength of cement and wooden posts.

The lower breaking strength should not discourage any one who intends to make his own cement posts. If there is plenty of sand and gravel to be had near by, every farmer short of wood ought to be his own manufacturer of fence posts.

The writer would heartily endorse this last paragraph of Professor Zintee and would also add that very likely these posts were made too "lean" and the reinforcements altogether too light and not correctly placed. It should be stated that these posts were not made by Professor Zintee, but sent him for experimental use.

Before many months we hope to have for readers of this paper the results of tests of posts made with correct proportions and sufficient reinforcement to develop the full strength. Posts should not be used sooner than two months after being made and better to wait six months.

Concrete water tanks have become very popular in many localities because they neither rust, rot, nor deteriorate in any way. For ordinary tanks from six to eight feet long by two to three feet wide and one and one-half to two feet high, the bottom and sides should be six to eight inches in thickness. Forms should be made of shiplap with uprights of 2x4's spaced about two feet apart. The concrete should be mixed "wet" and steel rods one-half inch in diameter should be placed ten inches apart. The gravel or stone should not be over one and one-half inches in largest dimension and in placing the concrete a spade should be used to work back from the faces, so finished work will have a smooth appearance. Tanks should always be built larger at top than bottom, so that freezing will not break the walls. Forms should be left until same

NOAH

"BUILT HIS HOUSE ON SANDY LANDS."

THE ARK was not intended to be a permanent fixture; but the Litchfield Spreader was designed and is being yearly perfected with a view of going down into history as one of the fixtures of this modern age, and is building on a rock foundation.

With the Litchfield Manufacturing Company it is not only a question of the amount of sales on this machine this year or next, but it is a question of how thorough and complete in design and construction this justly popular Spreader can be made. Improvements on this machine must be improvements—not simply talking points or alterations and changes, but if added, they must be good and must be worth the price.

Improvements in design are added as fast as modern ideas and perfected mechanical theories are developed. Besides this, as a result of a thorough organization along these lines, every possible weak point is developed and strengthened systematically. If two parts can be embodied in one with better working results, we consider this a big improvement. If any part that has ever shown the slightest weakness or trouble under severe tests or in the field is not corrected, it is because such conditions have never been discovered.

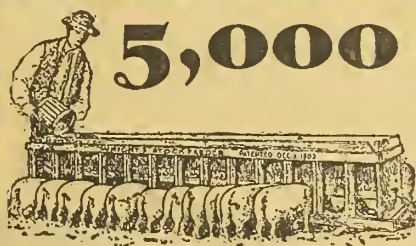

The Litchfield Spreader is today doing the business and doing it right, and is getting the trade that such a machine is entitled to. This is why we say the Litchfield Spreader is being built on a substantial foundation and why it is making for itself a reputation that will stand the test of time.

With the Litchfield Spreader it is not a question of producing a machine that can be sold at a less price than competing spreaders. The first consideration is the question of working results and quality. After this, of course, as a part of modern factory practice every part of the machine is produced along the lines of the most economical method of construction, with a modern factory, and all modern ideas throughout.

If our readers will consider the vitality that is given to the Litchfield Manure Spreader in producing it along these lines, it will be easy to understand the marvelous growth of this modern machine. Guaranteed for five years. Why? Because we can!

Continued next week.

THE NAME OF EVERY PERSON WHO OWNS A HORSE

THAT is out of condition or sick. If you have one that won't eat well, has distemper, or a cough, has become lifeless and lacks "go," looks bad, or has anything wrong with him, we want the chance to cure him for you. Just write us, telling what's the matter and we will send you a bottle of

GRAY'S TONIC PREVENTIVE FREE

On trial. Use it all and if it fails to benefit, it won't cost you one single cent. We mean this and our guarantee is as good as a gold bond. If it does improve your horse's trouble, you pay us after you are satisfied of it. Isn't that fair? Write us about your horse. You don't have to buy. We will tell you free what to do for him. Address,

THE E. E. GRAY CO., 322 CHICAGO AVE., HINSDALE, ILL.

can be removed without injuring the concrete, which should not be over two to three days after placing.

A very good waterproofing for use on inside of tank is a pure cement grout applied liberally with a brush. Two coats should be used to get the best results.

\$3.00. \$3.00. \$3.00. \$3.00.
KANSAS CITY AND ST. JOSEPH ROUND TRIP.

At 10:30 p. m. October 6th the Chicago Great Western Railway will have a popular excursion from Des Moines to Kansas City and St. Joseph at rate of \$3.00 for the round trip. Tickets will be good to return on train No. 4, leaving Kansas City at 11:30 p. m. and St. Joseph at 2:12 a. m. Sunday and Monday nights following. Seat checks will be issued to ladies and gentlemen who procure their tickets early. Tourist sleeping car berth rates \$1.00. For full information call on or address E. J.

Sawyer, C. T. A., 514 Walnut St., or either 'phone No. 423, Des Moines, Iowa.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. Rate one fare plus \$2. Liberal limits and stop-over privileges. For rates and further particulars call on agents or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

AMERICAN ROYAL LIVE STOCK SHOW, KANSAS CITY, MO.

For the above occasion THE CHICAGO GREAT WESTERN RAILWAY will sell round trip tickets to Kansas City and return at rate of one fare plus \$2 for the round trip, tickets being on sale October 5th to 9th and good to return until Oct. 15th and by an additional payment of 50 cents until Oct. 31st. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

WE GUARANTEE

that under the same conditions as to power and speed applied, condition of corn, etc.,

The Appleton Corn Husker

will do more and better work than any other machine of like character and corresponding size on the market, that it is simpler in construction, easier in every way to operate, easier and safer to feed and to require less power for successful operation. The proof of these claims is sent for the asking. We make also a complete line of manure spreaders, horse powers, shellers, ensilage and fodder cutters, feed grinders, wood saws, windmills, etc. Remember that Appleton quality is the standard of excellence.

APPLETON MFG. CO., 39 Fargo St., Batavia, Ills.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

Mr. Carl Kirk, of Iowa, sends a sketch of a self-acting gate latch to Successful Farming, as follows: "A latch for a

gate that swings one way may be made as shown in the picture. Take a piece of board about fourteen inches long and six inches wide, slant one end and cut a smooth notch to receive gate. Bolt two strong sticks to the board as shown in cut. Gate will latch itself. To open, press down on either stick."

Mr. Chas. C. Bower, of Indiana, writes the Practical Farmer as follows: "An easy way for one man to handle a large, vicious hog, is by means of a five-eighths-inch rope, ten feet long. Cut off three feet and tie a loop in each end, as shown in cut. Now tie the remaining seven feet to the center of the short rope, midway between the loops. Pass the loops over hind feet of hog, then draw long rope between front feet and over nose, then back again over short rope, pull forward over nose and back again as before and tie. With this arrangement, the hog is in complete control."

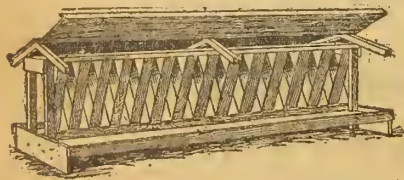

In apple-picking time a handy ladder will be found a convenience. The following from the American Agriculturist shows how to construct a ladder for almost any purpose about the farm buildings and especially in the fruit orchard where the trees are low. It can be made any desired height and the construction is not at all difficult. It is too good a thing to be without, and now is the time to construct it, with the heavy work of gathering tree

fruits just ahead. Use strong material, hickory being admirable for the cross bars.

The accompanying illustration from The Farmer represents a type of feeding rack with troughs that will be found economical for feeding both roughage and ground food. These racks can be cheaply constructed and will last for a number of years. One-half of the roof is put on hinges, so that they can be filled directly from a wagon. If cut silage is fed, it should be put in first, as it will fall

through the rack into the troughs. After the silage is thus properly distributed, the racks can be filled with hay. Twelve or fourteen feet is a good length to build such racks. The frame can be made of two-by-four inch lumber. A two-by-four inch scantling runs lengthwise in the center of the rack and is framed to the bottom cross pieces. To this is nailed on each side at the bottom a one-by-three inch strip for the troughs to rest on. The slats can be made out of two-and-one-half-by-seven-eighths-inch stuff, placed two and one-half inches apart. For outdoor use in

NEW AKIN CORN HUSKER

Just fine for rapid, easy work. Strong and durable. Easy to use. Fits snug and holds fingers firmly together so there's no jar to speak of. Quickly put on.

Adjustable Pin, made of cold-drawn steel, spring, relieves the strain on hand, wrist and arm muscles. If your dealer hasn't it, send 25c and get the Husker that beats 'em all. Smith and Davis, Box 2, Ames, Iowa.

U. S. BUTTER IS THE BEST. MINNESOTA STATE FAIR.

We have used for six years one of your United States Cream Separators on our dairy farm and always found it to be entirely satisfactory. We heartily recommend the U. S. to parties wishing a first-class machine. Our butter made from cream separated by the U. S. on our dairy farm scored 95½ at the Minnesota State Fair this year and was the **HIGHEST SCORE**. We believe that the U. S. Cream Separator has helped us in this contest, as it produces cream in fine condition and of even density.

U. S. Separator Butter, also made in Minnesota, won **ALL** the highest scores in the Dairy Class in **ALL** the contests at the Louisiana Purchase Exposition, St. Louis, 1904.

Butter Sells According to Its Quality. "U. S." Butter Grades Highest.

Write for our fine new catalogue that not only shows plainly how the U. S. "produces cream in fine condition and of even density," but why it skims cleanest, how it is built to last many years, why it is extremely simple, easy running and easy to clean. Everything is made perfectly plain by the many fine engravings of the different parts. Get the book and see for yourself. Ask for "New Catalogue No. 81" and we'll send it at once. Write now, addressing

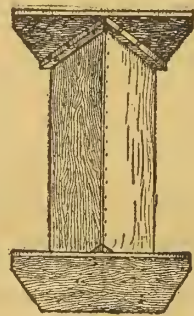

Vermont Farm Machine Co., Bellows Falls, Vt.

PROMPT DELIVERIES. Eighteen Distributing Warehouses.

451

a wet climate, the racks should be roofed, though it is not necessary where the rainfall is light. A one-half inch strip should be nailed to the eaves, so as to prevent the water from dripping in the feed or on the sheep while eating.

Mr. Jesse Scruggs, of Arkansas, sends the Michigan Farmer his plan of a substantial hog trough. He writes: "The table etiquette of our hogs was so bad that they were continually tearing up their trough. The end boards were the most difficult to keep nailed on, for a

BOTTOM

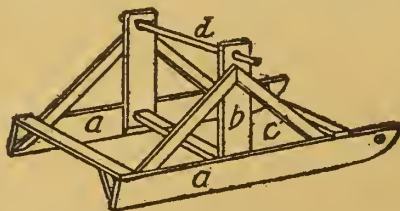

TOP

nail doesn't hold so well when driven in the end of wood, and it soon gets so full of holes one must saw off to whole wood.

Necessity, you know, is the mother of invention, so I got to thinking, and the rather crude drawings given will show the result; also explain better than words how the trough is made. All that is needed to make it is an ordinary amount of constructive ability, a saw, brace and bit—one-fourth-inch—a wrench and twenty-six or thirty small bolts, the length to be determined by the thickness of material from which it is made. One can determine how large strong and heavy to build by the size and number of hogs to be accommodated. This idea may be an old one to most people, but I don't remember ever seeing or reading of it, so I give it for what it is worth."

Mr. T. Burns, of Vermont, sends a description of a barbed wire stretcher to the Farm and Home. The following, to-

runners, a, should be two by six or eight inches and six to eight feet long.

gether with the illustration, explains it: "Having much wire to stretch, I arranged a sled, as shown in the cut, for holding a spool of wire while the same was unrolled along the line of fence. The upright post, u, should be of the same dimension two and one-half feet high. The braces, c, may be of one-by-four-inch stuff. Bore holes at top of b in which to insert the iron bar, d, as shown, for holding spool to be unwound. By fastening the end of wire to post and driving off along line of fence, wire is easily laid ready for stretching."

J. S. B., of Maine, sends to the New-England Homestead a sketch of a good brush scythe. He

writes: "A hook for cutting brush, heavy briars and such plants, which is simple and easily made by any blacksmith is shown in the cut. Take a piece of cast steel one-fourth inch square and ten inches long. Use one-half for the blade and the other half for the shank. Draw the end for the blade, a, down nearly to a point, then bend pretty well, as it will straighten in drawing to an edge. Have the bevel all on one side. Draw down true and thin. Then draw the shank down, tapering to the end, and bend about one inch of the end down to go into the snath. An old scythe snath is just the thing. Fasten it to the snath with an old heel ring driven on, the same as to fasten a scythe. Such a bush hook is light to handle. You can cut off a bush an inch or more in diameter with ease. The blade needs about the same temper that you would give a knife. This is much handier than the ordinary bush hook. The blade is not so long, cumbersome nor heavy, and the ease of management will appeal to every farmer who handles it."

We have all heard the inquiry: "Who built his house on sandy land?" This seems to be answered in the advertisement of the Litchfield Mfg. Co., on page 5 this week.

POPULAR EXCURSION TO TWIN CITIES.

The Minneapolis & St. Louis R. R. has arranged to run their last popular excursion this season to Minneapolis and St. Paul on Saturday, October 13th. The train will leave Des Moines at 8:30 p. m., arriving Minneapolis 7:10 a. m. and St. Paul 7:45 a. m. Round-trip rate \$4.50. Berth rate in tourist sleeper \$1.00. Make your reservation at City Ticket Office, 512 Walnut St.

H. C. GUMBEL.

The Man Who Stands Back of the "Knodig" Pitless Scale.

This introduces to our readers Mr. H. C. Gumbel, a successful manufacturer of Kansas City, Mo., who has built up a flourishing business based on the belief that every farmer should possess a scale of his own to weigh what he buys and what he sells. Mr. Gumbel is a man who is in dead earnest and possesses tremendous energy and combines with this sterling integrity. His specialty is the Knodig Pitless Scale—the kind with protective hearings.

Mr. Gumbel's chief aim for many years has been to improve the Knodig scale, and he has put behind the proposition brains, hard work and much money. His scale now is fully protected by United States patents Model A—No. 804164, issued Nov. 7, 1905, and Model B—No. 819959, issued May 8, 1906. After succeeding in producing a scale of absolutely high quality Mr. Gumbel's next move was to place it within the reach of every farmer, stock raiser, elevator man and grain dealer in the country. In order to do this he placed his Knodig factory on a direct selling basis, thus cutting out the profits of all middlemen and thereby saving their profits to the man who uses the scale. The plan of selling directly has met with wonderful success, as indicated by the number of scales that have been put out since the adoption of this plan. Those of our readers who are contemplating purchasing a farm scale should write to Mr. H. C. Gumbel, general manager National Pitless Scale Company, Kansas City, Mo., for a copy of his new scale book. It will be sent free to any reader of this paper who asks for it. See his advertisement on page 9.

Clean Skimming Means Good Living

The hog trough is no place to put butter.

Wide awake farmers want the cream separator that skims the cleanest. It means more profit—better living. That separator is the Sharples Dairy Tubular—the separator that's different.

Sharples Dairy Tubulars have twice the skimming force of any other

separators—skim twice as clean.

Prof. J. L. Thomas, instructor in dairying at the agricultural college of one of the greatest states in the Union, says: "I have just completed a test of your separator. The skimming is the closest I have ever seen—just a trace of fat. I believe the loss to be no greater than one thousandth of one per cent."

That is one reason why you should insist upon having the Tubular. Tubulars are different, in every way, from other separators, and every difference is to your advantage. Write for catalog S-12 and valuable free book, "Business Dairying."

Toronto, Can. Chicago, Ill.

OUR DAIRY DEPARTMENT

All communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

CARE OF COWS IN THE FALL.

Each season of the year as it comes around presents its own problems to the dairyman. The time during the next few weeks is critical in a measure, inasmuch as dairymen will find it difficult to keep up the milk flow. Flies are exceedingly bad and pastures in many cases have been picked a little bare. Possibly the cows have had a taste of green corn and as the fodder dries up it is a little difficult for the average dairyman to find a substitute.

The dairyman who has failed to stock a nice lot of corn fodder before this date has made a serious blunder, not only in failing to add to his winter supply of fodder, but because he will be short of an ideal fall feed. We have found that dairy cows may be kept almost to the point of maximum milk flow if they have reasonably good pastures during the fall months, together with a liberal supply of well cured corn fodder once daily. No special harm will result if the fodder contains a little corn, though if the grain is matured it is not wise to feed all that is attached to the fodder, otherwise the ration will be too fattening and the cows will not respond at the pail on such a ration, but will convert the corn into fat for their own bodies.

Where fodder is not available it usually pays to resort to the use of some kind of roughage even when the cows are still on grass. If clover hay is available it will be profitable to feed all the animals will consume at least once a day. Well cured hay of any kind should be used rather than to let the cows pick their own living entirely this time of year.

As to the matter of grain it usually pays to start the cows on a grain ration early. On most of the farms of the central West corn is plentiful, and thus is liable to be fed a little too heavily. It should be used in connection with oats or barley, ground, or mill feeds of some kind. These foods are milk-making in character and their use will not only keep up the milk flow, but will bring the animal into good condition before winter. A ration composed of half bran and half oats, or even bran and corn, half and half, will give good results if it is fed to the right kind of cows. The amount, of course, depends upon a number of factors and should be left entirely to the one who does the feeding. It is possible to feed this kind of a ration to a poor cow in wasteful quantities, while even a good cow might consume more than will be profitable. There is no sense in pouring unlimited quantities of high-priced feed into an old cow that is nearing the end of her lactation period, while in the case of a cow that is just fresh there is less danger of being wasteful in the use of milk-making foods.

One thing should be kept in mind by every man who keeps dairy cows, namely, that if they are allowed to shrink in their milk at any time it is impossible to bring them back to their maximum milk flow in the same lactation period.

BUTTER TEST AT IOWA STATE FAIR

Each year adds more interest to the Iowa State Fair butter test, and this promises to be a more important feature of the fair to come, as the milk scales and Babcock's test estimate quite accurately the true value of the dairy cow. Five Holsteins, three Jerseys, and one Red Polled cow contested for the four liberal prizes, aggregating \$100.00. They were fed at the option of their owners, except that no condiments or drugs were to be fed during the test. The owners were permitted to feed and milk either two or three times per day, as they wished, and for the most part, those who milked three times per day fared best.

Tuesday night, after the cows had finished showing in the ring, they were milked dry in the presence of the director of the test or his assistants, and on the following morning the test began. Each milking was weighed and a sample of the milk tested to determine the per cent of butter fat.

Maryke 3d's Gerben 4th, a Holstein cow owned by C. F. Stone, Peabody, Kansas, won first. She milked in the two days 127.8 pounds of milk, which tested 3.52 pounds of butter fat. Parthenia Hengervelt, another Holstein

IMPORTANCE OF BUYING CREAM SEPARATORS THROUGH LOCAL AGENTS.

This heading voices a most important consideration in the purchase of a Cream Separator, and points a most serious objection to the purchase of such a machine by the "mail order" method, even if good separators were sold in that way.

While the Cream Separator is a simple machine when once understood, it is nevertheless of the greatest possible importance that it be set up and started just right, and that the user have the brief personal use instruction necessary in its handling and operation. If not it may mean several years of difference in the life of a machine and a good many dollars of difference in the results from its use.

Then, no matter how carefully used, things do happen even to the best of separators. It makes a lot of difference if you have a competent man near at hand to tell you just what is wrong and how to fix it. It makes even more difference to be able to get necessary repair parts right and quickly instead of having to send off to some distant concern for them which only sells machines somebody else makes and whose employees would not know a separator if they saw it and the parts for which are more likely to be wrong than right when you do finally get them.

All this is the business of the local agent for DE LAVAL machines. It is just what he is expected to do for users. Of course he makes a small commission out of it, but the user can mighty well afford to pay that commission and it would be a big mistake to try to save it even in the purchase of a good separator. It is still more so in the purchase of the kind which is sold in the "mail order" way.

The buyer of a cream separator should never lose sight of the big DAILY difference in dollars-and-cents results between the good machine and the poor one. A DE LAVAL catalog to be had for the asking, helps to make plain these differences

Wanted men to learn Telegraphy; write J. P. Tighe, care Santa Fe Ry., Arkansas City, Kan.

cow, owned by W. B. Barney, Hampton, Iowa, was second, milking 104.8 pounds of milk, which tested 3.10 pounds of butter fat. Trustee's Lizzette, (Jersey), owned by Geo. S. Redhead, of Des Moines, Iowa, was third, milking 69.8 pounds of milk that tested 3.38 pounds of butter fat; Fourth prize went to another Jersey, Guenon's Lad's Lost Time, owned by Mrs. S. B. Thomas, St. Joseph, Mo.

The butter fat was valued at 25 cents per pound and the skimmed milk at 25 cents per cwt. On this basis the cows ranked as follows:

First, Maryke 3d's Gerben 4th, (Holstein), C. F. Stone, Peabody, Kan., value of butter fat and skim milk, \$1.19; second, Parthenia Hengervelt, (Holstein), W. B. Barney, Hampton, Iowa, \$1.03; third, Trustee's Lizzette, (Jersey), George S. Redhead, Des Moines, Iowa, \$1.01; fourth, Guenon's Lad's Lost Time, (Jersey), Mrs. S. B. Thomas, St. Joseph, Mo., ninety-five cents; fifth, Morey's Golden Lass, (Jersey), Dixon & Deane, Brandon, Wis., ninety-three cents; sixth, Inka Tritornia, (Holstein), McKay Bros., Buckingham, Iowa, ninety-two and two-fifths cents; seventh, Shadeland's Mechtchilde, (Holstein), W. B. Barney, Hampton, Iowa, ninety-two and one-fifth cents; eighth, Princess Pel De Kol, (Holstein), C. F. Stone, Peabody, Kan., seventy cents; ninth, Lala, (Red Polled), Adolph Arp, seventy cents.

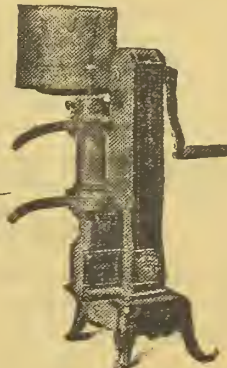

In conclusion, such a demonstration brings us many points for thoughtful consideration.

Between the first and ninth cow there is a difference for the two days of 49 cents. This represents a great difference, but is not greater than the difference between many individuals in most of the dairy herds that are run on a commercial basis; neither is it a greater difference than is found in different herds as we find them in the commercial dairy business.

The first cow represents a profitable investment, while the latter cow, although far above the average dairy cow, does not represent a profit nearly so large.

Princess Pel De Kol is only a two-year-old cow and should be in a class for cows of her own age, for it is difficult for a cow so young to compete with mature cows. Perhaps by another year the Iowa State Fair officials will see fit to put in another class, in which the younger cows may compete one with another.

Every state in the corn belt could well afford to conduct a test similar to this one. Actual performance is the thing in the dairy and the more emphasis placed on this feature by fair officials the more valuable will be the fair to the people.

A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using

Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address, The Iowa Dairy Separator Co., Waterloo, Iowa.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

LEGAL HEIRS.

A Subscriber, Frederickburg, Iowa.—A's parents are living. He holds a life insurance policy payable in case of his death to his legal heirs. After he took the policy he married, and two children were born of the marriage. His wife died. The two children are living. Who are his legal heirs?

Answer.—The two children.

FALSE PRETENSES.

A Subscriber, Golden City, Mo.—I have a fine registered mare which I bred to a stallion that was represented by the owner to be a registered French draft stallion, and so advertised by him. Since the colt was foaled I have found out that it cannot be registered, that its sire is not a registered French draft horse, or at least cannot be found on the French draft stud book at Fairfield, Iowa. Can I recover damages?

Answer.—You can recover damages, and besides, you can prosecute the owner of the stallion for obtaining money under false pretenses.

LAWFUL FENCE IN ILLINOIS.

A Subscriber, Tulla, Ill.—A owned a farm and he divided it among his heirs. B bought two of the heirs out. Both A and B are willing to put in a partition fence. Can B compel A to put in a hog-tight fence?

Answer.—If A has divided his farm among his heirs, what has he left to be fenced? According to your statement, A has nothing, having given the land away. Maybe you want to know whether a land owner can compel an adjoining owner to help construct a hog-tight partition fence. He can only compel an adjoining owner who keeps his lands enclosed, to construct and maintain half of a lawful fence on the division line. A lawful fence in Illinois must be four and a half feet high, in good repair, and consist of rails, timber, boards, stone, hedges, barbed wire, or whatever the fence viewers of the town or precinct shall consider equivalent thereto. In counties under township organization, the electors at any annual town meeting may determine what shall be a lawful fence, and in counties not under township organization, the power to regulate

the height of fences is in the county board. Whether or not fences constructed according to the foregoing requirements would be hog-tight, is a question of fact, and not of law.

CHOLERA—DEAD HOGS.

A Subscriber, Hedrick, Iowa.—Where hogs die of cholera, is the owner required by law to burn or bury them?

Answer.—Section 5015 of the Iowa code provides that the owner or person having charge of any swine, any of which die or are killed on account of any disease, shall upon such fact coming to his knowledge, immediately burn the same. The penalty for a violation of this section is a fine not less than five, nor more than one hundred dollars, or imprisonment in jail not exceeding thirty days, or both.

FENCE TROUBLES—COSTS.

A Subscriber, Lorimer, Iowa.—A bought a place in town last March. The place was enclosed by a fence set inside the line, and all the fence belonged to the place. On one side, this fence was composed of wire and pickets, and had become badly out of repair. Three or four months later B bought a place beside A's and took half of the rusty pickets, and the posts off and threw the old wire upon A's land and then put new wire fencing on the posts, and refuses to give up the posts. (1) Can A take out the posts that belong to him or will he have to go to law to get them? (2) Who would have to pay the costs in case of law suit?

Answer.—(1) A will probably have to go to law to get his posts, but this seems a proper case for the fence-viewers. Try them first. Request them to settle the matter between A and B. In case that cannot be done, or in case B is contrary, there seems no way but a law suit. (2) The party who loses the case usually has to pay the costs.

EFFECT OF DEED.

Mr. J. W. Southwick, Kalona, Iowa.—In March, 1860, A deeded to the school district township one-half acre of land which adjoins a cemetery for the price of \$10. Both A and his wife executed the deed. The purpose for which the land was conveyed was not mentioned in the deed. The land was used for school purposes until 1901, when a new school house site was purchased and a new school house built on it. At the annual school meeting in 1901, the electors unanimously voted to donate the land to the township trustees, as an addition to the cemetery. A has sold ten acres of land, including said half acre. He has not returned the \$10 dollars, the original purchase price. To whom does the half acre belong?

Answer.—If the deed made by A and his wife was an ordinary deed of conveyance, containing no clause concerning the use to which the land would be put, it conveyed all the title in fee from A and his wife, and the land is a part of the cemetery, beyond A's control or ownership.

TWO SETS OF CHILDREN.

A Subscriber, Eddyville, Iowa.—My brother died last January. He was a widower and left four children. One was married, but is dead, leaving a husband and six children. (1) Has her husband any right to her share of her father's estate? The children had me appointed their guardian. He had a house and two lots and they want to sell them, and the deed has been lost. (2) Can I get a new deed without going into court?

Answer.—(1) If the wife died before her father's death, then her husband has no right to any of the father's estate, but if she died after her father's death, her husband is entitled to one-third of her share of her father's estate. (2) The last part of the above letter, including the second question, is wholly unintelligible. Go to some lawyer and talk the matter over with him, and let him cross-examine you and find out who had the house and the two lots, also which set of children you are guardian for, and various other things you have entirely missed in your statement.

LANDLORD AND TENANT.

A Reader, Blair, Neb.—Last December B rented a farm from A for \$5 per acre, cash rent. When the contract was made, B asked A to build a shed on the place for hogs, which A promised to do, but he has failed to do it, and claims that the place is not paying, and that he cannot afford to build the shed. B has no witnesses to A's promise, but A does not deny it. Nothing was mentioned in the written renting contract about the shed. (1) Can B compel A to build the shed as he promised? (2) Can B build the shed and deduct the cost of it from the rent? (3) A lease was made for one year beginning on the 1st day of March and ending on the 1st day of March the next year. What kind of notice must the landlord give the tenant to quit when his time is out?

Answer.—(1) He cannot. The promise to build the shed was not put in the written contract and was not a part of it. It was a mere naked promise without consideration, which cannot be enforced. (2) He cannot, for the same reason given in the foregoing answer. (3) No notice to quit or vacate premises is necessary where the time is fixed by the lease. In such a case if the tenant refuses to vacate when his time is out, the landlord should serve on him a writ-

VALUABLE HINTS ABOUT ROOFING.

Do not use rough and uneven lumber for sheathing boards. They should be smooth and of uniform thickness.

Clean off the boards before covering them with roofing material. Loose nails should be driven "home."

Cover your gutters with Ruberoid Roofing instead of tin. It is absolutely water-proof and will outlast the metal.

Do not select a roofing by weight. If you buy a roofing covered with sand or pebbles you pay for half sand or pebbles and half roofing. If you buy Ruberoid Roofing you pay for 100 per cent roofing and no tar, paper, sand or pebbles. It is positively weather-proof and fire-resisting; does not need pebbles or sand to protect it.

Ruberoid Roofing will outlast any prepared roofing made. Facts and figures proving this furnished upon application to the manufacturers.

Ruberoid Roofing is inexpensive. Costs little or nothing to maintain. Any handy man can apply it. Full directions and all necessary fixtures free with every roll.

In laying a prepared roofing the seams of the roofing should run with the pitch of the roof. This permits of easy flow of water. Where gutters are covered this should surely be done.

Ruberoid Roofing applied at right angles with sheathing boards and gutter.

Write the manufacturers of Ruberoid Roofing for a copy of their complete pamphlet entitled "Valuable Hints to the Roofer." It tells you what to do and what not to do.

The first weather-proof, elastic and fire-resisting roofing ever placed upon the market was Ruberoid Roofing. The first Ruberoid roofs laid, fifteen years ago, are still giving satisfactory service.

ten notice to surrender the premises within three days after the service of such notice, and then if the tenant remains, bring a suit at once before a justice of the peace for forcible detainer and have him put out.

ELECTRIC LINES IN TOWNS.

A Subscriber, Farmington, Iowa.—(1) Can the city council of an incorporated town pass an ordinance granting the use of the streets and alleys for the erection of telephone poles and fixtures? (2) Does the law require a telephone company to obtain a franchise by a vote of the electors of a town before constructing its line therein? (3) What would be the probable cost of a franchise obtained by a special election?

Answer.—(1) By section 775 of the Iowa code, cities and towns are given power to authorize and regulate telegraph, district telegraph, telephone, street railway, and other electric wires by general and uniform regulation, which means by ordinance. (2) But, to lawfully obtain the right to construct lines for any of the purposes mentioned, the matter must be submitted to the electors of the town or city at a general or special election, and a majority of the electors voting, must vote in favor of it. (See section 776, code.) (3) We do not know.

Cancerol Permanently Cures Cancer and Tumor.

No pain. No scar. No experiment. Convincing book will be sent free on request. Address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

This "PEERLESS" Pitless Scale

Laid Down at Your Railroad Station Complete For Only

\$46.50

Why Pay More?

The only real difference between the "Peerless" at \$46.50 and other Pitless Scales selling at \$60 to \$100 is in the frame.

Peerless frames are of wood, the others, costing 33 1/3 to 100% more, are steel; all inside working parts are practically the same.

Then, why on earth should you pay a fancy price when you can buy a thoroughly good scale like the "Peerless" direct from the factory at a saving of all middlemen's profits?

Sold on 30 days free trial. No deposit, no notes to sign, nothing to pay unless you are satisfied, and you are the judge of that!

Let us send you a set. Test them for a month and make up your mind whether they are worth \$46.50. Keep them, if you think they are.

Send for the free "Peerless" Pitless Scale catalog fully describing every part.

You will make a big mistake to buy a high priced scale before investigating the "Peerless."

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

SPRAYING FOR SCALE INSECTS.

On account of the unfavorable results which were obtained by many entomologists and fruit growers in applying insecticides for scale insects during the fall or early winter, this operation has generally been postponed until late winter or early spring, just before the buds swell. The reasons commonly given for this practice included not only the experience which many had had in injuring the trees by early applications, but the belief that the insecticide would remain longer on the tree if applied in early spring. In the case of the lime-sulphur wash, it is obviously an advantage to have the insecticide upon the tree in a satisfactory condition at the time when the young scales are moving about.

According to experiments by J. B. Smith, entomologist of the New Jersey station, it appears that all kinds of insecticides effective against scales may be applied with success in the early fall, even before the trees have become thoroughly mature. In his experiments Doctor Smith used various preparations of soluble petroleum, lime and sulphur, whale-oil soap, kerosene limoid and other preparations. The ordinary scale insects cannot be kept in check in summer, for the reason that the foliage is injured when a sufficiently strong solution of a contact insecticide is used. If, however, applications are made in the fall, after a part of the leaves have fallen off, or as soon as the leaves have turned yellow and the tree gives evidence of being nearly mature, a considerable percentage of the scale insects will still be active, and will be immediately destroyed by the insecticide. The application of ordinary treatments, such as those just mentioned, appears not to produce material injury to fruit trees, even including peach.

Dr. Smith sets October 15th as about the right date to begin the fall application of scale insecticides in average years. The purpose sought in applying the insecticide as early as possible is to catch the scale insects in an active condition, while they are therefore exposed to the action of the remedy. As long as the sap circulates in the tree, some of the scales are active, and since the trees appear not to be injured when treated after October 15th, this seems to be a very good season for making the application. A few of the leaves are injured by early fall applications, and, in general, the foliage may drop off somewhat sooner than it otherwise would. This appears not to be of any moment, however, since the trees come out in spring in a thrifty condition and show no bad effects of the application.

Important Fruit Storage Experiment.

To the Editor of The Homestead:

Iowa orchards are producing a superabundance of fall apples and a proportionate scarcity of late winter fruit. This is particularly the case in the northern half of the state, where there is a great scarcity of hardy varieties of good winter apples. This condition presents two problems of economic importance:

The cold storage of fall varieties, thereby lengthening their season and making it possible to distribute the crop to more distant markets and also at better prices to the grower. The storage of fall sorts for local market and home consumption in winter as a substitute for late varieties. The aggregate amount of fall apples which annually goes to waste in Iowa is enormous. With ample storage facilities and proper methods of handling the fruit both before and after it is stored, there can be no doubt that much of this loss might be prevented and thousands of dollars which are sent out of the state would remain in the hands of the Iowa fruit grower.

While it is well known that the supply of winter apples from the orchards in Iowa does not meet the demand for

home consumption, yet few if any realize the extent to which apples are imported into Iowa from other states. From inquiry among the leading lines of railroads as to the number of barrels shipped in from October 1, 1904, to July 1, 1905, and also from the dealers, it is estimated that during the period referred to the cities of Iowa bought from outside of the state 364,800 barrels of apples which, at the conservative figure of \$2.50 per barrel, means an aggregate cost of \$912,000. It should also be remembered that this refers only to the urban population, which represents about one-third of the total population of the state.

It has been clearly demonstrated by carefully conducted cold storage experiments that many of the fall varieties of apples can be kept two and three months beyond their normal period in first-class condition. A variety varies much in its storage quality under different soil and climatic conditions, and while the leading commercial varieties grown in Iowa have already been tried in storage in older fruit growing sections, yet these tests do not apply to Iowa conditions and the value of Iowa fruit for storage has not yet been determined.

The horticultural section of the Iowa Experiment Station in co-operation with the division of pomology of the United States Department of Agriculture is taking up the investigation of a number of important problems connected with the cold storage of apples grown in this state. Observations are to be made on the keeping quality of different varieties of Iowa apples as related to the age of the tree, the type of soil upon which it is grown, whether it is grown under sod or under clean tillage, the degree of maturity of the fruit, the question of immediate versus delayed storage, of wrapped versus unwrapped fruit, and of a small package versus barrels. The work will be conducted by Mr. H. J. Eustace, expert in fruit storage investigations of the division of pomology, in co-operation with Professor S. A. Beach, of the Iowa Experiment Station.

Fall the Best Time to Plant.

To the Editor of The Homestead:

For many reasons it is much better for the farmer to make up his order for trees and plants now than in the spring. The nurseryman much prefers to receive orders in the fall, because he has more time to fill them and it relieves the spring rush by that much. The bulk of orders are and always will be sent in the spring because it is human nature to delay, but the consequence is that the nurseryman is overwhelmed with orders and many customers do not receive their stock until it is too late for the best results. In the spring a delay by express or freight may mean the loss of half your trees or a puny growth through the summer that means a year's loss of time.

Planting in the fall means that the farmer will not be so rushed with other work that he cannot give it his attention; it means that the tree is dormant and in the best condition for planting; it means that the soil is moist and soft and cool and can be dug into and handled to the best advantage; it means that a delay in shipping entails no serious loss for planting can be safely done at any time during the winter if the ground is not frozen too hard to work.

But if it does happen that the ship-

The New Protected Bearing "Knodig" Pitless Scale is Fully
Covered by Patents.

If you think \$50 is worth saving, don't do a thing about getting a scale until you write me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings.

I don't care whether you expect to buy a scale now or in the future, or for the matter of that, whether you ever expect to buy one, send for the "Knodig" book anyway.

It contains over 40 half tone pictures that will interest you, and it is chock full of good common sense from cover to cover.

You just simply can't read this book without getting interested in the "Knodig," and if you don't want one, yourself, I'll take my chances on your saying a good word for my scale to your neighbors.

Why, two-thirds of the thousands of Knodig Pitless Scales now in use in this country were sold as a result of satisfied users telling others about it.

Yes, that's just the kind of scale the "Knodig" is.

Ready for instant use when you want them. No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather.

Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

to contain the roots and laying the trees down at an angle so that the tops will not be much above the ground. Even if I knew that I could not plant before spring I should still order the stock in the fall and heel it out. The advantage in this is that during the winter the cut ends of the roots will callous over and be ready to send out roots the moment they are planted in the spring. Second, the trees will be on hands ready for planting at the earliest moment after frost leaves the ground and the farmer can seize any favorable opportunity for the work. Third, the earlier trees are planted in the spring, the better start they get; not only are the roots calloused, but the spring rains compact the soil about their roots and they are ready to make a vigorous growth through the summer.
Cape Girardeau, Mo. L. R. Johnson.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

THE VALUE OF SKIMMED MILK FOR HENS.

An experiment was recently conducted by the West Virginia Experiment Station to determine the value of skimmed milk when fed to laying hens. On most farms the skimmed milk is fed to calves and pigs and for that reason many allow themselves to believe that hens are not benefited by it. In the experiments made by this station the milk used was from the separator and for the most part of the year it was sour when fed, being thick in summer.

The hens were kept in houses and runs, one lot being fed skimmed milk and another not. The skimmed milk was used mostly for moistening the mash which was usually fed in the morning. At no time were the hens fed heavily as the eggs were used for hatching purposes and it was not considered desirable to have the hens too fat. The pen which received the skimmed milk laid 248 more eggs than the others, or practically an egg for every quart of skimmed milk they received. The value of the skimmed milk was placed at about one cent per quart, then the food cost was 9.8 cents per dozen for the fowls that had been fed skimmed milk, and 9.3 cents per dozen for the other lot.

During the time covered by the experiment the eggs produced were actually worth twenty cents per dozen. The 248 extra eggs produced by the pen fed skimmed milk valued at this price were worth \$4.13 which would give the skimmed milk a value of 1.6 cents per quart.

In summarizing the results of this experiment it was shown that more eggs were produced when skimmed milk was substituted for water in moistening the mash. At a value of twenty-five cents per dozen it was ascertained that the skimmed milk had a value of two cents per quart. In the experiment 802 quarts of skimmed milk were used resulting in an increase in the egg production of 702 eggs.

MASH AND DRY FEED.

There is a difference of opinion as to the merits of dry and wet feeds for poultry. Both have their advocates.

A flock of hens should be fed with a view to obtaining eggs without producing what is called over-fatness, realizing that it is the full-fed hen that can produce eggs to her full capacity. Director C. D. Woods, of the Maine Experiment station, in discussing this subject before an Illinois Farmers' Institute, recently said: "Several years ago we gave up the morning mash and fed it in the afternoon which produced far better results than when fed in the morning. We found that a full meal in the morning produced laziness, fatness and soft-shelled eggs. These results were not encountered when the birds were required

to eat slowly and exercise by digging the grains out of litter.

"A daily ration for twenty-two hens throughout the year was one pint of wheat in deep litter early in the morning. At 9:30 a. m. one-half pint of oats was fed to them in the same way. At 1 p. m. one-half pint of cracked corn was given them in the same way. At 3 p. m. in winter and 4 p. m. in summer they were given all the mash they would clean up in half an hour. The mash was made of the following mixture of meals: Two hundred pounds of wheat bran; one hundred pounds of corn meal; one hundred pounds of wheat middlings; one hundred pounds of linseed meal; one hundred pounds of gluten meal; one hundred pounds of beef scraps. The mash contains one-fourth of its bulk of clover and leaves and heads obtained from the feeding floor in the barn. The clover was covered with hot water and allowed to steep for three hours, and the mash was made quite dry, allowing only enough moisture to make the meal stick to the wet clover leaves.

"In addition to the feed they had grit and oyster shell before them all the time, and were given two large mangolds to each pen daily in winter. The records of several years show that from fifty to fifty-five pounds of dry mash, not including the clover leaves, were eaten by each hen per year. The quantity of grain was the same every day, winter and summer, but the quantity of mash differed according to what they would eat up in the time allowed them.

"Birds kept in warm houses where the temperature never reached freezing consumed less feed than those kept in cold houses. The whole layed on an average of 150 eggs per hen. Comparisons of the cost of grain rations as a whole and rations where a dry mash was used in egg

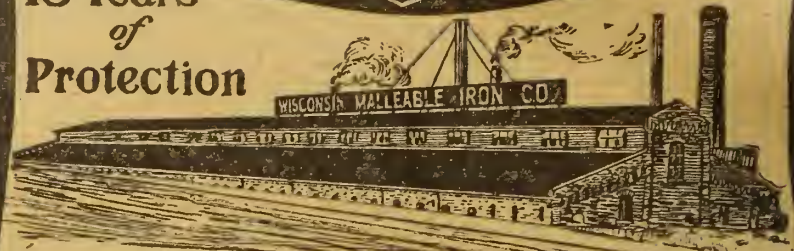

A RELIABLE RANGE MANUFACTURING CONCERN.

Do you expect to buy a stove or range of any kind this fall? If so, we desire to especially recommend the Judson A. Tolman Company, of 7730 Woodlawn Ave., Chicago, who advertise with us. It isn't an easy matter to sell stoves and ranges by mail any more because there are a great many competitors, and a concern that is as unusually successful as this concern has been, and, upon quality and square dealing alone, have built up an enormous range business, deserve special credit. Tolman ranges certainly must give satisfaction because there are sixty thousand of them in use throughout the United States, and in the one state of Michigan alone there are over six thousand pleased users. A large number of our subscribers have bought of the Tolman Company and report the greatest of satisfaction. We know that they would be pleased to send you their catalog, and what is more, you should have a copy. It is free, and you are under no obligations to buy. Read their advertisement and send for their catalog "G" to the above address. They ship on terms so fair that you run no risk, and we recommend them as entirely reliable. See their advertisement on page 15.

BLACK DIAMOND Ready Roofing

18 Years of Protection

The original buildings were roofed with Black Diamond in 1888. Factory usage is particularly hard on roofings on account of the corrosive action of acid fumes in smoke. Then, too, this big area afforded a severe test of the roofing's ability to give good service, without leaks. But when the size of this factory was increased in 1898 the owners put Black Diamond on all the additional buildings.

The first roofs are still in good shape after 18 years. This is only one of many records that we have gathered. And Black Diamond costs less than almost any other roofing on the market! Ask for a free sample.

yields do not show very great advantages of the mash over the dry grain ration. All grain cheapens the cost and the egg yield was not sufficiently depressed to indicate that the ration was faulty in its production.

A SHINING EXAMPLE.

"We know of no more shining example of strictness in representation and liberality in fulfillment than that of Macbeth, of Pittsburgh, the maker of lamp chimneys that fit, that get full light from a lamp, that do not break from heat, and that keep their transparent clearness. It would be money in a newspaper's pocket if printer's ink would not stick to type to print lies.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

A NEIGHING HORSE.

Is there any drug that can be given a stallion to keep him from neighing and squealing on the road that will not injure him as a breeder?

No drug will do any good without hurting a horse. On halter or bridle fit a couple of leather trusses on springs so that they will slightly press above nostrils to shut down on them so as to reduce amount of air that can enter the nostril. Try one nostril first and then both, if necessary.

FOUL IN FEET.

I have six head of three-year-old steers that have sore feet. One has both hind feet sore. It makes them a little lame when they walk. The heels are greasy and cracked and give off a bad odor. Will you please tell me what I can do for them if they can be cured?

Cleanse parts thoroughly and cut away all loose or under-run horn. Then saturate oakum in full strength coal tar disinfectant and bind between toes by means of a small bandage. Heels also should be well covered with the medicated oakum. Renew dressing once daily. Keep cattle out of mud and dirt.

BLOOD POISONING.

I have an eight-year-old gray mare which had the heel tramped off her right hind foot about four months ago. It seemed to get well and I put her to work in plowed ground. This made her lame and caused her foot to swell just above the hoof, and the place has been running ever since. The hoof around the hair is turning down, making a place about four inches from her heel around to the front. Now her whole leg is swollen. I have had a veterinarian treating her, but she is getting worse. What can I do for her?

The case is a desperate one as the wound evidently has become infected and it may be impossible to save the animal. Have your veterinarian give her two drams of Merck's calcium sulphid in sirup on tongue three times daily and if she greatly improves reduce the dose to one dram at a time. Perfectly cleanse the wound; clip away the hair and after scraping out the "pipe" and injecting it with a saturated solution of corrosive sublimate poultice part with hot flaxseed meal containing a few drams of coal tar

disinfectant or carbolic acid. Continue the poulticing for a week; then inject again and blister coronet with a mixture or a dram each of biniodid of mercury and powdered cantharides in two ounces of lard.

CATARH.

Several of my pigs run at the nose as if they had a bad cold, but do not cough, and otherwise are as thrifty a lot as I ever saw and galuing fast. They have all the rapo they want. I feed middlings and a little tankage in slop, using limo water to mix with it, also a little whole rye. What would be good for them?

The pigs seem to have catarrhal cold, or it may have been induced by running in dust which should be carefully avoided. Sprinkle chloride of lime in a pen and turn the pigs into it for half an hour twice a day. Give the sulphate of copper as advised in a recent issue of the paper, in editorial department.

LOSS OF SOWS.

My brood sows are dying. After farrowing they quit eating and drinking and gaunt up and die. I would like to know the cause and the cure.

There is nothing in your letter that would enable anyone to judge as to the cause of death and it will be necessary to have a post mortem examination made to determine the cause. It may be inflammation of the womb from infection derived from dirty pens or other source so that it would be well on general principles to clean up, disinfect and white-wash the hog houses and pens. Also have the sows well exercised and fed plenty of succulent food for a month before farrowing.

WOUND.

I have a dark brown two-year-old mare mule that got its left hind foot cut in a barbed wire fence about six weeks ago. The cut is just above the hoof, behind and below the ankle. It is only a flesh wound, no cords or leaders cut. The sore is about an inch wide and two inches long. It has a little proud flesh in it, and does not heal. I have been putting crude carbolic acid, diluted, on it, but it does not improve. What can I do to take the proud flesh out of it and make it heal?

For three or four days poultice parts with hot flaxseed meal, mixing in each poultice some bran and a couple of drams of coal tar disinfectant. Afterward wash parts clean on removal of poultice; then wet the parts several times daily with a lotion composed of two ounces each of goulard's extract and glycerine in a pint of water. A little oxid of zinc ointment may be applied twice daily as soon as the wound is doing well.

GARGET.

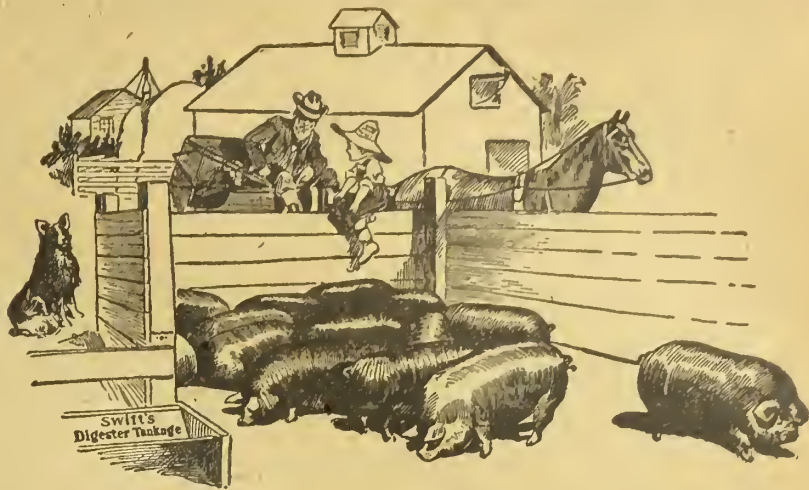

I had a valuable Holstein helper come fresh recently for the first time. She had a very large udder. I milked her out well, but the udder swelled badly and she stopped giving milk. Then I got some watery fluid from the udder which had what looked like thick milk in it. I used hot fomentations on her and reduced the inflammation, but could not get any milk from her. Is there any chance for her to come to her milk now, and if not, the next time she comes fresh? What effect would it have had to have pumped cold air into the udder, the treatment described in The Homestead for milk fever?

There is very little chance that the cow will either come to her milk again this season or at another freshening, as she has a bad attack of garget. It would be well to try inflating the udder with sterilized air as for milk fever; also to continue fermenting the udder with hot water and then rub well with alcohol. Feed to stimulate a flow of milk.

WOUND.

I have a three-year-old brown mule that got cut on the inside of the left hind foot on the barbed wire two months ago. The cut was from the front of her ankle downward, splitting the hoof behind, cutting clear to the bone all around. I put turpentine on it at first, then used a wire fence liniment with sulphur and burnt alum to keep proud flesh down. I then used pulverized alum and burnt shoe sole with cresylic acid in warm water. Am using the sulphur and fence liniment at present. The foot is enlarged on the inside and the flesh below the cut hangs out and makes her foot look crooked. The hoof at the top has an enlarged wrinkle or seam just on the inside.

Cleanse wound perfectly and cut away all loose horn and also the hair and any dead, ragged pieces of skin or flesh. Mix together equal parts of boracic acid, tannic acid and finely pulverized flour sugar and to each ounce of the mixture add one dram of iodoform. Put this in a pepper castor and dust it freely upon the wound and on one side of a mass of antiseptic cotton. Apply the cotton to wound and bind in place with clean bandage. Put a flat, dry piece of sponge over the protruding flap of skin after taking a turn or two of bandage and then go on bandaging. The sponge is to cause pressure upon the bunch and lessen the blemish as the wound heals. Renew the dressing daily. Tie mule so he cannot bite part. When wound is healed up level with skin stop bandaging and wet part several times daily with a lotion composed of an ounce of

Swift's Digester Tankage

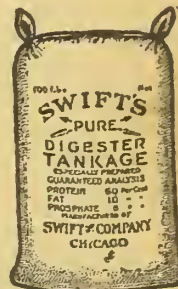

Market hogs fed on Swift's Digester Tankage have a uniform finish with firm flesh and smooth coats.

Buyers Buy Them

And pay highest prices when finished on rations balanced with Swift's Digester Tankage. They look right and sell right. Ask for our booklet "Protein for Profit."

Kills Hog Lice Chloro-Naptholeum Dip will quickly kill Hog Lice and all other insect pests. It will prevent and cure Hog Cholera. It is the best disinfectant for hog pens. Cures all parasitic and germ diseases of Cattle, Horses, Hogs, Sheep and Poultry, and heals their cuts, sores and wounds.

Chloro-Naptholeum Dip

proves its worth before you pay for it. I will send you a gallon, express prepaid, for a two-weeks' trial. If it doesn't kill hog lice in two weeks, you don't owe me a cent. Isn't that fair? Won't you try a gallon at my risk? (If you are located west of the Rocky Mountains, you must pay freight charges.) E. TAUSSIG, Pres. West Disinfecting Co., 21 E. 59th St., New York City

sugar of lead, six drams of sulphate of zinc and two drams of carbolic acid in a pint of water. Label the bottle "poison" and shake well before using.

LAMENESS.

I have a sorrel horse four years old that has a swelling on the inside of the left hind leg. It is just below the top of the knee joint and is about two by three inches, almost square, and extends out between a half inch and an inch. The horse limps a little when he trots. I first noticed the lameness about three years ago, but did not notice any swelling until about six weeks ago. One man said it was enlarged joint and advised me to use tincture of iodine, which I did for a while, but without effect. Will you kindly tell me what to do?

Clip hair from part and blister thoroughly by rubbing in for fifteen minutes a mixture of one dram of biniodid of mercury in two ounces of cerate of cantharides. Wash the blister off in forty-eight hours, then apply a little lard daily. Horse should have a month's rest following the blister. Tie the horse so he cannot bite part while blister is acting. It may be necessary to repeat the blister in one month if lameness is not entirely cured.

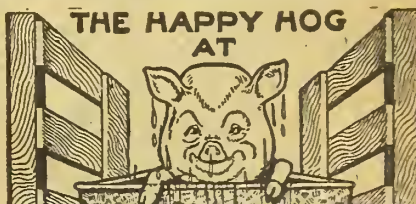

I. O. O. F., DUBUQUE, IOWA.

Account of the Annual meeting of I. O. O. F. and affiliated societies THE CHICAGO GREAT WESTERN RAILWAY will sell round trip tickets to Dubuque and return at rate of one fare plus fifty cents on October 14 to 17th with return limit of October 22d. Echoes From a Kansas Farm

By Henry Hatch

The genuine hobo has to put up a different story this year; he cannot say there is no work to be had.

People who wonder why Kansas has no real state fair cease to wonder after living here a while; it takes all our time to care for the big crops raised, so we have no time to attend fairs.

Here is the way one of our best farmers puts it: "I can raise more corn by having a field two years in clover and three in corn, than by having it in corn all five of the years." He has it about right.

There is living not far from here a man who tells every newcomer he sees that this country is no good, and that land is not worth half what is asked for it. Why does this man stay here, then? He has no direct answer for the question. Really and truthfully he thinks there is no place like Kansas, and he doesn't want others to buy land he might buy.

A friend of ours was just telling of his experience seeding a field to alfalfa. The field had been plowed in the summer, and, just before seeding time in the fall, a part of it had been double-disked when a big rain came. After the field had dried enough to disk again, he went ahead and finished the field, then turned back and double-disked that which was worked before the rain. On the ground that had been disked four

times, he got a fine stand, on the other only a part of a stand, which had to be plowed up. This indicates that failure is often caused by not working the land enough before seeding.

Ten tons of hay under a good roof is worth fifteen tons stacked outside. We have found this out by actual experience.

You get a poorer grade of lumber now for \$30 a thousand than could be bought eight years ago for \$20 a thousand. The increasing scarcity of timber is responsible for probably \$2 of this raise in price, the \$3 is caused by organization of the lumber dealers. Trust methods are costing the farmers of the West thousands of dollars every day.

Less than a month ago we heard a farmer who has the price of a good eighty-acre farm in the bank say he could not afford to own a disk harrow. When he has fall plowing to work down, or ground to get ready for small grain in the spring, he hauls out his cultivators and goes at it. One man with a disk could do as much as two would with cultivators, and do it easier on the four horses. He seems to think he cannot afford to spend \$28 to save, all told, the work of one man for two weeks each year, and a lot of horse-flesh besides.

Most all of us know better than we do. There are hundreds of thousands of farmers in this country who decide, about this season of the year, that they will farm a less number of acres next year, but farm them better. Next spring it turns out to be the same story with nine-tenths of them—they farm as many acres as they did before. It would be for the good of many portions of the western country to be more thickly settled than it is.

There are times in a person's life when absolute silence seems louder to him than the blowing of a hundred whistles. For instance, to look back as you turn off a row at the end and see the twine looped out of the twine box on your corn binder, to a stub thirty or forty rods back, makes the silence seem strong enough to you to overcome all the noises for five miles around. No man can whistle then as he winds in the twine.

Last spring we took particular care to select seed of kafir corn that was not smutty last year. It was planted on ground that had not raised kafir corn since seven years ago, and with a new planter, yet it shows the usual amount of smutty heads. We have come to the conclusion that the only way we will ever be able to grow smutless kafir corn will be to disinfect everything on the place, and everything that comes on the place.

One of the mistakes we made about this time last year was in cutting corn too green. The ears were ripe, but the blades and stalks were still quite green, the same condition corn is now in; and a series of rains coming right after it was put in shock molded the fodder. We find that the usual advice to cut corn when the kernels are well dented is something that can well be taken with grains of salt. You must take into consideration the brand of weather that is being manufactured about that time. If it is dry and windy, go ahead with the cutting; if still and dewy every morning and showery two or three times a week, better wait awhile.

The Rev. John Watson (Ian Maclaren) is degenerating into a punster. At a dinner not long ago the conversation turned to the art—or crime—of punning and Mr. Watson ventured the opinion that he could do very well in that line, offering to try then and there. He sat silent for a few moments and Hall Caine, who was among the guests, exclaimed: "Come along, Watson, we're all waiting." The preacher-punster replied at once: "Don't be in such a hurricane."

DAY BY DAY

Agricola

One of the permanent institutions of the land is now the county fair. It is expected as much as the autumn.

This week our fair was held and Agricola of course attended.

The grounds were a quarter of a mile outside the city upon an excellent field for the purpose.

Each agricultural department had its own hall, and the handiwork of the ladies, such as needle-work, pictures, etc., had its special booth.

Needle-work, elaborate quilts and coverlets, are very interesting, and table and stand covers very much so.

That mind isn't as civilized as it should be which does not enjoy such things.

A home adorned with such is generally free of trouble. It is a happy home.

There were hundreds of buggies and carriages hitched to horse-racks and to the fences.

Agricola walked along the line and reached the conclusion that farming in Iowa, at least, was a prosperous calling.

Why, the farmer rides as luxuriously as the president of the United States; and we have the idea that he enjoys it better than the head of the country does.

The apple show was immense. This end of Iowa is one of the homes of good apples.

In Agricola's grounds apples are going to waste. It is so all around us. You can hardly sell them at any price.

In the poultry house the show was wonderful. There were breeds not larger, scarcely, than one's fist, and others as large as turkeys. There were first-class turkeys, too.

We remember when a lad of seeing wild turkeys in father's woods "back yonder in Ohio."

And black and gray squirrels in the same tree. Sometimes, too, we had nothing to eat in the house, except hominy which mother made, and fat pork.

But we boys flourished on the diet.

There were some of the biggest horses that we ever saw at this fair. They reminded us of the dray horses which we saw once when visiting the city of New York. They were hauling freight to and from the big ships in the harbor.

There were horse races going on all the time. One spurt is all we can stand at a time. After the race the grooms would lead the horses around until they cooled off somewhat.

There was a pen of the largest geese we ever "sot eyes" upon. They were not of the wild species either.

All sorts of farm machinery were on exhibition. We noticed, too, that numbers of farmers were viewing them and listening to their merits set forth by the exhibitors.

The Scotch Short-horns were very fine. There were quite a number of Herefords. The white-faced fellows and the cows were pictures.

It must take lots of work to get up a show animal.

Cream separators were in evidence.

The separator saves our womenkind lots of labor, and besides, there is money in their use.

The corn exhibit was large and very interesting. However Agricola can go into his own field and gather wagon loads of just as good.

We are picking and hanging up in the barn as fine ears as we can find for seed. Iowa, as a state, can beat the world for corn.

There were monstrous pumpkins and squashes. The cows are now getting pumpkin night and morning. That is, many are.

The plum show was very poor. The plum tree should be pruned severely.

The domestic plum should not be in thickets, we think.

If you remember, the best wild plums were invariably along the borders of the swales and the edges of the prairie. They are now on our hundred acres of woods.

The largest onions that we ever beheld were in the fruit hall. A small, very small one, is all we can worry over at dinner.

There was a glorious show of asters. This flower is of the autumn. They were on hands in all their variety.

All kinds of flowers which are now in bloom were present and we enjoyed them very much.

The thrifty madams must be proud of their canned fruit, for there was lots of it on the tables.

In the fall we men folks feel as if we wouldn't care to see fruit for years again. But when winter roars without and snow flies and fills the skies, we wade in on it and bless the ladies for putting up so much.

However there is a criticism which should be made, viz.: The poultry hall was entirely too dark to do justice to the exhibit.

Poultry "needs light" as well as anybody. One cannot have too much light on any subject.

It can easily be seen how profitable county fairs are. They stimulate to effort for excellence, which results in benefits in every direction.

They bring farmers together and thus give opportunities to compare views and they are indeed of great profit in every direction.

The weather was wet, yet we did not see that it subtracted from the attendance.

And when the next comes round
May we be there to see.

IN THE GREAT SOUTHWEST.

The normal school building at Stanberry, Mo., was recently destroyed by fire. Two hundred students attended the college, but only the president's family lived in the building and they escaped uninjured.

A disastrous tornado struck the town of Elgin, Oklahoma, the 15th inst., and did a great deal of damage.

The court house of McDonough county, Mo., was broken into recently and some of the records taken away. Red pepper was scattered along the trail of the robbers to prevent the use of bloodhounds.

Thomas Cantrell, a prosperous farmer living near Thayer, Mo., recently met death in a peculiar manner. While out in the timber with a youth he saw a squirrel. He found a rock and hurled it at the squirrel, but it hit the tree and in rebounding struck him on the head and fractured his skull. Death followed almost immediately.

The farmers of several Oklahoma counties have refused to attend county farmers' institutes on the same dates that circuses appear at the county seats, and Secretary McNabb, of the board of agriculture recently announced the following change of dates, that the farmers may attend both: Norman, November 23d and 24th; Newkirk, November 26th and 27th; Perry, November 28th and 29th; Enid, November 30th and December 1st; Pond Creek, December 3d and 4th.

State game warden of Missouri is seining all the fish out of the lakes, but the game fish, and hereafter there will be no inferior fish in the lakes.

A rural mail carrier of Warrensburg, Mo., has just received news that his wife has fallen heir to a fortune of \$30,000. She inherited her fortune from her uncle.

Mrs. Mannie Staples, of Mangum, Okla., who has six children who have Indian blood in their veins, was recently notified that she had complete possession of lands and money to the value of \$50,000. Mrs. Staples and her children will each receive \$50 per quarter since their birth and a quarter of section of land each in the Choctaw Nation.

Louis Finchler, whose brother Fred, is a well known live stock man of Kansas City, was the winner of a silver mine

An Edge Test

Perhaps your knife, when newly sharpened, will cut paper, but whittle hard wood for a few minutes—then try it. If you want a Knife, a Saw, a Chisel, a Plane, a Drawing-knife, or any edged tool that will hold its keenness through long, hard service ask for the kind marked

KEEN KUTTER

This trademark covers a complete line not only of edged tools, but tools of all kinds. Saws, Hammers, Screw-drivers, Files, Pliers, Glass-cutters, Ice-picks, also Garden and Farm tools, such as Forks, Rakes, Hoes, Shovels, Scythes, Manure-hooks, Grass-shears.

For 37 years Keen Kutter Tools have been sold under this mark and motto: "The Recollection of Quality Remains Long After the Price is Forgotten." Trade Mark Registered.

Via the Minneapolis & St. Louis Ry. Popular excursion Saturday, October 13th. The last chance to visit the Twin Cities at a low rate. Tourist berth rate \$1.00. City Ticket Office, 612 Walnut St.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

STARTING WITH SHEEP.

We have an inquiry from a new subscriber who wishes to know something about sheep. Although an old industry there are many things about their management that are new to those who have not engaged in the business. The sheep industry is just now on a boom and in some respects it is not the best time to start in the business. We do not wish to be understood as saying that no one not now in the business should embark, for we do not mean that. We mean that caution and excellent judgment must be exercised in starting in when sheep are commanding present prices.

The writer referred to above asks whether it would be better to start with a flock of pure breeds or get some common ewes and breed them up. This will depend largely on the person, but as a rule it is safer to start with a few ewes that can be bought at a reasonable price and by the use of good rams one can soon have a high-grade flock. We would not say a word against starting with pure-bred ewes, but there are so many things to learn by the amateur that it is not considered advisable to do so.

In the first place a pasture should be provided with a sheep tight fence and this land should be slightly rolling, or at any rate it should not be wet. A few ewes not older than three years should be bought at the best price for which they are obtainable. A three-year-old ewe will have three pairs of adult or broad front teeth in the lower jaw. Two pairs represent the mouth of a two-year-old, and sheep get one pair each year until four pairs are visible, when they are called "full mouthed." We recommend sheep of this age for the reason that they are then at their best. Young ewes should not be bred and old sheep will sometimes prove disappointing.

The breeding season is now approaching and we wish to say that it is impossible to get a ram that is too good. In no better way can a flock be built up than in the purchase of good rams. If good warm quarters are at hand for the lambing season we would not hesitate to turn in the ram in October, but if such quarters are not available we would not turn in the ram until the first week in December. The gestation period of a ewe is twenty-one weeks, and it will be easy to compute the time of breeding. The ram should be well fed and should be taken from the flock twelve hours of the day, either in the daytime or at night, during which time he should be well fed. If the best results are to be obtained the ewes should be coming up in flesh at the time they are bred. If low in vitality at breeding time the lambs will be weak. If they are coming up in flesh they will continue to thrive and the lambs will be

GUARANTEE

DR. HESS & CLARK

ASHLAND, O.

DR. HESS STOCK FOOD
We guarantee that Dr. Hess Stock Food fed to Horses, Cattle, Hogs and Sheep will increase the powers of digestion so that a larger percentage of the nutrition in the food will be digested and converted into profit; also that it will cure and prevent stock disease.
We guarantee Dr. Hess Stock Food to cost less than a penny a day for Horses, Cows or Swine, and that it will require but one tablespoonful (1-24 of one pound) per day for an average hog.
We guarantee that three pounds of additional live weight per average hog will cost of feeding Dr. Hess Stock Food one month.
We guarantee one pound of additional live weight per average hog will cost of feeding Dr. Hess Stock Food one month.
We guarantee to refund every cent paid us if Dr. Hess Stock Food does not pay for itself many times over besides curing and preventing diseases, and authorize every dealer in our preparations to do likewise.
Remember this farm paper is back of our guarantee.

It Means What It Says

Dr. Hess Stock Food is always sold under a positive written guarantee. If it does not do all we say it will, your money will be refunded. This guarantee is not a "grandstand play." It is not put out with the belief that anyone who is disappointed would rather say nothing than ask for their money back. If anyone is not satisfied with the results obtained by feeding Dr. Hess Stock Food, we ask and expect that they will get their money returned. We issue our guarantee to show that we, who know Dr. Hess Stock Food better than anyone else, believe thoroughly and sincerely in its efficiency.

DR. HESS STOCK FOOD

was formulated by Dr. Hess (M. D., D. V. S.), who is a physician, a veterinary surgeon and a stock feeder of long experience. The prescription was used by him in his private practice with great success before the food was placed upon the market. Hence our faith in this preparation is based, not upon theory, but experience. It is not a condimental food, but a scientific stock tonic and laxative, that enables the system of the animal to convert a larger portion of the nutrition of the food into solid flesh and fat. It shortens the feeding period of any animal 30 to 60 days. It also relieves the minor stock ailments. Feed your hogs Dr. Hess Stock Food regularly as directed, disinfect the pens, bedding and feeding places once a week with **Instant Louse Killer**, and if you have any loss from disease, this positive written guarantee says that your money will be refunded.

100 lbs. \$5.00
25 lb. pail \$1.60

Except in Canada and extreme West and South.

Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee.

Veterinary advice given free. From the 1st to the 10th of each month by naming this paper, stating what stock you have and what Stock Food you have fed, we will furnish you free veterinary advice and prescriptions. Enclose two cent stamp for reply. Dr. Hess 36 page Veterinary Book will be mailed free for giving the above information.

DR. HESS & CLARK, Ashland, Ohio.

Also manufacturers of Dr. Hess Poultry Pan-a-cia and Instant Louse Killer.

Instant Louse Killer Kills Lice

SHROPSHIRE FOR SALE.

CHOICE registered yearling ewes and pure bred unregistered ewes. Also imported and home bred yearling rams. Choice rams suitable for flock headers. Inspection invited. Satisfaction guaranteed.
DANIEL LEONARD & SONS, ADAMS CO., CORNING, IOWA.
80 miles east of Omaha on main line of the Burlington.

come to stay and is found to be a most excellent feed for sheep. Alfalfa will not withstand close grazing and for that reason should never be overstocked. It is better to be able to mow a portion of the field occasionally than to allow the sheep to graze all of it closely.

All things considered blue grass makes the most ideal sheep pasture. Its manner of growth, quality of grass and value as a feed are adapted to the wants of sheep. If kept grazed short it will continue its growth much longer than when permitted to perfect a seed crop. It comes early and lasts a long time. Its being short does not interfere any as a pasture grass for sheep. Sheep will do better on a short pasture of blue grass than on more luxuriant growth of some of the coarser grasses.

Stubble fields are improved by having sheep turned in them before they are fall plowed. They glean and keep down weed growth. Lambs that are turned in cornfields will find a great deal of pasture on the growing weeds there. Meadows may also be grazed with sheep if care is exercised that they do not crop it too closely before winter.

AWFUL ITCHING ON SCALP.

Hair Finally Had to Be Cut to Save Any—Scalp Now in Good Condition—Cured by Cuticura.

"I used the Cuticura Soap and Ointment for a diseased scalp, dandruff, and constant falling of hair. Finally I had to cut my hair to save any at all. Just at that time I read about the Cuticura Remedies. Once every week I shampooed my hair with the Cuticura Soap, and I used the Ointment twice a week. In two months' time my hair was long enough to do up in French twist. That is now five years ago and I have a lovely head of hair. The length is six inches below my waist line, my scalp is in very good condition, and no more dandruff or itching of the scalp. I used other remedies that were recommended to me as good, but with no results. Mrs. W. F. Griess, Clay Center, Neb., Oct. 23, 1905."

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points in Indian Territory, Arkansas and Missouri, and \$25 from Chicago to Pueblo, Colorado Springs and Denver, with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory, which are

PASTURE FOR SHEEP.

A stock man who has never had any experience with sheep is inclined to the opinion that any kind of pasture will be suitable for them. This is erroneous, as there is as much difference in the value of the various kinds of pasture for sheep as there is difference in the texture of the fiber which grows on sheep's backs. Pasture that would be suited to sheep would be wholly unsuited for cattle, and vice versa. The pasturage that is best suited to sheep is grass that is short, sweet and luxuriant. It is not so much a matter of quantity as it is quality. When sheep have a preference they will be seen grazing most of the time near the tops of the hills where the short grass grows. Grass of quick growth after having been grazed is that which is best for sheep.

All sheep owners have observed that when we have a wet season and grass grows rapidly that the flock will graze a certain portion of the pasture and will keep it down close all the time, allowing part of the field to become woody and perfect a seed crop. Grass that has not been closely fed and which has been allowed to become long and coarse will, when grazed by sheep, sometimes cause looseness of the bowels, in which case it will be a good plan to give a feed of dry hay of some kind daily. This trouble does not often come in a dry year, but is most common in wet seasons.

In some parts of the West alfalfa has

CONGO ROOFING

You can lay it yourself. It's not hard work and it doesn't take long. After it's done, its done for a long, long time. Storms won't hurt Congo Roofing, wind won't rip it, heat won't soften it or make it brittle. It can't rot, rust, corrode, creep or leak. It is the "Never Leak Roofing."

Write for sample. That will tell the story better than words.

Buchanan-Foster Co.

442 Chestnut St., Philadelphia, Pa.

ADVERTISING NOTES.

Write Mr. Thomas J. Pugh, Omaha, Neb., for bargains in Texas Panhandle lands, the best in the state.

Two farms, one of 160 acres and the other of 120 acres in eastern Kansas are offered for sale on page 21 of this issue by Mr. P. S. Bennett, of Emporia, Kan. Write Mr. Bennett for full particulars in regard to these farms.

The Bosserman Seed Company announce to the readers of this paper in an advertisement on page 9 that they can ship this season's timothy seed the day the order arrives. They sell either by the single bag or in car lots and give as references any bank or business man in their county. Write for prices.

Mr. E. M. Kieron, of Minneapolis, Minn., is offering an improved quarter section of corn land for sale, located within half a mile of Crandall, S. D., in his advertisement that appears on page 21 of this issue. Mr. Kieron says that this land is in one of the best farming districts in the state, that fifty acres are plowed, and if taken at once he will accept a very low price and sell on reasonable terms.

A fine opportunity for those of our readers who wish to invest in Kansas farms is presented to them by Messrs. I. N. Wells & Son, of Emporia, Kan., in their advertisement that will be found on page 21 of this issue of The Homestead. The farms that they are offering for sale are located in Lyon county and prices and descriptions are given in the advertisement above referred to. They have issued a book on Lyon county which will be sent to those who ask for it.

The J. B. Streeter, Jr., Company, of Larimore, N. D., have an advertisement on page 21 that will be of particular interest to farmers and farm renter readers of The Homestead. This company owns a thousand acres of land in the famous Red River Valley of North Dakota and have large holdings in cheaper lands located in western North Dakota. They are selling these lands on liberal terms and will send an illustrated land book giving full particulars for the asking.

No reader of this paper, who has any interest in knowing more about the Southwest, the country that is developing so rapidly, and of the opportunities for homeseekers in Oklahoma, should fail to read the advertisement of the Commonwealth Land Company, of Muskogee, I. T., on page 20. Here is an opportunity to get reliable information from the owners of large tracts of land, and, if you want to buy, to do so at bottom prices. This company are successors to Messrs. Allen & Hart, formerly of Windsor, Mo., well known as leading land men for years.

California irrigated lands, located in the beautiful Sacramento valley, in tracts of ten, twenty, forty acres or more are placed on the market through an advertisement that will be found on page 21 of this issue by the Sutter Irrigated Farm Company, of San Francisco, Cal. These lands are so situated that there will be the advantage of two railroads, affording good markets for all produce. Four thousand acres have just been subdivided and are for sale on easy terms. They are near the Feather river, where fine hunting and fishing can be indulged in by those who are thus inclined. Write the above company for free illustrated pamphlet, mentioning this paper.

Every farmer is interested in a good stove, and he is also interested in knowing where he can get one at a most reasonable figure. He wants a stove that will make a maximum heat at a minimum cost of fuel. He wants a heater that will heat and a baker that will bake. He will be interested in the new special catalog gotten out and which will be sent to any person asking for it by Montgomery Ward & Co., Chicago. This firm is known for its square dealing and satisfactory prices and those in need of a stove of any kind should consult their prices before buying. Their advertisement appears on page 4. Write them today.

We are starting the advertisement of the Manlove Gate Company, of Chicago, Ill., on page 8 of this issue. As an evidence of the character of the company and the gates sold by them we print the following from the Grange Bulletin, of Cincinnati, Ohio: "The Manlove Gate Company, as reliable and courteous a firm as farmers ever had to deal with, sells their gates direct to consumer at about one-half the former price, which is directly along grange lines. They are now in reach of every home, and as a time-saver no better investment can be made. The gates are of 1½-inch gas pipe, firmly braced and filled with strong twisted steel wire. Trips, same size, are of iron, with crank to connect with throw rod. Pintel of hinge has a cam, into which rod is hooked from lower side. Trips are bolted in cast boxes to frames of 2x8-inch oak. The upper hinge supporting gate has steel ball-bearing action. The gate is indorsed by the best people of the land and is warranted."

KANSAS FARM SNAP.

The Inland Security Company, of Kansas City, Mo., have for sale a 327-acre farm in Morris county, Kansas, at a price that is \$10 below the price of surrounding farms. No farmer will miss it by buying a good Kansas farm, and the Inland Security Company say there is none better in the state of

Cholera is Getting A Good Start

R EPORTS from various sections of the country say that it is raging among hogs now fattening. No telling how soon it may attack your herd. It will pay you to take a little precaution to prevent it.

Your hogs have every chance to escape the contagion through a little attention on your part.

Almost everything depends on the condition in which your hogs are kept.

There's but one explanation of why one man's hogs escape while around him others are dying from the plague.

His hogs escape—

—because their general health is good,

—because their systems are not open to attacks of disease germs,

—because they are kept in healthy, sanitary quarters,

—because disease germs are destroyed and are not given a chance to prey upon the animals.

There is one easy, simple remedy that will surely accomplish all this for you, and enable you to market all the hogs you have been feeding.

It is the remedy that has been doing this for hog raisers for years—a remedy that has been tried and endorsed by leading breeders and feeders, by veterinarians, by Experiment Stations—

Kills Hog Lice

43 Agricultural Colleges Say, Use Zenoleum

Forty-three of these Institutions are now using, and recommending Zenoleum to accomplish the above objects for their hogs.

It will create sanitary conditions for your hogs, make and keep them healthy, destroy disease germs and enable them to avoid contagion.

The question for you to determine is not, what are the merits of Zenoleum; that is settled beyond all controversy. The real question is, can you afford to be without it?

Most all Dealers Sell Zenoleum

One gallon Zenoleum, express prepaid, \$1.50
Five gallons, freight prepaid, \$6.25

If you do not order now, at least write today for our booklet "Piggie's Troubles," 64 pages, which will show you why you cannot afford to be without Zenoleum.

ZENNER DISINFECTANT CO.,

31 Lafayette Avenue,

Detroit, Michigan.

Kansas for the money. It will pay you to read their advertisement on page 20 and when writing mention this paper.

OLD TRUSTY INCUBATOR.

The writer visited Mr. M. M. Johnson, of Clay Center, Neb., recently and was shown through the new office building which has been recently occupied by the Old Trusty office force. The building is very neat and reminds one of the up-to-date city buildings. We will give a more complete description of the building in other issues. The Old Trusty has established itself at Clay Center, and indications point to one of the highest seasons in number of incubators to be used. Mr. Johnson is the father of the incubator business in Clay Center, and his straightforward dealing has made him known the world over. His machine has proven its value as a hatcher and his brooder has given its assistance in raising the chicks. The Homestead stands at the head of the list for number of sales with a large number of sales over any other farm paper. Remember the Old Trusty is located at Clay Center, Neb., and is today the largest incubator concern in the world. See page 19.

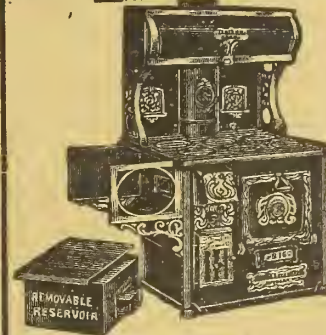

PARAFFIN HINTS FOR THE HOUSEWIFE.

Many of the cares that once made heavier the housewife's burden are vanishing before her increasing knowledge of the wonderful possibilities of refined paraffin as a labor-saver. Paraffin is one of the most useful of all wax products. Its small cost is making it wonderfully popular, and the up-to-date housewife finds it almost indispensable. She preserves her jellies and jams by pouring a little melted paraffin over the top of the contents of each glass. The paraffin in cooling, forms a perfectly air-tight seal that prevents mold and assures cleanliness. It saves the bother of cutting papers and fitting lids, as no other cover is necessary. Another and somewhat similar use for paraffin is for sealing fruit jars after the lid has been screwed on. As every woman knows, a defective rubber, careless handling, or any cause for the admission of air results in a can of spoiled fruit. She can insure every can of her fruit by inverting the can after the lid is screwed on, and dipping into a pan of melted paraffin. A teaspoonful of melted paraffin stirred into the hot starch improves the gloss and prevents the sticking of the iron, while half a cupful of chipped paraffin mixed with the soap on wash-day is a wonderful saver of labor. The highest grade of paraffin is manufactured by the Standard Oil Company for household use, and is sold by most grocers. It is a beautiful translucent wax, tasteless and odorless. It is put up in molded cakes of about one pound each, and neatly wrapped. Full directions for use with each cake.

CAUSTIC BALSAM CURES CANCER, PILES AND OTHER DANGEROUS HUMOR AILMENTS.

"Springfield, Ohio, September 19, 1904. The Lawrence-Williams Company, Cleveland, Ohio: Mr. Lewis Evelsizer, Urbana, R. F. D., a farmer, had a bad cancer on the back of his hand and was about to have his hand amputated. When I first saw it he was on his way to the doctor. I persuaded him to first try Gombault's Caustic Balsam, which he did, and on the second application could rest well at night, which he had not done for weeks. In less than three months he was at his work on the farm. He will certify to this statement over his signature. Then Mr. Jenkins, storekeeper and postmaster at Seth, Ohio, had a bad cancer on his cheek-bone. I saw him at a grange meeting and told him what to do; to use the Caustic Balsam twice a day, rubbing it in for five or ten minutes. In three months it was healed over and is now all sound. These two are all that I have the addresses of just now. I have had Caustic Balsam used on old shin sores. One man had not walked for more than a year without crutches and several pieces of bone had come out. I persuaded him to try Caustic Balsam, and today you would not know he was ever lame. He does not live here now. Then, it is a sure cure for piles, using it with sweet oil. I could go on and tell of dozens of cases where I have induced different ones to use Caustic Balsam. I am sure I have been the means of more than fifty bottles being bought, because I know just what it will do. You can't talk it up strong enough. I wish you success. Mr. R. L. Holman, Ohio State Grange Executive Committeeman in

WILL YOU LET US PLACE A TOLMAN RANGE IN YOUR HOME ON ONE YEAR FREE TRIAL?

We want to prove to you, at our risk in your own home, without any obligation on your part whatever, that Tolman ranges are absolute range perfection, and that one in your home will cut the fuel bill and housework in half. Let us explain to you how we sell direct to you, from our factory at

ACTUAL WHOLESALE PRICES

and thus save you \$15 to \$40 profits of middlemen and dealers. We give with every range a TEN YEAR GUARANTEE, which is as broad and binding as we can make it.

Is it not worth a minute's time and a postal card to send for our catalog, which tells all about this liberal special offer? Our catalog shows over one hundred different styles and sizes of Wood Cook Stoves, Heating Stoves, Steel Ranges, etc., etc. We are making many other liberal offers for the fall and winter months. Are you interested? If so, SEND POSTAL CARD FOR CATALOG "G," NOW.

JUDSON A. TOLMAN CO., 7730 Woodlawn Avenue, CHICAGO, ILLINOIS.

charge of Co-operative Work." The above is one of the many testimonials received every day by The Lawrence-Williams Company, telling of the many good qualities of Gombault's Caustic Balsam. Read the advertisement on page 3.

MAN WANTED.

Messrs. Hunter & Smith, of Beatrice, Neb. the well-known breeders of Jersey cattle, have an advertisement on page 4 in which they are advertising for a competent man or man and wife to work on their dairy farm and among the Jerseys. This is one of the good chances for a sober, industrious man who likes good stock and good pay.

FREE TREATMENT FOR CATARRH.

With the passing of summer many catarrh sufferers will feel the need of treatment, and we therefore call special attention to the announcement made by Dr. Williams on page 23. Write him and receive his book on catarrh and his symptom blank. He will make a diagnosis of your case and tell you frankly if you can be cured. For a score of years the doctor has made a specialty of treating catarrh, and has thousands of cured patients who are living testimonials to the efficiency of his methods. Dr. Williams offers one month's treatment without charge to convince the patient that his methods are effective. Write him today. Consultation and examination are free.

Iowa Climate and Crop Bulletin.

The following climate and crop bulletin is issued by the United States Department of Agriculture, Iowa Section, from the central station at Des Moines, Iowa, for the week ending Sept. 24, 1906:

The past week was quite variable in temperature, and in the distribution of rainfall. In the west central and northern districts there was a general prevalence of cool and wet weather, but in other portions of the state the average temperature was above normal, and the rainfall was generally light. The amount of moisture in the soil is now ample for pasturage and fall plowing, except in portions of the east central and southeast districts, where more rain is needed. The late corn has made good progress toward maturity except in the districts where wet and cloudy weather prevailed. Corn harvesting is in progress in all sections, with an increased acreage in shock in districts where dairying is the leading industry. Many crop reporters state that corn is nearly all safe, but conservative estimates indicate that from 10 to 20 per cent of the crop is not as well matured as could be desired to withstand a killing frost. The crop as a whole will be better and sounder if frostless weather prevails until October 5th, which is about the average date of killing frosts in Iowa. In the southern half of the state the bulk of the crop is now reported to be practically safe. The larger amount of immature corn is in the central and north central districts, where there has been heavy rainfall and a rank growth of stalks.

MEMPHIS, TENN.

Account of the annual convention Brotherhood of St. Andrew of Episcopal church at

the above place the Chicago Great Western Railway will sell round-trip tickets at rate of one fare plus twenty-five cents on October 15th to 18th, with return limit of October 30th, and on payment of fifty cents additional, until November 30th. Best service and connections. Inquire of E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

OUR HOME DEPARTMENT

ALL communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

AMONG OURSELVES.

At no time since I took charge of the Home Department have there been so many unsigned letters as during the last month or two. When, a few weeks ago, I stated that letters intended for publication must be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith, I thought there would be an end of the matter. But still the anonymous letters keep coming. And some of the friends who sign their names evidently do so under protest; they say it is embarrassing to have the neighbors know and talk about their writing. Let me say that there is no need for the neighbors to know. Writers may choose any name they please for publication. Their real name is for me alone, if they so desire it, and since this is so I cannot understand why anyone should object to sending their name and address. At the same time neither their nor my understanding affects the situation. The rule is a universal newspaper rule, and to avoid misunderstanding, it will in future appear in the notice at the head of the Home Department. Let me add one other word. Where you do not wish to use your own name, choose a pen name rather than initials, that you may seem to the circle a flesh and blood person and may be remembered, as is Aunt Ruth, Celeste, Aunt Belle, and others who are loved Among Ourselves, as they could not be had they come among us as Mrs. R. R., Mrs. H., or Mrs. S.

As those two younger children are in school by this time if they are to go this term, John's Wife must have decided on plans ere this, but, as the question she asked is one which is constantly recurring in farm homes, and "An Interested One" looks at it wisely, we shall give the circle the benefit of the word she prepared for John's Wife:

I want to say to John's wife, don't sell the farm; the home in which you have reared your children. You will need it so much more when the children are away—a place where every spot is familiar and everything your friend, whose value cannot be counted in dollars and cents. And then, when the children are weary of the hustle and worry of the world and their work they will be so happy to have the old home to come back to, if only for a little while, and possibly after a time some one of the children may weary of their profession and decide to perpetuate their old home. Perhaps a year away from the farm would decide for you. Then, on the other hand, good help can be secured by building a tenant house and hiring a married man, who at the same time he is assisting you with his family at home. I am also John's wife and have boys and girls growing up. John's Wife, in speaking of her

children, says people say of their eldest that he is not a lawyer only, but a Christian gentleman, also, and I cannot resist saying to parents, "Are you setting an example for your children that you would like them to follow, or are you courting sorrow for your old age?"

Mrs. McKerie has come Among Ourselves today, to answer her own questions. Let us hear what she has to say:

I have waited some time to get an answer to the questions I asked, but so far have not received any definite answer. I think I can give a satisfactory answer in one word, and that is selfishness. It is selfishness, pure and unadulterated that causes "some men" to think and talk the way they do. Mrs. Aggie Miller would rather I had said "some men" instead of men. Please excuse me and I will try and not offend again. I realize that there are some men who are unselfish and devoted to their wives and families, and I congratulate her on having such a husband. But I will have to take exceptions to the way she talks of Susan B. Anthony. She asked who has done the most for prohibition, the mother who has raised the man who never takes a drink or the old maid who casts her vote for prohibition. All honor to Susan B. Anthony, I would rather have been Susan B. Anthony than to have been the mother of a dozen men who did not drink. I would rather have shaken hands with Susan B. Anthony and Abraham Lincoln than any other man or woman I ever read about. Abraham Lincoln emancipated the slaves and Susan B. Anthony did what she could to emancipate women. "Do you ever lose hope?" was asked the silver-haired warrior. "Never," she answered stoutly. "I know God never made a woman to be bossed by a man. You know Lincoln said, 'God never made a man good enough to govern other men without their consent.' I say God never made a man good enough to govern any woman without her consent," to which I can give a hearty Amen. Abraham Lincoln and Susan B. Anthony have both passed into the great beyond, but "their souls are marching on."

It is a little curious to me that this should be the first reference to that somewhat extraordinary speech of Mrs. Aggie Miller's. Imagine how funny it would be to hear a man say: "I'd sooner raise one sober, truthful boy than have been George Washington." Surely it is no disparagement to motherhood to admit that such service as Frances Willard and Susan Anthony rendered to their day and age is beyond and above that rendered by their sister women—just as Lincoln's service is above that of the ordinary father, who trained his son to abhor slavery. Let us not be foolish about motherhood, sisters. It used to be almost the only place of honorable service open to women; let us be glad that it is no longer so. Let us rejoice that, in our day it is permitted to women here and there to mold the thought and influence the morals not of one family, but of a great nation.

After Mrs. McKerie seems to be the right place to introduce Uncle Josh, who comes to answer questions put to the men by Mrs. Ed Streeter:

Why do men pretend to have contempt for women, etc.? Well, this is a difficult question for gentlemen to answer. Gentlemen, as a rule, do not pretend to have contempt for women. Men who do not treat their wife, mother or sister as an equal are in my opinion relics of barbaric times. Second, why do they hate to go to church as a general thing? In reply to this question would say, possibly they are obliged to wear their last year's "bonnet," or perhaps they have not had a new suit of clothes for the last six or eight years, or have been working hard all week, or are too lazy, or a dozen other excuses, but probably the real reason is that they are not followers of Christ and therefore do not feel interested in the spiritual welfare of themselves or of others. Also, possibly the church or place of worship is located some miles distant, yet I have known young men to walk five miles to church for the pleasure of seeing their best girl home "after the services." Third, why do they "growl" if we want them to clean their boots of mud when coming into a clean kitchen, and find fault if we complain of their leaving old clothes, hats or boots lying anywhere for us to pick up? Well, some are peculiar creatures. May be they were never taught otherwise; possibly they are possessed of traits very much akin to the animal which, if placed in a parlor, would break out and seek a mud hole. In conclusion I would like to say to the men, be gentlemen, treat your wife, mother or sisters as your social equal at least. And sisters, as you would that they should do unto you, do ye even so unto them, then I am sure there will be no more Aunt Ruth's methods of handling men. How thankful I am that my home is not located under that roof, that is, provided Aunt Ruth really intended her remarks as we interpreted them. The training of men is almost entirely in the hands of the women and the hand that rocks the cradle is the hand that in a great measure rules the destinies of men. Yours for equal rights.—Uncle "Josh."

Mrs. Streeter may not be satisfied with those replies to her questions, for Uncle Josh is something of a caustic, but I venture to say the circle will be glad to have this man visitor come again as soon as he likes.

Men sometimes profess to come Among Ourselves with some fear and trembling. If Mr. C. E. K. is feeling uneasy, Uncle Josh can assure him that there is nothing to be alarmed about:

What a beautiful little sketch of an ideal home is that drawn by Mrs. Juanita. Sym-

pathy for each other, expressed in little kindly acts, does make life richer and fuller, and charity and patience for each other's shortcomings help to smooth the rough places, for as Whittier has said, "In mutual sufferance lies the secret of true living." How enjoyable it is, after the day's duties are done, for father, mother and children to sit in the twilight, while "silently one by one in the infinite meadows of heaven, blossom the lovely stars," and while they listen to the various voices of the night, talk over the past, present and future. What can be more delightful than good health and contentment in a good country home?

That letter of Mrs. Juanita's was bound to appeal to the men. I am glad to have one speak for his fellows, speak eloquently too. And then, that question he asks—what a good sound it has this year of fine crops.

Some of the best letters which have ever been addressed to this department are being called out by the discussion provoked by Aunt Ruth—by the way, the prize is certainly hers. For this week I have chosen a few which bring out points not heretofore presented and also a few which rehearse points already made. Mrs. Amy looks at the matter from individual experience and so speaks for a considerable number:

I have been reading with much interest the letters in the Home Department and have started to write one several times, but never got one finished. Just now there is a great deal being said about the women folks working outdoors. I want to say I think it no disgrace for a woman to work out doors if she uses common sense and reason. So often they try to do a man's work, and I don't think many women are able to do it. If I had a girl she should certainly learn to milk and such light work, but if there are half a dozen boys around there is no need in a girl doing such work all the time. I learned to milk when a little girl and did it until I wanted to put hard work into music. We all know milking stiffens the fingers, so if a girl wants to make a musician of herself she can't milk. I then taught music long enough to pay for a piano. The last few years we have had lots of cows to milk and I always help—milk from six to eight twice a day. I would rather do it than have a hand around. At the same time I aim to raise garden and chickens enough to keep up the household expenses; so I put in the most of the summer, any way, out doors. Of course my house work is sadly neglected sometimes, but I do the best I can. I do all my sewing and care for two little boys. I am not strong enough to work with machinery very much, but I always cut seed potatoes, plant and help pick up, shell seed corn and any other light work I can do at the same time. I very seldom get a bucket of water and have yet to fill the boiler for the first time on wash day in the six years of married life. And so we work together and hope some time to have a home of our own. If I did not help all I could I would feel I was not doing my part. At the same time I think I do enough for a woman of ninety pounds.—Mrs. B.

I weigh something over ninety pounds and I am something of a worker, but I confess I could not begin to keep pace with Mrs. Amy. I wonder if she may not need to think over what Reine has to say on the subject:

I have been especially interested in the subject of out-door work for women as dis-

cussed Among Ourselves, and would like to add my mite to the general fund of information. Some have spoken of the amount of heavy work done by foreign women, and when one writer narrowed the "foreign" down to "German" it gave my thoughts a new impetus. Being myself of German descent it occurred to me that we might be surprised if we asked the women in question what they thought of their mode of life. Memory took me back ten years or so, and recalled a remark made by a German lady, past seventy at the time, to the effect that if she outlived her husband and married again she would never marry a German. They made their wives work too hard, she said, harder than was right. She was almost six feet tall, straight as in her girlhood, and free from disease. Not more than three years before the above remark was made I saw her carry a washtub full of potatoes, on her head, from her home to a neighbor's three blocks away, apparently without the slightest exertion. With physicians beginning a crusade against the more strenuous athletics in girls' colleges, with examples among our acquaintances of women who are broken in health and spirits from too much heavy work in early life, with the knowledge brought home to us by personal experience that the home must suffer when the housewife goes to the barn lot or field to work, wouldn't it be well for us to decide that this is a question for individual judgment to determine? It seems to me that this, like the question of the size of the family, must be decided by each husband and wife for themselves. If he loves a pretty, attractive home, good music, a cultivated feminine intellect, likes to see his wife wear pretty house frocks and do her hair becomingly, he will be determined to keep her away from all the field and barn work. Being a reasonable creature he can figure it out in a few minutes that only so much can be accomplished in the course of the day by one pair of hands, and that she cannot attend to the purely feminine duties of homemaking while doing a man's work in the field. This is our solution of the problem for ourselves, and the use of the word "ashamed" in connection with this subject reminds me of the one time when I went against my husband's wishes in this respect and planted a few acres of corn. I believe it is supposed to be the woman who will feel "ashamed," but this woman wasn't. She was as delighted as a child with a fascinating new game to play; her husband was ashamed, though, and worried all the time for fear someone would see her doing such unsuitable work. I love to see things being done, and done in season. Nothing delights me more than to get grain in the ground in good time, to cut weeds wherever they make a place unsightly, to have trim fences and clean corn fields all about. But I cannot stand even such work as cutting weeds with a hand sickle for any length of time, so I think it foolish to attempt to gratify my love of helping things along in a hurry. Still this same love of harder work makes me charitable enough to believe that where there are several daughters in the home and there is not enough housework to keep them all employed, it is right to allow them to help outside, always with the understanding that father and mother will keep a watchful eye not to allow them to injure their health and that the daughters themselves are reasonably strong. After all, good judgment must determine this question more largely than any hard and fast rules.

Reine has said a number of things I meant to say, said them very well too. I commend her remarks to every woman, and also to every man, here Among Ourselves. And now let us hear Mother Eva:

I was asked to give my idea of girls' labor

Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

W. L. DOUGLAS, Dept. G, Brockton, Mass.

on the farm, or in other words, what I deemed the proper way of bringing up farmers' daughters. A short time ago someone wrote about a girl doing field work as a means of promoting health. I admit that pure, fresh air is all right, both for girls and boys, but I disagree with those who deem it necessary to mount a plow or any other farm implement in order to catch a breath of air or to bring color to the girls' cheeks. I was born on a farm and have spent forty-five years there, and I know something of the health of girls and women who try to take the men's places in the field. They grow old fast and a goodly number are now in very poor health; in fact they cannot enjoy life. Some have paid out a good many dollars in doctors' bills which could have been avoided if the girl had only kept her place. Please do not misunderstand me, for I may not make it plain. I wish to say that I believe in all girls being taught to work out in the open air, but in a way that will not injure their health. If the girl attends school for nine months, please tell me if the remaining three months should not be spent in the home or a short pleasure trip. We have three girls, aged fifteen, ten and eight years. They are my only help and we do our own sewing, cooking, canning fruit, besides marketing a goodly number of tomatoes and strawberries each year. The three girls sold enough out of the garden last year to pay for a term of music lessons. All three take music lessons. They can make bread as well as anyone, and when it is cooked can play a piece on the piano. They can do any kind of housework and are in good health. If the Creator had intended girls to work in the field, then He must have expected men to keep house, for it is an old, but true, saying that we can live without books, but civilized men cannot live without cooks. Pray tell me when the girl that rides the plow can learn to cook or mend or tidy up a room or practice a lesson on the piano?

These views of a mother of daughters are worthy of careful consideration by all mothers of girls.

It looked for a little time as if the advocates of field work for women were to have it all their own way; it was then that Mrs. Van felt moved to support the other side:

I have been reading the Home Department letters in silence, but in the August 30th issue there were so many letters in favor of field work for women and so few supporting Aunt Ruth's views, I felt I ought to contribute my views on the subject. If a woman does her household duties as they should be done, and raises chickens, she will not find time to work in the field. How true the old saying, "Man may work from sun to sun, but a woman's work is never done." That doesn't include field work, either, for that is not woman's work. And let me say to Mrs. King, of Michigan, neither is dish-washing a husband's work. Again I say, if a woman works out in the field she neglects her house work.—Mrs. Van.

Some women will resent Mrs. Van's closing remark, others will admit its truth; there are others who think that if it is not true it should be. And now I think that we have had enough for one day. This discussion will be continued next week, when we shall have some of the best things yet. One of the letters in store is from a fifty-three-year-old woman, sad of heart and broken in health; one from a happy wife who is shocked at the tone of Aunt Ruth's remarks; and one from Mrs. A. B. Cornelius, who brings her usual ability to the discussion of this subject.

Notice is hereby given that the Editorial sanctum will be reopened next week.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Take joy home,
And make a place in thy heart for her,
And give her time to grow, and cherish her;
Then will she come, and oft will sing to thee
When thou art working in the furrows; aye
Or wedding in the sacred hour of dawn.
It is a comely fashion to be glad.
Joy is the grace we say to God.
—Jean Ingelow.

"It is better to whistle than whine."
Life is so short that we should try to make

the best of the time allotted to us. It is hard, though, sometimes, to try to be cheerful among so many "ups and downs," especially when it is "downs;" but we do know that when storms of sorrow rise we should submit to the will of the One higher than we. Like the little children say, "Let us play" as though we were happy, and by and by we can become more cheerful in reality.

CHEESE MAKING AT HOME.

If many farmers know how easily and inexpensively cheese can be made on the farm more families would enjoy this nourishing food. Here are the directions, and, if followed, will make a delicious three-pound cheese, good after four weeks, and better with age:

Take five gallons of sweet milk, cream and all, if it has set a while, and heat until the milk is warm. Dissolve one No. 2 rennet tablet in one-half teacup of cold water; stir well into the milk and add one tablespoon of salt. Remove from the fire and let stand from three to seven minutes, when it will be like very thick clabber. As soon as it becomes clabber it is ready to break up.

Then with a hand spoon or some other article stir the clabber or curd, as it is now called. This separates the curds from the whey. Let it stand and the curd will settle to the bottom; then with the hands press the pieces into a mass or ball. Slip the lump of curd into a sack, take out and hang up to drain; this will be in about one-half hour. If the curd is broken again during the time it is draining cut the curd in small pieces, say an inch thick, put in a crock and pour over it hot (not boiling) water. Stir with a spoon and let it set until it seems tough like leather, which will be in about three minutes. Take out of the water and again cut in pieces, as it has probably run together again. Salt as for butter and it is ready to press.

Take a gallon apple or sirup can, either round or square, and melt off the top and bottom; this is to be the press can. Make followers of inch boards to just fit inside the can. Set the can over one follower and line the can with a well-greased cloth, long enough to fold over. Pour in the curd, put on the cloth left to fold over and lay on the follower. Set where it can drain and place a fifteen-pound weight on top. Leave twenty-four hours, after which remove from the press. Take off the cloth and grease well with butter. Lay on a plate in a screen box. Grease and turn every day until ready to use. If the cheese molds scrape well and grease again. If it cracks dampen a cloth in vinegar and wrap about it once a week.

TO MAKE FRAGRANT TEA.

Use a china or agate-lined tea pot. Heat it by pouring in boiling water, or by standing on the back of the stove. When hot put in the tea leaves so they will get heated through before the hot water is added. The water should be brought quickly to a boil, and used as soon as it can be, for it becomes dead and valueless when boiled long.

As soon, then, as it is thoroughly boiling, pour it upon the tea leaves, which may be of any choice variety preferred. The quantity to be used depends wholly upon the strength desired. One-half teaspoonful of tea leaves to one cup of water is sufficient for many persons.

The water then must be thoroughly boiling when it is poured on, and must never boil again. Steep gently for five or ten minutes, and the result will be a perfectly delicious cup of tea.

Remember that its delicate flavor will be entirely destroyed if the tea gets to boiling.

JAPANESE EGGS.

Boil six eggs for fifteen minutes and drop immediately into cold water. Pour this off and crack each shell before starting to re-

"A Kalamazoo Direct to You"

ROYAL STEEL RANGE
For All Kinds of Fuel.

Examine our complete line of stoves and ranges for all kinds of fuel. move the entire shell, though this must be done immediately afterward. Boil one cup of rice carefully, and when full and flaky drain and heap in the center of a large platter. Cut the eggs through the center into halves and press them down into the rice. Pour over all this one cup of cream sauce made from one cup of milk, one tablespoonful of butter and one tablespoonful of flour. Tomato sauce may be used if desired instead of the cream sauce.

EXCELLENT LIGHTNING YEAST.

Boil twelve medium sized potatoes and mash fine. To this add three tablespoons of flour, three of sugar, one of salt. To this add two quarts of boiling water and mix; then add one quart of cold water. Add three cakes of good yeast, thoroughly soaked in warm water. Put in glass cans and if kept in a cool place will keep as long as it will last. Use one cup of this yeast with an equal amount of warm water for each loaf wanted.

A SMILE.

While out walking with her father one evening little Margie became very tired and he was obliged to carry her. "Am I very heavy, papa?" she asked.
"Indeed you are, pet," he replied.
"Well," continued Margie, "you ought to be awful tickled that I ain't twins."

to the other apostles, showing the genuineness and equality of his apostleship and consequently his authority as a Christian teacher.

He affirms the office of the ceremonial law to be that of the special slave who brings the child to the schoolmaster. When once the law has brought one to Christ, the Master-Teacher, it has no further function. It vanishes away. To hunt up the law again and magnify it is to desert and be disloyal to Christ. It is to exchange liberty for weak and beggarly elements and bondage. He invades the territory of the Judaizers themselves, when he affirms that Abraham was justified by faith and not by works, as he lived before the institution of the ceremonial law, and therefore could not have been justified by it. All, therefore, who are justified by faith, whether Jews or Gentiles, have Abraham as their father. In his allegorical reference to the two Jerusalems, he surpasses even himself. Those who persist in following the ceremonial law prove themselves descendants of the bondwoman Hagar, who answers to Jerusalem, which is in bondage with her children; but those who assert their independence from the ceremonial law are the true descendants, not of Hagar, the bondwoman, but of Sarah the free. And Sarah stands for that Jerusalem, which is superior to the literal Jerusalem. She is free and the mother of the free.

The Epistle to the Galatians is pre-eminently the Epistle of Freedom. Eleven times this word "liberty" rings out like a bugle-blast to the soul. The apostle will not brook the idea of his converts going into servitude to the ceremonial law. Having begun in the Spirit, he will not supinely witness their futile effort to finish in the "flesh." He warns, entreats, admonishes. "Stand fast in liberty." "Be not entangled with the yoke!" "Ye have been called unto liberty!" "Walk in the Spirit!" "Neither circumcision nor uncircumcision avail anything!"

Analysis and Key.

1. St. Paul. Dynamic. Epistle to Galatians illustrative. Still potent.
2. Cause of writing. Galatian converts perverted. Epistle written to recover them.
3. Heresy—Survival and obligation of the ceremonial law.
4. Argument. Course of converts challenged. Apostleship established.

The International Sunday-School Lesson.

Third Quarter. Lesson XIV. Gal. V, 15-26; VI, 7-8. September 30, 1906.

Temperance Lesson.

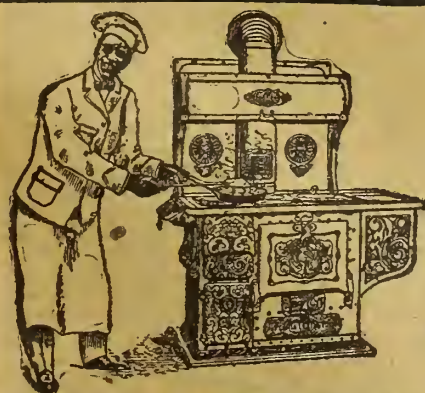

St. Paul's "veins ran lightning." Two millenniums afterwards, we yet feel the shock of it. That he is both illuminative and dynamic, the Epistle to the Galatians is evidence. It can never be a literary curio, shelved in the oblivion of

a library. It is living and potent still. It is highly condensed, but in its terse terms contains the whole of religion, its very sum and substance.

The apostles' converts in Galatia had been tampered with. Warm-hearted and enthusiastic, so devoted to their spiritual Father that they were ready to pluck out their eyes for Him, yet in His absence they had allowed themselves to be bewitched and removed to another gospel. In order to recover them, St. Paul writes one of the most polemic and hortatory epistles that ever came from his pen. Incidentally it is also photographic of himself, and in its spirit and conclusion wholesomely practical.

The heresy to be combated was the affirmation of the survival and obligation of the ceremonial law. A little leaven of this had leavened the whole of the Galatian church. The genuineness of St. Paul's apostleship had been discounted in order that the authority of his teaching might be destroyed. Under the spell of this new gospel, which was no gospel, Gentile converts were submitting to circumcision, and all were observing "days and months and times and years."

St. Paul's argument is invincible; his method persuasive. His first note unequivocally challenges the course and conduct of his converts. He then enters into a minute account of his personal relation to the doctrine of Christ and

8. Conclusion. Exhortation.

The Teacher's Lantern.

The paragraph assigned contains the whole epistle in epitome. It illustrates its style and spirit, and holds the substance of its thought.

Liberty is not to be degraded into license. It is no cloak to cover selfish and fleshly deeds. On the contrary it is to be used as means of unselfish service of others.

The glory of religion is that its substance is not meat or drink, the externalities of sacrifice and oblation, but in righteousness, a subjective condition which will express itself in right conduct.

That this subjective condition is evolved painfully by courses of intelligent self-denial and discipline, the apostle here teaches under the figure of a contest between "flesh" and "spirit."

There is a ceaseless battle of the "I's," the ethical ego and the sensuous ego, which St. Paul pictures minutely in the seventh chapter of Romans.

Temperance, in the ultimate analysis, is the ascendancy of the ethical and spiritual ego over the sensuous ego. It is the soul in the saddle. It is the subjection of all animal instincts to the rule of the spirit, so that they will never be gratified selfishly, to the harm of others, and with an intrusion upon the rights of others.

St. Paul gives a hideous catalog of the effects of the supremacy of the sensuous ego. They are "manifest." They can no more be denied than they can be ignored. The list is not scientifically formulated. The enumeration is not proposed to be technical because the terms are not mutually exclusive. It is for practical purposes.

The result of the ascendancy of the spiritual ego is just as manifest. One is discord, the other is harmony; one is night, the other day; one is hell, the other heaven.

The reign of law is not more universal and inviolable in nature than it is in human nature. Ascendancy of the spiritual ego will ultimately evolve the saint. Ascendancy of the sensuous ego will make a devil. There can be no switching or crosscutting by which the sensuous ego shall shun hell and glide into heaven. "Be not deceived. God is not mocked!"

Dressmaking and Millinery—No. 535.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

While many white waists will be worn during the present and the coming season these will not prevail to the exclusion of waists of dark, heavy materials to the extent that they have for some seasons past. The favor of the costume of one material, or of colors that harmonize has had much to do with this change, while, too, perhaps, the long vogue of white has itself suggested that it is time for a change. The plaid waist will perhaps lead as a separate waist, and this is usually of silk, but the heavy cottons and the light weight flannels that were in favor several seasons ago are again with us in a variety of weaves and colorings. Made up in these materials the fancy is usually for the plainer models, pleats and gathers being used only on the fabrics that lend themselves readily to these. Some of the plain designs show only applied trimmings, straps, stitched bands and the flat braids. Also for those as well as for the whole cos-

tume there are the "pull braids," so called because of the thread on one edge by means of which one may shape the braid into

[5469 Boy's Sailor Suit, 4 to 12 Years.] curves, loops, etc., and thus apply according to fancy.

For the small boy fashion dictates few changes, only now and then adding a new

[5458 Girl's Dress with Guimpe, 6 to 12 Years.] touch to the designs of his garments, yet by making changes as to materials, mode of trimming, etc., variety is afforded so that

Why "BUFFALO CALF" Shoes Outwear All Others

Most new shoes you get have to be "broken in." They "draw" your feet and make them smart and burn. That's because the leather is "stiff" and full of tan bark juice and acid that should have been worked out before it was out.

When cattle are three years old; age wrinkles begin coming around their necks. Hides from such cattle are stiff and need powerful chemicals to tan them. We buy all the hides from which "Buffalo Calf" shoes are made before they are tanned, and get only those from young cattle. We take them only from "inside raised" cattle, not over 3 years old, killed in July, August and September. Outside raised cattle get age wrinkles sooner than "stable kept" cattle, and those slaughtered in Winter and Spring have hides with long hair which makes their fibre "loose" and "flaky." Much of the toughness of any hairy animal's skin goes into its winter coat. That's why we buy only "short hair" hides, and have them tanned by our own special Dongola process which sets the fibre together and adds toughness and wearing quality. And, after tanning, instead of softening the leather by artificial greasing, leaving the tan juice all in, we "boack" it and work it by hand just as Indians do buckskin. That's why Buffalo Calf Shoes are soft and pliable when new, and always stay so. They will not "draw" your feet and, if you wet them, they do not harden up, but will dry out as soft as before. The soles of Buffalo Calf shoes are made from Hemlock tanned Texas steer hides and the heels, counters, insoles and slipsoles are all solid leather. We do not use any "horn fibre" nor "moulded" counters.

The shoe you see here has vamp and upper all in one piece—no seam to rip. The back seam is "cylinder fitted"—extra strength there. The vamp goes clear to the sole over the toe so that, if your toe cap wears through, the vamp toe is still there. We line our shoes with heavy twisted duck—one piece linings—no inside seams with edges to chafe and blister your feet. Ask your dealer for

If your dealer does not have "Buffalo Calf" shoes, write us and we will send you one of the little Buffalo Calves, so you can test the leather and tell him about it. The toughness of the hide we buy and our way of tanning and handling the leather cause "Buffalo Calf" shoes to outwear all others. They stand the hard knocks. And they do not cost as much accordingly as inferior shoes. We make all sizes—men's, youth's and boys'.

Bentley & Olmsted Company, "The Western People," Des Moines, Iowa

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Value of Canning-factory Refuse.

To the Editor of The Homestead:

You submit to me the following communication received from one of your subscribers:

I am about to build a feeding plant close by a large sweet corn canning factory. Can get all the cobs and shucks I can use for the moving. What do you think of such a venture? I will build a large silo, and want the feed for making beef and pork. What would be the feeding value of silage from the sweet corn cobs and shucks? It strikes me that this ensilage with corn and cottonseed meal would make a splendid ration for feeding cattle. Please give me what information you can on this subject.

So far as the writer can learn, no definite tests of such material as silage have been made. The feeding value would depend upon the closeness with which the corn is shaved from the cob, the maturity of the corn used, amount of waste or cull ears, and the per cent of water present in the mass. There is no question, however, but that such silage would be of good feeding value. Pea vines and the pods have been used for silage with excellent success, and in one instance, were not even stored in a silo, but were merely tramped into a compact pile. This feed has, when ensiled, been valued at from \$2 to \$3 per ton when clover hay was worth \$6 per ton.

Silage from a sweet corn cannery would be less valuable. The husks are, of course, the richest part of the fodder. The cobs from mature corn do not differ greatly in digestible nutrients from wheat straw, and it is probable that the cobs from the cannery would be richer, as they contain some nutriment which would pass into the grain as the corn ripened. At a very conservative estimate, such silage should be worth \$1.50 per ton, and it may prove to be worth more.

If the output of refuse is large, it

will certainly justify the expenditure contemplated. If possible, the silos should be so located that the refuse may be elevated directly into them. Prudence would counsel the drawing of a ten-year contract for the refuse before the plant is built. Corn and cottonseed meal cannot be improved upon in such a feeding venture. The ensilage will take the place of grass for the steers, and will probably give nearly as satisfactory results. The silos must be built of such size as to permit of a rapid enough lowering of the surface to prevent spoiling in hot weather. Silage is of but moderate value in hog feeding, especially in the case of fattening hogs.

In conclusion, would advise your correspondent to tie up the cannery in a ten-year contract for the refuse, to build the silos where the cobs and shucks may be elevated directly into them; and to use, with the silage and grain, a moderate ration of clover hay—eight or ten pounds per head per day.

Wayne Dinsmore.

Iowa Agricultural College.

LIVE STOCK SALES

M. L. Logan's Sale of Short-horns.

Mr. M. L. Logan's sale of Short-horns held at his farm near Lincolnville, Iowa, on Tuesday, September 18th, was not as well patronized by breeders as the quality of the cattle merited. The railroad connections for Lincolnville are not good from eastern and northern points, and this undoubtedly kept several away, as was the case with a prominent Illinois breeder whom the writer met at another sale two days later. These disadvantages coupled with the drought which had been more severe in Mr. Logan's vicinity than in most parts of the country afforded those who did attend, one of the best opportunities of the year to buy good Short-horns and at prices that will show the buyers a nice profit. Mr. Logan deserves much credit for the cheerful spirit he maintained throughout the sale. Everything was sold with the exception of a heifer that had gotten out of condition and an average of \$105.90 was made on Mr. Logan's cattle. A few head consigned by a neighbor are not included in the list and the averages. Mr. H. E. Hayes, of Olathe, Kan., secured the Scotch Victoria cow, Victoria of Meadow Farm 4th, at \$330, the top price of the sale. Mr. Hayes also secured a great bargain in the Marsh Violet cow, Violet of Maple Hill 6th, a daughter of Gallahad, at \$190. The second highest priced female was the yearling Violet heifer, Ladybud, she selling for \$255 to Mr. A. J. Wisdom, of Bloomfield, Iowa. Mr. Wisdom also bought the ten-month-old Scotch Aconite bull, Scottish Archer. This, too, was one of the bull bargains of the year and Mr. Wisdom is to be congratulated on securing so good a bull to head his herd. The top bull of the offering was the yearling son of Victoria of Meadow Farm 4th, Baron Victor, he selling for \$255 to Mr. W. E. Cutler, of Corydon, Iowa. Messrs. Owens Bros., of Homestead, Iowa, were good helpers at the sale and at the same time helped themselves. The cow, Cherry Volumnia 2d, got by Imp. Spartan Hero, and out of a daughter of Imp. Craven Knight, went to this firm at \$180. Mr. Owens after buying her told of his having sold her some years ago in Chicago at \$1,350, and that she was now to return to their farm for the balance of her natural life. Short-horn breeders who were in need of good females missed in this, Mr. Logan's first sale, an opportunity such as is only found now and then, and an average of \$125 on everything sold would have been about what Mr. Logan should have received and when he again announces a sale it is to be hoped he will receive prices that are nearer in keeping with the quality of the cattle found at the Caled Stock Farm. Col. George P. Bellows and Harry Graham conducted the sale in a very satisfactory manner and worked hard for Mr. Logan's interests. A list of all sales of over \$100 follows:

Lot.	Price.
2 Victoria of Meadow Farm 4th, and b. c., H. E. Hayes, Olathe, Kan.....	\$330

Andrews' Dispersion Sale of Angus.

The Angus dispersion sale of Mr. W. W. Andrews, at Maryville, Mo., on Monday, September 17th, could well be considered a success. Iowa, Illinois and Missouri furnished the buyers and competition was lively on the better and more fashionably-bred lots. The top of the sale was \$775, paid by Mr. Stanley Pierce, of Creston, Ill., for Lot 6, Imp. Eudora of Eccleshall. Mr. Pierce also secured Lot 2, Blackbird Irene, at \$525. Mr. Oliver Hammers, of Malvern, Iowa, was a good buyer and secured the Prince Ito cow, Woodland Blackbird Pride, at \$550. Mr. Hammers also secured the top under year heifer, Eudora Erica 2d, got by Messrs. C. D. Hooker & Sons' grand breeding bull, Eraste. The price paid was \$380. Messrs. Robinson & Chappell, of Maryville, Mo., and Messrs. Wheatley & Ward, of King City, Mo., were good buyers and liberal bidders on the better females. The top on bulls was \$300, paid by Mr. G. W. Fink, of Maryville, Mo., for Lot 5, Blackbird Ento, got by Elder Erica, and out of a daughter of Prince Ito. Mr. Fink should, harrington accidents, have in another year one of the great yearling bulls of the breed. The herd bull, Black Magic of Home Dale 2d, went to Messrs. Don Carlos and Martin, of Greenfield, Iowa, at \$205. Twenty-eight lots were sold at an average of \$223.40. The consignment of ten head from Messrs. Hooker & Son's herd averaged right at \$100, which was not what the cattle merited. Colonels Igo and Bellows did the sell-

ing. Following is a list of all sales of \$100 or over:

The Wisner Short-horn Sale.

The first public sale ever held in the new sale pavilion at Wisner, Neb., was pulled off at that place on September 20th, when Messrs. S. S. Hall, Pender, Neb.; J. R. Mansfield & Son, and Theodore Serck, of Wisner, Neb., and Jno. O'Kane, of Bancroft, Neb., sold forty-nine head of Short-horns. The weather man did all he could against the sale by allowing it to rain for almost four days before, thereby making it impossible for people from a distance to get there. The M. & O. railroad did not run for about three or four days, and therefore prevented many from attending. Notwithstanding these many obstacles were against it, they nevertheless had a splendid sale. The forty-nine head averaged \$109.28. Mr. Hall sold thirty head at an average of \$113.08 and Messrs. J. R. Mansfield & Sons sold eight bulls at an average of \$132.18. Mr. Serck's ten head averaged \$85.50. The highest price of the sale was \$260 for the yearling bull, Nonpareil Count, consigned by Messrs. Mansfield & Sons. The highest priced female was Eglantine, a four-year-old cow belonging to Mr. S. S. Hall, and she sold for \$230. The sale on the whole was a decided success and the contributors were well pleased with the result. Col. Geo. P. Bellows cried the sale, assisted by Colonel McGuire, the local auctioneer. Below we list those selling for \$100 and over:

S. S. HALL'S CONSIGNMENT—COWS.		
Miss Phyllis Dudding, three years, A. J. Clark, Wisner, Neb.....		\$130

\$59.50 **FREIGHT PREPAID**

30 Days Free Trial **Guaranteed and Backed by a \$25000.00 Bond**

Wagon Box Manure Spreader

FITS ANY TRUCK

The Only Successful Wagon Box Spreader that Fits any Ordinary Farm Truck.

Sold direct from my factory to you. That's the way I sell them. Built on honor. That's the way I build my spreaders. Not how cheap but how good, is the principle on which I build the Galloway spreaders. After I have made them as good as I can then I make the price as low as I can. A spreader for \$59.50. A spreader that I personally guarantee to work as well or better than any other spreader on the market today. My guarantee is the broadest possible—and backed up by a \$25,000 legal bond, which as president of The William Galloway Company I stand right back of. I just want you to try the Galloway spreader. It's a wagon box spreader that I have so much confidence in that I want you to send for one, take it out in the field and use it, or abuse it if you want to, for 30 days, and if you don't find it worth more than the \$59.50 I ask for it just take it back to the depot and ship it back to me. I will pay the freight both ways. You can try it for nothing—and at no risk. My free trial plan is such that you don't have to send me one cent in advance. You get my plan when you get my booklet. I can save you over one half the price you would have to pay for any other spreader. In other words I can save you \$70.00 on a spreader of a fifty bushel capacity. You would tie nearly that amount up in a spreader truck, useless eleven months in the year, if you bought the ordinary high priced spreader. A feature of the Galloway Spreader, as important as its simplicity and low price, is its light draft. Just two horses needed to haul it. Mr. Miller, a prosperous farmer of Waterloo, Iowa, gives all these points in his letter—just read it.

Miller Testimonial Letter.

I have thoroughly tried your horse spreader. Have hauled over 300 loads of manure of all kinds and it did the business to a queen's taste. It has caused no trouble whatever. My 13 year old boy took it out when we first got it and started it up and hauled 6 loads before I saw him and it didn't make any trouble. I feel safe in recommending it to my neighbors and friends. We wore out one spreader of another kind and it caused so much grief that we felt prejudiced against all spreaders but will truthfully say I have changed my mind. LEWIS MILLER.

No spreader made a third as simple as the Galloway. But one operating lever. One other lever for regulating the speed of the heater. Few cogs—and all working parts extra strong. Its beater has a rotary outward motion—nothing just like it. Its apron is simple and works perfectly—of the endless apron style. We positively guarantee them to handle any kind of manure. Sold direct to the buyer without one cent being paid to us in advance, and the freight paid to your station. Now, friend, if you have taken the time to read my spreader advertisement clear through you certainly would not be doing me or yourself full justice unless you complete it by writing me at once and letting me send you without cost my complete Spreader Booklet. It tells all about my spreader and many things you want to know in regard to the future of your land in fertilization. Don't forget the price, \$59.50 freight prepaid. Don't forget my "iron clad" guarantee. The Galloway is the only spreader every farmer can afford to own. I want every farmer to have one. Write for my free spreader booklet today or send in your order now. Write me direct—WILLIAM GALLOWAY, President, WILLIAM GALLOWAY COMPANY, 109 Jefferson St., Waterloo, Iowa.

Just cut out this ad and send it to me with your name and address written on it plainly and I will send you my Spreader booklet by return mail—free, or a letter or postal will bring it.

Von Seggern's Hereford Sale.

The sale of Mr. J. G. Von Seggern was held at Wisner, Neb., on September 22d and brought out a good-sized crowd, mostly local and from adjoining country. The cattle were nearly all young and right off grass. No very high prices were realized, though a good, fair average was maintained. The high price of the sale was \$135 for the four-year-old cow, Princess Mary. Columbus Boy, a nine-months hulk calf, and a son of his present herd bull, Columbus 25th, sold for \$125, while Popularity, a coming two-year-old, brought \$150. The twelve bulls sold for \$1,022.50, an average of \$85.21. Twenty-three cows sold for \$1,560, an average of \$67.82. The average on the entire offering was \$74. Below is a list of those selling for \$75 and over:

Emmie, four years, Peter Witt, Wisner, Neb.....	\$ 85.00

The subject of the above illustration represents the beautiful imported Short-horn cow, Augustina 2d. She is a red, calved Nov. 23, 1899, bred by Lady Cathcart, Aberdeenshire. She is quite a showy cow and is a remarkable producer. She is consigned to the dispersion sale of Messrs. R. G. Robb & Son, at Morning Sun, Iowa, October 18th. She has a fancy heifer calf in the sale, dropped Dec. 22, 1905, to the service of Graceful Archer. She was rebred to this great bull Feb. 20, 1906. The picture, by Burke, in no wise overdraws her; in fact, it is a question if it is a good one if her great depth and roundness of body are fully delineated. She is one of the many plums that go in this dispersion sale, including twenty-three Scotch cattle, three of which are imported. See advertisement on page 40.

SCALES 30 DAYS FREE TRIAL

Let us save you \$20.00 on a 2-ton wagon scale—pit or pillars. We guarantee them for 30 days and ship anywhere in U. S. on 30 days free trial. Do not guess the weight of your farm products. Send for catalog and complete information. Kemper-Paxton Merc. Co. 938 Liberty St. Kansas City, Mo.

FOR SALE Farms, Reno and adjoining counties; ranches west. Write me what you want. A. M. Jewell, North Main St., Hutchinson, Kan.

The Week in Kansas.

To the Editor of The Homestead:

At last we can report another "just right" week. It has been neither too hot nor too cold, too wet nor too dry. It has been growing weather from the word go. Wheat sown on this farm last Friday was coming up on Monday, an almost incredible short space of time for wheat to germinate at this season of the year. But then, conditions could not be more perfect for planted seed to grow if it were the middle of June.

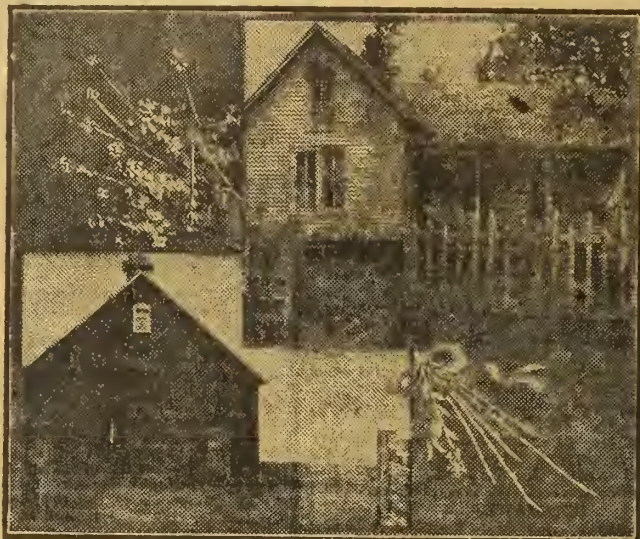

There is no let-up on the amount of work each farmer has on hand to do, in fact it seems to be more pushing the farther the season advances. The harvesting is greater than the planting, a result that puts us all ahead financially, but makes us work harder than we ought.

It is practically impossible to get competent help on the farm at any wages. There are the few young fellows of migratory habits that can be hired for a few days, but what this class of men smash up and waste amounts to as much more as their wages, with the undesirable of having them around, besides. Then, too, the average hand of more or less migratory habit cannot be depended upon one day to stay at work the next. If he sees some hard job ahead, he pulls out for pastures new.

Corn cutting has been the work that is being rushed the most right now. It seems that the corn got at the right stage for cutting at a few moments' notice this year, and almost before any of us realized that it would have to be cut, the work was waiting on us.

Seeding has been done by a few, but the majority have not even started. This thing, that thing and all things to be done at just the same time has made everyone late with their seeding, and as a consequence there will be a considerable acreage of late-sown wheat in this section of the state. However, if the weather continues as favorable for germinating as it is right now, seeding down by the last of this month will be as far ahead as that sown two weeks earlier, at the end of October. Henry Hatch.

SOMETHING GOOD IN MISSOURI

246 Acre Farm in Henry Co., Missouri.

This farm is a finely-located, improved farm about fifteen miles northeast of Clinton, Mo., the county seat, and two miles from a good railroad town. It is all good, level, rich land and can practically all be cultivated.

The improvements are all new and well finished. They include a good, substantial, conveniently-arranged, seven-room house, a good barn 28x40, double corn crib, hog house, chicken house, good cistern and well. The farm is well fenced and cross fenced.

Located as it is, in one of the farming counties in Missouri, and being so well improved, this is an unusually desirable home place. It is also close to the Kansas City markets, which insures higher prices for grain, hay and live stock.

The owner of the farm lives in Iowa and has all his other interests there. He wishes to sell it and will give very favorable terms or might consider a good Iowa farm, live stock or other property in part payment. Write for full particulars.

Send for our new illustrated catalog of improved farms. It is the most attractive list we have ever issued and offers many unusual bargains. The descriptions are complete and the illustrations are from actual photographs of improvements on the farms described. It is printed in handy folder form on good paper and contains a large map of Iowa.

We have a few good farms to exchange for city property, merchandise, etc.

NORTHERN IOWA LAND COMPANY,
INDEPENDENCE, IOWA.

Nothing To Beat This In Kansas.

327 ACRES, fine land, all nearly level; rich soil, with 160 acres now under plow; fair buildings; 1 1/2 miles from good railroad town, Morris County, Kansas, at \$32.50 per acre. Don't pass this up as too cheap, for it is just as good land as the state affords, and if you would rather pay more, why we will raise it to \$40 per acre, what the surrounding farms are held at. Also fine farm 19 miles from Kansas City at a bargain.

INLAND SECURITY COMPANY,
WATERWORKS BUILDING, KANSAS CITY, MO.

SUNNY COLORADO FREE

BOOKLET about Colorado and other WESTERN STATES, has just been issued, setting forth the advantages and profits of investing in irrigated and non-irrigated lands. Beginning with the question, "Do you want a change?" it leads the reader on through a description of the climate, the farming system, fruit and vegetable crops. If interested, write for free booklet. The W. E. Moses Co., 718 17th Street, Denver, Colorado.

LAND. LAND. LAND.
FINE Buffalo County farm of 720 acres for sale, on account of owner wishing to engage in other business. This is one of the finest farms in the state. All A No. 1 farm, wheat and alfalfa land. There are over 10,000 worth of improvements upon this land; 600 acres under cultivation, 80 acres in alfalfa, balance in pasture and wild grass meadow; located 1 mile from school, in one of the best neighborhoods in the county; 12 miles from Kearney, 6 miles from two stations. This land will pay 25 per cent on the investment. Will sell 560 acres in case purchaser does not want the entire tract. Price, \$80 per acre, good terms. Also nice little home of 20 acres, good improvements, located only 3 miles from Kearney; the finest truck and garden land in the world. Price, \$2,000. For above land address owner, W. H. GRASSMEYER, RIVERDALE, NEB.

IOWA FARM
240 ACRES, good dwelling, 2 barns. Land lies well, but part some rolling; abundance water piped from spring to largest tank; has apples, peaches, cherries, grapes, small fruit; about 7 miles to town; line roads; all could be used for corn. Easy terms; this is a snap. Write us, or better come and see this before it is sold. BOSSERMAN BROS., MURRAY, IOWA.

460 ACRE FARM
FOR sale or trade, about 20 miles north of Iowa in Jackson Co., Minnesota; well improved; all very fine land and worth \$60 per acre. Owner wants town property or merchandise, or sell at a bargain. Write to, Western Farm Land & Realty Co., 908 N. Y. Life, Kansas City, Mo.

FARMS WANTED. In exchange for income property, residences, hotels, elevators, mills, livery barns, stocks hardware, groceries, dry goods, general merchandise, stills, registered cattle. Can get good trade. Northern Iowa Land Co., Independence, Ia.

TEXAS LANDS IN THE PANHANDLE, CHEAP. Theo. J. Pugh, Omaha, Neb.

Eastern Kansas

I HAVE for sale at owners' prices, over 300 choice improved farms of all sizes in Lyon and Coffey counties, located in the heart of the best part of NEOSHO RIVER VALLEY.

All smooth, level land, no hills, stone, sand or hardpan; best black soil with clay subsoil. No hot winds; plenty of timber, fine water, tame grasses and fruit of all kinds. Long farming season and short, mild winters. Splendid school and social advantages. A live, up-to-date business town of 1,000 population with two long distance and local telephone systems, 6 rural mail routes; 3 large, new grain elevators; best shipping facilities; 100 miles to Kansas City market. Prices cheaper and selection better than near county seats. Write for new illustrated descriptive circular. Mention The Homestead when writing.

ED F. MILNER, Hartford, Kansas.

....LANDS AND HOMES FOR SALE....

WHAT WOULD YOU DO?

IF YOU WERE A TENANT on high priced land, working 365 days each year—If you were a toiler in town and able only to earn enough to keep even with the world—if you were sick and tired of moving, and hungry for a home of your very own—if you were a young man just starting in life, and were considering the purchase of high priced land, and realized that you must mortgage the future of yourself and family for years if not for life to pay for it—if you were the father of grown children and found the home nest so crowded that it had become necessary to build new nests for some of the brood—if you had saved up a few hundred dollars and hesitated about leaving it in the bank or handing it over to life insurance grafters to speculate with—if you had a surplus that you wished to invest where it would not only be secure but would multiply while you slept—if you had come to realize that while the population is steadily increasing there is BUT ONE CROP OF LAND and that unless you secure a foothold you will be pushed off the earth?

If you were in any one of the above situations, and were offered for \$7.50 an acre, land (on easy terms if desired) as fertile as is found on the prairies of Illinois or Iowa, where bountiful crops were growing and everyone was prosperous and happy—WHAT WOULD YOU DO?

Why, you would do just as about one hundred others have done who have investigated the Golden Prairie of Wyoming within the past sixty days. You would go at once to Pine Bluffs, and climb into our big Northern Automobile. You would be quickly carried out upon the gently undulating Golden Prairie. You would see crops that will pay twice over for the land at present price. You would take a spade and dig into that fertile soil. You would drink your fill of pure cold water. You would gaze on herds of grazing cattle that look like they had been stall fed. You would breathe an atmosphere pure, healthful and exhilarating. You would become firmly convinced that that land will soon be selling at several times its present price. You would buy all the land your means would permit and would instantly become a member of the "Golden Prairie Boosters' Club."

In the short time since we placed our Golden Prairie lands on the market our sales have been phenomenal. We have disposed of about 20,000 acres, our purchasers coming from Iowa, Illinois, Kansas, Missouri, Tennessee, Virginia, Indiana, Ohio, Alberta, Canada, Arkansas, Nebraska, New York and other places. The Golden Prairie will soon be thickly populated, and you should not delay. We have arranged for the purchase of a large steam plow with a capacity of thirty to forty acres per day, to cultivate a part of the land which we will retain permanently, and also for the accommodation of those of our customers who wish plowing done.

Here is a sample of the many testimonials we are receiving from scores of our pleased customers:

On the recommendation of Mr. E. A. Nye, vice-president of the Century Fire Insurance Company, with which I am connected, I called at the office of the Federal Land and Securities Company relative to an investment in their Golden Prairie, Wyoming land. After hearing a description of the land and seeing samples of crops grown, I purchased a section, which was selected for me by the president and treasurer of the company, subject to exchange by me if I preferred.

On August 21st I went to look at the land. Mrs. Beatty accompanied me and we had a delightful trip. On arriving at Pine Bluffs we took our seats in a fine Northern automobile and were soon speeding over the "Golden Prairie," looking at the fields of golden grain, some in shocks, some just being harvested. We couldn't help remarking how appropriate indeed is the name, "Golden Prairie."

We found the section selected for us a beauty and I could not have made a better selection had I spent a week there. In my judgment that country is all right. The soil is deep and fertile, the surface is just undulating enough to drain well. The crops are equal to the best in Iowa, the climate is superb. I expect my land to double in value within a year, and continue to advance until it commands as high a price as the best farm land in the central states.

To all who wish to buy land worth true money from a company composed of upright, courteous gentlemen, I commend the Golden Prairie country and the Federal Land and Securities Co., of Des Moines, Iowa.

Des Moines, Iowa, September 3, 1906.

[Signed] C. L. BEATTY.

We are selling your choice of this land (and there is really very little difference in the value of one section as compared with another) at \$7.50 per acre in tracts of quarter, half, three-quarter and whole sections, with a small cash payment and balance on ten years' time with easy annual instalments and low interest.

Fill out and send us the attached coupon today, and you will receive a reply with map and full particulars by return mail. Low rate excursion tickets furnished, and railroad fare refunded to purchasers.

THE FEDERAL LAND & SECURITIES CO., Owners, News Arcade Bldg., DES MOINES, IOWA

If you are interested in securing a choice farm for a home or as an investment, fill in the blank lines and mail us this coupon at once.

When writing please mention this paper.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 52 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 80 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and world of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

FIELD NOTES.

Mr. Chas. Sobotka, of Cainsville, Mo., can supply Duroc Jersey boars and gilts that are bred and grown for usefulness.
 Messrs. Daniel Leonard & Sons, of Corning, Iowa, have a good lot of Shropshire rams and ewes for sale. Write them and send your order at once.
 The Short-horn sale of Mr. R. E. Williams, Jr., of Oakland, Iowa, will take place on October 8th instead of October 4th, as stated in last week's Homestead. See advertisement on page 30.
 Messrs. Ruebel Bros., of Rockwell City, Iowa, are offering a grand lot of Poland China boars for sale, and their prices are very reasonable. Those wanting boars will do well to write them.
 Messrs. Wheatley & Ward, of King City, Mo., are offering a number of Aberdeen Angus bulls that are ready for service. These are from good families and by breeding bulls that sire such stuff as is found desirable.
 Remember Mr. W. A. Raukin's sale of Durocs at Carson, Iowa, September 28th. He is selling some Ohio Chief and Glendale Critic boars that are worth looking after, as well as a choice lot of sows and gilts.
 If you want a good, blocky, red Short-horn bull of good milking strain, or a lengthy, strong-boned Chester White boar pig, write Mr. W. W. Vaughn, Mariou, Iowa. He will price them right. See advertisement on page 32.
 The Buff Cochins offered for sale by Mrs. Amos H. Hanson, of Collins, Iowa, on page 10 of this issue, are choice ones and are only bas a few for sale. She will quote special prices on young cockerels for the next ten days only.
 Mr. S. J. Butts, breeder of Duroc Jersey swine, Mason City, Iowa, in remitting for advertising, writes: "My stock are in good condition and ready to send out. We need ten days more to finish our corn crop." See advertisement on page 35.
 Mr. J. T. Scarff, breeder of Ohio Improved Chester White swine, of Salem, Iowa, has choice pigs for sale, as advertised in his announcement on page 33 of this issue. He names the price at which he will sell for the next thirty days. He guarantees satisfaction.
 The advertisement of Mr. M. A. Easthouse, of Hartley, Iowa, will be found on page 27 of this issue of The Homestead. In furnishing copy Mr. Easthouse writes: "My Poland Chinas are in good condition, the pigs are growthy and extra heavy boned. I guarantee satisfaction or will refund the money. My herd boar, Oris Duke 88967, which I am offering for sale, is of extra good length, heavy-boned and with well-sprung ribs. I will ship this hog on approval to any re-

liable purchaser. I guarantee him to be a good breeder."

Short-horn breeders interested in the public sale to be held by Mr. R. E. Williams, Jr., of Oakland, Iowa, will bear in mind that the sale is to be held October 8th and not October 4th, as stated in our last issue. See advertisement on page 30.

Mr. L. M. Mann, of Des Moines, Iowa, has several tracts of farm land that he is offering for sale on page 21 of this issue of The Homestead. For more particulars and full descriptions of these tracts, it will be necessary to read the advertisement and write Mr. Mann.

In the sale advertisement last week of Mr. R. E. Williams, Jr., of Oakland, Iowa, the date of October 4th was given as that on which he would hold a public sale of Short-horn cattle. It should have been October 8th, as per advertisement on page 30. Those interested will please make note of this correction.

Mr. S. R. Patterson, of Centerville, Iowa, will hold his second annual Poland China sale on Thursday, October 18th, at which time he will offer seventeen spring boars and gilts, sired by Golden Rod Chief 100547, one of Meddler's best sons. He will also offer for sale fall gilts and sows bred to him. Write for catalog. See the advertisement on page 27.

Mr. T. E. Laurie, of Jacksonville, Ill., breeder of Duroc Jersey hogs, has a most excellent lot of pigs for the season's trade. At the Illinois State Fair next week Mr. Laurie will have a nice lot of stock which will bear inspection. Look him up and watch these columns for further particulars concerning the sale consignment to be sold on Tuesday, October 23d.

Mr. W. W. Vaughn, of Marion, Iowa, is making special prices on ten blocky, thick, all-red Short-horn bulls ten to twenty months old, and thirty smooth, heavy-boned Chester White boars of spring farrow. Take advantage of the low railroad fare to Cedar Rapids next week and go and see them. Electric cars between Cedar Rapids and Marion every ten minutes. See advertisement on page 32.

Mr. D. L. Pond, of Inman, Neb., is one of the well known western breeders of Polled Durhams who is consigning cattle to the combination sale at South Omaha on October 5th. He sells eleven head, largely of the Rose of Sharon and Arabella families, and his cattle will undoubtedly please those who attend the sale. Those who believe in the usefulness of Short-horns should not fail to be present on the above date.

The first-prize Oxford ram lamb at the late Iowa State Fair, Now Or Never 27493, weighing 400 pounds, and four other buck lambs sired by the same ram, are offered for sale by Mr. F. C. Thackaberry, of Tampico, Ill., in his advertisement that appears on page 34 of this issue. Mr. Thackaberry is also offering Poland Chinas for sale. For full particulars in regard to the stock, write him at the above address.

Mr. A. Latimer Wilson, of Creston, Iowa, writes us that some unscrupulous horse salesman is reporting over the country that he is not selling his choice imported stallions at \$1,000 each. Mr. Wilson requests us to say through our columns that he is selling his choice of the last importation at \$1,000, and that he will sell a good two-year-old imported Sibre colt at \$700. These are his cash prices.

Messrs. Humbert & Son, importers and breeders of Percheron horses, of Corning, Iowa, write: "Our last importation of Percherons arrived at our barns in fine shape. We did not spare money and time in selecting them. They are all of the big, heavy-boned, drafty kind; all will beat a ton in weight at maturity. Among the lot there are several sons and grandsons of the world's famous Besigue 19002."

Dr. T. C. Brady, of Marshalltown, Iowa, is offering 100 head of sheep, forty-two head of horses, four cows, and the necessary machinery located on a leased South Dakota ranch, for sale on page 27 of this issue. The doctor states that there is ample room for 5,000 head and that the lease runs for five years at eight cents per acre, and for someone who has the time to give it the necessary attention it is a money-making proposition.

Messrs. Allen Bros., proprietors of the Allendale Stock Farm, New Sharon, Iowa, in furnishing copy for change of their advertisement which appears on page 33 of this issue, write: "We have several good bulls now of serviceable age, and a number of good calves soon to be a year old. Most of them are sired by Proud Blackcap, our Blackbird-topped Pride bull, which in ordinary flesh weighs over a ton. Our animals are all in good shape and would prove money makers for any man."

On October 10th, Mr. F. H. Herring, of Iowa City, Iowa, will offer for sale at public auction forty head of Duroc Jersey hogs from his Greendell herd. The offering will consist of twenty boars and twenty gilts, the get of Inviucible 15143, Perfection Chief, 28567, Crimson Wonder Jr. 41103, Grand Chief 14932, Sensation 7393 and Reliance 14555. They are out of dams equally as well bred and are a growthy lot of March and April farrow. They are pronounced by Mr. Herring as excellent all of his past offerings. The catalogs are now ready. See his advertisement on page 27.

Messrs. Heury Bros., of Le Mars, Iowa, in sending change of copy for their advertisement, write as follows: "We have again won sweepstakes on our great Poland China boar, Matchless Jr., at the Interstate Fair. This is the second time he won sweepstakes at this show. We also won first on him at the Minnesota State Fair. At the Interstate Fair we won first on herd under one year, first on herd under one year bred by exhibitor, second on herd over one year, second on herd over one year bred by exhibitor, first on four bogs get of sire, first on yearling sow, first on sow under one year, first on boar under one year, first on aged boar and sweepstakes boar all ages. All these winnings are on Matchless Jr. and his get. This was the greatest Poland China show ever seen in the West. We have a grand lot of fall boars and a good bunch of spring boars, mostly elred by this great hog, for sale. Just say to readers of The Homestead that if they want a boar sired by this great two times sweepstakes boar that

they should lose no time in sending their order. First come will be first served. We want to hear from all."

Mr. W. E. Franklin, of Sabetha, Kan., is offering some choice pigs sired by Van's Perfection. This hog has sired some choice animals.

Mr. E. C. Thornhill, of Joy, Ill., is advertising Thornhill's Anti-Shrink, which he claims is a money saver for shippers of hogs and cattle. He will furnish for \$5 enough for four cars. See his advertisement on page 6.

Unequaled opportunities for homesekers and investors are offered to readers of The Homestead by Messrs. A. J. Waldo & Co., of Oklahoma City, Okla., in their advertisement that appears on page 20 of this issue. They make the announcement that the restrictions heretofore placed on the Indians which prevented them from disposing of their lands are being removed and now millions of acres of the richest farm lands are being offered for sale by them. Write the above firm for particulars and maps.

Messrs. E. L. Nagle & Son, breeders of Chester White swine, of Deep River, Iowa, in furnishing copy for their advertisement found on page 33 of this issue, write that they are all sold out of fall, February and March hogs, but that they have a few April males that are good ones. They say: "We had a fine trade at the state fair, sold thirty-four head. We have thirty-two spring gilts that can't be beat that we will sell open or bred. Breeders who want good gilts had better write us at once. We have thirty-five of September farrow that are a promising bunch. We will sell and ship these as soon as weaned."

Mr. J. G. Truman, manager of Trumans' Pioneer Stud Farm, importers and breeders of Shire, Percheron, Belgian, Suffolk and Hackney stallions, of Bushnell, Ill., writes: "I am very much pleased to report that our horses arrived home in good condition from the Indiana State Fair on Monday. Our last importation of stallions and mares are doing fine and are ready for the Illinois State Fair, where we expect to make quite a select exhibit. I feel safe in saying that at no time in the twenty-eight years that we have been in the importing business have we ever had on hand as large a number of first-class horses as we have at the present time. I shall be very much pleased to hear from any of your readers that are anticipating buying either a Shire, Percheron, Belgian or Hackney stallion this season."

On page 27 will be found the announcement of Mr. George H. Purdy, of Mason City, Iowa, in which he sets forth the advantages of his Clover herd of Duroc Jersey swine. Mr. Purdy has an unusual bunch of March and April hogs sired by such noted hogs as Improver 2d, Advance, Tip Top Notcher, Ohio Chief, Sensation, Granger and Orion. This herd was inspected by our representative and found to be in first-class condition. The stock is large and growthy, of proper colors and in every way fit to command the attention of all who may be interested in first-class Cherry Blonds. Mr. Purdy desires to close out these hogs now at bargain prices in order to prepare for his winter brood sow sale, which will be held February 22d in honor of Washington's birthday.

The Greeley Horse Importing Company, of Greeley, Iowa, had an importation of 116 head arrive on Monday, September 10th, mostly Percherons and Belgians, the finest lot of two, three and four-year-olds Mr. Holbert has ever imported. In fact, the United States government veterinary who inspects all horses before they can land at New York, said he had never passed a lot of colts and horses with such size, bone and quality. These horses were under the care of Mr. Thomas Holbert and came from New York by special express train and all landed at Greeley in fine shape and a large part of them are ready to sell at once. Mr. A. P. Holbert and his son, Fred, are still in Europe buying Shires, Hackneys, German coach, Belgians and more Percherons. He will soon land another shipment of over 100 head. Mr. Fred Holbert will remain in Europe to make further shipments during the winter. Both Mr. Holbert's sons received their schooling in Europe and speak German or French as fluently as their mother tongue. One of the young men remains in Europe all the year buying at all seasons, which, knowing the country as they do, enables them to sell a large part of their horses to dealers and importers cheaper than they themselves can buy them in Europe. They make a specialty of selling to dealers and will be pleased to correspond with anyone contemplating buying horses to sell again. They are selling to individuals at wholesale prices. They sell only for cash or well-secured notes and do a big business on a sound basis for a small profit on each horse. See advertisement on page 31.

On page 32 will be found the advertisement of Mr. Geo. Hans, of Newton, Iowa, announcing the sale of Short-horn cattle and high grades at his farm, two and one-half miles from Newton, on October 8th. Mr. Hans has been a Homestead advertiser for a number of years and has supplied many of our readers with good Short-horn bulls at modest prices. His herd has now grown to such proportions that he feels it necessary to somewhat reduce it before winter, hence has drawn from among the breeding matrons eleven choice cows, more than half of which have calves at foot or are bred to the Cruickshank bull, Victor Alexander 2d. The remainder of the pure-bred offering consists of eleven bulls, all yearlings and of good color. These bulls are all by Beauty's Prince, a son of Gwendoline King and he by the great Gwendoline Lad, used by Mr. N. A. Lind and out of the champion cow of America, Gwendoline 2d. Beauty's Prince belongs to the famous prize-winning Nerissa family that furnished the great bull, Nonpareil King, and other celebrities shown by Mr. Geo. Bothwell, of Nettleton, Mo. Mr. Hans did not feel like drawing on his breeding herd for the full quota of pure-bred necessary to make a successful sale, hence he has listed fifteen practically pure-bred unregistered Short-horn cows and heifers and five steers of like breeding. This will certainly be a great opportunity to the farmers of central Iowa or all who are within easy distance of Newton to buy some Short-horn cattle at what, in all probability,

will be modest prices—yet the cattle are from very useful, prolific families. They are well colored and well shaped, but will be frosh from the pasture with no special fitting. In our next issue we shall have something to say of the different families represented.

Messrs. Hanson Bros., of Doan, Iowa, can furnish Homestead readers with Duroc Jersey and Poland China spring pigs of either sex. They also have one yearling Poland China boar, one fall and one two-year-old Duroc Jersey boar for sale. They also have for sale a large female Collie dog and one male, Light Brahma chickens and Hereford cattle. Write them your wants, or, better still, if convenient, call and see their stock.

Mr. I. J. Lorton, of Union City, Ind., the well-known breeder of Duroc Jerseys, writes under recent date as follows: "We have received a letter from one of our old customers, Messrs. J. H. Lewis & Son, of Cameron, W. Va., today, and he says at their state fair he won on yearling sow hought of me last spring, and in herd show won on pig recently bought of me. He now wants a spring boar to develop for next year. Pigs are doing fine. Early pigs will weigh 200 pounds, not fat. I recently sold a spring boar to Mr. N. G. Kessler, of Cassopolis, Mich., who reports that he is very well pleased and will show him next week." Mr. Lorton has one of the best herds in Indiana. At the head of his herd stands I. J.'s Chief 12445, first-prize aged boar at Indiana State Fair, 1905. Mr. Lorton has a fine lot of pigs for sale at reasonable prices and will be pleased to correspond with breeders or farmers wanting herd hogs. Look up the advertisement on page 34 and write for particulars, mentioning The Homestead.

RUSSELL'S SALE POSTPONED.

The public sale of Mr. E. Z. Russell, of Blair, Neb., has been postponed to October 15th, in order that parties can reach several other Nebraska sales which will occur in the early part of October.

SHORT-HORN BULLS GOT BY IMP. MUTINEER.

Some all-red Scotch Short-horn bulls got by Imp. Mutineer are offered by Mr. A. C. Berry, of Unionville, Mo. These bulls are strictly first class and Mr. Berry prices them worth the money.

THIS LAND WILL MAKE YOU MONEY.

In this week's issue of The Homestead, the W. F. Shelton Land Agency, of Kansas City, Mo., offer for sale 7,000 acres railroad lands near Sharon Springs, Wallace county, Kan. This land will be sold at the very low price of \$5.50 per acre and on the most favorable terms. Do not fail to read their advertisement on page 20 and write to them for more information, and when doing so, mention The Homestead.

LINOFELT MATERIAL THAT WILL MAKE YOUR HOUSE WARM.

The Union Fiber Company's fire-proof factory at Winona, Minn., will be in operation by October 15th, and will be ready to accept orders for Linofelt for delivery about that date. Anyone desiring to complete a building this fall should get his order in early, as the great demand for Linofelt throughout the Northwest will tax the capacity of their plant to the limit.

ENGLISH FOX TERRIERS.

Mr. S. J. Miller, of Kirksville, Mo., has a card on page 10 in which he advertises English Fox terriers. Mr. Miller breeds the Fox terrier because he likes the strain and because they have no superiors as rat dogs. The pups he offers are from recorded stock and are eligible to registry. They are nicely marked and are offered at very reasonable prices. If you want something fine write Mr. Miller today and kindly mention this paper.

QUICK'S HERDS AND FLOCKS.

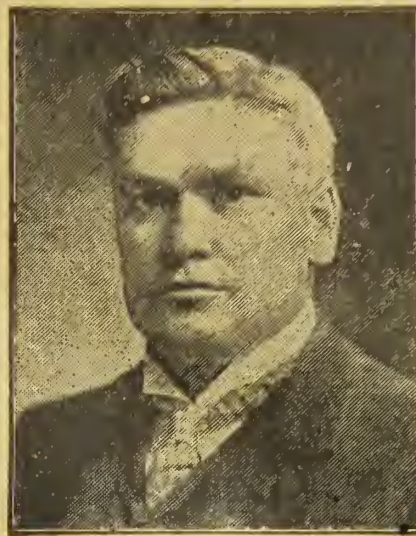

Messrs. S. R. Quick & Sons, of Gosport, Ind., have an advertisement on page 27 of this issue which should interest readers of this paper. They are offering for sale at reasonable prices 350 Duroc Jerseys, 150 Shropshires, and 100 Short-horns and Polled Durhams. On account of the large number on hand Messrs. Quick & Sons are offering stock for sale at greatly-reduced prices. Write at once for particulars as per the advertisement, kindly mentioning The Homestead. Further particulars will be found in our next issue.

HULBERT'S POLAND CHINA CATALOG.

We are just in receipt of the private herd catalog of Mr. Charles M. Hulbert, of Oakland, Neb., which is one of the most up-to-date catalogs that has come to this office. It is well illustrated with his herd hogs and leading brood sows, some of which have been leading winners at the fairs. It may be had for the asking and everyone interested in Polands should have one of them. A postal addressed to Mr. Hulbert will get one. Remember that in this herd is Oakland's Prospect, that won second at the last Nebraska State Fair, as well as the first prize under year boar at the same show. We ask you again to write for this catalog and mention The Homestead.

DISPERSION OF BLACKBIRD DODDIES.

A very important dispersion sale of Aberdeen Angus cattle will be held on November 14th at Mt. Vernon, Iowa, at which time the famous herd of Blackbird doddies owned by Messrs. Baker & Smith will go under the auctioneer's hammer. There are forty-eight head in the sum total—thirty-nine females and nine bulls. Fully four-fifths of this entire offering is of the very popular Blackbird family bred in lines that are the most prized and appreciated, even by the critics, who are indulging in the advancement of this famous prize-winning family. There will be a few Prides and other families listed in the sale, including two of the best Angus herd bulls to be sold this season. This sale is made necessary to dissolve the partnership existing between Mr. Matt Baker and Mrs. Smith. Mr. Baker will retire to a farm of his own and later engage in breeding Angus cattle. Everything will be sold without reserve or by bid. There probably never has been a sale where as many Blackbirds were offered by one firm on this continent, and speculation runs high as to what these choice-bred Blackbirds will bring. The catalogs are ready for distribution by Messrs. Baker

DR. T. F. WILLIAMS,
CONSULTING PHYSICIAN.

GERTRUDE REDFORD, HAMILTON, MO., writes me: "When I commenced your treatment it was almost impossible for me to breathe through my nostrils. Now I can breathe through them without any difficulty, although I have not quite completed the second month's treatment. I believe your medicine can do all that is claimed for it."

J. W. HOOD, LE ROY, IOWA, says: "Have only missed one day's treatment in four months. I do believe it cured me in three months, but wanted to be sure. I have no more catarrh trouble and thank you very much for your good advice to me."

ALBERT GEHRKE, RAINIER, WASH., writes: "I have suffered from catarrh for two years. I am glad to tell you that I am perfectly cured after using your treatment for two months. It has cured me and will cure others."

I receive such letters as these every day from grateful patients all over the United States. You can have the same experience by filling in the coupon and mailing to me. This costs you absolutely nothing but a two-cent stamp. Why delay when such an opportunity is offered you?

FREE TREATMENT COUPON.

Dr. T. F. Williams, 211-213 Crocker Block, Des Moines, Iowa.

Please send me free symptom blanks with a view to my taking your free month's treatment.

Address

& Smith, at Mt. Vernon, Iowa. Mention The Homestead in applying for the same.

R. J. PECKHAM OFFERS GOOD POLANDS.

Mr. R. J. Peckham, of Pawnee City, Neb., is offering some choice pigs sired by John-son's Chief, Major Blain (now dead) and a few other as well-known sires. If you want the Blain type of Polands you will get them here. Mr. Peckham purchased his first Poland China of Mr. Blain and has very much of the same blood in his herd today. It would pay you to write him for prices at once. His crop of spring pigs are very growthy and are the kind that grow into useful sows and good sires. Look up his advertisement on page 33.

JOHN TUTTLE'S ANNUAL SALE OF POLAND CHINAS.

For his fourth annual sale of Poland Chinas Mr. John Tuttle, of Fillmore, Mo., has listed forty head of the tops of his herd. A few are fall hogs, several are thrifty spring hogs, the balance, and over one-half of the offering, are sows, some of which have litters that sell with dams. Mr. Tuttle has stuck to the Tecumseh, and the entire offering will be found rich in the blood of Tecumseh 3d. A neat catalog has been issued, and those who are interested should write Mr. Tuttle today for one. This will be one of the opportunities to step in and buy good hogs at worth-the-money prices, as Mr. Tuttle has not gained the prominence his herd deserves. See page 34 for advertisement and kindly mention The Homestead when writing.

ANGUS AUCTION AT THE AMERICAN ROYAL.

Aberdeen-Angus breeders will be given an opportunity to bid upon an unusually attractive offering at Kansas City during the American Royal of 1906. Mr. Omer Catterson, of Maryville, Mo., includes four young animals that he has been showing this season. The Queen Mother heifer, Maplehurst Queen 30th, a calf of last January, and the Coquette heifer, Maplehurst Coquette 4th, calved September, 1905, are exceptionally good ones. The Coquette is from a dam that was bred by Mr. McHenry, and she was sired by the Pride bull, Paragon of Alta, a grandson of the champion Heather Lad of Emerson 2d. The Queen Mother mentioned was got by the double Queen Mother bull, Clansman Chief, second winner of second prize at the American Royal in his two-year-old form. The other two entries of Mr. Catterson are both Queen Mothers, and the yearling bull, Maplehurst King 9th, grandson of the Trojan-Erica bull Endor, is one of the most attractive bulls of the auction. Paul M. Culver, Edgerton, Mo., includes a grandson of Rosegay, Don View Point, third prize winner at the recent Nebraska State Fair; Queenly of View Point, a Queen Mother heifer that was first prize winner at same show; and Geo. Kitchen, Jr., of Gower, Mo., enters Helmet A., a young bull that was also awarded first prize at the recent Nebraska State Fair. He was sired by Helmet 3d, first prize two year old at the Missouri and Kansas State Fairs of 1905, and he was out of the dam of Jewel of Alta, first prize and junior champion heifer of the western state fairs of 1905. Mr. R. S. Williams, of Liberty, Mo., who has been one of the strongest supporters of these American Royal auctions in the way of furnishing good, thick-fleshed breeding cattle, offers two good cows on this occasion, one of which is by the noted Black-

Have You Catarrh?

Have you given up all hope of a cure? Write me today and receive free my book on Catarrh in all its forms. I will diagnose your case and tell you frankly if I can cure you. For twenty-five years I have made a specialty of treating Catarrh and have thousands of cured patients who are living testimonials to the efficiency of my methods.

bird hull, Black Magic, and the other by the Ballindalloch Nosegay bull, Grapewood Banker 2d. The cows are both in calf to the sire of champions Zaire 17th, and Mr. Williams also consigns a splendid daughter of this bull to the auction. The auction occurs on Tuesday, October 9th, and while the offering is not large, it is the opinion of Manager McGavock that it is the best that has been made at Kansas City for several years. Catalog can be obtained by addressing Mr. W. C. McGavock, Springfield, Ill.

OXLEY'S ABERDEEN ANGUS SALE.

At Bedford, Iowa, on October 12th, Mr. George N. Oxley will close out his entire herd of Aberdeen Angus cattle. There will be about fifty head in the sale, composed of cows, heifers and young calves. Some of these are bred along the most popular lines, and represent the Easter Tulloch Duchess, Jeannette, Nosegay and other well-known tribes. The entire offering will be sold right off grass, and while they will not be fitted especially for this sale, nor loaded with fat, they will be in good breeding condition. There will be some good individuals among the heifers that farmers and breeders can well afford to take a hold of. Everything goes, as Mr. Oxley is very desirous of closing out. If any of our readers wish to pick up a bunch of doddies at prices that they can make money on they should not fail to attend this sale. Watch next week's issue for further particulars. Sale will be held under cover. Cols. Silas Igo and Piper Bros., auctioneers.

SCHAEFER'S SCOTCH AND SCOTCH-TOPPED SHORT-HORN SALE.

One of the best sales that will be held in northern Iowa this year will be that of Messrs. F. A. Schaefer & Son, of Raleigh, Iowa, on October 17th. They are selling fifty head, among which are sixteen head of Scotch cattle, including one imported cow and one Canadian-bred cow. There will be some choice young Scotch heifers in the sale, and the remainder of the cattle will have from two to six and seven Scotch tops. Among the Scotch cows that go into the sale will be Imp. Cella 9th, a six-year-old daughter of the Duthie-bred bull, Proud Star. This cow was bred by Mr. George Campbell, of Kinnellar, Aberdeenshire, Scotland, and she is one of the choice things in the offering. She is bred to their grandly-bred two-year-old bull, Choice of Archers, recognized as one of the best Scotch bulls in northern Iowa. They sell a good Duchess of Gloster cow, bred to choice of Archers and an Orange Blossom bred to the same bull. They sell two good Orange Blossom heifers and two good Gwendoline heifers. Two other nice heifers are Lady Laura of Raleigh, a daughter of Imp. Nonpareil, and Lauretta, a daughter of the Scotch bull, Golden Robin and out of Imp. Lady Laura 12th. They are cataloging one of their herd bulls, Bridal Archer, a richly-bred Scotch and about nine young bulls. One of the best of these young bulls is Sittytton Archer, a December calf. He is a son of Choice of Archers, and his dam is Sittytton Lass by Sittytton Hero, a Dryden-bred bull. He is a red in color, low to the ground, thick and blocky, and very much resembles his sire. He will be one of the best things in the bull line in the sale. There will be eight or nine other young bulls, largely of Scotch breeding, and there are some very good ones among this lot. If you are interested in Short-horn

PILES

FISTULA--NO MONEY TILL CURED

Rev. J. J. Pritchett, Pastor Melrose Methodist Church, Kansas City, Mo., writes under date of August 26, 1906: "Your treatment of my case of piles, fistula, contraction, etc., was highly successful and I can unreservedly and conscientiously endorse your institution and its splendid work. It is a privilege and a pleasure to send those afflicted as I was to you for relief."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. Address either our St. Louis office or

cattle write Messrs. Shaefer & Son, Raleigh, Iowa, for catalog and kindly mention The Homestead.

SANMANN'S POLAND CHINA SALE.

On Wednesday, October 10th, Mr. R. A. Saumann, of Glasford, Ill., will hold his annual public sale of Poland China hogs. Fifty head consisting of yearling sows, fall and spring pigs of both sexes, will be offered at this time. Mr. Saumann has been a successful breeder of Poles. Particular attention has been paid to the large, growthy, quick-maturing type, with plenty of quality and finish. Breeders and farmers in search of good Poland Chinas representing fashionable families should write to Mr. Saumann at once as per the announcement on page 31 of this issue, kindly mentioning The Homestead.

WEST'S DUROC SALE.

Thursday, October 11th, has been selected by Mr. W. S. West, of Hanna City, Ill., as the date on which he will offer fifty-five head of Duroc Jerseys at public auction. Mr. West is known to many of our readers as one of the oldest and most successful Duroc breeders. Included in the offering are four mature sows, twenty-five spring gilts of March and April farrow, two fall gilts by Leveler, one fall gilt by Bachelor and twenty spring boars. All but three litters of the spring stuff are sired by Top Wonder 42051, he by Wonder Chief by Pilot Wonder, his dam a granddaughter of old Top Notcher. The offering is equally as good individually, as the blood lines represented in this herd have produced some of the most noted prize winners of the breed. Write for catalog as per the advertisement on page 31 of this issue, kindly mentioning The Homestead.

THE AMERICAN ROYAL HEREFORD SALE.

Prospects for the American Royal show this year are most flattering. All classes in all departments are very full and the show will be the greatest yet held. The Hereford cattle selected to be sold at public auction on the afternoon of October 12th at the live stock pavilion, have been selected with unusual care. Anticipating that a great number of the breeders would want to buy a bull good enough to head a herd of No. 1 good heifers, the bulls selected for this sale have been selected with the object in view of filling the wants of such breeders. A great deal could be said about these cattle that we do not deem necessary to say now, as it would take entirely too much space to go into details as to the good points of each animal. If you want to buy a good bull to head your herd, or a few good cows or heifers to add to your herd already established, do not fail to attend this sale. Call this week a vacation, come to the show, shake hands with your old friends, get acquainted with new breeders, have a good time and take home a good bull. If you would like a catalog descriptive of the animals, Secretary C. R. Thomas, 221 West 12th St., Kansas City, Mo., will take pleasure in mailing you one. See advertisement on page 28.

THE BEST WEARING RUBBER BOOT ON THE MARKET.

Every farmer reader of our paper needs a good, strong rubber boot to get out in the slush and rain, which will soon be upon us; he also wants a boot that will stand the hard wear he has to give it. The Security Looming Duck Boot, advertised by the Hamilton-Brown Shoe Company, of St. Louis, Mo., on page 4 of this issue, is just such a boot. This Security rubber boot is made of pure rubber and the best duck, and is positively snag proof. A representative of this paper was shown a number of pairs of this boot that had been worn for some time, and there was not a hole or snagged place on any of them; they were the best-looking lot of rubber boots that had seen lots of wear that we ever saw. The new boot looks exactly like the rubber boot in the illustration in the advertisement, and if your dealer does not carry them in stock, do not take some other, but write the Hamilton-Brown Shoe Company, St. Louis, Mo., and they will tell you just how to get this Security rubber boot. If you once get a pair of these boots you will never have any other kind, as they are the only ones that will stand the hard wear you have to give them. Insist on getting the Security Looming Duck Boot and take no other.

AN IMPORTANT HEREFORD AND DUROC SALE.

Messrs. N. J. Hiltabrand, of Lostant, Ill., and Lewis Bros., of Geneseo, Ill., will offer for sale at public auction on Monday, October 8th, at fair grounds, Princeton, Ill., an excellent lot of Hereford cattle. The day following, Tuesday, October 9th, fifty head of Duroc Jersey swine will be offered for sale. Messrs. Hiltabrand and Lewis Bros. have been breeding Hereford cattle for a number of years, using the best bulls obtainable and by selecting top females of superior breeding and individual merit have succeeded in building up splendid herds. Over half the offering is composed of females, many of which have calves at foot while others are well along in calf or will calve soon after sale day. In fact, every female of breeding age will be bred or have calf at foot. Few as good lots of cattle are ever consigned to public sale as the one which will be offered by these men. Full particulars regarding the offering will appear in these columns next week. In the meantime send for catalog as per the announcement on page 26 of this issue. The Duroc Jerseys are a large, smooth, growthy sort. Thirty spring boars, mostly by Improver H., he by Acrobat by None Such, the sire of Hanley, the noted show and breeding boar; ten fall cows and ten spring sows, make up the consignment, worthy the attendance of all breeders and farmers wanting something good. Valuable additions can

be made to good herds or herd boars secured. Further particulars regarding offering will appear in these columns in our next issue. Write for catalog at once as per the announcement on page 26, kindly mentioning The Homestead.

TOWNSEND'S DISPERSION SALE.

On October 25th, at Anita, Iowa, Mr. C. E. Townsend will make a closing out sale of his entire herd of Short-horn cattle, numbering about seventy head in all. There will be about twenty-five or thirty head of Scotch cattle in the offering, including his herd bull, Sovereign Cupbearer, a five-year-old son of Imp. Sovereign. There will also be about nine head of young Scotch bulls in the sale. The Scotch families represented are Orange Blossom, Victoria, Mysie and Nonpareil. He also has a splendid offering of Scotch-topped cattle. Mr. Townsend has disposed of all his interests in this state and is moving to South Dakota and this is the reason for closing out his herd. Some good cattle will be sold in this sale and it is going to be a good place to add to one's herd or to get a foundation to start a herd. There will be nine Scotch bulls in the sale, including his herd bull, Sovereign Cupbearer. Write for catalog and watch future issues of The Homestead for particulars. Kindly mention The Homestead when writing.

LAST CALL FOR OSBORN'S OHIO CHIEF SALE.

On October 4th at Carson, Iowa, the day following the Harding sale and at the same place, is where Mr. O. E. Osborn, of Weston, Iowa, will sell forty-five head of the best Duroc Jerseys he has ever raised. In looking back over the many years in which Mr. Osborn has bred Durocs, we can point to many a sow and boar that has come from his herd that has helped make his reputation and has placed his name at the top as one of the breeders who believes in a square deal. Mr. Osborn has a half interest in Ohio Chief and he is selling seven or eight of his boars in this sale. He also sells two choice gilts by the same boar. Ten of the boars will be sired by his old boar, Indicator; eight by Briggs' Prince, and two by Miss Bob's Wonder. There will be several good sows in his sale. One of these is sired by old Malcolm's Model and is out of a Crimson Wonder dam. A very choice Indicator sow that he sells in the sale will have a litter of pigs by Ohio Chief, and he also puts in an Orion-bred sow that will have a litter by Ohio Chief. If you want Ohio Chief-Crimson Wonder-Malcolm's Model or Orion blood, you cannot go wrong if you make your purchase of Mr. O. E. Osborn. He puts in an offering that is a credit to any breeder. There will be a choice lot of herd headers in his offering. Send for his catalog and attend the sale. Kindly mention The Homestead when writing.

FORTY HEAD RECORDED HEREFORDS FOR SALE.

A joint sale of Hereford cattle, the property of Mr. F. J. Green, of Early, Iowa, and Mr. Ben Broughton, of Lake View, Iowa, is announced to take place at the Sunny Slope Stock Farm, Lake View, Iowa, on October 11th. The offering will consist of ten bulls and thirty females, all but ten of the latter being of breeding age and having calves at foot or bred to have calves soon. Mr. Green is dispersing his entire herd. He has been a careful, consistent buyer of the right kind of Herefords for some years past, but owing to the death of his son, for whom the cattle were purchased, and the ill health of his wife, he is obliged to give up farming entirely. His herd of cows is uniformly good, sired by such bulls as Garfield by Anxiety Grove 2d, running to The Grove 3d; Sunny Slope Tom 2d by Wild Tom, The Imp. Soudan, Printer, Archibald and Columbus 19th. His young stock were sired by the Briton-bred bull, Rosebud 11007 by Gentry Briton by Christmas Gift by Ancient Briton, the dam tracing back to Earl of Shadeland 12th and Lord Wilton. This was an exceedingly smooth, well-formed bull. Professor Curtiss said of him that he was good enough to show anywhere. Mr. Green has shown his cattle on several occasions, always taking the money. At one time Rosebud at the head of the herd won first prize on herd, all breeds competing, at Alta, Iowa, going ahead of Mr. A. C. Binnie's herd at that place. The present herd bull used by Mr. Green is Allen Overton 2d, a bull having three crosses of Anxiety 4th in him. He was used successfully for a while as herd bull in the herd of Mr. C. G. Comstock, of Missouri. His produce is showing up very nicely. The cows consigned to this sale by Mr. Green will be bred to this bull or have calves at foot by him. Mr. Broughton is consigning about twenty head from his Sunny Slope Farm herd. In making this selection he has been careful not to consign any aged cows or anything that is not in the pink of breeding condition. "Most of my cows," he writes, "are carrying their second or third calf at the present time, and I guarantee them all to be regular breeders. They are with calf by, have calves by their sides by, or were themselves sired by my present herd bull, Dudley 17625. Dudley was by Andrew by Don Carlos, dam by Beau Brummel. From this it will be seen that he is an intensely-bred Anxiety bull. He was a prize winner at the Sioux City Fair this fall without any fitting. He has half brothers and sisters owned by Messrs. Cargill & McMillan, of La Crosse, Wis., that have been first prize winners this season as well as last in the circuit of state and national fairs. The young bull, Leopold, sired by Dudley, deserves special mention; his dam was a granddaughter of the Earl of Shadeland 30th. This is a bull that any breeder might feel pleased to own. At Sioux City, without being fitted, he won second in his class, second at head of breeder's young herd and second as one of four get of one sire. Professor Curtiss said of the class, the get of one sire, that all they needed was a little more fitting and they were good enough to show anywhere. Several of my cows, one bull and the two bulls consigned by Mr. Leslie, of Auburn,

were sired by grandsons of the mighty Dale." Altogether this will be a sale to attract the attention of the best breeders. There will be the most popular blood, good individuals, and the sale is made by men of the best reputation. Parties wanting catalogs should address Mr. Ben Broughton, Lake View, Iowa, or Mr. F. J. Green, Early, Iowa. See announcement on page 27.

WAVELAND SHORT-HORNS.

So unusual has been the demand for the sale of catalogs of Mr. J. B. Brown's forthcoming sale at his farm near Solon, Iowa, October 4th, that we refer to a few numbers in the catalogs, that are pretty generally distributed, as being among cattle shown by him which won prizes. Lot 31 of the sale catalog, Royal Victor, won sixth in the open class and third in the Iowa special at the recent Iowa State Fair. Lot 35 was third in the Iowa class and headed the breeders' herd that with Lots 9, 17, 3 and 24 won fifth in the open class and first in Iowa. The above prizes were all captured this year by cattle that are included in this forthcoming sale. In 1904 Mr. Brown won both the breeders' young herd and the get of sire at the Iowa State Fair and fourth in the open class and in the Iowa special the same year he won both firsts. Lots 1, 10 and 22 were members of this same herd at that time. Last year at Columbus Junction District Fair both the old and young herd prizes were captured, by Mr. Brown's cattle. We make the above additional notes so that those who hold Mr. Brown's catalog can readily refer to these animals by number and see just what the breeding is.

SONNELAND'S DUROC JERSEY SALE.

On October 13th at Harlan, Iowa, Mr. August Sonneland will make a public sale of fifty head of Durocs at the new sale pavilion, and he will put in the pick of this year's crop of pigs. It is very largely a Top Notcher sale, there being ten good boars by Tip Top Notcher, the World's Fair sweepstakes boar, and ten boars by old Top Notcher. There will also be three boars in the sale sired by old Orion and several by Top Notcher Chief 2d. Mr. Sonneland has been a purchaser of some of the very best sows in many of the leading western sales and last spring he went east and topped several of the good eastern sales. He also puts in a few good sows with litters, and he sells a few of his best spring gilts. Mr. Sonneland writes us under recent date and says: "You can say to Homestead readers that I am putting up one of the best offerings of Tip Top Notcher and Top Notcher boars that have ever been offered in the West. My offering will be in nice, useful condition, and just right for breeders. If any of the boys are after the blood that has been foremost in making the leading winners, they can get it in my sale. My catalog is now ready and will be sent on application." When writing for catalog kindly mention The Homestead.

PODENDORF'S IOWA SUNSHINE OFFERING.

On Friday, October 12th, at Council Bluffs, Iowa, will be held the great Iowa Sunshine Poland China sale of Mr. A. J. Podendorf, of Logan, Iowa. This sale is made at the Bluffs simply to accommodate buyers from eastern and southern Iowa and from Nebraska points. Mr. Podendorf's sale always attracts from abroad and his offering this fall is not going to be any exception to the rule. The majority of the stuff that he sells in this sale will be sired by Iowa Sunshine 33086, the boar that sired all of his show stuff, and the boar that has had more to do in bringing Mr. Podendorf and his herd to the front than any other hog he has ever had on the place. As a sire of high-class stuff, carrying quality, bone and finish, Iowa Sunshine has had few equals in the state. In twenty-four litters on the place this year he has sired 200 pigs, thereby proving himself one of the most prolific sires. Mr. Podendorf is selling forty head in this sale, twenty of which will be fall and spring boars and twenty will be sows and gilts. He will sell eight fall boars and the rest will be spring boars. These are nearly all sired by Iowa Sunshine. Among the number will be his great state fair winner, Sunshine Finish, out of Proud Ollie (the dam of forty pigs in four litters) by Proud Perfection. This pig was farrowed the 7th of March and won second at Des Moines in a class where there were 154 entries. It is often said that a pig does not get his deserts, and many breeders here is a great herd heading proposition, and the man that is out for a boar to head a herd will not go wrong in buying this pig. He was one of the greatest young hogs at Des Moines this year. There are several other very toppy Sunshine pigs in the sale that breeders can use to good advantage. The fall boars will also make good, useful breeders. He is putting in three mature sows. One of the best of these is Iowa's Beauty, a two-year-old sow. She was a winner at Des Moines last year and also this year, and she will make a great show sow for next year. This sow Messrs. John Francis & Sons made a long offer for at Des Moines and they wanted her for next year, but she was cataloged for this sale and the breeders will have an opportunity to get a splendid sow if they buy her. Another good two-year-old sow is called Valentine, and Mr. Podendorf puts her in for an attraction. She took second at Nebraska last year and fifth at Iowa. She is due some time after the sale to a boar called Mischief Lad, a son of old Mischief Maker. The other sow is Molly Perfection, a granddaughter of Chief Tecumseh 2d, and she is one of the best breeders he has ever owned. She is also bred to Iowa Sunshine. One of the things that Mr. Podendorf hates to part with is Iowa Belle, a September sow and a daughter of Iowa Sunshine. He places his reputa-

tion on this fall sow and unhesitatingly says that she is the best sow he has ever bred. There will be six fall gilts in the sale, mostly sired by the old hog. It will be essentially a Sunshine offering and those who are wanting this great strain of Poland China blood should not fail to attend this sale. If you cannot attend the sale, send a bid to Mr. M. T. White, a Homestead representative, in care of Mr. Podendorf. The catalog is now ready. Write for it and mention The Homestead.

TREATMENT FOR TICKS AND FLIES.

The following rather elaborate recipe for ticks, horn flies, stable flies, etc., is recommended by the Tennessee Agricultural Experiment Station: Cottonseed oil (fish oil may be substituted), one gallon; sulphur, one pound; carbonate of potash, one pound; concentrated lye, three ounces; beeswax, one-half pound; Zenoleum, one pint; water, three gallons. Heat the cottonseed oil, sulphur, potash and beeswax until the beeswax is melted; then add three gallons of the cottonseed oil or fish oil. To this add one pint of Zenoleum or crude carbolic acid. Before applying this wash to the cattle or horses, dilute with equal parts of water, thoroughly mixing it to form a good emulsion. Those of our readers who are disposed to experiment might try this and report results.

JANES' SHORT-HORN SALE--LAST CALL.

The class of cattle which Mr. A. M. Janes, of Lafayette, Ill., has selected for his forthcoming sale should appeal to buyers of the best sorts of Short-horns. Imported and home-bred Scotch and Scotch-topped females of the most fashionable strains, many of them with calves at foot, some of these bred again and others well along in calf make the offering a desirable one. The herd bulls, Gwendoline Victor and Baron's Champion, are offered for sale through no fault, but simply because Mr. Janes has a very liberal number of the get of these two bulls in the herd and cannot use either profitably. Baron's Champion is evidence of his breeding qualities. He is equally as good a sire of bulls as females and will make an excellent bull to head some good herd. Gwendoline Victor is one of the richest-bred Cruickshank bulls in this country. He was shown at the World's Fair and International in 1904, and was a prize winner at both of these shows in strong competition. He was the highest-priced bull sold in the International Short-horn sale of 1904. Many of his calves are to be found in the offering, giving breeders a good idea of his breeding qualities. The offering is a high-class one in every respect and should not be overlooked. Look up the advertisement on page 35 and plan to be present on sale day. Write for catalog, kindly mentioning The Homestead.

LAST CALL FOR JOHN HUGHES' SALE OF SHORT-HORNS.

October 6th is the date, and Belle Plaine, Iowa, the location at which Mr. John Hughes, formerly of Victor, Iowa, but more recently of Belle Plaine, will sell a choice lot of Short-horn cattle, forty-three head in all--eleven bulls and thirty-two females. Mr. Hughes is selling a fair sprinkling of Scotch cattle confined to three families, the Simplices or Secrets, the Marr Emmas and the Cruickshank Strawberry or Secret family. The Emma cow that is included in this sale is Emma 20th. She and her two daughters are listed. This beautiful cow traces to Imp. Emma 3d, she by Young Englishman. This is the same foundation that produced the famous prize-winning twin Emmas, so successfully shown by their breeders, Messrs. J. H. Potts & Son, during their career as Short-horn breeders. Emma 17th is of this same family, a cow that sold for \$1,750 at auction. Mr. Hughes is presenting a good lot of business Short-horns, fresh from the pasture. He is selling a number of good bulls, among which is the splendid red bull, Strawberry Lad. This bull is three years old and was sired by Village Nonpareil, his dam being the beautiful Cruickshank Secret cow, Imp. Seedling Strawberry. She was sired by the Bruce bull Jerimard, while her dam, Imp. Strawberry 4th, was by Fopsman, a bull bred by Mr. Sylvester Campbell, and he by the Cruickshank bull, Gravesend. This bull is worthy of a place in some good herd and in fact has been in heavy use by Mr. Hughes, hence is a tried breeder and one that will be worth considering on sale day. Simplicity 4th is included in the sale, a splendid roan cow bred by Mr. C. W. Norton. She is by Baron Victor 2d, he by Imp. Baron Victor, her dam being Simplicity 2d by Imp. Cupbearer, and she out of the \$1,200 Imp. Simplicity and own daughter of Cumberland. This cow has a red bull calf at foot calved Jan. 23, 1906. The other cattle are Scotch-topped American sorts, such as Young Phylis, Zella or Fashions, Nell Gwynnes, Rose of Sharons and other standard sorts. There will be five Scotch females and two Scotch bulls listed in this sale. It should be sufficient evidence that some good cattle are offered when so good a judge as Prof. C. F. Curtiss, of the Iowa Agricultural College, bought their present herd bull to succeed Imp. Scotland's Crown from Mr. Hughes, he being a bull of Mr. Hughes' own breeding. This sale will be held the day following Mr. George H. Burge's sale at Mt. Vernon, Iowa, and is very easily reached from Mr. Burge's place, both Belle Plaine and Mt. Vernon being on the main line of the C. & N. W. Ry., Mt. Vernon about twelve miles east of Cedar Rapids, and Belle Plaine about thirty miles west. Belle Plaine being a division point, all trains stop. Note the advertisement on page 30 and write Mr. Hughes at once for the sale catalog. Col. Carey M. Jones will officiate at this sale in his pleasant and apt manner. We predict some bargains, as this is the last of the week's series of Short-horn sales in this section of the state, the chances being that the buy-

ers will be pretty well filled up with cattle by the time Mr. Hughes' sale day is reached. The heavy milking qualities of the Hughes Short-horns are one of the strong points in favor of the herd, but the cattle are not heavily fitted, hence this will accrue to the buyer's benefit and to Mr. Hughes' loss, as it is a well-known fact that the average buyer will pay more for a fat beast than one in thin breeding condition.

ASA TURNER'S DUROC JERSEY MALES.

Mr. Asa Turner, formerly of Maxwell, Iowa, but now of Farrar, Iowa, is offering a very fine bunch of young Duroc Jersey males at reasonable prices. His pigs are by two noted sires, namely, King Perfection 16235, the well-known sweepstakes hog at the Iowa State Fair, he by Banker Boy 2d out of Fancy Perfection, and also Advancer Lad by Advancer 28773 out of Rosehill Belle. Two of the sows in his herd have made notable fair records while in the hands of Mr. G. A. Munson. Among the sows are Prospect 79792 by Sheepspeare out of Countess 2d; also Maxwell Belle 33480 by Ohio Prince out of Reed's Fancy; also Miss Luther 33502 by Luther's Chief Jr. out of Iowa Queen. No man who is posted on Duroc Jersey blood lines needs to be told that this is exceedingly rich breeding. Not only is the breeding right, but the individuality is there in every case. The public demand for the sows that are now owned by Mr. Turner when they were put up at auction compelled him to pay good prices, but an examination of their first litters indicate that they were after all good bargains. Mr. Turner is selling these hogs from \$25 to \$50 each. He will not send out a single pig that does not come up to a high standard, so that our readers are safe in sending in their money and describing the kind of a pig wanted. Address Mr. Asa Turner, Farrar, Iowa.

JONES' NATIONAL SCHOOL OF AUCTIONEERING MOVED TO CHICAGO.

Homestead readers will, no doubt, be somewhat surprised to note that the popular live stock auctioneer, Col. Carey M. Jones, of Davenport, Iowa, has moved his school of auctioneering and oratory to 231 Ashland Boulevard, Chicago. This has been done in the interests of the school, Chicago being the center of the live stock interests of America, or of the world, for that matter, furnishes better opportunities and facilities for the students than could possibly be furnished in a city like Davenport or Des Moines. Col. Carey M. Jones, the president of Jones' National School, is the pioneer and founder of this system of training students in the line of selling blooded live stock and all other classes of property. The phenomenal success of his work at Davenport has surprised even Mr. Jones' intimate friends. The seventh term will open November 19th at the above location. This is unquestionably the best school, the best equipped in all its departments of any auctioneering school in the world. Students attend from almost every state in the Union, as well as from the British possessions. A well-known auctioneer who took a course at the Jones' National School recently said to the writer that he would not be deprived of what he learned at this school for \$1,000, although it cost him but \$100. It should be remembered that the great national stock yards, where all kinds of live stock are sold, affords the students one of the best opportunities extant in which to see the methods of disposing of stock at auction. Mr. Jones has associated with him the strongest corps of instructors that money will secure. The Homestead wishes him the unlimited success of which he is deserving in his removal to Chicago, where his opportunities are unlimited.

ARE YOU INTERESTED?

The coming sale on October 10th at Osceola, Neb., will give the breeders and farmers an opportunity to improve their respective herds by investing a few loose dollars in a few good hogs. Messrs. E. J. Brown and O. E. Mickey, of Osceola, Neb., have selected as choice a lot of Durocs as the two herds could afford and will offer them to the public on the above date. Both gentlemen have good herds and each herd has been topped to make the best offering one that will please those interested in good Durocs. In looking over the Brown herd we first find the grand show hog, Red Knight. This animal was strong enough to win first and sweepstakes in one of the strong shows at Nebraska in 1904. He is a well-balanced boar with good, strong back and good side lines, good head and ear, and very good legs and feet. He was a favorite among all who saw him at the fair, and the decision met with the approval of all. He has sired some strong sons that will be included in the sale and we predict good luck to the one who might be fortunate enough to secure a Red Knight get. Belle's Echo sired by Echo King and out of the greatest Duroc sow, Nebraska Belle, is also in the herd. He is owned by both these gentlemen and they have a strong offering by him. His get in the Fentress sale last fall were ready sellers and were choice animals as well. The cross on Red Knight sows has figured out as expected and consequently several strong herd boars are to be found among the list. Mr. Brown will consign about twenty boars, and these are good. Mr. Mickey will consign about eighteen head, mostly sired by Homestead Gold Dust by Gold Dust Jim. This boar is one of the best sows of the great boar, and his get are real choice animals. Mr. Mickey has a few sired by Red Knight and a few by his partnership boar, Belle's Echo. On looking over our list of notes we find that there will be eleven head sired by Belle's Echo, five by Homestead Gold Dust and two by Red Knight. Nos. 26, 27 and 28 are choice ones sired by Belle's Echo and out of Red Knight dams. No. 29 is sired by Homestead Gold Dust and out of Lady Maublieke, sired by B. Maublieke. This fellow represents a good line of breeding—only fourteen in the litter. Nos. 32 and 33 are out of a litter sister to Red Knight. Mr. Mickey will also offer a very good sow sired by Surprise and out of Red Roso. She is safe in pig to Belle's Echo and will farrow by sale time. The two gentlemen interested in this sale are reliable, and you can expect square dealings from them. If you are unable to attend the sale send a bid in our

care to Mr. G. W. Segrist or Auct. T. C. Callahan. Watch for our next issue and be sure and read the held notes. Look up display advertisement on page 38.

BAXTER'S DUROCS.

Mr. Ed A. Baxter, the well-known Duroc breeder, of Pawnee, Ill., will exhibit Buddy K. IV., sweepstakes boar last year at the Illinois State Fair, again this year at the same fair. Those who have seen this boar of late are unanimous in referring to him as one of the grandest boars the breed has ever produced. Many of his get are included in Mr. Baxter's forthcoming sale, catalogs of which are out and will be mailed to any one writing him. Several head of boars consigned to the sale may be seen at the Illinois State Fair next week. They are not for sale at this time, being held for public sale, but breeders desiring a herd boar may leave bids with Mr. D. M. Pierce, representing The Homestead, who will handle them with proper care. If you are not on Mr. Baxter's mailing list write him at once, kindly mentioning The Homestead, as per advertisement on page 27.

JAMES' BIG POLANDS.

On October 11th at Braddyville, Iowa, Mr. J. O. James, one of the most wide-awake and enthusiastic young breeders in southern Iowa, will make a public sale of fifty head from his herd of big Poland Chinas. This offering will be mostly the get of his noted boar, Pawnee Lad, one of the largest and best hogs in the state, and Big Prospect. There will be fifty head in the sale, half of which will be fall and spring boars. Both of his herd boars, Pawnee Lad and Big Prospect, were bred by Mr. John Blain, and they have been great factors in making the James herd one of the most practical and successful herds of pig Polands in Iowa. He has reserved everything for this sale and only the tops go in. Lady Grant, a daughter of old Giantess, will have five March gilts in the sale, and these are good enough for any breeder to put in his herd. Anna Price 2d, one of his greatest brood sows, will have a March boar and a gilt in the sale that are good to look at, and Choice of 1904, a good Pawnee Lad sow, will have a nice April litter by Big Prospect. May Price 2d has a spring litter in the sale and she will also be sold with litter at foot by Pawnee Lad. A daughter of Nemo L's Dude will also be sold, and she will have a litter of pigs by Pawnee Lad. He sells a good bunch of fall boars in this sale, and some of these are sired by old Pawnee Lad. His spring boars are big, with splendid length, good backs, and lots of bone. Those who want the type of hog that Mr. James breeds will not be disappointed in his offering. He is breeding the practical, money-making Poland China, and his offering this year is about the best that has come from his herd. Write for his catalog and mention The Homestead.

COTTINGHAM'S SHORT-HORN AND POLAND CHINA SALE.

On Tuesday, October 9th, Mr. Ira Cottingham, of Eden, Ill., will hold his annual public sale of Short-horn cattle and Poland China hogs. From his herd twenty-two head of Short-horns have been consigned, including ten pure Scotch females, cows and heifers of such noted families as Imp. Nonpareil (of the Wimple family), Victoria, Secret and Duchess of Gloster. Mr. W. A. Christy, of Canton, Ill., sends forward nine head, four of which are pure Scotch and the others by imported bulls. Mr. J. C. Gutshall, of Elmwood, Ill., sells a choice imported bull four years old. Mr. Cottingham has long been identified with Short-horn interests. He has always used good Scotch bulls and his females have been of the best families. At the head of his herd stands the Scotch bull, Proud Star 2d 202864. He was got by Imp. Star of the North, a sweepstakes bull at the International and a sire of many excellent cattle. Several of the cows and heifers in the sale are in calf to the service of Proud Star 2d. Mr. Cottingham's former herd bull was Champion Archer, he by Imp. Fearless Archer. Many of the heifers in the sale are sired by this bull. The get of Champion Archer bred to Proud Star 2d should produce something extra good and breeders should not overlook this opportunity to make valuable additions to their herds. We wish to call the attention of our readers to a few of the good females included in the offering. Imp. Glad Tidings is a five-year-old cow by Prince of Beauty and her dam was Glad Welcome 3d by the Secret Bull, Sovereign (G1841). Individually Glad Tidings will suit the most discriminating buyers. A wonderfully smooth individual with neat head and horn, good top and bottom lines, she has the quality which the best breeders demand. She has been a very good producer. Since a two-year-old she has dropped a heifer calf about every eleven months. One of her heifer calves sells in this sale, and she is well along in calf to the service of Darnley's Best, a pure Scotch bull of exceptional merit. An excellent young Scotch cow is found in Nonpareil A. She was got by Imp. British Prince, an excellent bull which was used by such good breeders as Messrs. John Isaacs, C. L. Gerlaugh and A. Alexander. Nonpareil A. is well along in calf to service of Darnley's Best. She should be looked after by discriminating buyers. Victoria Pride 3d is a roan heifer of exceptional merit. She was got by Lord Darnley and will be two years old in December. She was recently bred to Proud Star 2d. Mr. Cottingham has always put into his sales good, useful cattle that have been money makers for those who purchased from him. The offering this year is made up of such cattle and breeders and farmers should not overlook this opportunity to secure good, useful cattle of rich breeding and individually in keeping with their breeding. The Poland China consignment is a most excellent one. Forty head have been selected for this sale, consisting of fall gilts, spring gilts and boars. The writer recently inspected the offering and is pleased to recommend it to readers of The Homestead. The type selected and bred by Mr. Cottingham has proved the best money makers for breeders and farmers. Large, smooth, growthy, with plenty of bone and standing on the best of feet, they will suit the most particular buyers. The fall gilts are an unusually good lot. They are sired by Harcourt 94563, he by Faultless Perfection Jr. A few of these gilts have been bred for fall litters, but several are sold open. The spring pigs are mostly by Long

Sunshine 106223, a boar of Mr. Peter Mouw's breeding. Several of the boars are fit to head good herds. The sale will be held in the new pavilion recently erected by Mr. Cottingham on his farm, with ample accommodations for all. Catalogs are now ready and will be sent to all who write as per the advertisement on page 31 of this issue. Bids sent to Mr. D. M. Pierce representing The Homestead in care of Mr. Cottingham will be properly handled. Look up the advertisement and write for catalog at once, kindly mentioning The Homestead.

MANLEY'S SALE DECLARED OFF.

The sale of Messrs. Manley & Co., at Lyons, Neb., on September 18th, was declared off because of the conditions of the weather. The M. & O. railroad was washed out for several miles at Pender, Neb., owing to a cloud burst, and trains did not run for several days. It was a continual down-pour for four days, and under these conditions it was impossible for the most of the buyers to reach their place. Notwithstanding these conditions quite a few were present, some from a distance. Mr. J. Coy Roach, of Girard, Ill., reached the farm by driving from Onawa, Iowa. Mr. Roach is the man that owns the \$1,000 sow, Helen Blazes III, and he came all the way from Illinois to the Manley sale. Before leaving, however, he purchased an Orion boar and two bred sows. These go to his well-known Oak View herd and are something exceptionally good. These were selected from this herd and not from their catalog. Mr. John Tighe, of Stanton, Neb., bought their best young John fall boar at a long price to head his herd. He was one of the best boars they raised this year. They now offer at private sale their entire offering that was cataloged for sale, except the boar sold to Mr. Tighe. Among these are ten sows, bred to Junior Jim, their Iowa State Fair winner, and also to Proud Advance. They also offer eight fall boars by old Orion and a number of fall boars sired by Young John and Belle's King. The boys are offering some hargains in these boars and bred sows. A sow bred to Junior Jim or Proud Advance will not be a bad proposition for many of the best breeders to get for a future drawing card. Write them about these at once and mention The Homestead.

H. L. MCKELVIE WILL SELL A STRONG LOT OF HOGS.

One of the coming attractions among the Poland China sales will be the strong offering put forth by Mr. H. L. McKelvie, of Fairfield, Neb. The McKelvie herd needs no introduction, as these gentlemen have always been classed among the top. Mr. McKelvie will sell as strong a lot of boars and gilts as will go through any sale ring this season. He has made some good purchases of late and the class of Polands now on the farm are hard to beat. Some of the main attractions will be in the boar class. He has about seven boars, fall and spring yearlings, that certainly look good. The young fall boar sired by Nemo L's Dude is one that should be watched. He is very much the likeness of his sire and is as strong on his feet and legs as you will find. The old tried boar, Kodak, will be included in the sale as well as two choice sons of last spring yearlings. Kodak has proved one of the strong breeders and his get show him up to good advantage. One son in particular should be looked after by all means. He is a show hog and we would only fault him in his front feet, which could be remedied by the trimming process. The spring gilts and boars are good and that is all that is necessary to say. Mr. McKelvie has the type of Polands that will please the Iowa breeders and you can rest assured that you will get the very best to be found when buying of him. Watch our sale announcement later. We would ask you to get his catalog now and post yourself on the offering before sale day. The sale will be held at his farm near Fairfield, Neb., on October 26th. You can attend this sale and then make direct connections for the Messrs. McNutt & Meece sale at Grand Island, Neb. Both sales will be of top notchers.

LAST CALL FOR THE TIGHE-WALLACE DUROC JERSEY SALE.

The first sale of Duroc Jerseys to be held at the new sale pavilion at Wisner, Neb., will be that of Mr. John Tighe, of Stanton, Neb., and Mr. Clarence Wallace, of Wisner, Neb. These two breeders selected from their herds the best they have and are putting them into this sale. Mr. Wallace puts in nine good fall boars, vigorous, stretchy, good-boned fellows, and nearly every one with a good, arched back. These are all sired by Col. Van Patton, a son of the old sweepstakes boar, Van's Perfection, and the present herd boar of Mr. Wallace. These are out of sows that in many cases are granddaughters of old Jumbo Red, considered one of the best brood sow boars ever used in Nebraska. Mr. Wallace also sells fifteen head of spring boars sired by Billy K. 2d. Colonel Van Patton and Hamilton's Improver, the latter boar being a son of Improver II., and a half brother to the first-prize pig at the Nebraska State Fair this year. He also puts in a few boars sired by a son of old St. Paul and a son of Red Chief I Am. Mr. Wallace is putting in a very creditable lot of Duroc Jersey boars in this sale, and they will be found good in color, length and with plenty of bone. Mr. Tighe is one of the old reliables in Duroc Jersey circles in this section of Nebraska, and no man stands higher in the estimation of his neighbors and acquaintances than he. Mr. Tighe sells twenty-one head of spring boars, sired by Surprise Chip, a son of old Surprise, and a boar that has sired him some very good pigs. He also has pigs by Belle's Echo Prince, Glendale Critic, and a few by other boars. Two of Belle's Echo Prince boars are out of Mollie Orion, the sow that topped the Mihil's sale last winter. Nos. 14 and 15 are sired by Echo King and out of a Waterloo Prince dam. A couple of good boar pigs are sired by Crimson Tom and are out of a daughter of Belle's Echo. Mr. Tighe will sell Surprise Chip because he has so many of his daughters in the herd. His offering carries the blood of Glendale, Red Knight, Proud Advance and Orion and Mr. Tighe is offering the very best he has raised this year. Those who want Duroc Jersey

I think too much of my name to put it upon poor lamp-chimneys. Evidently other makers feel the same way. Good lamp-chimneys bear my name, and the poor ones go nameless.

Let me send you my Index to chimneys. It is free.

Address, MACBETH, Pittsburgh.

boars will find the Tighe-Wallace sale a good place to buy. See their advertisement on page 34 and write either party for catalog, and please mention The Homestead.

LAST CALL FOR WATSON BROS.' DUROC SALE.

About as nice an offering of Durocs as will go through a sale in southern Iowa this fall will be that of the Messrs. Watson Bros., at Creston, on October 3d. All of their best stuff has been reserved for this sale, and they are offering forty-five head. A representative of The Homestead has seen their offering and we want to say that they are putting into this sale one of the best bunches of spring boars that we have seen this season. There are fifteen spring boars, the very pick of this year's crop of pigs, and about twenty of their best gilts. Some of these gilts will be sired by Proud Advance, and two by the prize-winning boar, Keep On. There will also be a good gilt in the sale by Addy's Choice Goods. There will also be some gilts sired by Harding's Proud Advance. Among the boars will be a good pig by Keep On. Two of the spring boars will be sired by Addy's Choice Goods. The young stuff that they are offering has been well grown out, has ample bone, with plenty of stretch to them, and they are bred along the most up-to-date lines. In fact, this sale carries about as much of the blood of the winners as any of the fall sales because the boys have purchased many of the tops at several of the best sales last spring. The matured sows are mostly sired by old Parnell Banner, a hog that is well and favorably known to southern Iowa Duroc men and also by Matchless Chief. Many of Iowa's best breeders can find good things in the Watson Bros.' sale, and we urge upon them to come out and attend their sale. The boys have been good buyers and they have an offering that merits a good attendance on the part of breeders and farmers who want a good boar or a few choice gilts. Write at once for their catalog and mention The Homestead.

LAST CALL FOR THE SOUTH OMAHA SALE OF DOUBLE STANDARD POLLED DURHAM CATTLE.

With this issue we direct attention for the last time to the very important sale of Double Standard Polled Durham cattle to be sold at South Omaha sale pavilion October 5th. Attention has previously been called to the high character of the cattle to be sold, but we would again remind our readers, lest they forget, that the bringing of these cattle to the very gateway of the middle West offers them an opportunity seldom equaled in the way of selection of good Polled Durham cattle, with the variety of breeding that will be found in this offering. The cattle are contributed by four different firms as follows: Mr. D. L. Pond, of Inman, Neb.; John Renswick, of Boyden, Iowa; Shaver & Dueker, of Kolona and Wellman, Iowa; and M. Rau, of Harlan, Iowa. These cattle are consigned by some of the foremost breeders of the country and are the produce of illustrious sires and dams that stand high on the honor roll of Polled Durhams. Included in this sale are many of superior individual merit as well as of choice breeding sufficient to attract the attention of the discriminating buyer. Those who are in quest of good stock with which to lay the foundation of a new herd of this breed, or those who wish to strengthen the ones they already have, can, no doubt, find something to suit them here. All females of suitable age will be bred to the best herd bulls in the respective herds of the contributors or will have calves at foot. In the announcement of their catalog mention is made of the fact that all known defects will be pointed out on day of sale. All animals are guaranteed breeders. In buying a piece of land every buyer wants a deed and abstract of title. These keen, far-seeing breeders are prepared to furnish with each animal sold, certified copies of registration in both the American Short-horn herd book and the Polled Durham herd book. Terms of the sale are cash, but a credit of six months will be given on approved notes bearing 7 per cent interest. Bids by wire or mail should be sent to Col. F. M. Woods, T. G. Walker or Joe Shaver, who are the auctioneers. A perusal of the catalog will at once show the informed reader or student of Polled Durham pedigree that some splendid Polled Durham blood is being offered. Some of the prominent Polled Durham herd bulls found in the pedigrees are Ottawa Red Duke 2d, Duchess King, Gwynne Duke, Polled Cedar King, Earle of Ottawa, Polled Chief, Waterloo Duke, Montrose, Tippecanoe 6th, Hillsdale Commander, Romeo Ottawa Gauntlet, Cambridge Cup Bearer, Duke of Wellman, Young Athlestone, Young Hamilton, Rattler, Bryan, Young Hero, all of which are Double Standard bulls. Thus, it will be seen that the offering is composed of cattle that are choicely bred in Double Standard Polled Durham lines. No breeder need hesitate to attend this sale and purchase cattle, as the offering is such as should command the attention of every lover of this growing popular breed of hornless cattle. The date should not be lost sight of. Application for catalogs should be made to

Mr. L. G. Shaver, manager, at Kolona, Iowa. The catalogs are now out and ready for distribution. Every one of our readers can have one for the asking by mentioning The Homestead when writing. See the advertisement on page 39.

GREER'S DUROCS.

One of the best lots of Durocs which the writer, representing this paper has ever inspected, is the consignment from the well-known Oak Grove herd, the property of Messrs. W. W. Greer & Son, of Rushville, Ill. Size, quality, uniformity of type and color place this offering among the best that was ever put up for public appraisal. Visitors to the Illinois State Fair next week will have the pleasure of inspecting several head which will be included in the offering to be sold at Bushnell, Monday, October 22d. On account of the superior railroad facilities Mr. Greer decided to hold his sale at Bushnell. Trains from all directions leave after the sale, and breeders who wish to go to Mr. Laurie's sale the next day can easily do so. Messrs. Greer's offering consists of twenty-five head of fall sows, ten head of fall hogs, a few sows that have raised one litter of pigs, and some ten or twelve head of spring pigs, both male and female. The writer wishes to call attention to a litter of October 7th pigs by Tip Top Notcher and out of Daisy Improver. There are four of each sex in this litter and great attention has been directed to them by competent judges, who have pronounced this litter the best the breed has produced. With a possible exception of one boar, the entire litter has been reserved for the sale. Breeders in attendance at the Illinois State Fair who wish to secure one of this litter, and who cannot be present at the sale, may leave bids with Mr. D. M. Pierce, representing this paper, who will properly handle such bids. Messrs. Greer's consignment throughout is one of exceptional merit and is in keeping with the herd maintained by them. Plan to be present sale day, and if not on his mailing list write for a catalog at once as per the announcement on page 36 of this issue. Kindly mention The Homestead when writing.

FULTON'S BIG-BONED POLANDS.

At Villisca, Iowa, on October 10th, W. D. Fulton will again sell a draft of fifty head from his herd, and this event is always looked forward to by breeders and farmers who want a big hog. He is selling fifty head—twenty-five spring boars, fifteen spring gilts—the rest fall sows and matured brood sows with litters at side. No breeder of Poland in this state has been more steadfast in their belief in a big, lengthy, large-boned hog, than has Mr. W. D. Fulton, and no breeder has been more successful in convincing the farmers and breeders that he has just what they want. A large sprinkling of his offering are sired by his big yearling boar, Miller Boy 38515, a boar purchased of John Miller. He will now weigh around 600 pounds and has a nine-inch hump, and he is the sire of some of the growtiest stuff in the sale. He puts in one litter that is sired by Long Wonder, the Peter Mouw boar. Three of the spring litter are sired by Big Klever, a boar purchased from Ed. Klever, and used with much success in the herd. Big Klever is a complete outcross from both the Tecumseh and Perfection strains of Poland China and many of our readers can use his stuff. He also sells four litters by Model Chief, a grandson of Chief Perfection 2d. The three sows and one boar by Long Wonder, referred to above, are out of a sow called Fulton's Surprise, by Surprise Chief by Chief Price, and those who are familiar with the larger strains of Poland will recognize in this breeding a line of blood that has done wonders in bringing the Poland Chinas into popular favor with the farmers of the West. Mr. Fulton is putting in some good sows with litter by Miller Boy, and his entire offering will speak for themselves on sale day. In southern Iowa Fulton's "big fellows" have won a reputation and there is always a strong demand for his breeding. He is offering a good bunch of boars and sows in this sale, and those who want his type of hog will not be disappointed if they go to the sale. Write him for catalog and mention The Iowa Homestead.

SOMETHING ABOUT WYOMING LANDS.

One of our representatives recently called upon Mr. Carper, secretary of the Federal Land & Securities Co., of Des Moines, Iowa, and in making some inquiries about their land Mr. Carper said: "We receive many letters asking us if the rainfall on the golden prairie of Wyoming is sufficient to produce crops. These inquiries show that the lack of information on the subject is general, owing to the stories of stock men and others who are interested in retarding the settlement of the western country. Statistics are always dry reading, but in this connection here are some comparative figures that should hold the attention. In the annual report of 1902 of the weather bureau of the United States Department of Agriculture, the average annual precipitation for Polk county, Iowa, as recorded at Des Moines for a period of twenty-five years ending in 1902 was 32.52. The lowest annual rainfall was 19.77 inches in 1901. The average rainfall at Des Moines during growing season from May 1st to September 1st for thirteen years ending with 1902 was 15.69 inches, with lowest of 6.2 inches for these four months of 1901. It may be a surprise to many that although 1901 shows only 6.2 inches rainfall for the four growing months, the average yield of corn in Polk county was only six bushels per acre less than the average for the entire thirteen years of the report, while wheat and hay made an average crop, and oats fell but two bushels per acre below the average. These facts can be verified by reference to page 102 of the government agricultural report mentioned. Now, for comparison. It should be remembered that the golden prairie of Wyoming is essentially a small grain country, and for comparison we take the months of April, May, June and July for the seven years in which the government weather bureau station has been established at Pine Bluffs. We find that the average rainfall for these months at that point has been 8.76 inches or over 2.5 inches more than for the four growing months of 1901 at Des Moines, Iowa, when there was an average crop of wheat and hay, and almost an average crop of corn and oats. Only once during these seven years has the average at Pine Bluffs for the growing season fallen below six inches, and that year the precipitation of 4.66 inches came mostly

in May, June and July with a resulting fair crop of small grains. The rainfall at Des Moines for the growing months of 1894 was 5.26 inches. Nature that so wisely sends autumn rains to us here in Iowa to refresh and bring forth the fall pasturage, as wisely withholds such rains in the golden prairie district of Wyoming, preventing damage and waste to the harvested grains and permitting the grasses to mature and cure for winter grazing. Thrashing is now in progress on the improved farms on the golden prairie, and the farmers report yields of wheat ranging from twenty-two to thirty-five bushels, and oats from forty to fifty-two bushels, with some of the best fields yet to hear from. The soil on the golden prairie is very rich with a retentive yellow clay subsoil and the crops raised there bear us out in our statement that the rainfall is ample to produce all grain crops." Read the advertisement on page 21 and write the company for full information.

WOODLAND DISPERSION.

A Short-horn sale which should attract the attention of breeders throughout the entire corn belt is that of Mr. W. I. Wood, of Williamsport, Ohio, proprietor of the Woodland herd. In order to settle the partnership existing between Mr. Wood and his sister, this noted herd will be dispersed on Thursday, October 18th, at Williamsport C. H., Ohio. At the head of this herd stands Imp. First-in-the-Ring. As a sire of breeding and show cattle he has few equals. In 1902 three of his sons, Master-of-the-Ring, Choice-of-the-Ring and Lord-of-the-Ring sold for more money than any three bulls the get of one sire in America. Not only has he been a good bull breeder, but his heifers are equally as good. It is only in dispersion sales that breeders are permitted to bid on such hulls as Imp. First-in-the-Ring. Cows that under any other circumstances would not be priced or parted with go into this sale. Choice-of-the-Ring is also included in the offering. His get have had ready sale and have come up to the expectations of the most discriminating buyers. Woodland Coronet is another of the hulls used by Mr. Wood and in placing him in this sale an opportunity is given to breeders to secure an excellent bull at their own figures. There will be a car load of younger hulls of rich breeding and individual merit entitling them to places in good herds. The female portion of the herd is equally as good as the bull consignment; choicely-bred imported and home-bred Scotch of Cruickshank and other leading families, Bates of the best and most popular families, and Scotch-topped cattle that will suit buyers of this class. In fact many of these cattle carry more Scotch blood than those designated as pure Scotch. Many of the cows have calves at foot by one of the bulls named above, while others will be well along in calf. The heifers are a strong lot. To the breeder who is in search of some extra good heifers this dispersion offers an opportunity seldom given. High prices are not looked for. A dispersion sale of this character includes everything, both old and young, and it is in sales of this character that many bargains are to be obtained. Mr. Wood is recognized as one of America's most prominent Short-horn breeders and the cattle which he is selling at this time include many of the sort which enabled Mr. Wood to produce such noted animals as have gone forth from Woodland herd. Catalogs containing numerous photographs of individuals offered for sale are now ready and will be mailed to all those who write, mentioning this paper. Further particulars concerning this offering will appear in our next issue. Write for catalog at once and plan to be present at Washington C. H., Ohio, on Thursday, October 18th. See advertisement on page 37.

LAST CALL FOR ED COSGRIF'S SALE OF SHORT-HORNS.

Attention, all! If you are interested in Short-horn cattle of the business sort it will pay you to write today to Mr. Ed Cosgriff, of Clarence, Cedar county, Iowa, for his sale catalog of Short-horn cattle to be sold at his farm two miles south of Clarence, October 2d. In the sale will be listed forty head of very practical, useful Short-horn cattle, divided as follows: Thirty head of fine, large, strong cows and heifers, including ten exceptionally good yearling heifers by Victor Fashion and nine or ten strong, thick, stocky young hulls. Mr. Cosgriff is selling a heavy draft from his herd because of the fact that his son is going away to school this winter and he finds himself with greater cares on his hands than he feels able to undertake, and for that reason a number of Short-horns will be listed in this sale that would otherwise be priceless. Mr. Cosgriff's herd is built up entirely on common-sense, practical lines. He makes no pretention to having a Scotch herd, all in the sale being Scotch-topped. But for years he has possessed that wisdom and foresight which prompted him to buy the best \$500 Scotch bulls that he could find with which to head his herd. We have previously made mention of the two Scotch bulls now heading the herd, Victor Fashion and Scottish Spartan. Few herds of Short-horns have been so fortunate as to be so well and strongly headed as has the Cosgriff herd. From time to time the writer, in visiting this herd, has been impressed with the striking family characteristics of the entire herd and particularly so of the young bulls that have been for sale each year the get of Victor Fashion. Every one of this bull's calves are possessed of the same thick-fleshed qualities and smoothness of their illustrious sire. Mr. Cosgriff has always had good demand at good prices for all the bulls that he could produce. This offering is in the pink of condition, as viewed from the standpoint of future usefulness as a breeding herd. The major portion of their flesh, however, is natural flesh made on the grass. While Mr. Cosgriff is a liberal feeder in a sense he is not a heavy grain feeder to the detriment of the animals. As has been before stated, it is certainly worth something to buy cattle of a man whose word and integrity are above reproach, one in whom absolute confidence may rest in every word and statement made by him. Such a man is Mr. Cosgriff. The Homestead recommends its readers to keep this sale in mind as it certainly affords a golden opportunity to secure some splendid, practical, useful Short-horns, at prices that are not expected to be at all high or out of line in comparison with the quality of the stock. Past

sales held by Mr. Cosgriff have furnished bargains to the buyer seldom equaled, the stock selling rather low, considering its individual worth and condition. A goodly number of these cows have strong, husky calves at foot and are again reared, while others are well forward in calf, except the heifers, which have been more recently bred. The buyer will be fully protected by the most liberal guarantee with which these cattle are clothed. Besides this, Mr. Cosgriff's guarantee is just as good as a government bond. His catalog is now ready to be placed in the hands of every Homestead reader who will apply for the same. On October 4th Mr. J. B. Brown, of Solon, Iowa, sells fifty head of Short-horns and October 5th Mr. George H. Burge sells a like number at Mt. Vernon, Iowa. Arrangements have been made whereby parties from a distance may attend all of these sales without the least inconvenience. See advertisement on page 29.

CULTER & PROCTOR STOVES.

One of the oldest and largest firms engaged in the manufacture of high-grade steel ranges and cooks, cast ranges and cooks and heaters is the Culter & Proctor Stove Company, of Peoria, Ill. For more than forty years this firm have been making stoves in Peoria, commencing in a small way and enlarging their capacity from time to time until an entire block is covered with five-story buildings. An inspection of this complete plant would convince anyone that every care was taken and no expense spared in their efforts to produce the very best only. The very latest improvements in machinery are installed, only skilled labor employed and only the best of materials of all kinds used. The closest attention is paid to every detail and all goods closely inspected. They pride themselves on the durability of their goods, the mounting, fitting, nickeling and general, handsome, attractive appearance. They endeavor to keep their line right up to date in every respect and are constantly putting new goods on the market, all of which are thoroughly tested before marketed, so if you want the best, look for the name, Culter & Proctor Stove Company, which will be found on each and every stove. The company enjoy a large trade on their steel ranges, of which the Peoria Lexington is their leader and special pride, a range that stands alone as the acme of perfection in family ranges. Everything of the best is used in the construction of these ranges. The outside body is made of the very best obtainable heavy anti-rust planished steel that will retain its luster; has double walls of heavy steel lined with heavy asbestos mill board; hand riveted every two inches with steeple head rivets. The oven door hinge is put on with square head machine bolts through cast plate on inside making it perfectly tight and rigid; cannot work loose. The catch for oven door and cast top of range are fastened on in the same way. All parts coming in contact with fire or intense heat are protected with cast iron plates with asbestos mill board between cast plates and steel. Top oven plate is covered with asbestos protected with cast iron frame; has perfect operating side damper (original with this company) and found only in their Peoria Lexington, Sterling Lexington and Wabash steel

ranges and Peoria Lexington cast ranges. Has large fire box lined with heavy sectional linings; duplex grate which can be reversed for wood; grate is easily removed and replaced without disturbing the fire box linings or water front. Has deep ash pit, so ashes cannot bank up and cause grates to burn out. Large, balled ash pan and ash chute to guide all ashes into pan. Cast iron back flue or smoke box. Has patented non-breakable drop oven door, perfectly balanced. Will remain open at any angle and when dropped to horizontal position is a perfect and substantial oven shelf. Has double flue bottom which holds heat in oven and insures quick, even baking. Has thermometer in oven door. Has handsome substantial cast base; nickel ornamentation very elaborate, elegant and attractive. Their Sterling Lexington, Wabash and Active Mascot steel ranges are made of same high-grade material and with same care as the famous Peoria Lexington and will be found to equal the best steel ranges made by other manufacturers. The Regal Peoria hard coal base burner is a new design and strictly high-grade modern stove, having all the latest improvements of practical value in a base burner. Very economical and a powerful base heater by reason of their perfect fine construction which throws heat over entire base, utilizing all heat. The hot air circulating flue draws cold air from the floor and in its passage through the heated base, up and through back flue to hot air exit the air becomes thoroughly heated. By attaching pipe to collar over hot air exit this heat can be carried to upper room, or by reversing the damper this heat can be thrown out into room occupied by the stove. The Regal Peoria has improved duplex grate and patented hall bearing shaking ring, very easy to operate and removes the necessity of using a poker, as the shaking ring thoroughly cleans out all ashes from outer edge of fire pot. A very handsome stove. The Peoria gas burner is something entirely new, being a magazine stove for soft coal, hard coal, coke, lignite or slack. The only stove ever made that will, with entire satisfaction, burn soft coal and slack in a magazine and will automatically feed soft coal and slack as readily as hard coal. Positively will not burn up or cake in the magazine. Has down draft smoke and gas consumer that does the work perfectly and at same time keeps coal in magazine cool and this is the secret of its success. It is very economical in the consumption of fuel, cuts your fuel bill in half. A wonderful fire keeper. The handsome nickel trimmings and illuminated mica front door make the Peoria gas burner a very cheerful and attractive stove. Ask your dealers for Messrs. Culter & Proctor Stove Company's goods, or write direct to the company and they will give you full information about any style or styles and tell you where you can buy them. A cordial invitation is extended to all to examine their goods at the Illinois State Fair, September 28th to October 5th.

ERSCHEN'S DUROC SALE.

Mr. Frank M. Erschen, of Odell, Ill., has selected October 11th as the date on which he will offer to readers of The Homestead forty head of richly-bred Durocs at public auction. Mr. Erschen has been a liberal

2d ANNUAL SALE

OF

Pure Bred Hereford Cattle and Duroc Jersey Hogs.

N. J. HILTABRAND and LEWIS BROS.

will sell at Public Auction at the

Princeton Fair Grounds, Princeton, Ill.

We are offering a well bred and a thoroughly useful lot of cattle in this sale. With the exception of a few young heifers, all females will have calves at foot or be bred. An excellent lot of bulls representing the get of some of the best sires known to the breed.

50 Head Pure Bred

Hereford Cattle

Mon., Oct. 8, 1906

50 Head of

Duroc Jersey Hogs

Tues., Oct. 9, 1906

30 spring boars --- 10 spring gilts --- 10 fall gilts
representing the best strains of the breed. Those who want a herd boar will find them in this sale.

Sale to commence at 1 o'clock each day. Sale held under cover, rain, or shine. For catalogs address

N. J. Hiltabrand,
Lonsant, Ill.

Lewis Bros.,
Geneseo, Ill.

Cols. Edmonson, Plumley, McCall and others, Auctioneers.

SEND BIDS TO D. M. PIERCE, REPRESENTING THE HOMESTEAD.

buyer from the best herds and the lot which he has selected for this fall sale represents the tops of the season's crop of pigs. Twenty-six head of spring boars from his own herd, three head from the herd of Mr. C. P. Morris, of Dwight, Ill.; five head from the herd of Mr. W. J. Taylor, of Dwight, Ill., and two head from the herd of Mr. John Schrotborger, of Gardner, Ill., make up the boar portion of the offering. The balance are spring gilts from Mr. Erschen's herd. Several are sired by Comet 25965, he by the International winner, Gold Finch, and out of Daisy Paul by Oom Paul. A number are by Frank's Choice, he by Stoner's Improver and out of Daisy Muller, an International winner, and will please breeders or farmers looking for herd boars. A litter by Tip Top Notcher, the grand champion boar at the World's Fair; another by Buddy K. IV., the first-prize and sweepstakes boar at the Illinois State Fair 1905, and one by Roland, should prove attractive to breeders. The yearling boar, Long Duke, a son of the noted show and breeding boar, Longfellow, and out of Bright Star III, the dam of the prize-winning boar, Hanley, will suit some breeder in search of a good herd boar. Mr. Erschen recently purchased Hanley II, at the J. D. Nidlinger sale, and other good boars at the head of his herd place it among the best in the West. Catalogs will be sent to all who write mentioning The Homestead. Plan to attend this sale if in search of a herd boar. Further particulars concerning this herd will appear in our next issue. Bids sent to Mr. D. M. Pierce, representing The Homestead, in care of Mr. Erschen will be properly handled. The announcement appears on this page.

THE LAST CALL FOR JOHN WEIGHTON'S DUROC JERSEY SALE.

October 2d promises to be a lively day at Audubon, Iowa, when Mr. John Weighton sells his fifty head of high-class Duroc Jerseys. No sale held this fall will have more blood of the winners than the Weighton sale. The catalog, which should be in the hands of every Duroc Jersey breeder, makes rich reading for those who take pride in the best that the breed affords. The offering is largely sired by Proud Advancer, a son of Proud Advance, and out of an Audubon sow; Oran, a son of old Orion, and Audubon, a grandson of Sensation, and their main-herd boar for the past two years. The spring boars are mostly sired by Proud Advancer, the sire of his first-prize gilt and second-prize litter at the Iowa State Fair this year. A number of the spring boars are sired by Oran, a son of Orion. One of the best boar pigs in the sale is sired by Proud Advance and out of S. E.'s Model, the \$1,000 sow. Here is a pig that is bred along the most up-to-date lines, and he is going to be sought after by some enterprising breeder on sale day. It is now a question as to who will own him, as several of the best breeders have their eye on him. There are several other herd-heading pigs among the boars, and these must be seen to be appreciated. He is going to sell his herd boar, Audubon, one of the best arch-backed boars in the state. He has been used with much success in the Weighton herd and Mr. Weighton now sells him because he has so much of his breeding. There will be eight sows with litters in the sale; seven open gilts, eleven yearling boars and twenty-three spring boars. Mr. Weighton is selling a good daughter of Orion with litter of pigs, a couple by Peerless Oriou, one by Oran, a son of Orion, and one by Audubon. Few sales this fall can boast of such an array of blood lines as will be found in the Weighton sale. There are some very excellent boars in this sale, and Mr. Weighton says for all the boys to come and see one of the best herds and one of the most up-to-date hog farms in Iowa. Write for catalog and mention The Homestead.

THE WILLIAMS SHORT-HORN SALE.
On Monday, October 8th, at Oakland, Iowa, in the new sale pavilion, Mr. R. E. Williams will sell a draft of forty head of Short-horn cattle. He has selected these from among his herd and has concluded to dispose of them through the public sale ring. There will be eight good yearling bulls in the offering, nine yearling heifers and eight two-year-old heifers. The rest will be cows, every one of which will have calf at foot excepting four, and they will be bred and safe in calf to Grand Champion, a Duchess of Gloster bull, used at the head of his herd. The largest part of the offering belong to the Rose of Sharon, Young Mary and Lady Elizabeth families, together with a nice sprinkling of Arabellas, White Roses and Cowslip tribes. The cattle will be offered in good breeding condition and nineteen head will have calves at foot by Grand Champion. This bull was bred by Messrs. T. J. Ryan & Son and is a son of the 62d Duchess of Gloster, a daughter of King James, and was one of the very best Scotch cows that was ever in the Ryan herd. Quite a percentage of the cattle that go into this sale will be sired by Prince Airdrie, a bull that was formerly used in the herd. Some of the cattle that are to be sold are pure Bates, while others have a number of Scotch tops on them. The bulls are a good, vigorous bunch, are all red in color and are ready to do active service. Mr. Williams has too many cattle on the farm and he therefore takes this way of disposing of his surplus. He makes no claim of offering straight Scotch cattle, but he is offering a bunch of cattle that have always made him money, and they in turn will do the same for those who buy them and take care of them. In this sale will be a nice bunch of yearling and two-year-old heifers that are going to develop into good cows and these will be a good proposition for someone to buy who wants to improve the stock now on his farm. The sale will take place in the new sale pavilion, and there will be no postponement rain or shine. Mr. Williams has issued a nice catalog in which he invites all those who are interested in good cattle to attend the sale. Kindly write for it and mention The Homestead.

GALLOWAY SALE AT AMERICAN ROYAL.
There will probably be no more important event this season in Galloway circles than the sale at Kansas City during the American Royal Show Thursday, October 11th. One has only to glance at the names of the consignors to this sale to be convinced of the quality of the offering. Messrs. A. M. Thompson, W. M. Brown & Son, J. E. Bales & Son, Claude Attebery, Michigan Premium Stock Company, O. E. Matson, C. E.

Clark, F. P. Wild, S. M. Croft & Sons, W. C. Woods, F. E. Moore & Sons, Robert Dey and Brookside Farm Company will each contribute animals from their successful show and breeding herds. The bull offering contains a choice lot of individuals. Several have been noted prize winners at the leading shows and some have held prominent position in the best herds, while the young bulls are the get of noted champions and first-prize winners. Mr. A. M. Thompson has consigned Caleb Miller 15863, a richly-bred Brookside bull, which has been a splendid breeder in his herd. He has also included a couple of choice young bulls by the noted Wavertree bull, Dragon of Wavertree, which are fit to head any herd. Mr. S. M. Croft has put in his imported bull, Randolph 2d of Thornhill 19302. This bull is just at his best and is fit to be placed at the head of the best herd in the country. His merits as a breeder can be readily ascertained by a review of the Croft herd at the show. The Brookside Farm Company has consigned its noted show bull, Scottish Chief 3d of Castlemilk 21227. Messrs. Brown & Son are offering two of Chief 2d of Stepford's sons, which are good enough to satisfy the most fastidious. The Bales and Clark herds will be represented by sons of their famous champion bulls, Macdougall 4th of Tarbrooch and Worthy 3d. The Michigan Premium Stock Company has contributed its herd bulls, Watchman and Repeater. The latter is a young bull which was bred at Brookside and is the only son of Scottish Standard 15221 in the sale. Mr. Attebery's offering includes a few choice individuals which are richly-bred and possess the right substance and quality for range purposes. Messrs. Moore & Dey have also contributed very useful bulls that are good enough to head any herd. Never before has the association included so many richly-bred herd headers that have proved successful sires. The matured show bulls are just in the prime of their usefulness and the young bulls are a promising lot which contains several animals that will make noted show bulls. Altogether the offering contains bulls of the most fashionable families of Great Britain and America. There are bulls that have been first-prize winners and champions, some that will be prize winners at the Royal and still others that will undoubtedly produce animals that will be prize winners at the great shows of the future. Those desiring to obtain a herd bull or bulls for heavy service on the range that are teeming with the best blood of the breed should by all means arrange to attend the American Royal Galloway sale and secure their wants from this excellent offering at public prices. For further information and catalogs address Mr. Charles Gray, 17 Exchange Ave., Chicago, Ill.

STEWART HEREFORD SALE.
On October 3d at Steward, Ill., occurs the annual Hereford sale made up of cattle from the herds of Messrs. W. E. Hemenway & Son, J. M. Grimes, Morris Cook, C. C. Rowley and C. A. Watson, all of Steward, Ill. This offering is an unusually good one. Messrs. Hemenway send forward twelve females and three bulls. Mr. Cook lists eleven yearling heifers and four bulls. Mr. Grimes has selected thirteen females and two bulls for his consignment to the sale. The balance of the offering is made up of the tops of several good herds in the vicinity of Steward. We wish to call attention to the excellence of this offering in point of breeding and individual excellence. At the head of the herds of Messrs. Hemenway & Son and Morris Cook stands Masquerader, one of the best bulls in this country, a winner at the International. Individually and as a breeder of excellent cattle he has no superior. The heifers which go into this sale over thirty in number sired by Masquerader are one of the best lots which the writer representing this paper has ever had the pleasure of inspecting. Masquerader stamps his get as do few bulls. He is a prepotent sire and transmits his good qualities to his get. Mr. Cook also includes Alto Beau 29th, a son of Masquerader, just turned twenty months old. Of the fifteen head which Mr. Cook consigns all are yearlings, large, growthy, well-marked and worthy a place in the best herds. With the exception of two head his entire consignment is by Masquerader. Mr. Grimes sends forward a very uniform lot. Particular attention is directed to the yearling heifers in his consignment got by Astor. They are one of the best lots to go into a sale this year. Seldom indeed is an opportunity presented to breeders and farmers wherein so many good cattle are offered at auction. The six cows which Mr. Grimes consigns have heifer calves at foot. Messrs. Hemenway's offering, like the others mentioned above, is a particularly strong one. Ten of the heifers are by Masquerader, two of them being in calf to Right Lad, a bull recently sold to head the herd of Mr. William George, of Amora, Ill. His grandsire was Kansas Lad, and his dam was a richly-bred matron of exceptional merit. Three of the heifers are in calf to Dispatcher, a son of the noted International winner, Disrupter. Two of the three bulls consigned by Messrs. Hemenway are by Masquerader. The consignments from the other breeders represent the tops of their herds. The quality, breeding and individual merit of the offering is unsurpassed, and breeders should plan to attend this sale if wanting excellent cattle. To the beginner we wish to say that we know of no better place to secure the foundation for a good herd. Look up the announcement on page — of this issue and write at once for catalog, kindly mentioning The Homestead, and plan to be present sale day, Wednesday, October 3d. Steward is seventy-seven miles west of Chicago on the St. Paul division of the C., B. & Q. Ry.; train leaving Rockford at 7:05 will take passengers from Illinois Central at that point, Great Western at Holcomb, Milwaukee at Davis Junction and Northwestern at Rochelle. A later train leaves Rockford at 10 a. m.; this train leaves Rochelle at 11:20. Good connections are made on the return trip at these points. Steward is also reached by the C., M. & St. P. Ry. from McNabb to Rockford. Free conveyance at Steward to and from the farm.

Messrs. Powell & Rudy, of Smithton, Mo., own the great show and breeding boar, Surprise 10817. They are now offering pigs got by this boar and by Joe Folk, a son of Belle's Chief and Bishop's Choice. Write them if wanting hogs that are individually right and bred right.

JOINT SALE HEREFORD CATTLE to be held on THE SUNNY SLOPE STOCK FARM. LAKE VIEW, IA., OCT. 11, 1906.

40---Recorded Herefords. 10 bulls, 30 females---40

All but about ten of the females are of breeding age and will have calves at foot or bred to have calves soon; the rest of the females are too young to breed yet. There will be no old cows offered. In the bull class there will be two aged bulls that have proved their worth as breeders. Their calves will be offered in the ring, showing what they can produce. The rest of the bulls are of serviceable age and good ones. Some of these cattle to be sold were shown at Sioux City this season without any fitting and won premiums in every class shown in. Sale will be held in seated tent, no postponement on account of weather. Place of sale only four blocks from C. & N. W. depot. Parties coming over the Illinois Central will be met at South Wall Lake.

Mr. Green is dispersing his entire herd without reserve. All of the cattle offered are in fine breeding condition, none spoiled by fitting. Send for catalog to Ben Broughton, Lake View, Iowa, or F. J. Green, Early, Iowa.

F. J. GREEN and BEN BROUGHTON, Proprietors.
COLS. CARY M. JONES, E. P. LAYMAN, W. T. THOMPSON, AUCTIONEERS.

50

Head of cows and heifers, some with calves at foot and 7 bulls.
SILAS IGO and PIPER BROS., Auctioneers.

More Concerning Lanaghan Bros.' Sale of Short-horns.

Announcement has been previously made of the sale of fifty-five head of Short-horn cattle at the Lakeview farm of Messrs. Lanaghan Bros. one and a half miles west of Goose Lake, and three miles east of Charlotte, Clinton county, Iowa, Thursday, October 11th. The members of this firm are modest in all of their claims, as well as in their general deportment, and have never had as much to say concerning the good qualities of their splendid herd of Short-horns as their cattle are deserving of. Herefore they have disposed of their surplus stock either at private sale or by contributing a liberal supply to other sales in their community. This now is their first public sale of cattle wholly their own. Their herd has developed now to such proportions that these sales can be made without material injury to the herd. In this selection they have decided to keep just as good cattle as they are selling and to sell just as good as they are keeping. The herd was established twenty-six years ago and a perusal of the catalog will reveal the fact that some of the best herd bulls in use in eastern Iowa have been used upon this herd. All bulls hereafter named will be the ones to which all of the cows in the sale are bred, namely, Imp. Royal Archer, Jennie Lynd's Hampton and Hampton's Lad. Two of these bulls are by the world's famous Imp. Merry Hampton. The bull imported by Mr. C. B. Duston, of Summerville, Ill., afterwards sold to the Bigler's and at their dispersion going to the herd of Messrs. McLaughlin & Watts, and at the present time heads the College Farm herd at Champaigne, Ill. Merry Hampton was bred by Mr. Wm. Duthie and belonged to Mr. Marr's famous Missie tribe. The Missie at the present time probably rate as high as any of the Scotch families of Short-horns. Aelde from Merry Hampton being of the famous family, his two grandsons were the distinguished bulls, Field Marshall and William of Orange, being half brothers by Mr. Cruickshank's famous Roan Gauntlet. As has been before stated, there are twelve bulls in this offering, four of which are by Imp. Merry Hampton himself. It may be of interest to note that the show herd, almost entirely of the Messrs. Lanaghan Bros., will be included in this sale. These cattle captured nearly everything in sight at the recent following Iowa shows: Dubuque, De Witt and Morrison, Ill. One of the best bulls that has ever been used on their herd is Imp. Royal Archer. He belongs to the famous Miss Ramsden family, was sired by Prince Charlie, he by Cash Box and out of Queen Bess 14th by Lord Marshall, her grandam being Queen Bess 11th by the Cruickshank bull, Gravesend. Royal Archer's dam was Lady Lincoln 5th by the Bruce bull, Belted Knight, and he by Clear the Way and out of Augusta 6th by Privy Seal. Thus, it will be seen that this bull combines the blending of Cruickshank and Booth's best talent, thereby furnishing an infusion of fresh blood that has been very advantageous when used on the modern, present-day Scotch Short-horns. Royal Archer stands out in a class by himself as a sire; the same may be said of him as an individual during his more gloomy days. He comes of the same family that produced the famous show cattle, Proud Bell, Miss Ramsden 9th and 11th, Imp. Brave Archer, Imp. Duke of Hamilton 2d, Imp. Scotland's Crown and other noted celebrities. In addition to the use of such a bull as the above, the Cruickshank Secret bull, Sentinel, has left his impress on the herd, much to its advantage. Sentinel is a red roan bred by Mr. C. B. Duston by Baron Cruickshank and out of Sunflower of Homewood 2d by Imperial Victor. He belonged to Mr. Cruickshank's famous Secret family, coming through Imp. Sunbeam, a cow bred by Mr. Cruickshank and sold to the Hon. John Dryden, minister of agriculture of the Dominion of Canada. We speak of these bulls in order to show our readers that the class of bulls used at Lake View farm have been the very best that money and good judgment could secure. Messrs. Lanaghan Bros. are endeavoring in this sale to offer a class of cattle that will be not only useful to the buyer, but that will be a credit to themselves as breeders. The cattle will be put on the market in good, thrifty breeding condition and will include as useful and breedy cattle as will be sold this season. A large per cent have calves at foot that sell with their dams, including some very large calves that ordinarily are sold separate, but so prolific is this herd that the owners have decided to let a lot of these big calves sell with their mothers as one lot. The heavy-milking qualities, as well as the thick-fleshed tendency of the Lake View herd, are points in their favor which should in no wise be overlooked by the careful and judicious purchaser of Short-horns. Col. Griff Johnson, assisted by Messrs. R. T. Troy, Mart McLaughlin and John Farrell will be the auctioneers. All communication for catalogs should be addressed to Messrs. Lanaghan Bros., Charlotte, Iowa.

Last Call for J. B. Brown's Important Sale of Short-horns.

On Thursday, October 4th, the day before Mr. G. H. Burge's sale of Short-horns, Mr. J. B. Brown, of Solon, Iowa, will offer for sale forty-two head of good business Short-

horns. A representative of The Homestead has carefully inspected the offering and can say without fear of successful contradiction that it is the most practical and useful breeding lot of cattle Mr. Brown has ever offered. A goodly number of Scotch cattle are listed, as has been already stated, and which we refrain from further mentioning at this time because of the sample pedigrees of these cattle which appear in the half-page announcement on page 39 of this issue of The Homestead. The individual character of the offering is fully up to the high character of the breeder. Mr. Brown made a small showing at the Iowa State Fair and these cattle, with a host of other good ones that were left at home, will be included. It has been said by one of our wise heads that a good bull was half the herd and a poor bull was the entire herd. Fortunately indeed was Mr. J. B. Brown when he secured that great Scotch bull, Golden Rod by Imp. Golden Measure. Golden Measure was bred by Mr. Wm. Duthie, got by Golden Count and out of Imp. Mistletoe 5th by the celebrated Scottish Archer and out of Columbia 4th by Golden Crown. Golden Rod, while not a show bull, is a very prepotent sire of uniformly good stock. Mr. Brown has been engaged in the breeding of these Short-horns for more than twenty years and, like Mr. Burge, is making an offering almost entirely of his own breeding. Twelve of the offering are bulls; the remainder females, largely of breeding age. It is worthy of mention that Mr. Brown is in every sense a plain, matter-of-fact farmer and breeder. He is not a speculator, by any means, and he has bred all of these cattle. Family characteristics and uniformity will be found in a much more marked degree than can possibly be found where outside purchases are frequently made, for the reason that Mr. Brown is not a heavy buyer and attendant at all the other sales, his cattle will likely sell for less money; in fact bargains have always been the order of the day at his sales. Buyers usually get good cattle at the Brown sales at about sixty cents on the dollar. Nevertheless, as he raises all his sale cattle and produces the feed on his own farm from which they are grown, he has not as yet entered any complaint at the bargain prices at which his cattle were taken. The week in which October 5th comes will afford several opportunities for the discriminating buyer and particularly those who wish a car load to attend these sales. Commencing October 2d, Mr. E. Cosgriff, of Clarence, Iowa, will sell about fifty head; October 4th Mr. Brown sells forty-two head; the following day Mr. G. H. Burge, of Mt. Vernon, Iowa, will sell forty-four head. These sales are all within forty miles of each other and easily reached after the close of the sale each day. Clarence and Mt. Vernon are both on the main line of the Chicago & Northwestern railroad, east of Cedar Rapids a few miles, while Solon is some twelve miles south of Cedar Rapids on the Chicago, Rock Island & Pacific. It is our firm belief that those contemplating the purchase of good Short-horns who desire to secure real bargains should now so arrange as to attend this series of sales. Mr. Brown will be pleased to mail his complete catalog to every Homestead applicant. It is a neat and attractive piece of work, gotten out by Mr. F. P. Healy, the leading compiler and printer of catalogs of the middle West. This catalog should be in the hands of every one of our readers who is interested in Short-horn bargains.

Last Call for Harding's Great Ohio Chief. [Sale.]

If a crimson color is reflected from the heavens around about Carson, Iowa, on October 3d, it will be because Mr. Bob Harding and his Ohio Chiefs will be there in full force, awaiting the judgment of the breeders who have been calling for catalogs from a dozen different states and signifying their intention to be there in person. Today no Duroc Jersey boar is more discussed nor more thoroughly advertised than is Ohio Chief. As a first prize winner at the great World's Fair he came into public favor and public notice, and the get of no hog is in greater demand than is this great son of Protection. Mr. Harding is putting forty-five head in this sale, and thirty-five head of these are boars. These will be sired by Ohio Chief, Proud Advance and Orion, three of the most noted sires of the breed. There will be one very excellent litter by Belle's Perfect King out of a Surprise 2d sow, and no man will go far wrong in buying any of these. There will be four spring boars, all sired by Orion and out of Proud Lady, the sow that cost Mr. Harding \$1,275. There will also be four choice boars in the sale sired by Proud Advance out of a daughter of the Iowa State Fair winner, Perfection Chief. The great sweepstake sow, Nebraska Belle, will be represented in this sale by one of her sons, sired by Ohio Chief. This will certainly be a great commingling of the blood of the winners and should prove a good drawing card. There will be six boars by Ohio Chief and out of Lady Peach that are good, but a little late. There will be some good ones by Brighton Wonder, a full brother to Crimson Wonder, and a few by other good boars. The Harding sale will be one of the most attractive sales of the fall season, and every breeder, especially those who are looking for herd leaders, had better arrange to be with the boys on that occasion. Write for his catalog at once. It will reveal a line of breeding that you cannot pass up if you expect to get in touch with the best blood known to the Duroc Jersey breed. Kindly mention The Homestead when writing.

I am offering a fine string of Pawnee Lad yearling sows and these make great big, roomy brood sows. I have retained everything that was good for this sale—the very cream of my herd. Ten fall boars in sale sired by Pawnee Lad and Big Prospect. My spring boars have never been equaled for size, bone and quality in southern Iowa. Write for catalog.

J. O. JAMES,

BRADYVILLE, IOWA.
Col. J. WEST JONES, Auctioneer.

THE TOP NOTCHER-TIP TOP NOTCHER DUROC JERSEY SALE

HARLAN, IOWA, OCTOBER 13, 1906.

50 10 choice boars by old Top Notcher; 10 boars by Tip Top Notcher. Boars sired by Top Notcher, Chief 2d and 3 boars by old Orion out of Dandelion sows. A few choice sows and gilts included in sale. 50

Top Notcher Chief 2d, the sire of many of the pigs in the sale won fourth place at Des Moines. I am putting in the best lot of Top Notcher and Tip Top Notcher boars that have ever been sold in the West. Some of the sows will have litters at foot. If you are wanting the best blood in the land it will be necessary for you to attend my sale. Catalog ready, write for it. Address,

AUGUST SONNELAND, HARLAN, IOWA.
C. C. KEIL, AUCTIONEER.

Northwest Iowa Sales.

Readers of The Homestead should impress upon their minds the dates of three important sales to be held in Clay county, Iowa, as follows: Mr. Wm. Hansen, of Dickens, Iowa, will sell fifty head of Angus cattle at his farm adjoining Dickens on October 10th; on the eleventh Mr. John H. Graham will sell fifty-five head of Short-horns at his farm six miles north of Spencer, and on October 12th the Clay County Poor Farm will disperse their entire herd of Short-horn cattle at the county farm three miles west of Spencer. The catalogs for these sales are now in the hands of the printer and will probably be ready to mail to all those who are interested by the time this reaches our readers. We have not the data at hand from which to enter into detail concerning these various contributions. However, will say concerning the Aberdeen Angus offering that it consists of at least forty females, about twenty of which will have calves at foot and of the following well-known prolific, useful Angus families: Maggies, Queen Mothers, Lady Ferns, Westertowns, Lochiel Rosses, Heatherblooms, Easter Tulloch Duchesses, and Tillyfour Jans. The grandly-bred Heatherbloom cow, Heatherbloom of Burlington, is included in this sale. She is the dam of the International prize-winning bull of 1903 that sold for \$1,000. Maggie Estill 4th is included in this sale and sells with calf at foot by that grand Blackbird bull, Baron Blackcap, he being a son of Edward R. and out of Blackcap Maid. Mr. Hansen is selling nine or ten bulls from twelve to twenty-five months of age, with the major portion of them around about twelve months. They are a good bunch of bulls in modest condition. Catalogs for this sale can be had by application to Mr. Wm. Mincer, of Spencer, Iowa, who is the sale manager for Mr. Hansen. Mr. Graham, who sells Short-horns on the 11th, is offering thirty-three females, among which are six Scotch cows and heifers of the famous Dorothy family. The remainder have from three to five Scotch tops on such cows as Josephines, Young Marys and Lady Jans. These cattle are in nice condition, being well covered with thick, natural flesh made off the grass. Mr. Graham's bulls are largely the get of that splendid bull, Orange Oakland, an Orange Blossom sired by Mr. H. D. Parsons' famous old Duke of Oakland. This bull is being assisted and strengthened as the head of the herd by Old Champion, the bull that made Mr. S. G. Crawford's herd at Lohrville, Iowa. This bull is one of the best specimens of the Cruickshank strains of breeding, and while he bears the weight of many years, he is still fresh and active for his age and is doing splendid service for Mr. Graham. More details will be furnished when we have received the sale catalog. Application for this should be made to Mr. John H. Graham, Spencer, Iowa. The Clay County Poor Farm on October 12th will consign ten bulls all by the Canada-bred bull, Major 14878, and forty cows and heifers. Ten or more of these cows will have calves at foot. The cows are bred to the splendid Scotch bull, Monarch, now at the head of the herd. Monarch was by Gloster Valentine 181498. He was bred by Messrs. Walpole Bros., of Rock Valley, Iowa. This herd has been maintained for a number of years by the county and they now find themselves overstocked; hence this dispersion sale. Mr. A. F. McConnell, one of the county commissioners, is the manager of this sale, to whom all applications for catalog should be addressed. Their offering embraces practically all American families, but are of the good, useful kind and have been cared for and reared in a manner that makes them eminently worthy to stand in comparison with good herds of cattle owned by individuals. Inasmuch as one expenditure of time and money will enable those interested to attend the three-days' sale, a golden opportunity is hereby offered. Watch further announcements in The Homestead.

Last Call for C. F. Hewitt's Dispersion Sale of Angus Cattle.

It is with regret that The Homestead makes the announcement for the last time of the dispersion sale of Mr. C. F. Hewitt's famous herd of Aberdeen Angus cattle at the new sale pavilion in Morning Sun, Iowa, on October 2d. On that date auctioneers W. K. Henss and Silas Igo will put Mr. Hewitt out of the Aberdeen Angus cattle business. A variety of conditions have arisen which call for his dispersion sale. It is not, however, because the business has not been profitable and pleasant to him, for during the three preceding years to, and including, 1900 Mr. Hewitt's bull average at private sale was \$110 per head, including young bulls from eight to fifteen months of age. In founding this herd of Angus cattle he fully realized that a good bull was the whole herd, and in securing the heads of his herd at various times he has been exceptionally fortunate. Mr. Hewitt realized that the only way to improve his herd was when in need of a herd bull to not hesitate in the least on the price, but simply buy him without regard to price when the bull of which he was in search was placed on the market. Too few breeders recognize this point in the building up of a herd of Aberdeen Angus cattle, or for that matter, any of the pure bred breeds. Mr. Hewitt and his brother have built up their herd side by side, working in unison so far as their herd bulls were concerned for the past eleven years. Mr. J. T. Hewitt, the junior member of the firm, will contribute to this dispersion some five or six head, but will continue in the business on a separate farm a mile and a half distant from his brother. Their interests have always been separate except in the joint ownership of the heads of the herd. Mr. C. F. Hewitt makes the announcement in his catalog that this entire herd will be dispersed without regard to the prices paid. That there will be no protection thrown about these cattle of any kind. All known defects will be made known on day of sale and every effort made to honestly inform the buyer of just what he is about to purchase. A liberal guarantee is placed on every animal, guaranteeing them to be breeders. He owns a large farm and expects to continue his residence at Morning Sun and is amply

able to make good every guarantee that he sees fit to make. We wish to call special attention in this sale to the splendid Blackbird Barter that will be sold, as well as to the other eight young bulls listed in the sale. It is a plain, practical, useful business herd that needs no apology in any shape or form. Neither are any excuses offered for the sale of the cattle. Mr. Hewitt has never been a believer in going from place to place purchasing cattle at long prices expecting the seller to return the compliment and thus simply exchange dollars. His idea has been to buy what he needed and pay for the same on strictly a business basis, with no fault of reciprocity on his part. This being his motto, there is no probability that there will be any "boosters" at this sale. Hence it will afford a golden opportunity for the breeder or speculator who wishes to secure some good, useful cattle, a large per cent having calves at foot or are soon due to calve, to secure them at what, in all probability will be great bargain prices. The writer has been familiar with the herd for a number of years and considers it is as prolific and as heavy milking a herd of Aberdeen Angus cattle as there is in the state of Iowa. This sale should not be overlooked by anyone in search of doddly bargains. The shipping facilities from Morning Sun are most excellent, Mr. Hewitt being able to ship on either the Iowa Central, C., B. & Q. and C., R. I. & P. railways. All stock will be loaded on the cars free of charge with no stock yard charges of any kind. The buyer will simply have the freight to pay. For catalogs address Mr. C. F. Hewitt, Morning Sun, Iowa, mentioning The Homestead.

The New Horse Remedy.

Nearly everyone connected in any way with horses has heard of Mr. E. E. Gray, "The Speed Merchant," of Hinsdale, Ill. Two years ago Mr. Gray inaugurated the "Guarantee System" of horse selling and his success has been truly phenomenal. He sells horses all over this continent, also in Europe, and in most cases his customers buy on description. Mr. Gray guarantees the horses, stating their faults as well as their virtues. Pleased customers everywhere attest the honesty of his dealings and it now looks like Mr. Gray held the speed horse market in the hollow of his hand. At all times from forty to sixty speed horses are to be found in Mr. Gray's barns. Naturally among this number the services of a veterinarian were frequently required. The "Speed Merchant" employed one of the best veterinarians in America and after two years' experience with him he discovered that the prescription he used in nine out of ten cases was what is now known as Gray's Tonic Preventive. The veterinarian was honest and upon being questioned stated that he had used this one remedy for over thirty years in his practice with almost unflinching results. So Mr. Gray having knowledge that it had worked wonders for him during its two years usage bought the rights to it and gave it his own name. It has been out on the market less than three months, but every bottle sent out has sold many others in the communities where it has been tried. No horse medicine has ever met with such speedy success and already it is better established than many remedies that have been advertised for years. There is only one way to account for this and that is on the ground that it possesses true merit. It makes friends for itself and the testimonials received from its users differ only in the adjectives used in lauding its praises. There is nothing more efficacious as a preventive of disease. It cures coughs, colds, distemper; acts on the circulation and on the secretory organs. As a tonic and flesh builder it has no equal. It promotes a natural and healthful appetite, rids the horse of worms, renovates and rejuvenates his entire system and leaves no bad after effects. Unlike a stock food it is not a daily diet, but a scientific treatment which is left off as soon as the animal is on the road to health. For brood mares and their foals it is a perfect remedy. For horses being prepared for the market it puts on the finest of finishing touches, makes them fatten readily, makes their coats shine. Mr. Gray will send you a bottle free and if you don't like it, you don't have to pay for it. On page 6 of this issue will be found our advertisement which more fully details the merits of Gray's Tonic Preventive. It is destined to be America's greatest family horse medicine.

Voge's Top Notcher-Crimson Wonder Sale.

On October 9th, at Portsmouth, Iowa, Mr. August Voge will make a public sale of forty head of decidedly high-class Durocs. There will be thirty-five boars and five gilts in the offering, and these will be sired by his prize-winning herd boar, Crimson Wonder I Am, third prize yearling boar at Des Moines this year in one of the strongest classes ever seen at that fair. Then there will be quite a number that are sired by the World's Fair sweepstakes boar, Tip Top Notcher, and a few will be sired by Ohio Chief 2d, considered the greatest son of Ohio Chief. Mr. Voge will have a few in the sale that will be sired by other good herd boars and these will be out of good sows that he bought last spring. His offering will be a Crimson Wonder-Top Notcher-Ohio Chief offering, and no sale in the West will carry any more of the blood of these three noted boars than will be found in Mr. Voge's sale. Breeders will be surprised when they see his sale stuff. As a feeder and care taker few can beat Mr. August Voge, and he will show the boys a bunch of pigs that will surprise them on sale day. In the first place they have the size, are excellent in color, good bone and have plenty of length. If you are wanting a boar sired by his Crimson Wonder I Am second prize winner at the Iowa State Fair, or by the World's Fair sweepstakes boar, Tip Top Notcher, or by Ohio Chief 2d, then don't fail to remember his date, August 9th, and don't fail to attend his sale. Every Duroc Jersey breeder should have one of his catalogs and he will take pains to see that they get one if they will only write for it. Kindly mention The Homestead when doing so.

GRAND PUBLIC SALE

OF

SHORT-HORN
... CATTLE ...

AT

CLARENCE, CEDAR COUNTY, IOWA,
TUESDAY, OCTOBER 2, 1906.

On the above date I will sell 40 head of as good individual Short-horns as will be sold this season, at my farm two miles south of Clarence, Cedar county, Iowa. The offering consists of 30 cows and heifers and 10 bulls, all richly Scotch Topped with some of the best Scotch blood extant. All females bred to the Scotch bulls Victor Fashion 104906 and Scottish Spartan 257120. It is a grand aggregation of heavy milking breeding Short-horns. A large number of cows will be sold with calves at foot. A certified copy with each sale will be furnished with each individual catalog. Parties from a distance will be entertained free of charge at the Cottage Hotel. Terms cash, but bankable notes will be accepted on six months time at 6 per cent interest. All lovers of good Short-horns are cordially invited to attend this sale.

E. GOSGRUFF, PROPRIETOR,
CLARENCE, IOWA.

COL. GRIFF JOHNSON AND O. S. JOHNSON, AUCTS.

Attention is called to J. B. Brown's Short-horn sale at Solon, Iowa, Oct. 4, and G. H. Burge's sale of Short-horns at Mt. Vernon, Iowa, Oct. 5. Parties can attend all three sales without any inconvenience. Mention Homestead when writing for catalog.

DISPERSION SALE

OF

ABERDEEN ANGUS
CATTLE

I will disperse my entire herd of Aberdeen Angus breeding cattle at Morning Sun, Iowa, Tuesday, Oct. 2, 1906. The herd embraces 51 head, including 6 bulls and 45 females. The present herd bull Barter is included, sired by Imp. Proteros, dam Blackbird McHenry 17th, also one choice yearling bull by Emperor of Estill, dam by 2d Mayor of Estill. Twenty cows with calves at foot will be sold. Nine yearling heifers. Two two-year-olds and 5 cows due to calve before sale day. The herd is pre-eminently a business herd. They will be in prime breeding condition but not excessively fat. I am retiring from the breeding of Angus cattle, but my brother, J. T. Hewitt, who contributes some 5 head to this sale, will continue breeding Angus cattle. This sale offers the best opportunities in recent years for the young breeder to found a new herd with strictly breeding cattle. The sale will be in the new pavilion in town with Cole, W. K. Henss and Silas Igo officiating as auctioneers. Write for catalogs to

C. F. Hewitt, Proprietor,
Morning Sun, Iowa.

Last Call for G. H. Burge's Short-horn Sale.

As this is the last opportunity we will have to direct attention to Mr. G. H. Burge's sixth annual sale of Short-horn cattle to be held at his Wayside farm, Friday, October 5th, we would feel ourselves negligent did we not refer briefly to Mr. Burge's history in the Short-horn business. As has been before stated, Mr. Burge is pre-eminently a self-made breeder of Short-horns. Starting as he did with the proper ideal in his mind, he of course had something on which to build. No breeder who starts to breeding beef cattle is worthy of being considered a breeder without having an aim or object in view. The ideal that presented itself to the mind of Mr. Burge was a type of Short-horn that possessed all the good qualities of the early-maturing beef animal, and at the same time showing breed character in that high degree that made it possible for each and every animal maintained in his herd to reproduce itself of that same type. Hence, early-maturing qualities of the proper beef conformation on short legs, closely coupled with broad heads, wide between the eyes, and as much shortness from the eyes to the muzzle as could be secured. Mr. Burge's herd is built up to its present proportions on the above described lines. The bull offering in this sixth annual sale is an exceptional lot. It is worthy of note that with all of Mr. Burge's prize winnings for the past two years every animal exhibited by him was bred at Wayside, and of the forty-four head cataloged for this important sale, thirty-six were bred by Mr. Burge. It is useless for us at this time to enter into detail concerning the breeding of any of the cattle for the reason that on page 38 we submit a sample of the many rich pedigrees that are to be found in the catalog. However, inasmuch as that grand old herd bull, Acrobat, has been consigned to the sale since the catalog was gotten out, we will make reference to him in detail. Acrobat and Money Musk have been the chief herd bulls for Mr. Burge for some time, and so good were the daughters of Acrobat that Mr. Burge had been casting about for some time in search of a young bull to use on these heifers where Money Musk was so closely related that he could not be used. At the Iowa State Fair, recently held, the object of his search was discovered in a splendid son of Gallant Knight, in the hands of Messrs. T. K. Tomson & Sons, of Dover, Ksn. This bull being secured at a long price, Mr. Burge finds himself in position now to let Acrobat go. His pedigree appears first in the sale catalog for reference only. But as the old bull will be sold regardless of price, we wish to call attention to his breeding. He is a solid red, calved Sept. 5, 1899. His sire is Victor Mysie 2d, dam Amelia by Lord Mysie; second dam Aethyl by Royal Duke of Pleasant Ridge; third dam Anreola by Imp. Favorite; fifth dam Imp. Anorra by Duke of Chamberg. Acrobat belongs to what is known more commonly as the Scotch Avalanche tribe. Victor Mysie 2d, his sire, was unquestionably the greatest herd bull ever used by Messrs. S. H. Thompson & Sons, of Iowa City. He was got by Double Victor and out of Mysie of Pleasant View, she by Secret Emperor, she out of Mysie Venus 2d by Imp. Leyburn, thence out of Imp. Mysie 36th by Scotland's Pride. Acrobat is beyond question one of the best aged Scotch bulls that will be put on the market this year; in fact, it seldom occurs that such an opportunity to buy so good an old bull as Acrobat is offered. His handling qualities are certainly as good as has ever been discovered on a red bull. In moderate breeding form a double handful of loose, mellow hide may be rolled up on his ribs that has a soft and yielding touch to the hand denoting great feeding quality. As has been before stated, practically the entire show herd of 1905 and 1906 are included in this sale, and embraces cattle that should go in future shows and make themselves formidable competitors in strong competition. One of the best young bulls ever bred by Mr. Burge is The Trumpeter, a red bull calved Dec. 5, 1905. This bull is a herd header beyond any question for a choice herd. He is a Scotch Nonpareil, being sired by Money Musk and out of a dam by Orange Chief. Orange Chief was by Saxon Knight and out of Princess Orange Blossom by Golden Prince. The third sire is Prince President 2d, a Mysie bull sired by Dunblane's great son, Imp. Prince President. Here is certainly a treasure that should not be overlooked by anyone in quest of a strictly first-class herd bull that is bred right, made right and is right, and of the modern Burge type. There are other good bulls in the offering aside from this one and Acrobat which will meet the demands even of the critical on sale day. This sale is the last of a series of sales to be held in this locality commencing with Mr. E. Cosgriff's sale October 2d at Clarence, Iowa. Mr. J. B. Brown's sale at Solon, Iowa, October 4th, and Mr. Burge's sale on the 5th. Parties can attend all three of these sales with little or no additional expense. Mr. Burge has made every arrangement at the beautiful modern hotel, Altoona, in Mt. Vernou, for the free entertainment of his guests. Free conveyance will also be furnished to and from the farm on sale day. Prices at all of the Wayside sales have heretofore been conservative and we predict that some bargains will be the order of the day on October 5th. In writing to Mr. Burge for a catalog, kindly mention The Homestead.

Dispersion of Honey Creek Short-horns.

Readers of this journal will be interested and doubtless surprised in the announcement of Messrs. R. G. Robb & Son, of Morning Sun, Iowa, advertising the dispersion of their entire herd of Short-horn cattle, to take place in the Morning Sun sale pavilion on October 18th. Owing to the advanced age of the senior member of the firm, now being past his seventy-third year, it has been deemed advisable to close out this herd and divide the existing partnership under which name the herd has been conducted for a number of years. Some of the best Scotch Short-horns in Iowa have been owned by this firm. The firm have unquestionably found the business profitable and pleasant.

But such times as this come to every individual and firm sooner or later. We shall not enter into detail at this writing, but will leave that for future issues. We will, however, say that there will be thirty-six head—twenty-three Scotch, three of which are imported. There will be thirty females in the offering, about one dozen of which have calves at foot and are bred again to one of the leading Scotch herd bulls. Enough Scotch-topped cattle will be contributed by Mr. J. J. Robb, (not a member of this firm) and Mr. J. T. Carruthers. A word concerning the history of this firm may be of interest at this time. Some five years ago they secured to head their herd the splendid Brawtib Bnd bull, Imp. Golden Archer, a son of the famous Mystic Archer, and he by Scottish Archer, and out of the celebrated Missie cow, Missie 136, she by the celebrated William of Orange. This famous bull did Messrs. Robb & Son a world of good and from him they produced another splendid herd bull, Victor Archer, a Crickshank Victoria, but four removes from Imp. Victoria 73d. Prior to the use of these bulls Messrs. Robb & Son had used a splendid Scotch bull, Royal Mysie 3d, bred by Messrs. Thompson & Sons. At the present time their herd bulls are Imp. Clan Craibstone and Graceful Archer. Both the above bulls will be included in the sale and are worthy representatives of the famous Scotch stock to which they belong. A representative of this journal has recently inspected the offering and finds it an unusually attractive lot. It is in the pink of breeding condition, and in fact a goodly number of the young things are in splendid condition for any purpose. There will be a number of choice young bulls in the sale aside from the two herd bulls previously mentioned. Short-horn breeders generally can rest assured that this sale offers some splendid inducements to not only prospective buyers who wish to add to and strengthen their herds, but to the beginner as well. There is not an unfashionably-bred animal in the entire offering, hence the beginner who knows nothing of pedigree will be absolutely safe in attending this sale and buying anything that is offered where the individual merit suits his fancy. In succeeding issues we will enter somewhat into detail relative to the individual character of some of the animals to be sold. This firm have made preparations for a large gathering in the way of free entertainment at the Hungate Hotel at Morning Sun. The sale will be held in town at the new, spacious sale pavilion. Cols. George P. Bellows, Carey M. Jones and George Brown will officiate and disperse the many plums in this offering. It indeed seems unfortunate to disperse a herd like this just at a time when it has reached that state of perfection which has been the aim and ambition of its owners for many years. The good will of the Short-horn fraternity will certainly be and go with the senior member, Mr. R. G. Robb, wherever he may go, and the good wishes, we know, of the entire Short-horn world, will be extended to Mr. T. C. Robb, the junior member of the firm, and his son, who will soon establish and rebuild another herd of Short-horns, which, we doubt not, will soon equal this splendid herd that is being dispersed. Our readers can have a catalog of this sale by return mail, if applying to Messrs. R. G. Robb & Son, saying you read this notice in The Homestead. See page 40.

Mr. J. O. Danner's Duroc Jersey Boar Sale.

On October 8th at Yale, Iowa, Mr. J. C. Danner will offer thirty head of Duroc Jersey fall, yearling, March and April boars for sale. In writing us in regard to his stock, Mr. Danner says: "These pigs that I am offering are sired by such noted hogs as Sons of Proud Advance 42225 and Hambleton Lad 33731. Hambleton Lad's sire, Hambletonian 21837, made a reputation for himself the first time he went in the show ring by winning first in twelve and under eighteen months class in his every-day clothes at the Nebraska State Fair in 1904. He also sired the second-prize herd at the fair in 1905. Hambletonian is now owned by Messrs. Manlove Bros. and J. H. Norris, of Bowen, Ill., and his weight is 500 pounds. Son of Proud Advance is a great hog, as well as his sire and grandsire. He is as square as a box and is built right all over. Sire of Son of Proud Advance was one of the noted winners of last year, winning first in class, also sweepstakes bred by exhibitor, and he also headed first-prize young herd and first-prize young herd bred by exhibitor. The fall yearlings are by Hambleton Lad 33731. They are a very even lot and good enough to go anywhere. There will be one pig in the sale by Hambleton Lad, dam Gold Miss F. 53328, bred by Mr. E. E. Henderson, that is going to make something good. This pig was farrowed March 21, 1906. Trone E. 122432 had a fine litter of ten and raised nine, six of them being boars and they are all good ones. They are sired by Son of Proud Advance. The grandsire of Trone E. was bred by Messrs. George W. Trone & Son. He was by Col. F. 3791. Pretty Face had a litter of fourteen by Son of Proud Advance. There will be two in the sale of her litter. She is as fine a sow as I have and her pigs will show for themselves. Pretty Face was by Stnb J. 31837. He was bred by Mr. B. A. Shafer. Stnb J. was sired by Wanneta Banker 11251, he by Banker Boy 9971. Gold Block 127410, Gold 127414, Goldie 127412, all have fine litters by Son of Proud Advance. These sows were sired by Eclipse 25171. Eclipse was bred by Mr. G. Van Patten. The dam of these three sows is Gold Miss F. 53328. Birdie J. is a grand old sow. She farrowed fourteen pigs last spring by Hambleton Lad, and there will be one in sale of her litter that will be worth looking after. This sow will be five years old next spring and she has never had less than twelve pigs at a time and she always raised the most of them. Her breeding runs back to First Prize 18700 on dam's side. Her grandsire was Luther 6605. Her mother was the first red sow I ever owned about eight years ago. My foundation stock was bred by Messrs. William Roberts & Son, of Paton, Iowa. I have never had any of my stock at the fairs. Parties from a distance will find free accommodations at the hotel. Col. F. F. Luther is the auctioneer, and the catalogs will be ready by October 1st." See advertisement on page 32.

DRAFT SALE

OF

SHORT-HORN CATTLE

AT

... OAKLAND, IOWA, OCTOBER 8, 1906 ...

40 Head from the R. E. Williams Herd 40

HANNA CITY, - ILLINOIS.

JERSEY CATTLE.

JERSEY CATTLE

DESIRABLE YOUNG BULLS

THE WENONA'S GREAT STUD.

HAVING concluded to make a change in placing STALLIONS before the PUBLIC on account of the unsatisfactory business methods and transaction done in the stallion trade to the buyers, as well as to the sellers by the stallion salesmen, we have concluded to sell our stud from the barns. Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood) and the great expense of placing the stallion. The long-time notes, from 3 to 5 years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50%. If you have to have a company to live a horse in your neighborhood, form your own company, and come to the barns, BE CONVINCED THAT YOU CAN SAVE FROM \$1,000 to \$1,500.

GOOD AMERICAN-BRED STALLIONS, from \$800 to \$1,000.
FIRST-CLASS IMPORTED STALLIONS, from \$1,200 to \$1,600.
CHOICEST STALLIONS, a little higher.

THESE are the prices at our barn at Wichita, Kan., and Wenona, Ill. For prices at the GREAT WESTERN BARN, apply to M. C. Gray, Pullman, Wash. We ask all intending purchasers to visit our stables, where we have over 300 Head of Stallions to select from: SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over 22 years, longer than any one man in the stallion trade, and we guarantee to make every deal satisfactory to you. Get your guarantee and insurance direct from headquarters. Visit our barns, see our exhibits at the different state fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and have the quality of stock that will suit the people, are perfectly good for their guarantee, and will sell to you more good horse quality for less money than any one. Come to the barns and get the most reasonable terms that can be offered.

ROBERT BURGESS & SON, WENONA, ILL.

W. A. LANG & CO., - GREELEY, DELAWARE COUNTY, IOWA.
IMPORTERS AND DEALERS IN
CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH
AND STANDARD BRED STALLIONS.

WE have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No odd, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more top horses than any other place in America. Write.

Large Improved English Yorkshire Swine.
F. Rabeler, Prop., Leigh, Neb.

I HAVE the best imported and home-bred Yorkshires in America. Have made 5 importations. Onk Lodge Minstrel 8th 1855 and O. L. Fustler 6443, two imported boars and Hannover Emperor 7038 at head of herd. Stock for sale at all times. Can furnish stock not akin. Now booking orders. Write us at once.

LARGE YORKSHIRES

WORLD'S FAIR CHAMPIONS. We have 70 pure bred pigs, farrowed this spring of the most uniform quality we have ever bred. Can furnish pigs not akin to stock sold in previous years. We have the numbers and quality; try us for price. Will have an exhibit at the Iowa, Minnesota and South Dakota state fairs. Address,
Thomas H. Canfield, Luke Park, Minn.

CORN-BELT YORKSHIRES.

I have been using matrine breeding stock for years, and have size, quality and prolificacy. All sows in herd averaged better than 11 pigs per sow this spring. (Everything that does not come up to a high standard is unsexed.) Males and females not akin for sale. Some extra good Poland Chinas for sale also. Jas. Atkinson, Des Moines, Ia.

WANTED: Registered cattle, stallions and jacks in exchange for Illinois, Iowa, Missouri, Kansas, Nebraska, Minnesota or Wisconsin farm. Box 151, Independence, Iowa.

When writing please mention this paper.

BERKSHIRE HOGS.

Rookwood Berkshires.

A CHOICE lot of early boars and gilts for sale. Superior breeding, unusual size and quality. Also two good Scotch bred Short-horn bulls, six to ten months old, fit to head good herds. Address,

ROOKWOOD FARM, AMES, IOWA.
C. F. CURTISS, PROP., JOHN W. OGLE, MGR.

Heavy Weight Berkshires

ATTENTION! Are your hogs too small and fine boned, with a disposition to run out? If so, come to me and I will fix you out with a big boned, short legged, broad backed, heavy quartered Berkshire Boar, with an extra back, wide spring of rib and very short, broad dished face. I will do it at farmers' prices.
W. D. McTAVISH, COGGON, IOWA.

T. J. CONGDON'S Winning Berkshires have won 1st honors at the best shows. I am now offering some very choice pigs, sired by the great Charmer Duke 25th, by Baron Lee 5th. Some choice pigs by Choice Woods. I breed the large, roomy Berkshires. Everything guaranteed as represented. Extra amount of size on the spring pigs. T. J. Congdon, Pawnee City, Neb.

BERKSHIRE HOGS.

I HAVE winter and spring boars of this breed for sale. Write your wants. I can suit you.
JOHN C. MILLER, - Harlan, Iowa

COLS. WOODS, BARCLAY AND URTON, AUCTIONEERS.

SIXTH ANNUAL SALE OF SHORT-HORN CATTLE

From the Wayside Herd of Geo. H. Burge, Mt. Vernon, Ia., October 5th.

On the above date I will sell 44 head of the choicest Short-horns ever offered in Linn County. Thirty-five head are females and 9 head are bulls, the larger portion of the females being straight Scotch or of Scotch extraction. Included in this sale will be the major portion of my show herd at the Iowa and other State Fairs for 1906. I will sell the get of and cows bred to the 2d prize winning bull at the Iowa State Fair of 1906, Money Musk. As this is the best offering of cattle that I have ever been able to put before the public I trust that lovers of Short-horns will find time to attend this sale and if they cannot help me, they will at least help themselves to some of the many plums that I am listing in this sale. I have no apology to make for this sale. I simply need the money that these cattle represent and trust that all my friends and neighbors, as well as my enemies, will come and buy these cattle just as cheap as they can. All parties from a distance will be entertained at the beautiful Altoona Hotel at Mt. Vernon and will be taken to and from the farm free of charge. Dinner will be served at noon at the farm. Sale will commence at 1 o'clock sharp.

Sweepstakes Boar Offering

IMPROVE YOUR HERDS BY INVESTING HERE.

The Brown & Mickey sale of **Choice Durocs**
AT OSCEOLA, NEB., OCT. 10th.

Choicely Bred Lot of Boars & Gilts

Offering Strong in Blood of

Sweepstakes Boar, Red Knight 25199.

The Tops From our Two Herds. Profitable Offering in all Respects.

E. J. Brown consigns offering strong in blood of Red Knight, Crimson Wonder, Belle's Echo.

O. E. Mickey's offering strong in blood of Homestead Gold Dust, sired by Gold Dust Jim, Belle's Echo, and Red Knight.

Our offering of Duroc Jerseys on Oct. 10th will be the tops from our two herds. We have decided to make this sale one to be remembered by all and to do this we realize that the tops must be included. Our boar offering will give ample opportunities to select choice prospects. The offering will represent as much prize winning blood as will go through any sale this season. Red Knight was first and sweepstakes winner at Nebraska State Fair 1905. Belle's Echo is the son of Echo King and is out of the great Nebraska Belle. Homestead Gold Dust was sired by Gold Dust Jim. We would be pleased to mail you one of our catalogs. If unable to attend the sale send your bids to G. W. Segrist, representing this paper, or the auctioneer. Look up field note.

E. J. BROWN,

T. C. Callahan, Auct.

O. E. MICKEY,

Osceola, Neb.

F. A. Schaefer & Sons

Scotch and Scotch-topped

SHORT-HORN SALE.

Raleigh, Ia., October 17, 1906.

50 HEAD. 40 Cows and Heifers and 10 Bulls.

About 16 head of Scotch cattle, including the imported cow, Celia 9th, and our Scotch bull, Bridal Archer.

IN our sale will be found some of our very best cattle representing such choice and well known families as Duchess of Gloster, Orange Blossom, Miss Ramsden, Gwendoline and other popular families. There will be a choice lot of young heifers in the sale, and some good young bulls, including Sittytton Archer, a son of our great herd bull, Choice of Archers. We think here is the best young bull we have ever raised. The rest will be Scotch-topped on the very best foundations. Several of the cows will have calf at foot by Choice of Archers and the most of them will be bred to him. Those who are looking for good cattle are invited to attend our sale. Write for catalog at once and mention Iowa Homestead. Address,

F. A. SCHAEFER & SON,

RALEIGH, IA.

Col. Geo. BELLows, Auctioneer.

B. G. Stark, Livermore, Ia., sells a choice draft from his herd at Humboldt, Ia., October 16. Parties can attend these two sales very conveniently.

Draft Sale of Short-horn Cattle

At SOLON, IA., OCTOBER 4th

A. J. Podendorf's Great Iowa Sunshine Offering

at the KIEHL LIVERY BARN.

COUNCIL BLUFFS, IOWA,

Friday, October 12, 1906.

**20 CHOICE
BOARS**

Iowa Sunshine 22985

**My very
best Sows 20**

INCLUDING my entire show herd, together with my second prize Iowa Sunshine boar pig at the Iowa State Fair, with fifty-two in the ring. This is one of the greatest pigs of the year, and here is a herd-head-er and a show hog for some good breeder next season. Nearly all of my offering will be sired by my great sire of prize-winners, Iowa Sunshine, considered to be one of the greatest sires of show stuff in the West. I am putting in this sale some of my very best sows, many of which have been winners at the Iowa and Nebraska State Fairs. I am also putting in the dam of some of my best winners. Iowa Sunshine boars have made a reputation for themselves and I am putting in my very best in this sale. Send bids to M. T. White, of The Homestead, in care of Mr. Podendorf. Catalog now ready. Address,

A. J. PODENDORF,

FREE ENTERTAINMENT AT HOTEL HUNGATE.

MORNING SUN, IOWA.

SALE OF SHORT-HORN CATTLE

BY J. Z. WILLSON AT

...MORNING SUN, IOWA, OCTOBER 10, 1906...

On the above date I will sell in the new pavilion 57 head of Short-horn cattle, 47 of which are females and 10 bulls. These females are all reds and all well Scotch Topped. They are largely of the Ruby family, topped out with such grand good bulls as Scotchman 128117, Lord Nonpareil 225698, Village Prince 161575, Darnley's Best 232104, Lord Darnley and Plumed Knight, the last named being the best Cruickshank bull that ever did service in or around Morning Sun. He was got by Knight of Orleans, a son of Craven Knight and out of Imp. Gwendoline by Baron Violet. It will be thus seen that the bulls in the top of these pedigrees are some of the best Scotch bulls that the country has seen in many years. These cattle will be sold fresh from the pasture without any special fitting and no surplus flesh. The writer has had the pleasure of looking over this entire offering quite recently and regards them as a very rapid breeding herd as well as being heavy milkers throughout. Mr. Willson guarantees all females breeders when properly cared for. A certified copy of each and every lot sold will be furnished on day of sale signed by the Secretary of the American Short-horn Breeders Association. Mr. Willson is a plain, practical farmer and breeder and has made no effort to place these cattle in strictly thick, fancy sale condition. However, they are in condition to breed rapidly and to give best results to their new owners. One seldom sees a bunch of cows of like number with as many calves at foot or just ready to drop calves as can be seen in this offering. The herd is in thrifty breeding condition and will afford a golden opportunity for the young breeder to start a herd cheap, as well as getting into a family of very rapid breeders and heavy milkers. It is this same family that Mr. W. T. Clay, of Plattsburg, Mo., made his reputation on. Mr. Clay started with one Ruby cow and in 17 years from her and her produce, had produced 237 head. Fully 15 of the cows listed have calves at foot and a number of others will have calves by sale day. Concerning the milking qualities of these cattle, one of the cows listed in the sale gave 1100 pounds of milk in 30 days. This cow was Ruby 3d by Dick Bly 2d. The present bull to which these cows are bred is Prince Joyful 262020. He is a son of Emma's Prince and he out of the great \$1700 cow Emma 17th. The dam of Prince Joyful was Anemone 2d by Count Joyful. As has been before stated, it is pre-eminently a red offering. We do not speak of this because of the reds being superior to the Roans or Whites, but because of the fad for Reds in the minds of some. To any one who is tenacious for the red colors Mr. Willson's offering affords them a splendid opportunity to secure the color of their choice. His catalog is out and ready for distribution and may be had for the asking by simply mentioning The Homestead. In our next issue we shall have something to say concerning the bull offering and particularly some Scotch bulls that are listed in the sale.

ANNUAL SALE

of 55 Short-horn Cattle

AT OUR FARM, 3 MILES EAST of

CHARLOTTE, CLINTON COUNTY,

IOWA, ON OCTOBER 11, 1906.

WE will sell 43 cows and heifers and 12 bulls. Four sons of Imp. Merry Hampton. Ten yearling heifers, 8 two-year-old heifers. A large number of cows with calves at foot. Nine of our 12 show cattle are included, which we won with at Dubuque and De Witt, Ia., and Morrison, Ill. The chance of a lifetime to get good cattle cheap. Address for catalog,

Lanaghan Bros., Charlotte, Ia.

Col. Griff Johnston, Auctioneer.

HOG CHOLERA A GERM DISEASE.

If any animal disease is to be skillfully combated, half the battle is in knowing the nature of the disease. In the case of hog cholera we have to do with a disease that is communicated through the medium of germs. This is a fact that should be pondered over by every man who keeps hogs. These germs, or bacilli, can live in the ground for a period of three months. They are not visible to the naked eye, though the action of some men we have known would indicate that because the germs do not trip them up when they are going around the yards they are not there.

It should be borne in mind that cholera germs are carried about from place to place by such agents as wagons, men, dogs, birds, etc. A case was called to our attention recently where a farmer who had lost his hogs by cholera about the first of August hitched up his horse two weeks later and drove two miles into the yard of another farmer who had a big herd of healthy hogs. The individual who owned the healthy hogs immediately became nervous when he saw the neighbor drive into the yard, and at once asked the visitor if he did not think there was danger of bringing the disease into his herd. "None at all because it is more than two weeks since I lost the last hog, and anyway I do not see how disease germs could stick to the buggy wheels after coming through all this mud."

That is just the point. The average man has little faith in the scientific side of many of these things. When it comes to the matter of diseases, or, indeed, anything else, the scientific is simply the common sense of the thing and it takes sometimes the loss of two or three thousand dollars, and even more than that, to knock this phase of the question into the intellect of certain men. They not only lose their own hogs in many cases on account of ignorance, but succeed in propagating it to others.

We have in mind another individual who holds to the theory that there is no such disease as hog cholera; that all the losses attributed to that disease are due to the presence of worms. Nothing could be more absurd, or farther from the truth. We admit that worms cause an immense amount of loss among the hogs of the corn belt, but we have known instances where healthy herds were swept away by hog cholera when a post mortem revealed not a single worm in the intestines. We must educate ourselves to accept the evidence that is given out by the highest authority in our land. When the department of agriculture at Washington, with dozens of scientific men working on the subject, are able to isolate the cholera germ, to inoculate it into a healthy hog and produce cholera, that ought to be evidence enough to convince the average man that the disease is caused by a germ. Much is yet to be learned about the subject, but the germ theory we know with much certainty. A more ideal means of communicating disease from one herd to another can scarcely be thought of than driving a wagon or buggy through a contaminated yard and in turn going onto the premises of a neighbor where cholera did not exist. This simple act might be the means of distribut-

ing millions of germs in the yards of the neighbor, and yet of course not a single one of these is visible, nor is there the slightest indication made as to their presence until disease breaks out and then it is too late.

CURING SORGHUM FODDER.

The acreage of sorghum fodder in the corn belt is not large, but here and there you will find that dairymen, as well as other stockmen, are growing a few acres to supplement their supply of roughage. It requires but little experience to enable one to cure sorghum, but for the benefit of those who have never had experience with it we will say that sorghum ought to be allowed to stand until the seed is fairly well developed. In case it has been seeded late, which is sometimes practicable, it might not be possible to have it come into this stage of maturity before frost. But in such a case the matter should be delayed as late as possible. Where only a small acreage is involved one could not go far wrong if he actually waited until frost had nipped the leaves, but if this is done it should be cut within a few hours after the freezing.

Where land is rich and the growth of sorghum is large, there is only one implement that will cut it, namely, the mower. After cutting, it is generally advisable to leave it on the ground without more labor for a period of several days. So much the better, if a good, strong hay tedder can be put over it after three or four days. This lets the air into the heavy swath and prevents the surface from bleaching out. We have known instances where sorghum was actually too heavy to be handled by the hay tedder, in which case it was allowed to remain after cutting for a week or ten days without being touched. If rains come some damage will be done of course, but sorghum will stand more hardship than almost any other roughage crop.

A week or ten days of drying weather will reduce the weight of the sorghum about two-thirds. In other words, a crop that would weigh twenty tons per acre at the time of cutting would in favorable weather reduce in weight down

to six or seven tons. A lighter crop would even shrink more because its drying out would be more complete. It is then ready to be put in shock. First rake into windrows; after that some hand work will be necessary. Put it into large, round shocks about ten feet in diameter and about four or five feet high. If these are properly rounded off on the top very little water will enter and the fodder will keep in the field until it is ready for use in the feed yard.

Where it is the desire to store the fodder it can usually be put in a stack or mow after about one month's curing in the field, providing, of course, that the fall weather is reasonably dry. There is little danger of it mildewing or spoiling in any way because the curing has taken place in the large shocks.

There are those who advocate putting it directly into shock as soon as it is cut. True, it will cure it if handled in this way and really make a superior kind of fodder. The objection to the plan in this day and age is the amount of labor that it involves. No man who has ever been called on to shock a heavy crop of green sorghum will ever advocate such a plan. There is not one farm in fifty where labor is sufficiently plentiful to carry out this plan.

RATIONS FOR BROOD MARES.

The following communication has been received from one of our Wisconsin subscribers:

I would like a little advice on the feeding of brood mares during the fall and winter. My oat crop was very light, though I have an abundance of corn. I realize that corn is not an ideal feed for brood mares, but would like to have you inform me what I could use in connection with it and also what proportions should be used.

If brood mares are not working during the late fall and winter and there is a reasonably good supply of roughage on hand they need comparatively little grain. When they can have the run of corn stalks, and in addition, a good winter pasture, a ration of five pounds of grain a day ought to bring them through in good shape. Of course, for a considerable time after they are first turned into the stalk field no grain need be fed, as the corn found there will be sufficient to answer the purpose. A little later, however, when there is noth-

ing left but the dry fodder it will pay to use some grain.

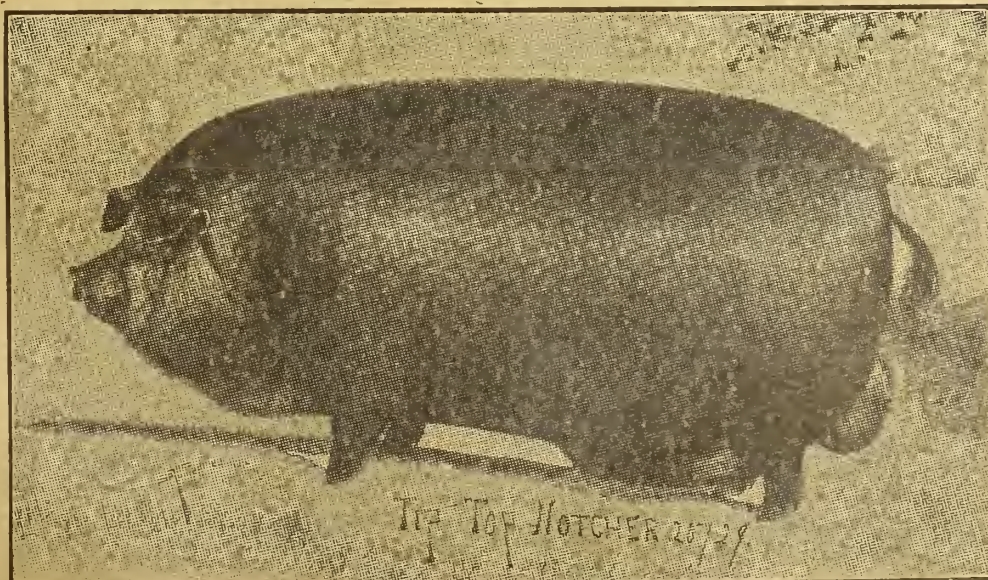

It is doubtful if there is any better food to use along with corn for breeding animals than oats, though in this instance oats are comparatively scarce, so that we would substitute bran. At the present price of mill feeds, as well as oats and bran, we believe that the following ration would be reasonably inexpensive and would answer the purpose well: Fifty pounds of corn, twenty-five pounds oats and twenty-five pounds bran. As corn is the cheapest feed of the three we have put it into the ration in the largest quantity. The oats and bran will supply flesh-forming constituents, the bran alone giving the whole ration a somewhat laxative effect and consequently contributing to a state of ideal health.

A little oilmeal fed daily or at least three or four times a week will give good results. However, this cannot be made to comprise any considerable proportion of the ration, and our opinion is that a single handful once a day is enough for a brood mare.

WHY CORN SHOULD BE PICKED EARLY.

There are many good reasons that voluntarily come to one's mind supporting the plan of picking seed corn early as compared with that of leaving it in the field until freezing weather or storing it in the crib, to be selected at leisure during the winter. Each season brings its own surprises, and this year there have been some heavy rains over a considerable part of the corn belt just at the time when corn was maturing.

As a result of these rains many of the husks contain a good deal of water at this time. Theoretically, we ought not to select ears that do not turn over and point to the ground, but when it comes to actual practice the man who selects his corn from the field is compelled to take a good ear wherever he finds it, providing it grows on a reasonably suitable stalk. The ears of some varieties grow more erect than others, and it is not difficult to find fields of corn this year where a very considerable percentage of ears weighing as much as a pound point upward—if not directly upward, at least at an angle that will admit rain into the husk. The presence of this water will no doubt injure a considerable percentage of corn, if not for feeding purposes, at least for seed. Even though it gradually evaporates it will tend to keep the seed wet, and as a result the germ will be injured just as soon as freezing weather commences. Because of this, we insist that it will pay our readers to stop all other forms of work for at least a day and pick the corn. We realize how urgent fall plowing, potato digging, fencing, hauling manure, etc., are at this time of year, but they will all be out of the way even though a day is taken off to select the seed corn. Formerly, we went through our fields with baskets and carried the corn to each end. It was then placed in a wagon and hauled to the racks. In order to save labor we have adopted a different plan during the last year or two, namely, in going to the best part of the field with team and wagon. One row is broken down, of course, but this is husked

Tip Top Notcher, grand champion boar World's Fair, recently sold by Mr. Geo. W. Seckman, of Ripley, Ill., to Messrs. Thomas & Hogsett, of Golden, Ill., and Fagan, Browning & McCabe, of Hersman, Ill., at the record price of \$5,000. The get of this boar have been winners at the leading fairs and a large number are included in the Grand Champion Sale Circuit, October 22d-29th, inclusive.

out into the wagon as we go along and seed is selected from adjoining rows into the baskets or sacks and then carried to the wagon. One can radiate out for a distance of forty or fifty rows from the wagon, and even then it will not be necessary to carry the seed very far. Two or three times across the average corn field in this way will usually mean a sufficient supply of seed.

CATTLE FEEDING EXPERIMENT.

Experiment II, as described in Bulletin 93, recently issued by the Nebraska Experiment Station, deals with the feeding of wheat bran, oilmeal, cottonseed meal, and alfalfa, each with corn and prairie hay, to test their relative efficiency as supplementary foods.

The cattle were two-year-old grade Short-horns and Herefords averaging about 1150 pounds each. They were in a half fat condition owing to their having been used in an earlier experiment where grain was fed sparingly for three months. The lots were redivided to give uniformity throughout.

The rations fed were as follows:

Lot 1, shelled corn and prairie hay.
Lot 2, shelled corn 75 per cent, bran 25 per cent, and prairie hay.

Lot 3, shelled corn 90 per cent, oil meal 10 per cent and prairie hay.

Lot 4, shelled corn 90 per cent, cottonseed meal 10 per cent, and prairie hay.

Lot 5, shelled corn and equal parts of alfalfa and prairie hay.

Lot 6, corn and cob meal and equal parts of alfalfa and prairie hay.

It may be said in explanation of Lot 6 that this ration was introduced in order to secure data on the value of corn and cob meal as compared with shelled corn.

As the cattle in the experiment had previously been fed as high as seventeen pounds of grain per day, they were started on that amount in Experiment II, February 15, 1906. Near the close, eight weeks later, the steers in the several lots were each receiving a daily allowance as follows: Lot 1, twenty-two and one-fourth pounds; Lot 2, twenty-seven pounds, and Lots 3, 4, 5 and 6, each twenty-five pounds. All lots except 1 and 6 could have been fed twenty-seven pounds. The steers in Lot 1, given corn and prairie hay, were not as hearty feeders as others, which has also been true in former experiments, no doubt because of the one sided nature of the rations. The presence of ground cob in Lot 6 seemed also to prevent that lot from eating as much corn as they might otherwise have done. The bran lot was purposely fed two pounds per day more than Lots 3, 4 and 5, because the larger proportion of the bran, 25 per cent of the ration, would have reduced somewhat the actual amount of corn fed that lot had all been fed the same number of pounds of the mixture.

The largest daily gain was made with oil meal, 2.52 pounds per day, while the smallest was made on corn and prairie hay without a supplemental food, 1.27 pounds per day. Lots 4 and 5, the former cottonseed meal and the latter alfalfa, each gained 2.29 pounds per day, while the lot fed bran gained 1.98 pounds per day and that fed corn and cob meal gained 1.95 pounds per day. While a smaller daily gain was made on corn and cob meal than on shelled corn, less of the former was consumed for each pound of gain. The corn fed as corn and cob meal proved in this experiment to be worth two and one-half cents per hundred more than shelled corn, not enough difference to pay for the grinding.

With wheat bran costing \$15 per ton, oil meal and cottonseed meal each \$32 per ton, and alfalfa and prairie hay each \$6 per ton, with all other expenses except labor included, the net profit or loss on each steer by lot is as follows:

Lot 1, corn and prairie hay, loss forty-six cents.

Lot 2, corn 75 per cent, bran 25 per cent, and prairie hay, profit fifty-seven cents.

Lot 3, corn 90 per cent, oil meal 10 per cent, and prairie hay, profit \$1.43.

Lot 4, corn 90 per cent, cottonseed meal 10 per cent, and prairie hay, profit forty-seven cents.

Lot 5, corn and equal parts of alfalfa and prairie hay, profit \$2.53.

Lot 6, corn and cob meal and equal parts of alfalfa and prairie hay, profit \$2.05.

It should be stated in this connection that the cattle were worth \$4.15 per hundred at the beginning and all lots, except Lot 1, \$4.60 at the close,

eight weeks later. The market value of Lot 1 was \$4.50 per hundred.

In comparison with corn and prairie hay without a protein supplement, the bran returned a value of \$20.80 per ton, the oil meal \$59.60, and the cottonseed meal \$45.60. The fact that oil meal returned a value nearly three times as great as bran may be partly accounted for by the higher protein content of oil meal, which amounts to nearly that difference. On the other hand, cottonseed meal is richer in protein than is oil meal, and in tests elsewhere it has sometimes proved the

equal of oil meal. In this experiment the pigs behind the cottonseed meal lot made much smaller gains, which accounts for a part of the difference in favor of oil meal, inasmuch as the pork was included in the net profits on all lots.

This experiment, as has been true with former tests, emphasizes the importance of using a protein supplement with corn and prairie hay, but it indicates in a very pronounced manner that alfalfa at its present market value may be used instead of a protein concentrate with greater profit.

Water Under Pressure For The Farm

By D. E. Chappell, Wisconsin.

In response to a request in your paper some time ago for a detailed description of a hydro-pneumatic water system, by a person having such in satisfactory operation, I will say for the benefit of the readers of this paper that we have such a system (air pressure) in active operation on our farm, and one that we would not be without again for any consideration. We have all of the conveniences and none of the undesirable features, such as impure water, etc., that our city friends enjoy.

We probably have a more elaborate system than some would think necessary, inasmuch as our 1,000 gallon pneumatic tank is located in the basement and water forced into it by the windmill which supplies other tanks on the farm, thereby doing away with the hand labor necessary with a smaller system. It will probably be proper to state that this 1,000-gallon tank is air-tight, being tested to 140 pounds cold water pressure, and tapped so that the intake and outlet pipes are both on the bottom. The tank is then closed at all openings except the intake, and the windmill started, which forces water into the tank, compressing the air until by the time the tank is two-thirds full of water you have a pressure registered on the gauge of forty to fifty pounds, which will elevate water over 100 feet high, affording service wherever you care to install fixtures.

We, of course, have in connection with the above system a complete sewerage system connected with a cess-pool, and if the readers of this paper could be made familiar with the convenience and labor-saving features of one of these systems I candidly believe every house

which can be would be equipped without delay.

We have what we call the three-pipe water system which serves hot and cold soft water wherever needed, as well as water from the well for drinking and flushing, and they are so arranged that in case the soft water gives out or the pneumatic supply is crippled, either system can be switched into the other, thereby affording constant service come what will.

As regards the expense of an outfit, it is governed wholly by the amount of service and kind and quality of bath-tub, closet, lavatories, sinks, range boiler, traps and faucets used. But I may add that when once properly installed of good materials, etc., a system of this kind is enjoyed without further expense, such as water rental and broken fixtures caused by flushing hydrants, and at times of fires such as one who is attached to city service must meet. And I wish to say right here that as a rule the people in the country are not awake to the amount of genuine pleasure that we can enjoy if we would but keep abreast of the times and realize the resources and the possibilities before us, available by means of a little thinking, planning and figuring. It would be impossible for me to commence at the beginning and describe fully the manner of installing such a system on account of space in this paper, but will state that the entire work was done by the writer and farm labor, with the exception of skilled labor amounting to \$2. But the work must be well done or it will not be a success, as compressed air is hard to control, but very serviceable when fully controlled.

THE DOUBLE-EARED CORN PLANT.

One of our subscribers sends the following communication:

I notice in going through my corn fields that a certain percentage of the stalks bears two ears. In a number of instances of course one of the ears is smaller than the other, though it is possible to find a good many pair of twins that are quite uniform in size and shape. What I would like to ask is, would it pay me to select my seed corn from the plants bearing two ears? Could one eventually, by selecting always in this way, fix this characteristic in this strain of corn? There is no question in my mind but what a plant bearing even two medium sized ears produces more than the single-eared plant, and because of this it appears to me that one would get more corn if he could succeed in fixing the "twin" characteristic.

We do not favor the practice of selecting seed corn from stalks that bear two ears, although in individual cases the weight of grain from a double-eared stalk might be more than from those producing single ears, yet as a rule there is more good sound corn on the one good ear than on the two small ones.

If we had reached that time in the improvement of our corn where every stalk was so well bred and the soil so well handled that the hundred per cent yield could be obtained, it would then be time to take up the question of fixing the two-ear characteristic. One good ear weighing a pound to the hill makes a yield of fifty bushels per acre. Considering the fact that the average yield of corn in the central West is about thirty-five bushels per acre, it must be apparent that we have much yet to learn about growing single-ear varieties before maximum yields are produced.

We would therefore, instead of advising the selection of ears from plant-producing pairs, recommend that they be passed by in every instance and that seed be selected from typical plants producing one ear. We do not deny that there might be an important field in which our experiment stations can work along this line, but out of our own ex-

perience we make the above recommendations.

RELATION OF SOILS TO GOOD CROPS.

Much interest has been revived during the last few years in the question of grain improvement, notably corn. Every experiment station in the corn belt is vying with every other station in its effort to publish something on this subject. Sometimes it is based on painstaking experiments, while in other cases it is largely a matter of guess-work.

Our desire at this time is to call attention to the relation of the soil to crops, especially when we are making efforts to improve the character of the crop. You may take the best bushel of seed corn that has ever been grown and plant it on thin land, or land that has been cropped for many years, and you may not be able to identify the corn at husking time as the same variety you planted.

A little experience we had recently emphasizes this idea with some force. On the poor farm in one of the counties in Iowa was planted a large number of varieties of corn, these having been secured from farmers scattered here and there throughout the county. Most of the seed obtained was planted in two or three different parts of a given field, this being done in order to give every variety a fair show. The field in question was not very uniform, so we traced down a few varieties in order to observe the character of the growth on light as well as on heavy soils. What was the result?

In one instance where a farmer had sent in a large late corn, part of the seed was sown on second-bottom land and about twenty rods away the balance was planted on light upland, though in the same field. The corn on a given date that had been planted on the second-bottom land was still green and would require at least three weeks to mature, while that on the upland was practically ripe. The stalks on the upland was not

as tall as the other by at least three feet, and yet the seed planted in each instance was the same and the work was all done in a single field. Certain persons interested in the experiments protested that there had been a mixing of the labels, as the difference in the soil could not possibly account for the difference in the character of the growth. There was no mixing, however, as those in charge had adopted every precaution against this.

The difference was due to the soil, and to the soil alone. There was more sand in the upland than on the second-bottom soil and it looked as though vegetable matter was entirely lacking. The corn produced on this upland was simply nubbins and nothing more, and no man could identify the variety. There was not a single ear more than six or seven inches long, while on good land the same corn grew nine, ten and even eleven inches long. The small corn was flinty, while the other was a clearly defined dent.

The lesson to be drawn from this instance is simply this: that as much pains must be taken to keep up the fertility of the soil if we expect to grow good corn as is taken with the selection of the seed. We are not sure but what scrub corn will give better results on poor land than the improved varieties, just the same as scrub animals will be more profitable if they are to be carelessly handled than will the pure-breds. Incidentally, therefore, the agitation about improving corn will do good by way of introducing better farming methods, because one's success in the production of good corn will be more largely in proportion to the skill employed in keeping up the supply of soil fertility.

Long Hours on the Farm.

To the Editor of The Homestead:

Regarding this question will say that my views coincide with those of Mr. W. C. Baldwin, of McPherson county, Kansas. Progressive farmers of all states are realizing the truth he expresses and plan their work accordingly. In fact, long hours have been the bone of contention for years and the length of same has gradually been reduced in all lines of labor. I myself can do as much work in a short day, working with some vim, as I can by dragging along two or three hours more. United States labor statistics prove the same thing for all lines of labor throughout the country.

For two years in the past I was a mental and physical wreck, caused by the greed of a long-hour man. I didn't know enough to look out for myself then. As for a two-hour noon, no hired man wants it. He wants to do his day's work and then quit. The employer who desires night work should hire a man to work in the night only and let the day shift work in the day. I am unalterably opposed to night work, and will not do much of it for anybody, including myself.

This summer I have talked with many progressive farmers and they all said their aim was to get everything done before dark. Besides, the five a. m. to nine p. m. plan allows absolutely no time for mental advancement, and today the hired man of average mentality will have something of that kind.

Our happy, contented farmer belongs to the 6:30 class. The other class is not satisfied after working day and night. In answer to Mr. Kelley's compliment for the 6:30 class, I will answer in kind and say that the five to nine deal is merely acting the hog.

Farm Furrows

Turned by a Practical Farmer.

If someone about the household loses his temper, there are others that find it at once.

Potatoes do well after clover or buckwheat. I have found this out by actual experience.

This is a busy time for the manure spreader. It ought to be kept busy at least ten hours per day these days.

A farmer needs a nice house that will keep out the cold and he needs an ice house that will keep out the heat.

Now that cheap alcohol seems to be in sight some are asking about how cheap it can be made out of fifty cent corn.

Valley land that is really dry is a good proposition. When dry it has many advantages over the hilly land.

If a dog has to be tolerated he should be properly trained. It is as necessary to train the family dog as it is to train the children.

Weed-killing bees should be arranged for now for next year. Weeds usually perpetuate themselves very readily if not prevented.

It is a wonder to me that we do not have more failures in business when we see on every hand so many placards of "selling below cost."

If I were ready to sow winter wheat and could not get a drill, I believe I would pass the business up. This is how much I believe it pays to drill in the wheat.

King Corn has been giving Jack Frost the race of his life, and while Jack has been industrious in some quarters, he has had to "go some" to catch the corn in some parts of the corn belt.

High-priced labor cannot be made to count on low-priced land. On low-priced land the owner must perform his own labor. At all times it will be necessary to keep the cost of production down as low as possible.

In our report of the Nebraska State Fair the ownership of the two-year-old Hereford bull was credited to A. J. Firkins, while as a matter of fact he belonged to G. G. Clement of Ord, Neb. We are pleased to correct this mistake.

Nearly everywhere the trees are hanging full of fruit and some attention should be paid to marketing them. No good excuse should be offered for letting apples go to waste. In many orchards there is great waste. Profit comes in being able to turn them to account.

Not long since I saw a nice growth of weeds being very much damaged and retarded by a sparse growth of small corn stalks. The weeds were wild sunflowers, and since there were no ears on the stalks the variety of corn could not be ascertained. It was probably some earless variety.

Ben Davis has broken into Scotland and the people there are glad to receive him. Enemies of Ben have said that the hardy Scotchman who has been living on oatmeal, perhaps does not mind the bran-like taste. That's all right, so Ben gets there with both feet. The American producer of the Ben Davis apple is not going to inquire about that so long as they sell well.

A man in looking over a paper saw the prices of hogs and he said to himself, "Why haven't I a few hogs to sell?" In another part of the same paper he read of the cholera being very bad in one locality and he mused, "I am glad I have no hogs to die with the cholera." So, after all, it may be well enough that this man did not have any hogs. This is a good time to be in the hog and sheep business.

Apparently the proxy business has run riot in some of our live stock associations. One instance comes to mind where the secretary of one important association cast through the proxy 73 per cent of the vote cast at the annual meeting, and did this for a period of twelve years. Men who go to the expense of attending a meeting have no show against a man

Montgomery Ward & Co.'s No. 75 Catalogue Now Ready FREE

Nearly 1300 large pages, thousands of pictures, 127,000 articles. The biggest bargain book ever printed. Beats all Catalogue records for quantity, quality and low prices. Full of many things you want that you cannot buy near home and multitudes of things of better quality and at lower prices than any other catalogue or store offers you.

eline of that kind. Such a system should be downed—it will be downed.

We plant but one crop of corn a year and it is well to have it right. To whatever extent we fail, to that extent will there be a failure in the yield.

Thrashing on a hot day is a hot job. The combined, concentrated rays of a summer's sun while laboring on a strawstack, associated with a "peek of dirt," prevents it from being a picnic job.

It is always an indication of a dry spell or the neglect of somebody when the pump handle sticks up, pointing obliquely at the sky. It makes one weary to look at a pump in this predicament.

Growing walnut timber is a doubtful industry. It requires almost a lifetime for the product to come into use and one crop is the limit. Then, there is a chance that the style of furniture may change. Some of the imitations of walnut lumber nowadays seem to be finer than the genuine. I have walnut trees

that have been planted about thirty years and the lumber in them amounts to but little.

Unloading a forty-bushel load of ear corn on the west, or hot side of a tall corn crib in August in the middle of the afternoon is liable to set a man thinking on real husking time. I have had that experience.

A stalk of corn was heard to say to the weeds growing in the field, "What are you doing here; you don't belong here?" and upon close listening the weeds were heard to answer, "We are here at the sufferance of your master; he invited us by his negligence, and we came."

I never see a large cottonwood stump but what I think that some man is wrestling with the warped and twisted lumber made from the timber taken from the stump. A neighbor of mine says he once had a wagon box made of cottonwood lumber and it was most convenient and obliging. The warping

would make the box turn wrong side out occasionally. Once he drew in a load of potatoes on a hot afternoon and left it stand while he went to dinner. The box took its usual turn and dumped the potatoes in the pit.

The two-row cultivator is here to stay and is one of the implements that hurries up the cultivation when the hay is getting ripe. A field of corn that can be cultivated in one day has the advantage over a field which requires two to go over it. To the corn grower this is evident.

A friend of mine, Mr. C. S. Buckley, of Iowa, says that the best solution of the weeds in a fence row problem is to seed a strip of ground around all the fields to clover and timothy. He has all his fields equipped in this way. There is no trouble or loss in opening up a field of small grain and the grass can be made into hay and the stock will graze these strips when turned in the stalks thus minimizing the liability of cornstalk disease or compaction of the stomach. This is a splendid plan.

SELECTING FINE LOOKING SEED CORN.

We desire to again refer to the practice of selecting seed corn according to what some term "the empirical standard," the so-called score card. A few weeks ago Prof. Clifton Smith, of the Michigan Station, presented some strong arguments in these columns denouncing the plan of selecting corn in this way. Among other things Professor Smith said:

We have known farmers to select corn, taking the best ears they could find each fall, year after year, and yet have not noted much improvement in the quality of the crop. Now come our corn improvement associations offering large prizes at fairs and elsewhere for the bunch of prettiest ears and we have known men to invest considerable money in a lot of ears for seed simply because those ears conformed to an empirical standard, a so-called score card. This is utter folly.

Let us examine the first statement in the above quotation. Professor Smith says we have known farmers to select corn, taking the best ears they could find each fall, year after year, and yet have not noted "much" improvement in the quality of the crop. If he had said not noted "any" improvement in the quality of the crop then his argument would have been consistent. If selecting good looking corn year after year will increase the yield perceptibly, then the system is not wholly wrong.

We do not deny the merit in the system of planting corn from one ear in each row and afterwards saving for seed the grain from the largest-yielding rows; but we want to again assert, as we have heretofore, that until individual farmers here and there are ready to take up this more scientific plan it will pay, and pay well, to put some skill into the matter of selecting corn.

We need no experiments at our stations or elsewhere to demonstrate that a bushel of corn composed of uniformly good ears, that is, ears that are good according to score-card standards, will outyield, when planted, another bushel that is selected just as it comes in the field—as it were, by the scoop-shovel plan. We have in mind a number of instances where men started five years ago with improved corn, selected only by the score-card method. They have been putting considerable pains into its selection year after year since by the same plan, and as a result today it is almost impossible to find a barren stalk in these fields. Furthermore, this corn is yielding from ten to twenty-five bushels more per acre than common corn. Unquestionably, if these same growers had started with a seed supply five years

ago selected from a singularly productive mother ear, they would have made much greater advancement; and in this respect no corn grower who has made a study of the business would disagree with Professor Smith.

We have no apologies to offer for the work that has been done by stations in the corn belt by way of stirring up the interest of farmers in good corn, that is, corn that is good according to the score-card standard. The work along that line has done more by way of interesting young men in the work on the farm than anything that has ever been taken up by the stations, and, incidentally, it has increased the yield of corn in every case where men have taken up the work with a desire to learn.

Soil almost wholly lacking in sand will grow good potatoes, if the season has been right, but it does not do to let them remain long in the ground after ripening, especially during wet weather. Here on this farm we have soil, on the other side of the creek that divides the farm in two, that has some sand in it. Here is where we raise potatoes for winter use, but those on the all-clay soil must be dug earlier, or they become watery, "soggy," as some call them. After all, it takes some sand to produce a clean, smooth potato.

The seed of English blue grass is cheaper than it has been for years, with a shorter crop. Why it is so cheap, no one knows, and many more than half believe the buyers are taking an undue advantage of most folks' ignorance as to the real market value of the seed. Take hogs, wheat or corn, and every farmer knows the present market value in all the principal market centers; the newspapers have educated us along this line, but very few farmers, if any, know the export price of blue grass seed.

W. A. Merryman's Sale of Herefords.

The sale of pure bred and high-grade Hereford cattle held by Mr. W. A. Merryman, of Laredo, Mo., on September 28th, was one of the most successful sales held in northern Missouri for some time past. Mr. Merryman had advertised his sale well, both abroad and at home and the attendance bears out the statement that advertising pays, and pays well when the man behind the gun is known among his fellowmen as one of the true blue sort. Fully one thousand people gathered at the Merryman home to attend the sale and to spend the last day with this estimable couple on their farm preparatory to their moving into town. Even the

schools in the neighborhood closed that the children might attend. Colonel Merryman learned of their coming and a merry-go-round was erected for their amusement. The writer at no time in his rounds ever saw more carriages in attendance at a sale than was seen on approaching the farm. Farmers came for twenty miles around and young men with their best girls possibly traveled farther in getting to the sale. Yet with all the crowd Col. George P. Bellows and his assistants kept order throughout the sale. The only accident of the day was the falling of one tier of seats loaded with some 300 men and women. For a time it was thought some were seriously hurt, but fortunately only a few were slightly bruised. The grade cattle and horses were sold in the forenoon and after dinner Colonel Bellows made one of the most forceful talks in behalf of the "white face" that has ever been our privilege to listen to. Buyers were present from Missouri, Iowa and Kansas and the forty-two head of pure bred averaged \$30.25. Mr. H. K. Philson, of Harlan, Iowa, was the most liberal buyer, taking a full car load of the better cattle. Among the other good buyers and bidders were: C. L. Browning, of Laredo, Mo.; T. H. Wells, Bedford, Iowa; L. E. Fuller, Humphreys, Mo.; J. W. St. Clair, Humphreys, Mo.; I.

CULTER & PROCTOR STOVE COMPANY.

We show herewith an illustration of the Celebrated King Bee Air Blast, a heating stove manufactured by the Culter & Proctor Stove Co., of Peoria, Ill., makers of high grade steel ranges, steel cooks, cast ranges and cooks and heaters of all kinds. This company enjoys a very large trade on the King Bee Air Blast. It is a wonderful stove and is giving universal satisfaction wherever used.

The King Bee Air Blast is an up-to-date stove in every respect, embodying all of the latest improvements of practical value in hot blast stoves, and has more individual features of real merit than any stove of its class made.

The King Bee is designed to burn soft coal, hard coal, lignite, slack, wood, cobs or any kind of fuel, with equally good results, and will give more heat with the same amount of fuel than any stove made.

The features of holding fire, burning gas and smoke, operate to perfection in the King Bee. It is as simple as can be, the cleanest stove in the market, a genuine pleasure to operate.

This stove is built air-tight, so you have your fire under perfect control. This, combined with the many other valuable features, will enable you to get results not obtainable from any other stove.

The King Bee Air Blast has an exposed fire pot, which with their heat deflecting ring, makes it a perfect and powerful base heater, equal to, if not surpassing any hard coal base heater made. The fire pot, being exposed, will outlast a dozen enclosed fire pots and give ten-fold better results.

The cast base is perfectly fitted; has the faced ash pit door with two genuine screw registers; lathe faced, tight fitting grate shaker door. No dust can escape into room when shaking down the ashes. This base is positively air tight and is provided with a large, roomy bailed ash pan.

Each King Bee Air Blast is mounted with an anti-buckling ring, which prevents the buckling or warping in of the drum at top of fire pot, effectually preventing any possible draft getting in between fire pot and drum, however long the stove may be used. All stoves without this anti-buckling ring will, in a short time, become open between fire pot and drum and become uncontrollable and of no value as a fire keeper, or gas and smoke consumer. Their anti-buckling ring positively prevents this buckling. Loose rings or castings around top of fire pot will not do, as they will bend or warp by heat and are of no value.

Their Patent Perforated Puff Preventer, in top of feed door effectually prevents all explosions so common in other makes of stoves of this class.

The King Bee Air Blast is a genuine fuel saver and will pay purchaser better dividends than any investment he can make.

They, without hesitation, recommend the King Bee Air Blast as the cleanest, most economical, most perfect operating and best all round stove of its class on the market. (See page 18 for coupon offer.)

Sectional view showing the latest improved King Bee Air Blast, unsurpassed as a Gas and Smoke Consumer. Manufactured by Culter & Proctor Stove Co., Peoria, Ill. See page 18.

Mayer HONORBILT

SHOES FOR MEN

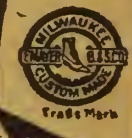

The highest degree of style, fit and workmanship are embodied in these splendid shoes. There are none that equal them in appearance and wearing quality at the price. They are

BUILT ON HONOR

That's what the name means. That's what a trial will prove. By all means wear "Honorbilt" shoes. Demand them of your dealer—INSIST. Sold everywhere. If you cannot get them write to us.

We also make the "Western Lady," and the "Martha Washington" comfort shoes and a full line of men's, women's and children's shoes. Our trademark is stamped on every sole.

Lost in Humanity.

We see by the notices that the Litchfield Mfg. Co., of Waterloo, Iowa, are sending out to prospective customers that they are afraid the dense crowd around their machines at the Illinois State Fair will prevent some of their customers from finding them. They state that the modern improvements on this machine have attracted so much attention at some of the fairs that the people who went there to see them thought the machines were not on the ground at all. They were simply buried in the center of anxious crowds of people who were striving to see and examine these modern spreaders. Read the continued story of this modern machine which will be found on page 5.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in the department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

A WORD OF ADVICE.

The editor of the legal department earnestly desires to answer all questions which are of any interest to the readers of the paper. Some legal inquiries, however, must remain unanswered. Occasionally correspondents complain of this, and want to know the reason why their questions are not answered. The space devoted to the legal department is limited, and the questions are numerous. They come in troops during some portions of the year, and it is impossible to keep up with the procession of them. It requires some power of condensation and discrimination to be fair and just to all demands upon the space allotted to the department. Too much space given to a single correspondent would be infringing upon the rights and privileges of others. Sometimes a correspondent desires information, which, if given, would fill several columns of the paper, to the exclusion of other matters equally interesting. Recently a subscriber asked us to publish the complete fish law of Wisconsin. This law is very long and complicated, with much detail of statement. It gives the names of four bays, seven lakes and seven rivers, besides Bonnet's Point and Squaw Island; and designates twelve counties where the law has more or less varied force and effect. It specifies twelve different kinds of fishes, to which the law affords protection of some kind or another at various seasons of the year. This law must have engaged the undivided attention of ambitious statesmen for a long time. It is most too much of a task to publish it, besides it can readily be found in the office of any justice of the peace or attorney, in the state of Wisconsin.

Another correspondent wants to know what right he has to fish in an Iowa lake. He says that an adjacent land-owner claimed that he was trespassing on his

land, and tried to drive him away. He says there is a government stone about four rods from the lake, and wants to know how much land the government owns around the lake. He omits entirely to state the main facts upon which any legal opinion might be based, so his questions cannot be answered. Still another wants this paper to publish a suitable form of articles for incorporating a telephone company, the only safe and proper way in such a case being to employ a competent attorney to prepare the articles and see that they are duly executed and properly filed, and start the company right, by drafting by-laws and attending the first meeting of the board of directors. Very often correspondents who ask questions involving legal points of great importance omit to mention the state where the transaction in question took place. As a general rule, when this happens it is impossible to give a reliable answer, for the reason that the laws of the various states differ widely upon many subjects. Correspondents can greatly aid us, and insure answers, if, when preparing their questions, they will carefully observe the directions contained in the note kept standing at the head of the legal department, and never fail to mention the state where the transaction occurred.

LAW QUESTIONS CONSIDERED.

PAYING TAXES TWICE.

Mr. John Wadle, Lacona, Iowa.—I have receipts for paying taxes every year. Recently I had to pay \$10 delinquent taxes for 1904. How can they collect taxes for a long time back?

If you had a receipt for the payment of the taxes of 1904, you should not have paid again. When you pay once, refuse to pay for the same thing again.

TRESPASSING STOCK—NEGLIGENCE.

A Subscriber, Cedar Falls, Iowa.—If a man is negligent and purposely leaves his fences open on the public highway and his neighbor's cows break out of their pasture and get into his crops through the open fence, can he recover damages from the owner of the cows?

Answer.—He cannot, because his own negligence was partially the cause of the injury to his crops. Generally, a man cannot recover damages for the trespass of animals unless they get upon his premises through a lawful fence.

PUBLIC NUISANCE.

A Subscriber, Savannah, Mo.—The boys of this neighborhood have been playing base ball across the road in front of A.'s house for some time. He objects to it and is angry and threatens to have them arrested. Can he cause the boys trouble, and, if so, how much?

Answer.—He can cause the boys trouble. They are guilty of committing a public nuisance, which is a misdemeanor under the laws of Missouri, punishable by fine or imprisonment in jail. The degree of punishment is largely in the discretion of the justice of the peace where the case is tried.

HUSBAND AND WIFE—WILL.

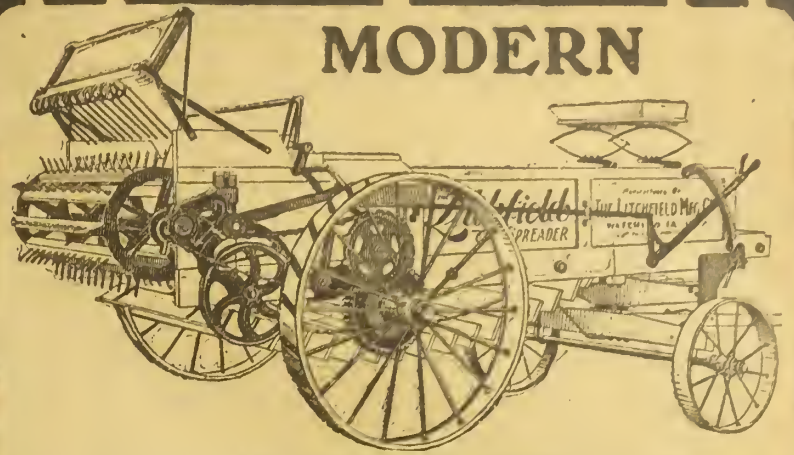

A Subscriber, Brighton, Iowa.—A. and B. are husband and wife. They have no children. They own no land, but have considerable personal property, consisting principally of live stock. The wife had some money of her own at the time of marriage. This money was invested in stock. (1) In case A. should die first, how would the property be divided? (2) Could the wife lawfully claim the stock which was bought by her own money as her separate property? (3) Can a will be made to last for years without changing?

Answer.—(1) The widow would be entitled to one-half of the property which A. owned at the time of his death. The other half would go to A.'s parents. (2) B. would be entitled to the stock which was bought with her own money as her separate property. (3) A will properly drawn takes effect when the testator dies, no matter when it was made. It does not become invalid by age.

A PRODIGAL SON.

A Subscriber, Merriman, Neb.—I have a son past sixteen years old. He left home and is now in Wyoming. I do not think he is doing anything and am afraid he will get into bad company. (1) Can I have him sent to the reform school in Nebraska? (2) Where is the school located? (3) Would he be treated right there and be taught something useful? What would be the cost of having him sent there?

Answer.—(1) You have not stated any facts which would warrant a court in sending your son to the reform school. Some cause must first exist. It must be proved to the court that the boy has committed some crime—or that for want of paternal care he is growing up in mendicancy and vagrancy, or that he is incorrigible. You may be to blame yourself. Give the boy a chance. A reform school is a kind of penal institution. A right-minded father ought not to willingly allow his son to go to such a place. Give the boy a chance. (2) The

MODERN

TOP DRESS THE CORN.

THE MANURE SPREADER of today is developing modern ideas and perfecting principles of modern farming, perhaps more rapidly than any other existing condition. "Top dressing" of the different growing crops is becoming a matter of very important consideration, and one that is being made possible on various crops and under various conditions with the modern manure spreader and which under other circumstances would not be practical.

Our best farmers are beginning to realize that the distribution of the manure, daily, where this is possible, especially on the large dairy farms, is coming to be an important matter.

To do this there must always be some place on the farm at all times of the year where this fertilizing is needed and where it is adaptable to the conditions.

For top dressing meadow land and small grain crops, thorough and uniform distribution is of vital importance. This is what you get with the Litchfield Manure Spreader. It is also essential that the wheels on the machine shall not cut through the surface, and this is another important and leading point with the Litchfield Spreader, by reason of its six-inch round-edge tires on the traction wheels.

It is only recently that the value of top dressing corn ground has come up for favorable consideration. It is becoming very popular and that quite rapidly. There is no way to do it except with a Spreader that is designed and adapted for this class of work.

The Litchfield Spreader with its three-horse hitch will do this work to perfection. It places the center horse in the center of the machine and all three horses walk between the corn rows. The wheels of the Spreader also travel between the corn rows. This is made possible with the new style adjustable pole as used on this machine. Keep in mind the distribution on corn ground before fall plowing also. It is the same improvement that gives the uniform equalization with the three horse hitch. No side draft, but all three horses pulling straight ahead and absolutely equal in their work.

A personal examination of this modern principle will be necessary to thoroughly appreciate it, as well as other valuable points on this modern machine, which must appeal to every man. All we ask is an opportunity to demonstrate the strength of our statements. Read next week!

Genasco Ready Roofing is a permanent protection from every kind of weather

Whether your house and barn are secure from the zero-cold of winter, the hot sun of summer, and the most searching wind, rain, hail or snow storms, will depend on what you get in your roofing.

The genuine Trinidad Lake Asphalt—the greatest waterproofing material known—goes into Genasco and gives it life and resisting power through a valuable process we have developed in twenty-five years' experience.

Your Genasco roof will be in good condition long after your neighbor's roof of shingle, slate, tin, coal-tar, or other substitute, has gone to pieces.

Genasco is easy to apply—and it stays applied.

Ask your dealer for Genasco Ready Roofing. Smooth or mineral surface. Write us for Book V and samples.

reform school is located at Kearney. (3) The purpose is to treat the inmates right, and teach them something useful. (4) We do not know—probably more than it would cost to welcome home a prodigal son, even if fatted calves are high-priced.

HEDGE ALONG HIGHWAY.

A Subscriber, Goffs, Kan.—(1) Can the present hedge law of Kansas be enforced if the township board refuses to enforce it? (2) How can a land owner who has a hedge along the public highway be compelled to trim or cut it back?

Answer.—(1) The trustee, clerk and treasurer of a township constitute the fence viewers of the township. The law provides that any fence viewer who neglects any duty required of him shall forfeit and pay ten dollars. (2) It is the duty of the road overseer to give a land owner thirty days' notice to trim or cut back his hedge fence along the public highway, to the height of five feet from the ground. Upon the failure of the landowner to comply with such notice, the road overseer may do it and report the expense of it to the county clerk, and the amount is entered on the tax rolls against said land, and collected as other taxes.

Mild Home Treatment for Cancer—Time Tried and Successful is the Record of Cancerol.

Anyone who really wants to know if he can be cured can readily determine this by a little investigation. A valuable book, full of interesting information and containing records of unmistakable cures of cancer in most every situation on the body, sent free to those interested. Address Dr. L. T. ST. JOSEPH INTERSTATE FAIR

The Interstate Live Stock and Horse Show held in St. Joseph, Mo., last week was an experiment, but the outcome of the project spells success with double-scored capitals. Never in the history of fairs have forces been more effectively united in order to bring things to pass than was the case last week. The people of St. Joseph combined with the Stock Yards Company to make this the first event of its kind in that city a success, and their efforts were rewarded by results beyond expectations. The non-acceptance of the date set apart by state fair officials for the Illinois State Fair by the officers of the Springfield institution furnished St. Joseph's opportunity. There was one blank week in the western circuit and this was taken up. St. Joseph, therefore, was suddenly placed upon the fair circuit map and it will be no surprise if its place is a fixture.

No fair in the circuit has quite as good facilities for unloading show stock and getting it into quarters as St. Joseph. Exhibitors, therefore, were pleased from the start and nothing occurred during the week to disconcert them. On every hand could be heard loud praises for the fair management and many were the compliments directed to the general manager, M. B. Irwin. The "little things" that contribute so much to make a fair educational in effect were looked after by Mr. Irwin just a little better than at any state fair this season. The catalogs, for example, were up to date, were printed without error, included all needed information, and they were freely distributed to visitors; animals were numbered in the ring and all awards in every class announced for the benefit of visitors; parades were made at various intervals during each day to break the monotony of judging. What more could

one ask for at the hands of a fair just starting?

The general character of the stock exhibited was good; it was above the ordinary. This was not surprising. Adjacent to St. Joseph is one of the finest improved stock territories of the West, and in it you will find some of the best herds of all breeds. Many of these were exhibited last week, though other states besides Missouri were strongly represented in some of the classes. The premiums were liberal, far beyond what one would naturally expect in a first event of this character. The horse show feature of the evening proved a popular feature during the whole week, and the mammoth tent was taxed to its capacity more than once. As said before, the program of judging and parades carried out during the day was superb, but there was lacking one of the most important features of the fair, namely, the people. Possibly 1,500 to 2,000 people could be found in the judging ring at one time during the day, but this was the limit. A beginning has been made, however. The fair has been a demonstrated success, and we have little fear but that the people will support it in the future. This at least has been the history of the American Royal. With but a small beginning in the way of attendance a few years ago it has grown until now it is one of the mammoth expositions held on the continent.

One of the interesting features of the Interstate Live Stock Show was the draft from the Royal stud of King Edward VII., of England, composed of nine head of Shire stallions and mares. These are personally owned by the king of England and were sent by him to Canada to be exhibited at the principal fairs in that province. The exhibit was the crowning feature of the Canadian fairs, and it proved no less the center of attraction in St. Joseph. This group of famous horses will be exhibited but once more in the United States, namely, at the American Royal, held in Kansas City, October 8th to 13th. They will then be disposed of to American and Canadian breeders. We congratulate the management of the Interstate Live Stock Show on securing this most instructive exhibit of the famous English draft horse.

In addition to King Edward's display was a notable six-horse entry made by Swift & Co., together with a Percheron stallion recently imported by the Crouch & Son firm for Louis F. Swift for the betterment of draft horse breeds in St. Joseph and adjacent territory. The Swift six-horse hitch constituted an interesting feature of each day's program.

In the yard and stable equipment, in managing ability, in the enthusiasm of its people no other fair surpassed St. Joseph this season. Breeders on every hand were free to express themselves as believing that there is need for just such a fair at that point, and the support given this year by exhibitors indicates that faith in this case is backed up by works. It was established, not in jealousy, nor in envy, but for the definite purpose of encouraging the use

of more good blood on the farms located in the territory adjacent to this prominent live stock center.

CATTLE.

SHORT-HORNS.

The Short-horn show raised a high standard for the future displays of this breed at South St. Joseph and the herds and classes furnished a strong attraction to visitors and an interesting study to breeders and stockmen. No Short-horn admirer can leave the grounds without feeling well repaid for the effort he made to see the show, for there was on exhibition a very evenly-balanced collection of some of the best stock the country furnishes. Competition was keen throughout, as will be testified to by the judge, Mr. H. C. Duncan, of Osborn, Mo., who found many perplexing situations in some of the large classes where it was practically a drawing of straws to secure the winner. Under such conditions opinion is generally divided, which allows for future reversals, as will probably follow. The quality and uniformity of several herds made them the object of very favorable comment. In the aged bull class some noted sires were represented by their get, these being Imp. Bapton Ensign 172542 and Lavender Viscount 124755, shown for many years by C. E. Leonard, of Bell Air, Mo., with great success. Orange Viscount, of his get, was able to get only third, and while he is a trifle off in quality he is of a splendid, low-set, meaty type. Much Choice Goods stock was evident, especially in two-year-old bulls, where the first three were his get and were worthy representatives of his name. T. K. Tomson & Sons' quartet of red females maintained their place. They have won prestige and blue ribbons at every show this season. They are grand animals, uniform in all respects, with all the femininity and character that could be desired. Bellows Bros. showed in their usual style and among their many winnings took first on a very even calf herd which presented some good, vigorous types of youngsters with splendid manners for their age. The show was well supported by breeders of the red, white and roan and Short-horn men will most presumably make St. Joseph fair a strong center for their contests in the future. While it makes the third fair in a small area, it fills out an undesirable vacancy and will make it possible for western exhibitors to remain on the circuit without going out of their way. The ten-year-old female, Golden Abbotsburn, a winner of past years, was only able to get third in her class, much to the surprise of the spectators, and while her age may be against her in the minds of some, it would seem that a cow of her size, holding her form so splendidly, would have been better favored. Last year she was grand champion at Kansas City. A list of the breeders and their showings are herewith attached: Bellows Bros., Maryville, Mo. (9 head); C. E. Clarke, St. Cloud, Minn. (13 head); T. J. Wornall, Liberty, Mo. (15 head); T. K. Tomson & Sons, Dover, Kan. (10 head); A. F. Graves, King City, Mo. (2 head); J. F. Stodder, Burden, Kan. (9 head); Fred Case, Harrisonville, Mo. (1 head); J. W. McDermott, Kohaka, Mo. (2 head); E. D. Ludwig, Sabetha, Kan. (2 head); Thomas, Jamison & Mitchell, Allen, Kan. (11 head).

AWARDS.

Aged Bull—First, Clarke, on Bapton Favorite 231750; second, Tomson & Sons, on Silvery Knight 206653; third, Thomas, Jamison & Mitchell, on Orange Viscount 157352; fourth, Clarke, on Nonpareil Stamp 188487.

Two-Year-Old Bull—First, Bellows Bros., on Good Choice 227852; second, Wornall & Sons, on The Conqueror 215051; third, Thomas, Jamison & Mitchell, on White Goods 234975; fourth, Stodder, on Lord Filbert 223307; fifth, Huse, on Lord Butterfly 258435. This was a contest of Choice Goods' get which bore strong evidence of the prepotency of their sire.

Senior Yearling Bull—First, Stodder, on Royal Orange 243113.

Junior Yearling Bull—First, Wornall & Sons, on Careless Conqueror 24515; second, Tomson & Sons, on Gallant Lavender 24423; third, Graves, on Champion of Lyndale; fourth, Huse, on Prince Butterfly 263390.

Senior Bull Calf—First, Clarke, on Choice Knight 253397; second, Bellows Bros., on

Commodore, Vol. 68; third, Tomson & Sons, on Victor Archer 264156; fourth, Wornall & Sons, on Oakwood Conqueror 233251; fifth, McDermott, on Fair Goods 253391. Some splendid patterns came forward in this class and a Choice Goods calf was again honored, being especially good over the back and hind parts. Commodore, sired by Hampton's Best, shows future promise. The Choice Goods calf in last place would have stood more finish and condition, otherwise he represents a good type.

Junior Bull Calf—First, Bellows Bros., on Lord Hampton, Vol. 68; second, Clarke, on Knight Commander 263720; third, Graves, on Hampton Hero, Vol. 68; fourth, Stodder, on Standard Lavender; fifth, Stoddard, on Valentine Duke 263916.

Aged Cow—First, Clarke, on Welcome of Meadow Lawn 9th; second, Tomson & Sons, on 3d Elder Lawn Victoria, Vol. 57; third, McDermott, on Golden Abbotsburn, Vol. 42; fourth, Wornall & Sons, on Glosterina, Vol. 53; fifth, Thomas, Jamison & Mitchell, on Rose Victor, Vol. 59. Clarke held first place quite easily, but in choice for next place there was a difference of opinion and some favored the large red cow finally given third place.

Two-Year-Old Cow—First, Tomson & Sons, on Cherry Lass, Vol. 60; second, Clarke, on Dorothea 2d, Vol. 64; third, Clarke, on Duchess of Lancaster 13th, Vol. 59; fourth, Wornall & Sons, on Choice Violet 2d; fifth, Tomson & Sons, on Thorny Bud, Vol. 63. A splendidly-fitted class throughout. Cherry Lass is a neat block, showing quality and an attractive bearing that is captivating. Dorothea is a March Knight calf of great type.

Senior Yearling Heifer—First, Clarke, on Lady Mysie 2d, Vol. 64; second, Thomas, Jamison & Mitchell, on 4th Duchess of Gloster, Vol. 62; third, Wornall & Sons, on Sweet Tone, Vol. 63; fourth, Tomson & Sons, on Lavina, Vol. 64; fifth, Wornall & Sons, on Clear Right, Vol. 63. Considerable surprise was created in the choice for third place and a much smoother and better proportioned heifer was thrown down in her favor. However, the strength and growthiness of Sweet Tone may have been a strong card for her.

Junior Yearling Heifer—First, Tomson & Sons, on 5th Elder Lawn Victoria, Vol. 64; second, Clarke, on Alice of Meadow Lawn, Vol. 64; third, Thomas, Jamison & Mitchell, on Lavender Bud 2d, Vol. 62; fourth, Wornall & Sons, on Snow Queen, Vol. 66.

Senior Heifer Calf—First, Bellows Bros., on Hampton's Tea Rose, Vol. 68; second, Clarke, on Lady Dorothea 3d, Vol. 65; third, Clarke, on Dorothea 2d, Vol. 65; fourth, Bellows Bros., on Model Maid 2d, Vol. 68; fifth, Tomson & Sons, on Delightful, Vol. 68. This was a strong line up and ten heifers of very even merit made the first places highly appreciated by those who finally captured them. Hampton's Tea Rose is a very square, well-formed calf and held her place from the start, though at times was in danger. Clarke's Lady Dorothea is somewhat shorter in body, but deeper and fuller in the rounds, while both are finished to perfection.

Junior Heifer Calf—First, Bellows Bros., on Parkdale Queen of Beauty 2d, Vol. 68; second, Clarke, on Molly 3d, Vol. 68; third, Wornall & Sons, on Glad Smile, Vol. 68; fourth, Tomson & Sons, on Rose Archer, Vol. 68.

Senior Champion Bull—Clarke, on Bapton Favorite. The handsome silver cup offered by Swift & Co. was won by this bull.

Junior Champion Bull—Clarke, on Choice Knight.

Senior Champion Cow—Clarke, on Welcome of Meadow Lawn.

Junior Champion Heifer—Bellows Bros., on Hampton's Tea Rose.

Grand Champion Bull—Bapton Favorite.

Grand Champion Cow—Hampton's Tea Rose.

Aged Herd—First, Clarke; second, Tomson & Sons; third, Wornall & Sons; fourth, Thomas, Jamison & Mitchell. Some difficulty was experienced in choosing the third place, as the competition was about even, though the decision satisfied the majority.

Young Herd—First, Clarke; second, Wornall & Sons; third, Tomson & Sons; fourth, Thomas, Jamison & Mitchell.

Calf Herd—First, Bellows Bros.; second, Clarke; third, Wornall & Sons.

Four Animals Get of Sire—First, Tomson & Sons, on get of Gallant Knight; second, Bellows Bros., on get of Hampton's Best;

MY NO-TAR ROOFING

RESISTS FIRE

IF you put it on your buildings, you can get lower Fire Insurance rates. Acid, weather, wear and water-proof.

Send me your name and address on a post card, and I will write you all about my roofing and send you a sample to test.

Then you can see for yourself that it is the only roofing that is weather, water, acid and almost wear proof as well.

I will also send you FREE a copy of my book which tells you how to lay a roof without any outside help.

AND ALL THE TOOLS YOU WILL NEED WILL BE A SHARP KNIFE AND A HAMMER.

You can't afford to spend money for shingles when you can get roofing as durable and lasting as my "No-Tar" Roofing.

You ought to send for my book right away if you are in any way interested in roofing.

My "No-Tar" Roofing is the best made for new buildings, re-roofing old buildings, or doing patching.

Write me a post card at once and I will tell you all about my roofing by return mail.

H. W. Binnie, President

THE HEPPES CO.

2401 Fillmore Street, Chicago.

third, Clarke; fourth, Wornall & Sons, on get of Imp. Conqueror.

Two Animals Produce of Cow—First, Clarke, on produce of Dorothea; second, Tomison & Sons, on produce of Victoria of Maple Hill; third, Wornall & Sons, on produce of Nonpareil of Meadow Lawn 5th; fourth, Thomas, Jamison & Mitchell, on produce of 4th Duchess of Gloster.

ABERDEEN ANGUS.

The Angus show was one of the strong features of the initial stock show at St. Joseph and if breeders have felt any lack of enthusiasm over the showing of this breed at preceding fairs they can now easily forget it in view of the numbers and general excellence that was typical of the herds appearing for honors. Breeders of this, and others breeds as well, are to be highly commended for the manner in which they responded to the call of the fair managers and the result has been that an enviable record has been made in the start. While some classes were not as close as they might have been, it was due to the superlative excellence of some animals shown and not to any falling below the standard set by the supporters of the blacks. In the aged bull class Jim Delaney, owned by A. C. Binnie, of Alta, Iowa, the champion of the season, was able to maintain his place without any danger. For smoothness and symmetry this bull is without a peer among the winners of late years. He represents some of the most valuable characteristics of the breed. Herds all through were well fitted and came with the intention of showing to their best advantage, so that Mr. McWhorter, of Alamo, Ill., found it not an easy task to place all classes in accordance with general opinion. It is probable some changes will be made in a few places at the next meeting. Eighty-six animals in all were shown by the following breeders: W. J. Miller, Newton, Iowa (25 head); Davis Bros., Maryville, Mo. (4 head); C. D. Hooker & Son, Maryville, Mo. (5 head); A. C. Binnie, Alta, Iowa (11 head); F. L. Sullivan, Afton, Iowa (3 head); Parrish & Miller, Hudson, Kan. (12 head); Wheatley & Ward, King City, Mo. (12 head); P. M. Culverton, Edgerton, Mo. (5 head); J. B. Withers, Missouri City, Mo. (11 head); Geo. Kitchen, Jr., Gower, Mo. (8 head).

AWARDS.

Aged Bull—First, Binnie, on Jim Delaney 62767; second, Sullivan, on Vala's Rosegay 63745; third, Withers, on Erroline's Rosegay 49763; fifth, Wheatley & Ward, on Maplehurst Proteros 47351; fourth, Wheatley & Ward, on Hale Lad 2d 42497. Two Rosegay bulls at second and third were strong individuals, but the reigning champion of the season was easily first.

Two-Year-Old Bull—First, Hooker & Son, on Blackbird Bentou 69611; second, Kitchen, on Louis of Meadow Brook 72459; third, Miller, on McDonald Lad 66952; fourth, Parrish & Miller, on Key 73172. A very uneven class in size; a ton bull was put second, however his weight was well placed. First choice was 200 pounds the lighter, with a trifle stronger lines and fine quality. Third choice had hardly sufficient refinement to crowd the winners.

Senior Yearling Bull—First, Culver, on Questor Lad 83369; second, Withers, on Bluegrass Ridge Ajax 76732; third, Kitchen, on Melbert 2d 84169; fourth, Davis Bros., on Heather Eraste 85412; fifth, Wheatley & Ward, on Lone Rock Leo 2d 77196.

Junior Yearling Bull—First, Culver, on Don of View Point 87199; second, Parrish & Miller, on Albertas 1st 77563; third, Binnie, on Elmar Lad 84122; fourth, Culver, on Royal Hypens 84120; fifth, Miller, on King Donald 80599.

Senior Bull Calf—First, Sullivan, on Beau Ito 94175; second, Davis Bros., on Elite Lad 95018; third, Miller, on Newton King Dodo; fourth, Kitchen, on Intensified 93993; fifth, Withers, on Miss Erie's Rosegay 94793. Quite a few of the nine calves that lined up here were rather plain and out of form for show. The most difficulty seemed in placing W. J. Miller's young bull, a strong calf, but a trifle off in his finish. Beau Ito was a much better appearing bull from the front. Intensified is a short-legged type and attractive, though a bit small.

Junior Bull Calf—First, Withers, on Dalgarno 94796; second, Binnie, on Even Lad 95008; third, Miller, on Erica Prince M. 94355; fourth, Kitchen, on Helmet A. 88992; fifth, Hooker, on S. O. Prime Lad. First

was an easy winner for being next to the ground with an evenly-covered, hocky form.

Aged Cow—First, Miller, on Snowflake 2d of Kirkbridge 61016; second, Binnie, on Gustie of Kirkbridge 61008; third, Kitchen, on Mina of Alta 3d 33589; fourth, Parrish & Miller, on Rutger Mina 2d 61094; fifth, Parrish & Miller, on Sunflower Happy 3d 54371. Tribute to the noted bull, Lotterer, was paid in the selection of first and second in this class. Not enough scale and finish in the last choices placed them at a disadvantage.

Two-Year-Old Cow—First, Kitchen, on Driftwood Rose 72992; second, Binnie, on Mina of Alta 5th 73111; third, Withers, on Grapewood Odessa 7th 72590; fourth, Parrish & Miller, on Sunflower Fairy 79585; fifth, Parrish & Miller, on Sunflower Happy 4th 70008. A very strong line with the most competition at the head of the list. Some, favored Mina of Alta for first, however. She had hardly as smooth a finish nor as inlaid a frame as the choice for first. The third placing is out of McHenry King 18th.

Senior Yearling Heifer—First, Binnie, on Blackbird Lassie of Alta 83368; second, Binnie, on Coquette Lass of Alta 83367; third, Miller, on Metz Ogarita 3d 83825; fourth, Sullivan, on Pay Ito 80350; fifth, Kitchen, on Beulah Brown 79012. Four out of the seven in this class were strong rivals and called for a close decision. Binnie's pair, however, are hard to heat for quality, condition and form, although Metz Ogarita had more weight to her credit, though she was a bit short of the required quality and finish to put her up.

Junior Yearling Heifer—First, Withers, on Bluegrass Ridge Dorcas 83095; second, Parrish & Miller, on Sunflower Happy Ito 83320; third, Sullivan, on Eoleon; fourth, Withers, on Bluegrass Ridge Dora 82676; fifth, Miller, on Metz Modesty 85687.

Senior Heifer Calf—First, Hooker & Son, on Erica Pride 2d 93787; second, Binnie, on Enna Lassie 2d 95002; third, Hooker & Son, on Blackbird Perfection 2d 93788; fourth, Binnie, on Coquette Lass of Alta 2d 95003; fifth, Miller, on Metz Labelma 4th 94352. Ten heifers made this a strong class and opinion was divided, many doubting the right of Messrs. Hooker's calf to be put ahead of at least two good ones below her. Mr. Binnie's two calves were reversed at Des Moines and the placing there was generally sustained.

Junior Heifer Calf—First, Binnie, on Queen Lass of Alta 3d 95007; second, Binnie, on Proud Lass of Alta 95009; third, Miller, on Snowflake's Queen 94354; fourth, Miller, on Metz Heather Bloom 94356; fifth, Hooker & Son, on Queen of South Oaks 2d 93795.

Senior Champion Bull—Binnie, on Jim Delaney 62767.

Junior Champion Bull—Culver, on Questor Lad 83369.

Senior Champion Cow—Kitchen, on Driftwood Rose 72992.

Junior Champion Cow—Binnie, on Blackbird Lassie of Alta 83368.

Grand Champion Bull—Jim Delaney.

Grand Champion Cow—Blackbird Lassie of Alta.

Aged Heifer—First, Binnie; second, Kitchen; third, Miller; fourth, Withers.

Young Heifer—First, Binnie; second, Withers; third, Parrish & Miller; fourth, Miller.

Calf Heifer—First, Binnie; second, Hooker & Son; third, Miller.

Get of Sire—First, Binnie, on get of Heather Lad of Emerson; second, Hooker & Son, on get of Eraste; third, Parrish & Miller, on get of Hale Lad; fourth, Withers, on get of Rosegay.

Produce of Cow—First, Hooker & Son, on produce of Blackbird of Denison 33; second, Parrish & Miller, on produce of Sunflower Hope; third, Culver, on produce of Alpha's Queen; fourth, Miller, on produce of Ogarita.

HEREFORDS.

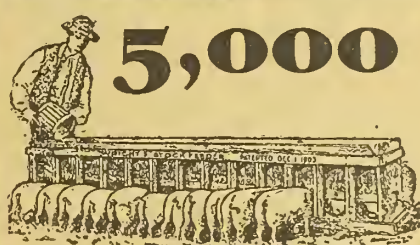

The showing of white faces was all that could be desired and was just what might be expected from the noted herds that were present. It is a great thing to produce a few animals of the desired type and quality, but when it comes to bringing out herds which were uniform throughout in type and quality it would seem as if the breeder had achieved his highest purposes. This was justly descriptive of several of the herds exhibited. Cargill & McMillan, of LaCrosse, Wis., made their usual consistent winnings and won new admirers as in the past, although their aged bull was not shown. For champion cow, Heliotrope, the aged female, was turned down and the place given to Miss Filler 2d, a Fulfiller heifer from the

Poland China Barrow. Age 18 months. Weight 1,035 pounds. Fed on Iowa Stock Food Bred and owned by Peter Plow, Orange City, Iowa.

P. S. Remember my sale of Duroc Jerseys October 18th. My prize-winning hoar under six months at Iowa and my other winners go in this sale.

same herd. This caused some surprise. Mousel Bros. brought out a very uniform herd, the get largely of Princetps 4th. These are their own breeding and were fitted to stand in good company. S. L. Brock made a good display with his herd which was notable for its uniformity and this partly accounted for its consistent winnings. Classes were interesting and brought out some perplexing problems for the judge, Mr. Harris, of Harris, Mo., who did the placing in a very business-like and satisfactory manner. The handsome silver cup offered by Morris & Co. went to Bonnie Brae 3d after a contest with Privateer. The breeders appear herewith: Cargill & McMillan, LaCrosse, Wis. (18 head); Mousel Bros., Cambridge, Neb. (10 head); Cornish & Patton, Oshorn, Mo. (8 head); B. E. Carpenter, Helena, Mo. (7 head); Hugh Whitford, Guilford, Mo. (7 head); Yates Bros., Agency, Mo. (7 head); Klaus Bros., Bendena, Kan. (5 head).

AWARDS.

Aged Bull—First, Yates Bros., on Columbus 49th 125888; second, Whitford, on Imp. Kensington 111886; third, Carpenter, on Onward 12th 140941.

Two-Year-Old Bull—First, Cargill & McMillan, on Privateer 2d 182133; second, Mousel Bros., on Princetps Dictator 185082; third, Cornish & Patton, on Admiral Dewey 184255; fourth, Klaus Bros., on Fulfiller 3d 184731; fifth, Carpenter, on He's Columbus 185455.

Senior Yearling Bull—First, Cargill & McMillan, on Bonnie Brae 3d 203317; second, Cornish & Patton, on Weston Anxiety 242862; third, Cornish & Patton, on General Gomez 49th 242856.

Junior Yearling Bull—First, Brock, on Discoverer 212231; second, Mousel Bros., on Loyd's Bully Boy 211167; third, Yates Bros., on Gold Brick 210178; fourth, Carpenter, on Onward Lad 21st 214466; fifth, Klaus Bros., on Major 2d 227309.

Senior Bull Calf—First, Cargill & McMillan, on Fulfiller 3d 230508; second, Mousel Bros., on Princetps 1 Am 234599; third, Cornish & Patton, on Weston's Perfection 245126; fourth, Brock, on Discharger 233122; fifth, Cornish & Patton, on Anxiety Stamp 3d 245125. In the eight calves brought out for this class it was easy to see which ones were out of the money, being off in type compared with the short-legged, compact built of those taking places at the top of the list. The Fulfiller bull is hard to improve on and had a reasonably easy time to hold his place against a dark red, hardly as good as one might expect for being out of Princetps 4th. Third choice was a rather small calf, but a tidy one.

Junior Bull Calf—First, Mousel Bros., on Alto Hesiod 236293; second, Cornish & Patton, on Admiral Weston 245124; third, Brock, on Disporter 238025; fourth, Cornish & Patton, on Admiral Dewey 2d 245123. A close ring, though a small one, but setting forth some neat, hocky types. The first choice

is a bit at a disadvantage for being a trifle too high behind, which detracts from a strong top line, making the smooth-fashioned, low-set calf in second place a strong rival.

Aged Cow—First, Cargill & McMillan, on Heliotrope 159451; second, Cargill & McMillan, on Twilight 167464; third, Mousel Bros., on Mery Helming 180194; fourth, Carpenter, on Bessie Real 163636; fifth, Klaus Bros., on Ruby 93832. Three great types of beautifully-covered, massive females made this class a feature of the female showing. For second place the contest was close and both animals had their admirers. However, the Twilight cow was somewhat the better fitted. A large, hocky cow was given fifth place, being somewhat below the standard of the class in quality and symmetry of parts.

Two-Year-Old Cow—First, Cargill & McMillan, on Miss Donald 17th 184573; second, Cargill & McMillan, on Golden Lassie 182126; third, Mousel Bros., on Princetps Lassie 185083; fourth, Carpenter, on Miss Fairy 191488. This class was practically a counterpart of the one preceding; three elegant individuals that made it impossible for a plainer type like Miss Fairy to endanger their positions.

Senior Yearling Heifer—First, Brock, on Lady Ann 204905; second, Cargill & McMillan, on Ethel 2d 203170; third, Brock, on Lady Ruth 217109; fourth, Cargill & McMillan, on Crocus 2d 203169; fifth, Cornish & Patton, on Poinsettia 242860. Spoils as well as general opinion was about evenly divided in this class and competition was earnest.

Junior Yearling Heifer—First, Brock, on Lady Lucy 212289; second, Mousel Bros., on Princetps Flossie 207877; third, Mousel Bros., on Claud's Princess 211164; fourth, Klaus Bros., on Miss Donald 29th 208944; fifth, Carpenter, on Miss Fairy 2d 214458. A much less attractive class, from lack of uniformity in size and condition for the ring.

Senior Heifer Calf—First, Cargill & McMillan, on Miss Filler 2d 230514; second, Brock, on Disturber's Lassie 233124; third, Brock, on Lady Elfin 233127; fourth, Cargill & McMillan, on Miss Filler 4th 230516; fifth, Brock, on Lady Welmore 233131.

Junior Heifer Calf—First, Cargill & McMillan, on Miss Filler 6th 239659; second, Mousel Bros., on Princetps Lady 234597; third, Cargill & McMillan, on Miss Filler 5th 230517.

Senior Champion Bull—Privateer 2d.

Junior Champion Bull—Bonnie Brae 3d.

Senior Champion Cow—Heliotrope.

Junior Champion Heifer—Miss Filler 2d.

Grand Champion Bull—Bonnie Brae 3d.

Grand Champion Cow—Miss Filler 2d.

Aged Heifer—Cargill & McMillan won first with Privateer at the head. He was somewhat below the standard of the females, not having the type nor smoothness. Mousel Bros. won second with a strong bull at the head.

Young Heifer—First, Cargill & McMillan; second, Brock; third, Mousel Bros.

YOU CAN GET THIS CAN OF Dipolene

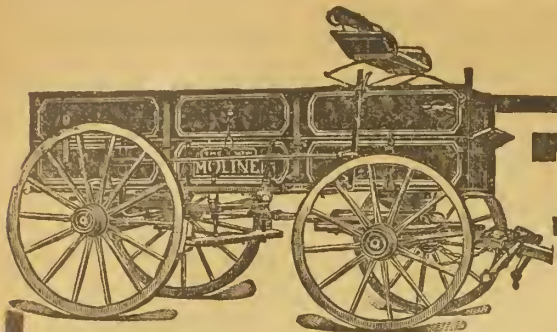

on 30 days trial. We don't ask you to pay for it unless it does the work. We don't ask you to take a single chance or a bit of risk on this proposition. We know what Dipolene will do—we want you to know by testing it thoroughly. That's why we are willing to send it

ON A MONEY-BACK 30 Days Trial

You can try it on hogs, cattle, sheep, horses—give it as severe a test as you please, it cannot do them any harm, and if it fails to do them any good, send it back at our expense and we will refund your money. You'll only be out the stamp it costs to mail us your order if it does not do what we claim for it. We want every farmer and stock-raiser in the United States to know by personal test how good a dip Dipolene is. We want him to know what it will do, and why it will pay him to use it in preference to all others. We make some pretty broad claims for Dipolene but we prove them with the dip. This is how we do it. We will send any quantity of Dipolene over two gallons on 30 days trial, to any farmer and stock-raiser who will write for it agreeing to use it according to directions, and refund his money in full if it proves unsatisfactory. Write for our introductory prices and we will mail you free a booklet stating specifically what Dipolene is good for and just how to use it to the best advantage. This offer is well worth accepting today—it may save you many dollars. Address,

This is The Moline THE IRONCLAD WAGON!

Built since 1854 in the largest exclusive Farm Wagon factory in the world, by machinery that does the work with such wonderful precision that each part fits the other with unfailing exactness. This enables us to produce the **Lightest Running Wagon Under Heavy Loads**

The Moline has for its foundation the best woodstock that grows—all Hardwood. Selected Hickory for axles, doubletrees and singletrees, and white oak for the rest of the gearing and wheels. Yellow pine boards that are tongued and grooved for

the bottom of box; and we put in the sides the best lumber material obtainable. Now on top of all this we have reinforced every conceivable place on the wagon which is liable to wear with iron and steel protections, not of flimsy size, but with heavy plates.

which are so in evidence on the wagon throughout that The Moline has been called **The Ironclad Wagon**.

THE WONDERFUL BOOK

Pole—Reach—Hind Gear—Front Gear—Box inside and outside, all have special ironing everywhere. Our master mechanic has written a book, "How the Moline Wagon is Made Ironclad." It is FREE. Whether you want to buy or not, get the book! You will learn a whole lot more about wagons than you ever knew before. Write for it today. Address

MOLINE WAGON COMPANY,
MOLINE, ILL.

BRANCHES—Deere & Webber Co., Minneapolis; John Deere Plow Co., Kansas City, St. Louis, Omaha, Dallas, New Orleans and Portland.

Calf Herd—First, Cargill & McMillan; second, Brock.

Two Animals, Produce of Cow—First, Cargill & McMillan, on produce of Belle Donald 2d; second, Cargill & McMillan, on produce of Misties Pride; third, Brock, on produce of St. Anne; fourth, Cornish & Patton, on produce of Pansy 4th.

Four Animals, Get of Sire—First, Cargill & McMillan, on get of Fulfiller; second, Brock, on get of Disturber; third, Mousel Bros., on get of Princess 4th; fourth, Cornish & Patton, on get of Weston Stamp 16th. This last class was a good one and Mousel Bros. were strong rivals for second place, which was held by four animals somewhat in higher condition and a trifle more smooth and typy.

GALLOWAYS.

The Galloways came out with a showing that spoke well for the exhibitors, and an uncommonly strong lot graced nearly every class. If this breed continues to improve in this country as it has been doing, it would not be safe to place estimate on their future popularity. The young classes were the most striking, and quality with a most splendid robustness and sweetness of character were evident throughout this stuff. The C. E. Clarke herd, of St. Cloud, Minn., attracted much attention and took all the blue ribbons with the exception of the first two bull classes, where they made no entries. Worthy 3d, a bull bought in Scotland by Leslie Smith, sired the larger part of this herd and has reflected most excellent judgment on his purchaser. Pat Ryan of Red Cloud was an easy winner for champion bull, and is a strong individual. The superintendence was in good hands and the judging done by Marion Parr, of Harristown, Ill., passed off without a hitch, although competition was not lacking by any means outside of one or two classes. The list of breeders is as follows: L. W. Lindsey, Red Cloud, Neb. (10 head); C. E. Clarke, St. Cloud, Minn. (11 head); A. F. Craymer, Morris, Ill. (11 head); S. M. Croft & Sons, Bluff City, Kan. (12 head).

AWARDS.

Aged Bull—First, Lindsey, on Pat Ryan of Red Cloud 20038; second, Craymer, on Scottish Samson 23542; third, Croft & Sons, on Randolph 2d of Thornhill 19302.

Two-Year-Old Bull—First, Lindsey, on Ned of Red Cloud 26253.

Yearling Bull—First, Clarke, on Prince of Meadow Lawn 26343; second, Craymer, on Protector of Rivers 27193; third, Lindsey, on Nume of Red Cloud 27588; fourth, Clarke, on Gay Knight 26841.

Bull Under One Year—First, Clarke, on Meadow Lawn Meadalist 28750; second, Clarke, on Victor of Meadow Lawn 28746; third, Croft & Sons, on Randolph C.; fourth, Craymer, on Grandee of Rivers 28774; fifth, Croft & Sons, on Advancer. Six lads made this a handy class and while several showed a tendency to fall away over the crops and be too open on the shoulders, the line up was first class in quality and type.

Aged Cow—First, Lindsey, on Favorite 16th of Lochenkit 21205; second, Croft & Sons, on Miss Midget 23502; third, Croft & Sons, on Lady Hutchinson 23174; fourth, Craymer, on Princess Mable 23484. The blue went to a very good handler, low set and blocky, and quite an easy winner. Not as much size nor condition was evident in the others.

Two-Year-Old Cow—First, Clarke, on Loucy of Meadow Lawn 24818; second, Lindsey, on Lady Charlott 24814; third, Croft &

Sons, on Randolph Pride 25013; fourth, Craymer, on Prudie of Rivers 25413. Four first-rate patterns of the low-set, plump kind with a good showing of quality especially characterized the first placing.

Senior Yearling Heifer—First, Clarke, on Cora of Meadow Lawn 26833; second, Croft & Sons, on Blackie of Greenbush 27073; third, Craymer, on Standard Pet 27190; fourth, Lindsey, on Mollie C. of Red Cloud 26239. A very strong rival for first was placed second, being just a little too upstanding.

Junior Yearling Heifer—First, Clarke, on Beauty of Meadow Lawn 26830; second, Clarke, on Sadie of Meadow Lawn 26834; third, Craymer, on Mischief of Rivers 27191; fourth, Croft & Sons, on Midget of Greenbush 27071; fifth, Lindsey, on Nettie D. of Red Cloud 27584.

Senior Heifer Calf—First, Clarke, on Lady Belle 4th 28740; second, Craymer, on Darletta of Rivers 28762; third, Croft & Sons, on Trixie; fourth, Croft & Sons, on Viola of Greenbush. This made a very striking quartet of rich-coated lassies, which was a feature of the calf classes.

Junior Heifer Calf—First, Clarke, on Lady Douglas 3d 28745; second, Lindsey, on Lady Elgin 28843; third, Clarke, on Floss 2d 28741; fourth, Craymer, on Defender's Pet 28761; fifth, Croft & Sons, on Flossy Lee.

Senior Champion Male—Pat Ryan of Red Cloud.

Junior Champion Male—Meadow Lawn Meadalist.

Senior Champion Female—Favorite 16th of Lochenkit.

Junior Champion Female—Lady Douglas 3d.

Exhibitor's Herd—First, Lindsey; second, Craymer; third, Croft & Sons.

Young Herd—First, Clarke; second, Craymer; third, Croft & Sons; fourth, Lindsey.

Get of Sire, Four Animals—First, Clarke; second, Lindsey; third, Croft & Sons.

Produce of Cow, Two Animals—First, Clarke, on produce of Saturn of Wavertree; second, Clarke, on produce of Sony of Kilquhanity; third, Lindsey, on produce of Cherilee of Red Cloud; fourth, Croft & Sons, on produce of Midget of Wavertree.

Best Bull Any Age—Pat Ryan of Red Cloud.

Best Cow Any Age—Favorite 16th of Lochenkit.

FAT STOCK.

Although this department of the show was not extensive, it brought out some splendid types of good gainers and well-finished blocks. Competition was close enough, however, to give the classes considerable inter-

Southern Iowa Normal College. A Great School Surrounded With Unusual Advantages.

As this is the season of year when farmers' sons and daughters are casting about for a good place to attend school where a normal or business course may be secured at the minimum cost, the Southern Iowa Normal looms up as the one place where superior advantages are offered. This normal school was established at Bloomfield, Iowa, through the enterprise of public-spirited citizens in 1870, and since that time has been a potent agency in helping thousands of young men and women to prepare themselves for various useful positions in life. This school prepares the student for teaching, as well as giving a thorough common school, college preparatory, scientific, literary, classical, business, shorthand and musical course of instruction. The location is an ideal one. Bloomfield is the county seat of Davis county, Iowa, and is surrounded by a good moral influence, as well as being healthfully located. The present management, Profs. J. M. Hussey and H. C. Brown, are among Iowa's foremost successful educators. Both these gentlemen are old and experienced instructors and have the right ideas of conducting a normal business school. They have studied to bring the cost to the student down to the minimum. A representative of this paper has recently inspected the dining room and the cuisine is furnished to the students at from \$1.60 to \$2 per week, which is practically cost to the faculty. This board is maintained solely for the accommodation of the student. However, students may board wherever they like, as there is no compulsion about dining at the college dining hall. President Brown and his family dine at the same table as do the students, as well as other members of the faculty. The subject of our illustration represents the college buildings at Bloomfield, which are delightfully located and well lighted and ventilated. The new catalog, or complete bulletin for 1906-7, is now ready to mail to all applicants who say they saw this school advertised in this paper. Students from a distance have their railroad fare paid. Certainly this is a point not to be overlooked by scholars who wish to attend from a distance. As soon as corn husking is over there will be some four months that farmers' sons could well devote in securing a business course at the Southern Iowa Normal College. Write the Southern Iowa Normal College, Bloomfield, Iowa, for the new bulletin.

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeder today know that grain should be mixed with "roughness." The cob is the best mixture for calves and steers. "The Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Calves thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

Soon Pays for Itself

Enterprise Wind Mill Co., 24 Main St., Sandwich, Ill.

class Thomas, Jamison & Mitchell won over Lord Hanna shown by the Kansas station, with Coleridge, sired by Orange Viscount. Colonel Harrimon, shown by the station was the only entry for the class under one year.

Sweepstakes—Kansas Experiment Station, on Tim.

Sweepstakes—Black Prince.

GRADES AND CROSS BREDS.

SPECIAL PREMIUMS, SWIFT & CO.

Steer or Spayed Heifer, Two Years and Under Three—First, Hull, on Hereford; second, Miller, on Angus; third, Leeper Bros., on Short-horn.

Steer or Spayed Heifer One Year and Under Two—First, Miller; second, Kansas Experiment Station; third, Cornish & Patton.

Steer or Heifer, Six Months and Under One Year—First, Cargill & McMillan, on Hereford; second, Davis Bros., on Angus; third, Stodder, on Short-horn.

Championship Cup—For best steer, open to all classes, given by Swift & Co., W. J. Miller, on Dutch Lad.

Hammond Packing Company—\$50 to best car load fat steers or heifers, any breed, one year and under two, Wertz Bros., Alma, Neb., on Short-horns.

Davis & Son Specials—For best carload fat cattle any age or breed: First, Wertz Bros., on Short-horns; second, Thomson, Bohart Ranch, on Herefords.

Beside these specials the Lee Live Stock Commission Company offered prize on best car load fat cattle any age or breed, won by Wertz Bros.

The St. Joseph Cattle Loan Company offered prize of \$25 to best car load feeders any age, won by Thomson, Bohart Ranch.

CAR LOTS.

In the Short-horn classes Wertz Bros., of Alma, Neb., had a car load of prime red steers and one of spayed heifers equally as good. Both loads were bought at the Colorado fat stock show in February and have been on feed since, being under two years of age. They are range-bred stuff and their uniformity in size, quality and color made them a very attractive lot. The steers were awarded the following prizes by the same

talent that made the fat cattle awards Best car load steers or heifers under three years, also same two years and under three. The lot of heifers were given second place in the former class.

Among the Herefords, Drake Bros., of Frankfort, Kan., won first in the car loads under three years. These were S. M. S. stock, bred right next to the ground and well fleshed. Second to C. V. Hull, Platte City, Mo., on a load of older steers possessing more scale, but a trifle less finish and quality.

The car load of feeding cattle went to the Thomson, Bohart Ranch, on a load of white faces sired by bulls from the ranch of Governor Sparks, of Reno, Nevada.

David Rankin, the noted steer feeder and corn grower, of Tarkio, Mo., made the awards on the feeder car loads.

SALE OF CAR LOTS.

Mr. Gross, of St. Louis, auctioned off these cattle and incidentally sold before commencing that the show at St. Joseph was one of the best he had ever seen for the first attempt.

Drake Bros.' Herefords, seventeen in the lot, sold for \$6.35 to Swift & Co.

A load of Wertz Bros.' steers, which have the reputation of being market toppers, brought \$7.25. Their heifers were sold for \$6.30.

Thomson, Bohart Ranch got \$4.25 on a load of Hereford feeders.

Dispenser, the fat Hereford steer shown by S. L. Brock, was bid up to \$7.60, while Rare Roast brought \$10.

HORSES.

PERCHERONS.

Mr. A. C. Hood, of Westerville, Ohio, judged this breed and although the classes were small he found some very difficult decisions to make. McLaughlin Bros. made the largest showing, among which was Faison, a winner at the French Government Show, but unplaced in the aged stallions here. Competition in this class was strong and it was a long while before the judge was satisfied with his decision. Lamplon, owned by Louis F. Swift, the pride of St. Joseph horsemen, met defeat at the hands of Dagada, and opinion was varied in regard to this decision, as the former stallion is about correct in conformation and straight and strong in his underpinning. Those showing were McLaughlin Bros., St. Joseph, Mo. (10 head); Louis F. Swift, Chicago (1 head); Schwalen & Son, Clarksdale, Mo. (2 head); Finch Bros., Joliet, Ill. (1 head); J. F. Rolifson, Maryville, Mo. (1 head).

AWARDS.

Aged Stallion—First, McLaughlin Bros., on Dagada 41293; second, Swift, on Lamplon 40309.

Three-Year-Old Stallion—First, McLaughlin Bros., on Negrillon 4137; second, McLaughlin Bros., on Brutus 41233.

Two-Year-Old Stallion—First, McLaughlin Bros., on Clochtran 41301; second, McLaughlin Bros., on Van Dyck; third, Rolifson, on Phoenix.

Champion Stallion Any Age—Dagada. The Percheron Registry Special added \$100 to this prize.

BELGIANS.

A. B. McLaren, of Chicago, made the Belgian awards and placed much stress on quality and action. But three classes were brought out for adjudication and in the aged stallion group there was considerable rivalry between a massive roan finally placed second and a horse of less size and compactness, but combining quality, scale and action very harmoniously.

AWARDS.

Aged Stallion—First, Finch Bros., Joliet, Ill., on Franceour; second, McLaughlin Bros., Kansas City, Mo., on Pierre de Baron 2214; third, Finch Bros., on Pequavine.

Three-Year-Old Stallion—First, Finch Bros., on Fraseur.

ENGLISH SHIRES.

Finch Bros., of Verona, Ill., were the only exhibitors, and Barnfield All Fours, the champion at Minnesota this year, was unable to show, allowing the championship to go to Stuntney Bounder. Mr. A. B. McLaren, of Chicago, Ill., placed the awards.

CLYDESDALES.

But one stallion, Baronmeter, owned by McLaughlin Bros., was entered, and given the two prizes offered in this breed. He is a horse of wonderful quality.

MULES AND JACKS.

Only a few of these were shown. However, they were all good specimens and classes should have been better patronized in one of the greatest mule raising states of the union. S. B. Utz, of St. Joseph, made the awards, which were as follows:

Best Mule Any Age—First, Frank Sweet, St. Joseph; second, Peter Podvant, St. Joseph.

Best Pair Mules Any Age—First, Frank Sweet; second, Peter Podvant.

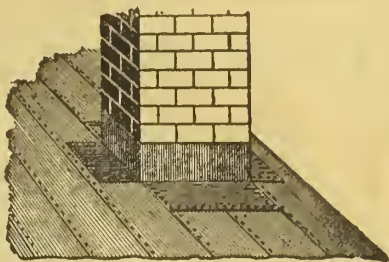

Best Jack Any Age—First, Donovan & Swift, Chicago, on Geo. Waller; second, Yates Bros., Agency, Mo., on Dewey.

SWINE.

The exhibit of swine was limited in respect to numbers, but for quality it equaled the highest expectations. It was hinted before the show was opened that there might be danger of loss from faulty sanitation. However, those who inspected the quarters could not ask for a better situation or a safer guarantee against such a contingency. The best breeders have patronized the show with their best stock, which points to better things for the future. The three-judge system was in force. The judges were J. J. Ferguson, Chicago; W. E. Spicer, Bushnell, Ill.; and L. H. Roberts, Paton, Iowa. Judging passed off nicely and classes were generally interesting. Three head of Hampshires were shown by G. S. Lawson, Ravenwood, Mo., and eighteen head of Berkshires by Etzler & Moses, of Decatur, Ind. These were good

VALUABLE HINTS ABOUT ROOFING.

In applying Ruberoid Roofing around chimneys, as shown in illustration, cut a

FLASHING RUBEROID ROOFING AROUND CHIMNEY

strip of ROOFING about twelve to fourteen inches wide. Straight-slit this strip about half-way up at the point where it goes around the corner of the chimney. Coat thoroughly with RUBERINE the underside of the strip and, pressing closely into the angle, bend it around the chimney.

Work the ROOFING closely into the angles formed by the walls or chimneys. Cement carefully here so that water "backing" up, as on flat roofs, cannot work in behind.

The pliability of Ruberoid especially adapts it for all work where bending or folding is necessary. Stiff roofings crack when bent, and create leaks.

Ruberine Cement, nails and tin caps

are furnished free with every roll of Ruberoid Roofing.

Do not worry about your roof catching fire if it is covered with Ruberoid Roofing. Sparks or burning brands will not ignite it.

Remember that there are roofings made to look like Ruberoid and claimed to be

the same as Ruberoid. Do not accept any roofing that is not put up in rolls bearing a black-and-white label exactly like that shown in cut. As a further safeguard, we stamp our registered trade mark "RUBEROID" on the underside of every sheet, every four feet. We are the sole manufacturers of Ruberoid Roofing, and it can only be obtained from our authorized agents. Write and we will tell you who is our nearest agent to you. There is only one Ruberoid. Contains no tar or paper. Will outlast metal or shingles. Easily applied.

The first Ruberoid Roofs laid, fifteen years ago, are still giving satisfactory service. It costs no more than a poor roofing. Needs no paint when applying.

Send for samples and Booklet "L," also for a copy of our pamphlet: "VALUABLE HINTS TO THE ROOFER."

RUBEROID

REGISTERED U. S. PATENT OFFICE.

Cincinnati Offices, Union Trust Bldg.

representatives of the breed. The total number shown of all breeds was 140.

DUROC JERSEYS.

Two score of the popular red hogs made up the showing of this breed and were very representative of the refined type of long, smooth-sided, fat back now being sought by the best breeders. Most of the firsts were carried away easily by J. E. Mendenhall, of Fairbury, Neb., while C. A. Wright was a close rival in some of the classes.

AWARDS.

Boar Twelve Months and Under Eighteen—First, Mendenhall, on Butter Orion 48579; second, Wright, on Blue Valley King.

Boar Six Months and Under Twelve—First, Mendenhall, on Leander; second, Wright.

Boar Under Six Months—First, Mendenhall; second, Wright.

Sow Two Years Old—First, Wright, on Little Beth 61032.

Sow Over Twelve Months and Under Eighteen—First, Mendenhall, on Blue Valley Queen; second, Mendenhall, on Carroll Lady; third, R. W. Murphy, on Ohio Lady.

Sow Six Months and Under Twelve—First, Mendenhall, on Marti Lady; second, Murphy; third, Mendenhall, on Lolita.

Sow Under Six Months—First, Wright; second, Murphy; third, Mendenhall, on Inter Lassie.

Champion Boar One Year or Over—Blue Valley King.

Champion Boar Under One Year—Leander.

Champion Sow One Year or Over—Little Beth.

Champion Sow Under One Year—Lodi Marti.

Four Animals Get of Sire—First, Mendenhall, on get of Belle's Chief; second, Wright, on get of Challenger.

Four Animals Produce of Sow—First, Mendenhall, on Miss Crimson; second, Wright, on Cerle.

POLAND CHINAS.

Dawson, Bros., of Endicott, Neb., had the largest exhibit in this breed and on account of the excellent type and uniformity of this herd their winnings were consistent, taking first in nearly every class. This herd included Hunch 82237, the 1,000-pound boar that attracted so much attention at this year's Nebraska fair. Many firsts at that fair were secured by this herd. They were closely seconded by Gates & Hunt, of Ravenwood, Mo., with eighteen very useful head. The sequel of the awards are presented in the championship prizes, which are as follows:

AWARDS.

Grand Champion Boar Any Age—Dawson Bros., on Grand Look.

Grand Champion Sow Any Age—Dawson Bros., on Wansee.

Four Animals Get of One Sire—First, Dawson Bros.; second, Gates & Hunt.

Four Animals Produce of Sow—Gates & Hunt.

Boar and Three Sows Over One Year—First, Dawson Bros.; second, Gates & Hunt.

Boar and Three Sows Under One Year—First, Dawson Bros.; second, Gates & Hunt.

Boar and Three Sows Under One Year—First, S. D. Frost; second, Hall; third, L. L. Frost.

Boar and Three Sows Any Age—First, Hall; second, S. D. Frost; third, L. L. Frost.

FAIR NOTES.

Chandler Bros., of Kellerton, Iowa, made the only sheep exhibit with eleven head of their Shropshires. Their great show ram attracted considerable attention.

C. E. Clarke cleared nearly \$800 in prize money with his two herds, Short-horns and Galloways. No stinting prize money was shown anywhere by the management and aside from the regular premiums there was about \$1,000 offered by commission firms and packers, while the French Coach Horse Registry Association put up prizes amounting to over half that sum.

The new railroad rate law is working much mischief by compelling exhibitors to pay special rates on chests and other paraphernalia needed to accompany them. It would seem as if the spirit rather than the letter of the law could well be substituted in this case.

A commendable part of the stock display was the grand parade of winners at the close of the contest. The great tent arena was crowded with the best stock in the country.

The posters for the show had for the central figure, the picture of Lamplon, the pride of St. Joseph horsemen. Five photographs were taken to secure his correct conformation, after which a painting was secured for \$150. From this the original cut was made in colors for \$480.

Make Your Own Stock And Poultry Foods

AT ONE CENT A POUND.

A Subject of Interest to All Feeders.

EXPERIMENT Station Bulletins are unanimous in their claims, based on many careful tests, that a good tonic or Stock Food is both profitable and positively necessary to the feeders of today, but the great objection is "they cost too much." "Should be bought for about one-half of the usual price." Farmer's Bulletin 73 and 144, Dept. Agt., Washington, D. C., show how Stock Foods are usually made, using about 90 per cent cheap "filler." You have a good "filler" of your own. We give you here a formula proven and guaranteed as The Best Stock Food Ever Known.

Formula:

50 lbs. Common Bran, Chop or Meal.
5 lbs. Common Salt. Mix and add a
50 cent package of Arabian Stock Food Tablets. Costs you only 50 cents for 50 lbs.

Arabian Stock Food Tablets are made from the seeds of wild flowers—the most reliable remedies known to medical science—reduced to extract form for economy. Send 50c to The He-Saw Chemical Co., 835 Schofield Bldg., Cleveland, O., for Trial Order (sent prepaid and guaranteed) including a Co-operative Advertising Certificate good for a free order and other premiums in return for recommending the Tablets, if you like them.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

EYE DISEASES OF CATTLE.

I have four head of cattle, three yearlings and one two-year-old, that have sore eyes. Some of the neighbors call it pink eye. Is there any such disease and if so, what is the treatment?

So-called "pink-eye"—properly termed "contagious ophthalmia"—presents the following effects:

Symptoms.—Adult, young cattle and calves first show swelling of the eyelids accompanied by weeping. Redness of membranes of eyelids and "haw" becomes apparent, creamy discharge follows and in three or four days a clouded spot shows in center of eye and gradually spreads until "sight" of eye becomes milk-colored. Changing from milk-color to pearl tint eye may become yellow, bulge, show blood-shot streaks, form an abscess and burst, leaving a ragged ulcer, or commence to clear up and finally recover. Slight ulcers may heal by granulation, but extensive ruptures and ulcers often lead to loss of sight. Fever and some loss of appetite is present, especially in young cattle, for a week or more from time of first attack and dairy cows may shrink in milk production.

Treatment.—The disease being "catch-

Lump Jaw

The first remedy to cure Lump Jaw was

Fleming's Lump Jaw Cure

and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in

Zenoleum, The Agricultural College Preventive For Hog Cholera

Kills Hog Lice

FROM the great hog raising state of Iowa, where they have made a special study of the plague, comes this unequivocal testimony:

Iowa Agricultural College

"We had an outbreak of hog cholera but we stopped it. We attribute our success in no small way to the use of Zenoleum."

W. J. Kennedy, Prof. of Animal Husbandry.

Are You Taking Chances?

Why should you? If the cholera attacks your herd you may lose them all. Forty-three of the Agricultural Colleges, whose business it is to find out the best methods of dealing with this plague, are now using and recommending Zenoleum. Is it not just common sense for you to follow their advice?

Write Today for Piggie's Troubles.

This is our 64-page free book which shows you why Zenoleum is used by the Agricultural Colleges, why it renders hogs immune to cholera, why it checks the disease when it has once taken hold, why leading hog raisers and feeders everywhere as well as the Agricultural Colleges are using it.

Almost Every Druggist Sells Zenoleum.

One Gallon Zenoleum, sent prepaid, \$1.50.

Five gallons, prepaid, \$6.25

Don't take a cheap substitute. Zenoleum goes so far and does so much for your animals' health that there is no excuse for taking anything but the standard, genuine preventive, Zenoleum.

ZENNER DISINFECTANT CO., 31 Lafayette Avenue, Detroit, Michigan.

LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I classify, and prove that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

Mica Axle Grease

Makes the Load Lighter

An ounce of grease is sometimes the ONLY difference between profit and loss on a day's teaming. YOU KNOW you can't afford a dry axle--do you know as well that Mica Axle Grease is the only lubricant you can afford? Mica Axle Grease is the most economical lubricant, because it ALONE possesses high lubricating property, great adhesive power, and long-wearing quality. Hence, the longest profitable use of your outfit is to be had ONLY when the lubricant is Mica Axle Grease.

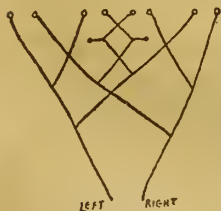

Mica Axle Grease contains powdered mica. This forms a smooth hard surface on the axle, and reduces friction, while a specially prepared mineral grease forms an effective cushioning body between axle and box. Mica Axle Grease wears best and longest--one greasing does for a week's teaming. Mica Axle Grease saves horse power--consequently saves feed. Mica Axle Grease is the BEST LUBRICANT IN THE WORLD--use it and draw a double load. If your dealer does not keep Mica Axle Grease we will tell you one who does.

STANDARD OIL COMPANY

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

Mr. Hugh Minnich, of Wisconsin, sends the Breeders' Gazette the following device for arranging the lines for four horses abreast. He writes: "I have read with interest the articles about driving four horses abreast that have been in recent issues of your journal. I have tried all the different ways mentioned and find that some work all right when going straight ahead with old steady horses. The trouble comes in turning around, or when you have one or more fast horses you wish to hold back. I have a way which is satisfactory with all horses and in all places. Hitch each team as ordinarily. Put a spreader strap with a snap on it on the outside of each inside horse. Run their outside lines through the rings in the spreader straps, then snap the spreader straps in the opposite hame rings. This allows horses more freedom in turning around than when tied together, and are always under the control of the driver. Have the harness maker make two lines three feet long with buckles on each end. Buckle these to the inside horse's lines instead of the long team lines. Cross them and buckle to the outside long lines. This sounds rather complicated, but is very simple, as I have used it exclusively in driving four horses abreast, three of which were green colts, though of the more gentle breeds, being purely bred Percherons and French Draft. To make it more clear, I send you a drawing of how the lines are arranged."

Several devices have been invented for bringing the mail from the farmer's gate to the house, but a Virginia correspondent in the Rural New Yorker seems to have carried off the plum thus far. As shown in Fig. 1 he has attached the rear

wheel, sprocket and frame to a post. The tire has been removed from the wheel so that the felly or rim carries the No. 9

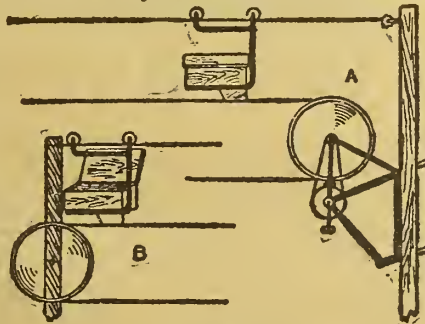

Fig. 1.

galvanized belt wire to the other wheel at the gate. Above the belt wire is heavy No. 9 wire that supports the mail box. It will be readily seen that the use of the bicycle wheel and sprocket is useful since considerable speed may be given to the mail box with comparatively little effort. A. A. S. reports that this device carries his mail from the gate some 250

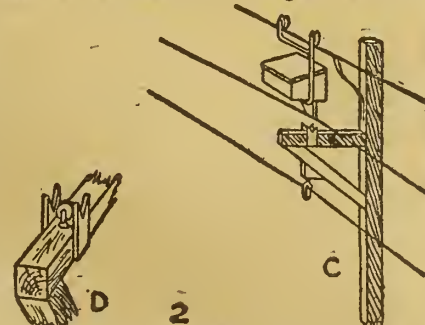

Fig. 2. Details of Mail Box on Wire.

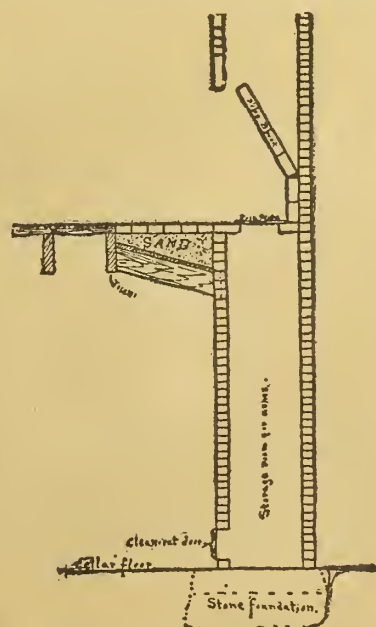

yards distance from the house. Owing to the distance intermediate posts are placed at every 50 or 60 yards. One of these is illustrated in Fig. 2 and shows how the support is given to both trolley and belt wire. The inventor states that he did all of the work himself, and necessary material did not cost more than \$5.00.

Frequent inquiry about the construction of a fireplace, which is again coming into style, calls out the following from the Rural New Yorker, by J. M. Drew,

of Minnesota: "The lower cut, a section of chimney and fireplace, shows how the fire brick should be set to make a narrow throat toward the front of the fireplace. This throat or opening should extend across the entire width of the fireplace, from side to side, but should be not more than two or three inches wide. This has the effect of making a strong draft at the front and will not allow any smoke to get past it. If the whole size of the flue is left open, some of the smoke is almost sure to roll out, as the flue gets enough draft without making a very strong pull at any one place. Narrowing the opening into a flue has the same effect as using a nozzle on a hose; it gives more force where it is

wanted. In a flue a certain amount of air is continually rising; by narrowing the opening a strong draft is caused through the opening. This sketch also shows the way the sand box is supported under

ported by pieces of two-by-six spiked to a joist and let into the chimney. The hollow foundation of chimney is used as a storage place for ashes. This is a great convenience, as the fireplace may be cleaned in a moment by moving the iron plate and sweeping the ashes into the hole. The clean-out door at the bottom is large enough so that a common shovel is used to get the ashes out. A fireplace should have a flue in the chimney separate from that used for furnace or stoves. An inside chimney, that is, one built in the middle of the house, always has a better draft than one built into the outside wall, as it is kept warmer. An outside chimney often does not draw well when fire is first started, but does better after it becomes warm. The first cut shows how the fireplace looks from the front. The inside is lined with fire brick set in fire clay mortar. The other brick work is of gray pressed brick. The arch is almost straight and rests upon two pieces of channel iron which are let into the wall on each side."

Belgians at Iowa State Fair.

Our attention has been called to the fact that in our report of the Iowa State Fair some injustice was done this notable draft breed of horses. Our representative considered the Belgians on the whole a little rough and expressed himself as believing that some of them were unsound. He did not take into consideration the fact that nearly all the Belgians at the Iowa State Fair were newly imported. Some of them, it seems, came directly from the sea-coast to Des Moines. They were therefore gaunted up, somewhat chafed and in a few instances bruised. A representative of this paper has since looked over these same horses and pronounces them as smooth a lot as have been brought out in recent years.

Farmers are now talking more about alfalfa than in years past. The belt in which this valuable grass can be grown is widening annually and more farmers are becoming converts yearly. The value in this crop can only be known by those who have been successful in its production.

The Iowa gate - FOR THE FARM -

A small child
can open or close it

IOWA gates are more than a convenience if women or children ever use them for being so simple they are very light and can easily be swung either way.

The Rolled Steel Tubing Frame makes them strong; not gas pipe or common steel but an extra hard steel tubing that will not bend out of shape.

The IOWA gate is made to last—no castings to break—no wearing parts—even the wires have galvanized stretchers to tighten them. Will raise over the snow in winter—will not blow down, burn or rot out.

Made any length and any kind of wire. Cheaper Than Wood. So write today for our low prices.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

ASTHMA CURED

SCHIFFMANN'S ASTHMA CURE
Instantly relieves the most violent attack and insures comfortable sleep. NO WAITING FOR RESULTS. Being used by inhalation, its action is immediate, direct and certain, and a cure is the result in all curable cases. A single trial convinces the most skeptical. Price, 50c, and \$1.00 of any druggist, or by mail. Samples Free for stamp.
DR. R. SCHIFFMANN, St. Paul, Minn.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

Albumen For Poultry.

To the Editor of The Homestead:

People who have trouble with their hens not laying in winter should feed them albumen. Albumen is an organic substance found in the composition of the bodies of all animals. It is more or less fluid in its natural condition, and is coagulated or hardened by the action of heat, alcohol, mineral acids and metallic salts. It is most familiar to us in the white of eggs, which is nearly pure albumen. It is also found in the blood of man, and all other animals, in the chyle and lymph, and in various other fluids of the animal body.

At some of the great packing houses which slaughter hundreds and thousands of cattle, sheep and hogs each day, large manufactories are established for working up those parts of the animal not marketable as food. The hoofs, horns, etc., are all used for various purposes. Pepsin and other substances used in medicine are made from the stomach, pancreas, etc., and what is left is turned into fertilizer. The blood is either dried as a whole, or the albumen is taken out and prepared in a dry state. It constitutes something over half of the solid portion of the blood. We are told that it is difficult to remove the red coloring matter entirely, so the prepared albumen still retains that color and hence is sometimes called "red albumen."

Otherwise it is called blood albumen. The genuine article resembles onion seeds. I have seen a red powder called "red albumen" which I think was a fraud. The directions for feeding, according to my method are as follows:

Take one pound of albumen and one pound of finely ground black pepper, mix and keep in a closed receptacle in a thoroughly dry place. Every morning for every twelve hens take one pint of wheat bran and one pint of corn meal well mixed; add to this two teaspoonfuls of the mixed albumen and pepper, then add enough hot water to dampen the food without making it sticky. Mix thoroughly with the hand and feed hot. Of course the fowls should have gravel or oyster shells, green bone, scraps of meat and green food, such as cabbage leaves, etc., and plenty of fresh water. For scours in calves we found albumen the best remedy we have ever tried giving one tablespoonful in their milk every evening. Two or three evenings have usually proven to be all that was necessary, but remember first to dissolve the albumen in a cupful of hot water, before putting it in the milk.

Dannebrog, Neb. A. F. Sorensen.

Runner Ducks.

My flock of fifteen Indian Runner ducks averaged 120 eggs last year, beginning to lay in February and laying through September, says Mr. M. G. Feint, of Cortland county, N. Y. They had no especial care or attention, having generally one feed a day when the weather was warm enough to get on their runs.

The average was greatly lowered by the presence of two ducks that were hatched in October, 1905, and never got to be of good size. They did not begin to lay until May. I could tell their eggs by the size and did not allow any of them to be used for hatching.

I am still as sure as ever that they are the most profitable birds for the farmer to keep, and only regret that it is not convenient on account of the range to keep hundreds of them. They are so cheaply fed, while producing such a number of eggs that may be sold at fancy prices. I know of two flocks of early spring hatch that laid all the fall, their eggs being shipped to New York for five cents more per dozen than fancy hens' sold for.

My flock averaged about \$6 each, the eggs nearly all being sold for hatching, except what we used in the family. This does not include any of the young ducks and independent and the eggs are very large and of the finest quality.

Use for Fowls in the Philippines.

Rex Flintkote ROOFING

"Making Poultry Pay"

is the title of a valuable illustrated book, written by P. H. Jacobs, Editor of the "Poultry Keeper." It tells how to care for all kinds of poultry, how to get the best results in chicks, eggs and market fowls. It tells how to prevent and cure poultry ailments, and how to properly house and yard poultry to keep them in prime condition. It also shows the peculiar adaptability of Rex Flintkote Roofing for roofs and sides of poultry houses, and gives photographs of many successful poultry houses where it is used.

This book will be mailed to any address upon receipt of 4c. in stamps simply to pay postage and packing. Rex Flintkote Roofing is long-wearing, water-proof, fire-resisting and a non-conductor of heat and cold. It can be laid by an ordinary farm hand.

Send for Free Samples

If your dealer hasn't the real Rex Flintkote with the "Look for the Boy" trade mark on the roll, stop, sit down and write to us for the name of a dealer who has. We will send you also samples to test, and a complete booklet on roofing. Everything to lay comes in the roll. We make a special red paint for Rex Flintkote if you prefer a red roof.

Chicago Office: 222 E Lake Street

WE WANT NAMES.

WE want YOU to send us the names and addresses of from ten to twenty-five farmers living in the United States, having a few head of stock (cows, horses, pigs). You can send us the names from any number of different post-offices. If you will send us these names we will send you TWO BEAUTIFUL COLORED PICTURES FREE. These pictures are reproductions of the most celebrated paintings in the world, and they are of high quality, and we know that you will be pleased and delighted with them; no pictures will be given for a list of less than ten farmers. We want to send a sample copy of the RURAL HOME to a lot of farmers who are not now taking our paper, and for that reason we want these names. Send us immediately a list of at least ten farmers and we will send you, postpaid, ABSOLUTELY FREE, TWO REPRODUCTIONS OF THE WORLD'S FAMOUS PICTURES, in beautiful colors, size 15x20 inches. Address THE RURAL HOME, 22 North William St., New York, N. Y.

THE ONLY HOG AND SHEEP WATERER.

SIMPLE, DURABLE AND RELIABLE.

THE ONLY has every good feature of other waterers and none of their faults. Besides it is guaranteed to run in weather 4 degrees below zero. Send 10 cents for the inventor's experience in hog raising, contained in the little booklet "How I Raise 1,000 Hogs a Year" by a man who does it. Write for prices today.

Have You Had Your Copy? Only a Few Left You can have one FREE

A Book of 146 Pages, full of money-making ideas for farmers

At a cost of thousands of dollars and with the aid of the most noted experts, we have had compiled, especially for us, this unique, compact, vital Farmer's Encyclopedia. We are now giving it away Free while the small supply lasts. And remember that this book is not merely a vest pocket guide—it is not an advertising book, but a complete boiled-down farm Britannica, consisting of 146 pages, 7 x 4½ inches, bound in cloth. If sold at retail it would cost you \$1.00. It deals not merely with one department of farming, but with all departments. It tells about the selection of all sorts of seeds, grain and grasses; just how to plant them, how to cultivate them, how to harvest them. It tells how to breed and raise all kinds of live stock and poultry; how to run the dairy; how to keep and manage bees—besides many miscellaneous topics, tables, veterinary suggestions, etc. In fact, it is packed from cover to cover with just the hints you most need to make more dollars out of your farm. And all this information is **absolutely reliable, practical and up-to-date.** Below is a mere suggestion of the contents and a few unsolicited words of praise.

THINGS YOU OUGHT TO KNOW

PART 1—Field, Crops and Grasses.

This part covers 41 different crops. CORN is discussed at length and edited by Prof. P. G. Holden, Iowa State College and Experiment Station. The WHEAT section is edited by C. P. Bull, Asst. Agriculturist, Minnesota Experiment Station.

COTTON by Prof. R. L. Bennett, Cotton Expert, Texas Experiment Station.

PART 2—Garden Crops.

Covering 44 different subjects, compiled from the most reliable sources.

PART 3—Live Stock and Dairying.

Covering 6 kinds of live stock. HOGS are discussed at length and edited by A. J. Lovejoy, Roscoe, Ill.

SHEEP by Jos. E. Wing, author of the "Winter Lamb" and "Sheep Farming in America."

PART 4—Poultry and Bees.

Covering 5 kinds of Poultry by Miller Pulvis, Peotone, Ill. Bee-keeping by Holverson Bros., Durand, Ill.

PART 5—Miscellaneous.

Gives valuable tables, information regarding insects, veterinary suggestions, data regarding breeding, etc.

WHAT IS SAID ABOUT IT

"Your little book, 'Farmer's Encyclopedia,' is simply a jewel and I want my neighbor home-steader in North Dakota to have one to study during the long winter evenings. I enclose 10c in silver for the same (it is worth ten times that for the article on corn breeding). Will you kindly forward one to Ole R. Knudson, Oberon, N. D." HENLEY FALLS, MINN. W. M. BECK.

"Your Farmer's Encyclopedia and catalog at hand. The Encyclopedia is just the nicest book I ever saw. It is lots better than I expected." GALLIAPOLIS, O. H. W. KLINKER.

"Just in receipt of the Farmer's Encyclopedia, which I appreciate very highly. Something every farmer ought to have and study carefully as I regard the information as the best and most practical." MITCHELL, NEB. J. L. SHORE.

"Your Farmer's Encyclopedia boils down, in plain terms, information about crops and stock which every farmer desires to know. I expect to find it a very handy book of reference." EDWIN C. POWELL, Editor Farm & Home. SPRINGFIELD, MASS.

ISN'T THAT WORTH MERELY ASKING FOR?

You couldn't gain in lifetime's practical experience and research one-tenth of the information this book contains. Because it is the result of so many expert minds, condensed, simplified and ready for your immediate use. And all this costs you **practically nothing.** Simply tell us what implements you will need the coming season, and give us the name and address of your dealer, enclose 10c in stamps for postage and packing, and the book will be sent you Free. You must act promptly. Our limited supply of books will not last long. Write today. Address,

J. I. CASE PLOW WORKS,

Department K22,

RACINE, WISCONSIN

The Week in Kansas.

To the Editor of The Homestead:

Nothing has happened to mar the "dull sameness" of the weather since our last report. There has been no rain, but a little wind, and just cool weather enough to make a person feel like work. Last evening it was real cool, and today the daily told of a probability of frost in Nebraska this evening. There is no danger of it here. It is not as cool this evening as it was last.

The work of this week has been a continuation of the work of last. Wheat drills are still on the move, and their work will not be entirely done this month. This lack of help is putting many of the best farmers further behind each day. The help problem is a greater one than any political question.

The time for harvesting the crop of winter apples is here. There is a great crop to be harvested, so great, in these parts at last, that there is almost no sale for them. A neighbor took several barrels of fine Jonathan apples to market, and the average he got for the load amounted to four cents a bushel. There have been hundreds of thousands of bushels of apples rotted under the trees from central Kansas to the eastern line this summer and fall. It seems a shame to think that all this fruit should rot, when there are people not so far distant that have to pay \$1 a bushel for all the apples they use.

The earlier sown wheat and grass is coming up in fine shape. On this farm, both wheat and grass is making the fields put on a tinge of green. Very little wheat is being marketed now. Several farmers have all of this year's crop stored up, and say they will not sell for less than seventy cents a bushel. Some have begun feeding it to hogs. One neighbor says none will go out of his yard for fifty-five to fifty-eight cents a bushel, when he has hogs on the place. He feeds it soaked, but aims to grind it as soon as the farm work will allow time for doing the grinding.

The feeding season will soon be here. Its coming has already been marked by several sales of cattle. Three or four bunches of from forty to eighty head have been disposed of by public sale within driving distance of here, within the past week, with bills of future dates still tacked to the telephone poles along the road. It seems that those who did not "quit" cattle a year and

two years ago are doing it now. Soon there will be no large bunches of breeding stock left. When the cows and heifers go, the time will not be far distant until cattle will be scarcer than now.

Henry Hatch,

Coffey Co., Kan., Sept. 27th, 1906.

Collecting Agricultural Data.

The farm crops section of the experiment station of the Iowa State College is making an investigation of the methods of farm practices with the object in view of outlining the practical systems of farm management which are found in this state. One of the problems in which we are especially inter-

ested is that of high-crop yields, also highly-profitable feeding experiments. It is believed that by studying the practices of the best farmers it will be possible to obtain some material which we can present to the farmers of this state that will lead to improved methods and raise our standard of farm practices.

Accordingly, we would like very much to hear from any who have been unusually successful with crops or live stock in this or preceding years. In making a report of the crops, state value of land per acre, number of acres in each crop, character of the soil, previous crops grown, methods of tillage, cost of production as near as possible, and net profit per acre. In making a

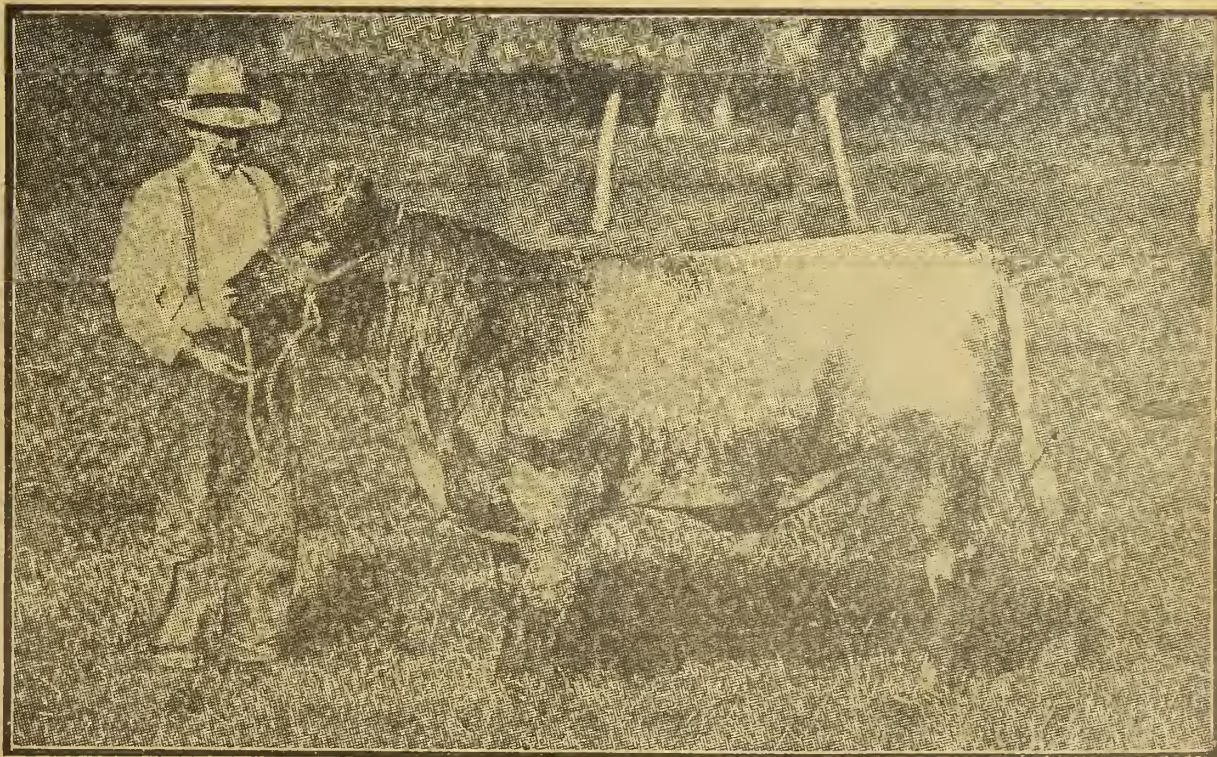

report of feeding experience, state quality and cost of stock handled, methods of feeding, cost of gains and net profit. Kindly reply at your earliest convenience.

M. L. Bowman.

Experiment Station, Ames, Iowa.

HOMESEEKERS EXCURSIONS.

Buy Roofing Direct from the Mills

Better Barn Roofing

There is no building around your premises that requires a better roofing than your barn. On the quality of its roof depends the protection of your stock, grain, feed, machinery, etc., which is of vital interest to you. One leak during a heavy rain is liable to cause more damage than a new roof of BEACON-ITE would cost.

When you put a new roofing on your barn, why not use a material that will not leak? BEACON-ITE LONG LIFE ROOFING is made of materials that make it absolutely water-tight. Isn't this the kind of roofing you want for all of your buildings, one that you will not have to patch after every rain?

About the cost, BEACON-ITE is the only roofing you can buy direct from the mills; thereby saving the dealers' profit. We pay all the freight charges.

Write to-day for FREE samples of this water-proof roofing and our wholesale prices. Then judge for yourself.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

On a Loess Farm in Missouri.

To the Editor of The Homestead:

When I bought the large farm with a large mortgage, I knew little of its soil or capabilities. I knew this much—that there were several kinds of soil in that county and that this farm lay in a streak that produced good clover. That settled the question with me, as I had unlimited faith in any soil that grew luxuriant clover and on my visits to this farm I had seen great vigorous stools of clover growing on the sides and in the bottoms of washes. The soil was not very prepossessing. It looked like common red clay—exactly like some soils that I knew were unproductive. Afterwards I discovered that it was what is called loess formation, underlain by limestone, and was already beginning to be recognized by some of the advanced horticulturists of the state as of a very superior quality not only for fruit, but for almost every variety of cereal and grass.

For years the farm I purchased had been in the hands of renters. They paid rent in produce, giving a third, and it amounted to but little more than enough to pay the taxes. The fences were rotting down and the rows overgrown with briars and vines. Stock of all kinds were breaking in and helping themselves to what they could find, which I am bound to say, was not much. The renters were shiftless and impecunious. They expected little from the soil, did little, and got little.

At that time my farming was largely theoretical as regards practice, but it was theory that was much better than blank ignorance. My theory for this land was deep plowing. From what I could learn it had never been stirred deeper than six inches and a good deal oftener three or four. This farm was well known in the country and neighboring town. It was settled early in the last century by one of the first pioneers from the south, and had been part of a large estate worked by slave labor. Once it had been covered by giant poplars, always indicative here of a fertile soil. Several of them, worthless through being hollow or growing in inaccessible places, were still standing, and a number of immense stumps still defied the plow. The old log barn, badly dilapidated, still preserved sound its splendid logs forty feet long.

I found that everyone who knew the farm was of the opinion that it was worn out and worthless. For years the crops had made only a bare living for the renters. Ten bushels of wheat to the acre were accounted an excellent crop, but oftener it was only six or seven.

My own case would have been considered desperate by many. I had gone in debt for a large farm and had not reserved enough working capital; and there is nothing more crippling, as I afterwards found, than insufficient capital. Among my assets was an old Oliver sulky plow that had been little used. I determined to use it in breaking my wheat ground and to plow deeper than I guessed had ever been plowed before. Selecting one of the old fields, we put three good horses to the sulky and provided it with a sharp coulter. While my man plowed, I carried the mattock and grubbed the sprouts so much deeper than they were used to that it must have astonished them. Occasionally the brush-scythe would be needed for a patch of briars. I was pleased with the appearance of the soil. Parts of the field, especially the north hillsides, which were invariably the most fertile, had a top stratum of dark brown loam that seemed to show the presence of humus.

The sulky did good work. We set it to run about eight inches deep and it turned a smooth, clean furrow. Everything was buried good and deep, but the soil brought up looked red and poor. I was convinced it had never seen day light before. Across the road from my farm were the farms of several prosperous Germans. Their land was in a high state of cultivation and produced regularly large crops. Their yield of wheat was very seldom less than twenty bushels per acre. These men shook their heads when they saw my deep plowing and the red subsoil. One of them argued with me that I was ruining any chance I might have had to produce a good

YOU WANT THIS FREE BOOK

Here is a book—yours for the asking—which should be in the hands of every progressive farmer in America. From cover to cover it is brim-full of facts of vital importance to you. It comes from the greatest independent telephone house in the world—the house that has been most instrumental in bringing the blessings of the telephone to hundreds of thousands of farm houses all over the land. It shows you how simple and easy and inexpensive it is to own a

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the day—a convenience and comfort you shouldn't even try to do without, and a protection against sickness, robbery, danger and fire that pays back its trifling cost over and over and over again. You owe it to your business and your family to get this book at once and read every line in it. Your letters will get personal attention and you'll have the help of experts from this great factory in every move you make toward owning a telephone. Sit right down now and say: "Send me your 52 page booklet G12 'How the Telephone Helps the Farmer.'"

Red Tag Trees

When You Plant Trees Plant the Best

For over fifty years we have grown and sold the best and sturdiest nursery stock that good soil can produce. We now have the largest business of its kind in the United States. To protect our name and reputation and as a guarantee of high quality, all

Phoenix Nursery Stock

is labeled with the Red Tag, with lettering as shown in the illustration. Look for this tag on every Phoenix tree, it is your protection and our guarantee. Order your stock for Spring planting from the oldest and largest growers in the country. We have a great variety of fruit trees, ornamental trees, evergreens, shrubs, plants and novelties. Write for free catalogue. It tells why Phoenix Nursery Stock is best. Fifty years' experience insures careful packing and safe delivery. Phoenix Stock is exactly as represented and flourishes everywhere. Write to-day.

PHOENIX NURSERY CO., 200 Park St., Bloomington, Ill.

crop. But I was not daunted. I had all the self-confidence of inexperience guided by theory and their advice did not shake me in the least. We plowed, harrowed, compacted the soil well and sowed good clean seed. The wheat came up well, grew off vigorously, and in May was attracting attention from all the passing farmers by its promise. Best looking wheat, they would tell me, that had been seen on the old farm for many years. At thrashing time they opened their eyes still wider. The field—thirty acres—averaged twenty-three bushels to the acre. Theory for once was vindicated. Cape Girardeau, Mo. L. R. Johnson.

THE NECESSITY FOR GOOD TOOLS.

The old, battered hammer or hatchet—the discarded saw or chisel, are silent witnesses of the necessity of buying good tools for the home. A good job cannot be done without good tools, and nearly every day something turns up about the house that could be improved or repaired if the proper tools were at hand.

The Keen Kutter Tool Cabinets are designed for the convenience of the home. The assortments of tools were carefully thought out by men who know tools and their requirements.

Every tool has a place of its own in the cabinet, so it will not be damaged by contact with others. Every tool belongs to the famous Keen Kutter brand, which means they are the best you could buy.

Keen Kutter Tool Cabinets are made in various sizes, costing from \$7.50 to \$100.00, according to the assortment of tools.

All Keen Kutter Cabinets are complete in every detail within the limits of the requirements for which they were designed. All contain in various numbers and varieties, Saws, Braces, Bits, Chisels, Gimlets, Awls, Planes, Hammers, Hatchets, Files, Pliers, Screwdrivers, Wrenches, Nail-sets, Reamers, Rules, Squares, and everything that is needed.

Nothing is forgotten—you don't have

STARK TREES ARE FAMOUS wherever planted; are planted everywhere trees are grown. Free Catalog of superb fruits—Black Ben, King David, Delicious, etc.—Stark Bros., Louisiana, Mo.

READ THESE LETTERS WRITTEN TO ME BY MY PLEASED CUSTOMERS

WABAUNSEE, KAN., May 12, 1906.
We have just received the handsome organ with stool and book. Much pleased with it. Gives us entire satisfaction. Comes up to your claims in every particular. Wishing you continued success, I remain,
MRS. J. S. RHODEMAN.

CECIL, NO. DAK., July 17, 1906.
I got the Piano a week ago today and it is certainly a beautiful instrument. Everybody who has seen and played on it says it is the best they ever saw. I am sure there isn't another piano in this vicinity that can come up to it in any respect. I will certainly be pleased to recommend you at any time. Yours truly,
E. MCCHESNEY.

SPRING VALLEY, MINN., March 24, 1906.
Dear Sir:—The Organ reached here all right and we are satisfied. It is better than we expected for that amount of money—all who see it say the same. Yours respectfully,
MR. CHAS. NORTHWAY.

HOUSTONIA, MISSOURI.
Dear Sir:—Your Organ at hand. It is just as you recommended it and will say we are well pleased. Several friends have called to inspect it and they say they prefer it to any other Organ they have ever seen. Yours,
WM. RAYL.

SHAVER, MINNESOTA.
Dear Sir:—Everybody who has seen or tried the Organ proclaim it excellent in both tone and finish. I will recommend your Organs to everybody thinking of buying around here. Yours truly,
OSCAR T. NELSON.

BAYOU GOULA, LOUISIANA.
Dear Sir:—We have now had your Piano on trial one month. It has been tested thoroughly and considered perfect in material, tone and workmanship. We therefore will keep the instrument. Thanking you for your honest dealings with us, we remain,
Mrs. B. A. LAUDRY.

CAVOUR, SO. DAK., Aug. 26, 1906.
Mr. J. B. Thiery, Dear Sir:—We are highly pleased with the Piano ordered from you on trial. Our neighbors and friends like it very much. The finish is perfect. One of our near neighbors have a new Piano they bought here, but it is nowhere near as pretty or nicely finished as ours. We consider ours much superior and we're glad we ordered from you. **WE ALSO FIGURE WE SAVED OURSELVES \$150.00 BY DEALING WITH YOU.** Resp.,
MRS. MINETTA MEDBERRY.

GETTYSBURG, SO. DAK., June 2, 1906.
The Organ bought from you gives entire satisfaction. In richness of tone and general appearance, it far surpasses any other Organ around here. We are more than pleased.
The Misses WESTMAN.

FRAZEE, MINNESOTA.
Mr. J. B. Thiery, Dear Sir:—I thought I would write you a letter letting you know that we are well pleased with your fine Piano. It has a clear, beautiful tone, is finely polished and designed. I don't think there is another Piano in this county that we would trade for it, so you can imagine what we think of your instrument and how glad we are that we decided to order from you. Yours respectfully,
ROSE A. SCHNEIDER.

OSSEO, WISCONSIN.
Dear Sir:—The Organ we ordered from you has been received and we are all delighted with it. It goes clear ahead of any we could have purchased here at same price. HATTIE RIPHENBURG.

EDGERTON, WISCONSIN.
Dear Sir:—I am glad I didn't get my Organ from somebody else. Yours is a beauty—better than any other Organ around here at double your price. JOHN LIEBER.

I supply more homes with Pianos and Organs than any other man in the country. I ship **DIRECT TO YOU**, selling to you at factory price. You have no agents' big profits and commissions to figure in and pay for. You have no risk to run. I SHIP ON THIRTY DAYS FREE TRIAL and cheerfully ask you to ship back at my expense if for any reason whatever you are not pleased or glad you sent me your trial order. I ask no security. No deposit. No guarantee from third party. No advance money. And I guarantee to save you money and furnish you with a finer instrument than you ever before examined at the same price.

OUR HOME DEPARTMENT

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

In early days in this country the people were mostly of British extraction. They were accustomed to what is known as the Puritan Sunday. They asked nothing different, desired nothing better, than to use the day for church-going and quiet home pleasures. The incoming of foreigners introduced an entirely different element. In Spain, Sunday is the favorite day for bull fights; in Italy, after mass, the day is given up to amusements of all kinds; in France, for over a hundred years the day has been one of the widest license; even in Protestant Germany the day is not observed with the religious strictness of more northerly countries. As is natural, people coming from the continent have brought the continental Sunday. America, which used on Sunday to be like a vast-aisled cathedral, bids fair to become a great amusement park with

vaudeville, beer-hall and base-ball attachments.

Playing on Sunday means working on Sunday. Let us bear that well in mind. And that the more opportunity there is for some to use the day for pleasuring, the less there is for others to have the day for rest.

When I was quite a young girl a cultured man made a remark in my hearing which rather shocked me at the time. What he said was, "Things are not true because they are in the Bible, they are in the Bible because they are true."

The remark of this man recurred to me when I read that France had passed a Sunday observance law.

For ages Frenchmen blindly did or refrained from doing certain things because they were so bidden by the Bible. Then came a time when the authority of the book was questioned, doubted, scoffed at and rejected. The French people would not have God to reign over them. The Goddess of Reason was enthroned, and such a carnival of crime was inaugurated as the world still shudders at. France has suffered many things since then. She has been taught wisdom in a hard school. She has profited somewhat by her lessons. One thing she has learned is that certain commands of God are not arbitrary; that they are commands because of facts in human nature and society. She would not have a rest day in seven because God commanded it. She has found out for herself, like many another naughty child, that her Father was wiser than she; that His command was for her good. She has discovered that the protection of society, if not her preservation as a nation, calls for a Sunday observance law, and so there is to be a great change in the country. The law she has passed enacts that no industrial or commercial establishment of any kind, whether public or private, lay or religious, even those for education or benevolence, shall be permitted to work an employee more than six days a week. And the weekly period of rest except in certain specifically stated cases, is to be for twenty-four hours, and to occur on Sunday.

One person rarely learns from the experience of another, nations sometimes do. It is devoutly to be hoped that America will learn from France in this matter; that she will awake to the fact that encroachment upon Sunday for pleasuring leads to the gradual secularization of the day and brings about a state of affairs fraught with peril to the best interests of the nation.

AMONG OURSELVES.

Last week I announced that the discussion provoked by Aunt Ruth's protest against girls working in the fields would be continued this week, and that we should hear among others, from a middle-aged woman, sad of heart and broken in health. I have decided to give her first place upon the program. "A Missouri Mother" gives as her reason for writing that her "heart bleeds for those who cannot see any good in a wife or mother who will not work out-of-doors," but her private letter is so eloquent and so supplements the one intended for the circle that I shall give extracts from it also, the private letter last:

Dear Sisters of the Home Band: I have been a silent reader for a number of years, and as I am one of those wives who has always worked out of doors, as well as performed all of my own house work, I have had no time to write, but now I feel I must defend Aunt Ruth a little. Thirty-four years ago, in my first married years, I was stout and healthy; now at fifty-three I am sickly and too old for my years. You mothers who are teaching your daughters that they must work out to save, don't let the almighty dollar be the means of risking health. No wife and mother can work out doors, do her work in doors, rear her children and do justice to any of them. Let me say that when a woman begins working out, doing chores, as well as field work, to help John or Jack, she has it to do. I have seen too many such. John will go to town and there will be no need to hurry home—might as well stay and chat a while; Mary Jane will do the chores, cut the wood to get the supper and breakfast. Don't misunderstand Aunt Ruth. I know whereof I speak. I have only two children left. The daughter is sickly and has been from a child. The reason of so many sickly children is the overworked mothers. God gives children to us to care for. When we do men's work we neglect what God gave us to do. If the good man is sick it is all right to help; if not, I say don't do it, sisters. You will soon be old and worn and your husband will not respect you any more than if you had done your work and he had done his.

I was stout when I married, and as I had not much to do in doors, I began to help out. I am free hearted and willing to divide in any good cause, so I thought I must help to get along, but when a wife begins there are not many men but what will expect more than a wife's strength can bear without crushing her, and she does not realize the

UP THE CHIMNEY

Is Where Half Your Fuel Money Goes In Winter

When the Ordinary Stove is Used

NOW, that's a big amount to waste in expensive coal every year.

But that is what you can expect with stoves—as the majority of manufacturers build them.

The joints of the ordinary stove are plastered up with stove putty in an endeavor to make them air-tight. Then it isn't long before the putty dries up, contracts and falls out—cold air is sucked in through the cracks—and the valuable gases which should be burned, and a large part of the heat is allowed to escape up the chimney.

You are wasting DOLLARS in high-priced hard coal through leaky joints and poor radiating surface. You also waste HALF the Gas Half, the best heating half of soft coal, by imperfect combustion.

A hat full of the Cheapest Coal, cost 1 cent, holds fire over night.

Our free Booklet on Scientific Combustion explains fully. Send postal for it today. It tells you all about the nature of soft coal and hard coal and other fuels, and how you can save the cost of a Cole's Original Hot Blast Stove in fuel each winter.

COLE MANUFACTURING CO., 3234-3244 S. Western Av., Chicago

COLE'S Original Hot Blast Stove

SAVES all wasted with other Stoves

This great fuel saver gives cleanliness and even heat day and night with soft coal you never dreamed possible. Uses less hard coal and gives more heat than any base burner.

Half a Million in use that have been sold on our guarantee as follows, which cannot be made on any other heating stove in the world. Your home dealer will set one up in your house on our guarantee, backed \$10 and by his guarantee, at prices, \$10 up

GUARANTEE:

- 1—We guarantee a saving of one-third in fuel over any lower draft stove of the same size with soft coal or slack.
- 2—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same size fire-pot.
- 3—We guarantee that the rooms can be heated from one to two hours each morning, with this soft coal or hard coal put in the stove the evening before.
- 4—We guarantee that the stove will hold fire with soft coal thirty-six hours without attention.
- 5—We guarantee a uniform heat day and night, with soft coal, hard coal, or lignite.
- 6—We guarantee every stove to remain absolutely airtight as long as used.
- 7—We guarantee the feed door to be smoke and dust proof.

Built on Honor

Cole's Original Hot Blast was invented after 12 years' continuous experimenting to find a way to save the enormous waste in fuel through the escape of gas and heat up the chimney in the ordinary stove. Our reputation as manufacturers of the Original Successful Hot Blast goes with every stove; and will not be sacrificed by the use of inferior material or cheap workmanship.

Would You Lose \$50.00 in Fuel to Save \$1.00 on the Cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made stove.

Like all successful inventions, Cole's Original Hot Blast has many inferior imitations, avoid them. They all lack our patented top Hot Blast construction, the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open by action of the fiercest heat; the patented compound hinge for ash door, the guaranteed smoke-proof feed door, which prevents dust, soot or smoke from escaping when fuel is put into the stove, and other patented features which are essential to the success of our stove.

The big expense of heating your home is in the fuel and not the first cost of your stove! Do not let any dealer persuade you to buy anything but Cole's Original Hot Blast which we guarantee to remain always airtight and to be just as economical after 10 years' use as the first day set up.

CAUTION—See the name "Cole's Hot Blast from Chicago" on the feed door of each stove. None genuine without it.

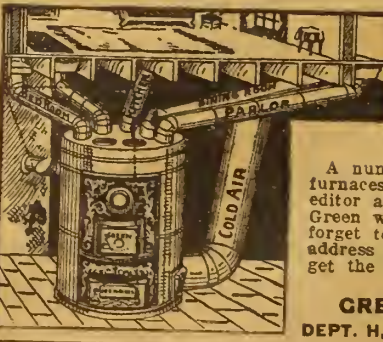

The best dealer in every town generally has the agency for Cole's Original Hot Blast Stove. Write us for name of local agent and for FREE BOOKLET on the scientific combustion of fuel, which also tells about Cole's Hot Blast. In towns where there is no agent, mail order purchasers are protected by the above guarantee.

The Rue Washer Washes.

THIS Rue Washer is the only machine that forces air through the clothes. It is the only machine that employs the same scientific principle used on the old time washboard. It is made of the best quality galvanized iron; it will not dry up and fall to pieces; it will last a life time; it weighs only 60 pounds; it will not tear the clothes; it does the work, better, easier, quicker than any other machine in the market. Every machine is sold under the positive guarantee of the manufacturer. Ask your dealer for it. If he hasn't it write us. We will send it on trial. The price is only \$8 at your R. R. station.

Rue Mfg. Co., Mapleton, Minn.

ARE YOU READY FOR WINTER?

HAVE YOU A FURNACE IN YOUR HOME?

We have some valuable information for you about heating your house, so don't get your furnace till you write us. You will be well repaid for your trouble.

A number of the employees of this paper have Green furnaces in their homes and we would refer you to the editor as to their good points. A good furnace like the Green will last a life time if properly handled. Now don't forget to write us today giving us your address and the address of your dealer. We will tell you just how to get the Green furnaces.

GREEN FOUNDRY & FURNACE WORKS, DEPT. H, DES MOINES, IOWA.

condition she is in until it is too late. I have wood to chop and perhaps a fence to fix and weeds to mow at my age. I suffer all night, night after night, but "mother" has always done these things. I would never teach my daughter to do what I have done. My children were all sickly. The doctors have told me it was from too hard work before and through nursing. A few mothers may get through and keep their health and strength, but we have moved around a good deal and I have seen too many cases of the overworked wife and mother, not to know.

A letter sometimes makes a lump gather in my throat; this one did, but what shall I say about it? One point made by "Missouri Mother" should be

emphasized. Many of the letters received have incidentally alluded to the fact that a man has no idea when a woman is overtaxing herself and she, in her anxiety to help, is so buoyed up that she overdoes unconsciously. All through this discussion women have shown themselves so desirous to be helpful to the men that there are evidently plenty of kind, considerate, appreciative men in the home represented in this circle. While we rejoice in this, let us not dream for a moment that all men, or even the great majority of men, are

W. L. DOUGLAS

\$3.50 & \$3.00 SHOES FOR MEN
W. L. Douglas \$4.00 Gilt Edge Line cannot be equalled at any price.

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD.

\$10,000 REWARD to anyone who can disprove this statement.

If I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. Douglas Strong Made Shoes for Men, \$2.50, \$2.00. Boys' School & Dress Shoes, \$2.50, \$2, \$1.75, \$1.50

CAUTION.—Insist upon having W. L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom. Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

so. "Missouri Mother" speaks not for herself alone—more's the pity. The average man is a thoughtless creature, and too many of him gives very little consideration to the comfort of women. That is why it is so often unwise for a woman to begin working in the field. As a letter which we are to have one of these days will further illustrate this point we shall leave it at this time and make room for Mrs. Cornelius.

Mrs. Cornelius looks at the subject in a large way. Her view is worthy of careful consideration:

Do I believe in women working in the field? Yes and no. I believe in the inalienable right of the American woman to do as she pleases, because she usually pleases to do right. At least the class of women who form this circle do, and there is no use in talking as some preachers do, to the absent audience. Circumstances alter cases, wholly. To begin with the girls: There may be farm girls who consider out-door work degrading, but I never remember knowing one. I have known many who preferred farm and garden work who, at the same time, were fully proficient in "woman's sphere." I have in mind now a young woman who was housekeeper for a neighbor in time of need. She was proud of having done almost all kinds of field work, while the family had no praise too high for her abilities as housekeeper and cook, and at the same time her "pick-up work" was a dainty dolly. (Now, bachelor brethren, don't write for her address—we have plenty of worthy young men here.) I think, on the whole, the girl who likes field work is healthier, happier and altogether sicker for a reasonable amount of it. And the girl who doesn't—well, the probabilities are she has never been interested in it. Likely her brother hates it, too. I think it would be a risky thing for her to marry a farmer. Which brings us to the wife. She who is not a mother may enjoy helping outside, and perhaps prefer that to the extra housework made by a hired man. If she can give John a lift occasionally without neglecting the home or overtaxing her strength, well and good. I think John will be willing to beat a carpet or carry wash water when he is not rushed. But to return to the mother—especially while the children are small. Can she profitably do regular field work? I think not. She might, like one who wrote some years ago, bury five out of seven and do a man's work. She may rob the older ones of their childhood to take her place indoors. But to bear, rear and properly train the average sized family, as our present civilization demands, is sufficient tax on time, strength and nerve force. The children are surely the most valuable product of the farm, hence they should have the first consideration, and surely no one else could fill mother's place in any family. Among Ourselves. I don't mean she should flatly refuse to head off the frisky calf, or turn the grindstone or look after the poultry and lighter garden work when able. Too close housing is as disastrous to health and harmony as neglected babies and hastily-prepared meals. When the mother has so trained her children that they are able to look after their own needs and relieve her of part of the house work, she may enjoy helping father potter about, just as she did in that well-remembered first year, but it is likely he, too, will have turned over much of the farm work to the boys, if they have them, or be renting most of the fields. Now you see why I do and don't.

When this discussion shall have run its course Among Ourselves I shall sum it up, pro and con, With the Editor, and shall have something to say on the in-

terference of field work with the work of a mother. In passing let me say that graves are not the saddest testimony to the evil of neglecting the duties of motherhood.

Mrs. Jenny Lind comes, bubbling over with good spirits. She is just home from a little outing which it is worth our while to hear about:

Well, I have been attending chautauqua. The first day I heard Mr. Towne, of New York. His speech was fine. The second day I heard the great Sam Jones. He is a man that I always wanted to see and hear, and I heard him in all of his glory. His wit and humor are something wonderful. I wish the mothers who have been discussing the right way of raising children could have heard his ideas. He told about Mrs. Wesley's method of raising children. He said she raised nineteen children and she never allowed one of them to cry out loud after it was a year old, and that two of the sons she raised revolutionized the world. I would like to tell all that Sam Jones said, but you would not have room for anything else. I wish every mother who reads the Home Department could attend the chautauqua. It is so good and uplifting and one feels better for a whole year. It is something to think about and to talk about when one has company. Instead of talking about the neighbors and the school teachers and the hired girl we can give them a good rest and be better ourselves. I attended one week last year and two days this year. It is so nice to get away from the work and see fine, intelligent people. Now don't say, "Oh, she neglected her family," for I did not. We took our turns going. I just baked and prepared food for them and lunch to take along with me, and how good it was to eat it out in the park. Mrs. Charles E. Risser conducted the C. L. S. C. round table. Her talk was on the chautauqua course and I am going to read the four books for this year and also the magazine.

Chautauquas and state fairs are often-er than not a means of grace to home-staying women. It seems a pity that they cannot be more generally enjoyed. Part at least of the benefit of the chautauqua may be enjoyed at home, as Mrs. Lind suggests. I wish that she or someone else would give us a little talk about the chautauqua course of reading and the cost of the books, etc.

A request and a reply to a request are noted for this week's program:

Would some of the sisters please give me a good recipe for green tomato pickles, and is it possible to keep them in open jars instead of having to seal in fruit jars? There was such an abundance of peaches in this part of the country that everyone has their fruit jars mostly filled. And if our pickles and butter could be kept in open jars instead of having to seal them it would save buying more, for it isn't likely we will be blessed with another such a fruit crop soon. —Mrs. J. C. Danielson.

A subscriber asks how to make wine out of wild grapes, and as I have been quite successful with mine I will tell how I make it. Take any amount of the grapes and look them over and wash. It does not matter whether you pick them off the stems or not. Put in a pan and mash with a wooden potato masher and squeeze through a cloth. Then measure one cup of juice, one cup of water and one cup of sugar. Mix well together and put in a tall stone jar and cover closely.

This Handsome Cook Stove

Only \$6.50 In Cash

(BRIEF DESCRIPTION: 24½ inches wide, 40 inches long. Top will not warp or crack. 14 inch grate with extra large ash pan. 18 inch oven, heavily removable inside of rack. Weight 240 lbs. Extra good value.

Here is a serviceable, well made, handsome Cook Stove that sells at any good store for from \$16.50 to \$20.00, yet we offer it to you for only \$6.50 in cash.

This is the greatest bargain in the Cook Stove line ever put on the market, and it is possible to make this offer only on

The Walker Plan

Everything Sold on 30 Days' Approval Test.

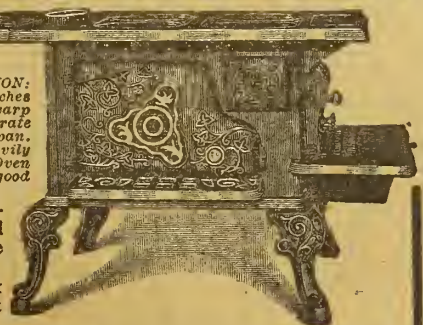

The Walker Plan in brief—

We manufacture and import over 200 household necessities—goods used regularly in your home, such as Foods, Teas, Coffee, Chocolate, Flavoring Extracts, Baking Powder, Spices, Laundry and Toilet Soaps, Toilet Articles, etc., etc., which we sell direct from our factory to you at prices as low—or lower—than you are now paying local storekeepers for inferior goods.

These goods are all sold with privilege of opening and trying each of them—subject to return if not satisfactory. All money refunded and no charge for goods used in test.

This Handsome Cook Stove, regular price \$16.50, we give you for \$6.50 cash. In other words, we give you this \$16.50 Cook Stove

W. & H. WALKER, Stove Dept. 90, Pittsburg, Pa.

for only \$6.50 cash to introduce our Walker products into your home.

We want you to write us for our Stove Catalogue and get the description of this Stove.

Will you write us a postal card and get this information?

With the Stove Catalogue we want to send you our General Catalogue of all kinds of household supplies and household furniture, together with wearing apparel, etc., over 1400 articles in all. All sold on a plan whereby \$1.00 buys \$2.00 worth of merchandise.

Our firm is 69 years old. We have a capital of \$5,000,000.00 and factories that cover 15 acres of ground.

The Walker Plan is the most economical way in the world of buying household supplies.

Will you send us a postal card—or a letter—today? Just say—"Please send Stove Catalogue and other literature." With it will go our catalogue and our little book entitled—"The Walker Plan and What It Means."

Do not delay. Write today. Address—

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Not they who soar, but they who plod Their rugged way, unhelped, to God Are heroes; they who higher fare, And, flying from the upper air, Miss all the toil that hugs the sod— 'Tis they whose backs have felt the rod, Whose feet have pressed the path unshod, May smile upon defeated care, Not they who soar.

—Paul L. Dunbar.

What a multitude of threads make up a fringe; and yet how beautiful and costly when completed! And here is found a beauty of the real Christian life—the highest, truest, Christian life. There are not a few who may be willing upon rare and notable occasions to do or suffer some great thing for Christ, but the ten thousand little things of life are entirely beneath their notice, as they also suppose them to be beneath the notice of the Lord—P. S. Henson.

SHE'S A WISE WOMAN

Who keeps in mind that a little credit is a dangerous thing.

Who is able to mend both her husband's clothes and his ways.

Who has learned the paradox that to have joy one must give it.

Who can tell the difference between her first child and a genius.

Who acknowledges the allowance made by her husband by making allowances for him.

Who manages to keep not only her house and her temper, but her servants and her figure as well.

WORK-BASKET HINTS—SOME SUGGESTIONS ABOUT MENDING AND REPAIRING.

The difficulty in mending large holes in fine old linen is found in keeping flat and not drawing it up. This is much more easily accomplished if a piece of fine tulle is basted over the hole and the darn then made in the meshes of it. The best thread for darning is that pulled or drawn from another piece of linen. This will be found preferable to flax, as it is much more even.

When the skirtband or placket hole keeps wearing out and much strain is put on the band, a piece of leather cut from an old glove should be stitched down the back of the placket and to the inside of the waistband. This will keep it firm and make a good foundation for sewing on hooks and eyes.

A HEALTH HINT.

emaciation, sleeplessness and general weakness we so often meet. Physiology teaches that in the body there is a perpetual disintegration of tissue, sleeping or waking; it is, therefore, logical to believe that the supply of nourishment should be somewhat continuous, especially in those who are below par, if we could counteract their emaciation and lower degree of vitality; and as bodily exercise is suspended during sleep, with wear and tear accordingly diminished, while digestion, assimilation and nutritive activity continue as usual, the food furnished during this period adds more than is destroyed, and increased weight and improved general vigor are the results.

FOR THE COOK.

Bread Cakes With Cornmeal.—Soak stale bits of bread in one quart of sour milk, over night. In the morning rub them through a colander, add the yolks of four eggs, well beaten, two teaspoonfuls of soda dissolved in a little water, one tablespoonful melted butter and enough cornmeal to make it the con-

istency of griddle cakes. Beat whites to a froth, and stir in just before baking. If sweet milk is used, take two tablespoonfuls of baking powder instead of soda.

Salmon Croquettes—I will tell you a new way of preparing salmon for the table. Remove salmon from the can as soon as opened. Pick out bones and skin. Mash fine, and put just enough corn meal in it to make it stick together. Season with pepper and salt. Make into long balls, about the size of an egg. Roll in beaten egg, then in meal, in egg again, then in meal. Fry in hot lard a nice light brown. Dish up on a platter and garnish with parsley. It makes a pretty dish, and is almost as good as fresh fish.

Chicken Pie—This is a dish too well known

to require specific directions, but the following is a good recipe for a biscuit crust, which is much more orthodox than regular pastry. Mix through one pint of sifted flour one teaspoonful of salt and two heaping teaspoonfuls of baking powder. Chop in two level tablespoonfuls of butter and the same of lard; then add sweet milk for a soft dough. After covering the par-boiled chicken, make a deep cross in the center of the paste, turn back the corners and insert a cone of buttered paper. Bake forty minutes. A large handful of hickory-nut meats, slightly chopped, is a most acceptable addition to the ordinary stuffing for a roast chicken.

The International Sunday-School Lesson.

Fourth Quarter. Lesson I. Mark XII, 28-34; 38-44 October 7, 1906.

The Two Great Commandments.

The Herodians joined the Pharisees in asking Jesus a catch question concerning the tribute money, which he answered in such a way that they were filled with wonder and went away discomfited. Then the Sadducees tried a similar question about the resurrection to which Christ's answer was again triumphantly successful. During this last interview the word went out that Jesus had put to silence the Sadducees and the Pharisees came hastening to see and hear. Finding the Sadducees utterly silenced, one of their number, a scribe, or lawyer, proposed a new question, "tempting him." At this point the lesson begins.

Question after question was pressed upon our Savior, now by Sadducees, now by Pharisees, now by Herodians. He consults no authorities; he asks no time. Prompt as the sun, quickly as a flash of lightning, he answered whatever question was asked, and always so completely as to leave his enemies silent or furious, or both.

This question on which the schools of Hillel and Shammai were disagreed, the lawyer put, tempting our Lord, hoping that he would commit himself as an enemy of traditions. The Rabbinical school taught that there were important distinctions between the commandments, some being great and others small, some hard and weighty, others easy and of less importance. Great commands were the observance of the Sabbath, circumcision, minute rites of sacrifice and offering, the rules respecting fringes and phylacteries. Indeed, all the separate commandments of the ceremonial and moral law had been carefully weighed and classified, and it had been concluded that there were "248 affirmative precepts, being as many as the members of the human body, and 365 negative precepts, being as many as the arteries and veins or the days of the year; the total being 613, which was also the number of letters in the Decalogue." It must have seemed to the Pharisees that no matter which Jesus called first, he would make enemies of those who advocated others.

In his answer had he stopped with the first half of his answer, presenting simply the love of God, they were prepared to attack him for making himself the equal of God. But when he added the love of neighbor as side by side in importance with love to God, he elevated humanity to a high plane of importance, and said in effect, "as the second commandment is subordinate

to the first, and yet like unto it, so the Son of man is subordinate to the Father, and yet like unto Him." The Pharisees felt at once that his addition of the love of man had traversed their whole design.

When we remember the legalism of the whole Rabbinical fraternity, the stress they had put on the minutest acts in and for themselves, the practices that had led Jesus to charge them with tithing garden herbs while neglecting judgment, mercy and truth, we must realize the immense stride this man took in this explicit endorsement of Jesus. The form in which he states it was especially calculated to displease his companions, and bears testimony to the enthusiasm which must have filled his heart at the moment.

Longfellow was constant in his protest against anything which savored of religious formalism, or substituted creed and ritual for the simple life of faith and love as it was revealed in Jesus. To the monks of Saint Bernard, who each day said their oft-repeated prayers, he cried "Excelsior!" Higher! There was only a degraded form of religion, such as was never seen in the life of the Master. He taught us to live a life of love, that loving service was the only true worship, and that any religion which was lacking in this quality was hypocrisy. Expressive of the thought Longfellow said:

I am in love with Love,
And the sole thing I hate is Hate;
For Hate is death; and Love is life."

There is no duty more pressing right now than that of loving your neighbor as yourself. If carried out in all its bearings and ramifications, it would speedily revolutionize mankind. It would not be hard to trace a majority of the evils, social, political, industrial, ecclesiastical, that afflict our race to the neglect of this great duty. No wonder the scribe said unto Jesus, "Well, Master, thou hast said the truth."

Analysis And Key.

I. Jesus' moral agony greater than physical; cause of it. Contradiction of sinners against Himself. Effort to entangle Him in His words. Refusal to accept Him or His message. (1) Particular instance: Pharisees' covert attack. Effort to elicit a criminating statement. The chief commandment; mooted because of number and variety. (2) Jesus' answer; partisanism avoided. Substance of religion, a Life. Characteristic of that Life—love; toward God, toward man.

II. Questioners questioned. No Scrip-

ture conundrum proposed. A clew of faith proffered. Rejected. Questioners silenced.

The Teacher's Lantern.

Technicality in religion finds its burlesque in Phariseism. They taught 613 commandments, one for each letter of the Decalogue; 365 of these were negative—one for each vein in the body, or day of the year. They also commanded (Numbers xv, 38) fringes to be worn on the corner of their tallith, bound with a thread of blue; each fringe had eight threads and five knots—thirteen; and the letters of the word tsitsith (fringes) makes 600 plus thirteen equal 613. Absurd! Yes; but so is salvation by legalism.

No doubt Jesus pointed to the shema which the lawyer wore in the phylactery between his eyes. How near, and yet how far, the answer was from the lawyer's mind!

We are so familiar with the incident we are apt to lose the power of it. How easily the answer seemed to glide from Jesus' lips! Yet, under most trying circumstances, it was the instantaneous enunciation to order of the fundamental principle of religion. It was a Scripture quotation. Yes; but from passages sundered far. (Deut. vi; Lev. xix.) And nowhere are they spoken of as the First and Second Commandments. Jesus' answer was no abstraction, but a concrete reality. "He simplifies the whole sweep of the Ten Words in brief and easily remembered principles." (Geike.) "He sets out two great guiding stars which all the hosts of lesser commandments follow." (Ibid.)

St. Paul, in his noble Ode to Love, gives us the expansion of the commandments Jesus enunciated.

Charles Kingsley says admirably: "There can be no real love of God which is not based upon the love of virtue and goodness, upon what our Lord calls a hunger and thirst after righteousness."

These two commandments are the noble and sufficient guide of the religious life.

On loving God with the whole heart, mind and soul, Burkitt quaintly remarks that the measure of loving God is to love Him without measure.

Dressmaking and Millinery—No. 536.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Quantities of buttons are used on the season's garments, many of these being used simply in the way of adornment, and not in the way of fastenings. Covered buttons in color to match the material are used in groups of any desired number on skirts and waists. These may be bought ready for use, or one may have them covered with the garment material or silk similar to it, but I do not recommend attempting the work oneself, for there are likely to be unsatisfactory results. Usually a dressmaker will take your order for it and will send material to one who makes a business of this line of work. On skirts that simulate a front closing there are buttons in groups of any fancied number each side of the center line, loops of braid or cord, "seaming," to hold the parts together. On points, on tabs and straps, and wherever buttons are placed that do not suggest a closing the buttons are used without the loops. There are fancy buttons in metal, gilt, silver, jet, etc., used in the same way, and these may be selected to suit either the material or the trimming. The numbers used will decrease as the size increases, as one would not use the larger buttons except with wide spaces between, and even then they are largely confined to the outer garments.

Among the popular coat designs No. 5461 is one of the leaders, and it is one that may be used for the costume coat or for the separate garment, being adapted to any of the materials usually selected for either purpose. When desired to complete a costume the material of coat and skirt may differ, but the color should be the same, as we find many of the suits made up after this idea this season. This permits one to select for the coat a heavier fabric than would be desired for the skirt. It permits also the selection of material that will make it suitable for wear with any skirt or cos-

tume, thus saving the necessity of an extra coat. The coat is semi-fitted, the long lines afforded by the seams from shoulder to hem giving a suggestion of slenderness. The sleeves are in the full-length coat shape,

[5464—Double Breasted Tourist Coat, 32 to 42 bust.]

without cuffs, stitching simulating these. There are patch pockets. The roll collar is faced with velvet, but may be of the material if preferred. If desired the garment may be in full length by adding to its length equally all about the lower edge. Be careful in making this alteration not to change the shape. Pattern No. 5464 is

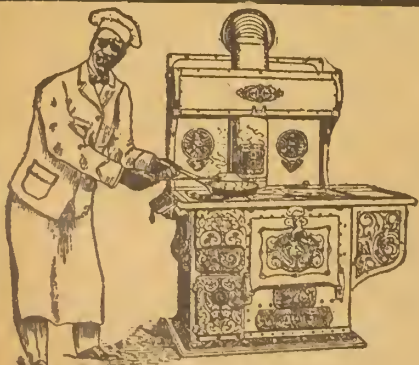

[5468—Fancy Waist with Girdle, 32 to 40 bust.]

cut in size for 32, 34, 36, 40 and 42 inches bust measure.

No. 5468 shows a fancy waist with girdle that will be a charming design for the waist that is to be worn as a dressy garment, it being rather elaborate for the ordinary occasion waist. However, it may be used as a costume design when a waist like the skirt is desired. The girdle may be of silk, of velvet or of the costume material trimmed in any tasteful manner. The hertha may match the girdle, but does not necessarily. Groups of buttons are seen on the girdle and on the pleat extension that finishes the lower part of the sleeve. The waist is made with a yoke to which the full portions of the garment are attached. If the fitted lining is used (pattern provides for this) the yoke is faced on the lining and may be of any material liked for the purpose. Pattern No. 5468 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

Lost Strayed or Stolen—One Cow

That is about what happens each year for the man who owns five cows and does not use a Tubular cream separator. He loses in cream more than the price of a good cow. The more cows he owns the greater the loss. This is a fact on which Agricultural Colleges, Dairy Experts and the best Dairymen all agree, and so do you if you use a Tubular. If not, it's high time you

did. You can't afford to lose the price of one or more cows each year—there's no reason why you should. Get a Tubular and get more and better cream out of the milk; save time and labor and have warm sweet skimmed milk for the calves. Don't buy some cheap rattle-trap thing called a separator; that won't do any good. You need a real skimmer that does perfect work, skims clean, thick or thin, hot or cold; runs easy; simple in construction; easily understood. That's the Tubular and there is but one Tubular, the Sharples Tubular. Don't you want our little book "Business Dairymen," and our Catalog A. 12 both free? A postal will bring them.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

Something About Milk Veins And The Udder.

A few years ago we thought we would see what percentage of the farmers out of 100 believed that the large veins on the belly of the cow, which are called milk veins, were really veins for conveying milk to the udder. So without expressing any opinion of our own on the matter we simply asked the following question of one farmer after another:

"Why are those veins called milk veins?" The answer from ninety out of 100 was in effect, like this: "Because they carry the milk to the udder." Of the remaining ten, five could not give any answer except that they did not know, while only five had the right idea, viz., that these veins were in reality great blood veins returning blood from the udder to the heart. Afterwards we conversed with several of the original ninety on the subject, and stated to them what science had really found out and as to the purpose of these veins. In almost every instance, however, we found them adhering steadfastly to their former ideas. One of them declared that he had cut into the veins on a dead cow and has seen the milk flow out.

Now, this is but one of the several errors concerning the physiology of a cow which are strongly believed in by the farmers. To be really intelligent and well informed, to believe in the truth and not a mass of errors, on any questions concerning living beings, one must make a study of them. Can we afford as farmers to be harboring a mass of unfounded notions about so important an animal as the cow?

If we believe the truth as it really exists, that these veins return the blood to the heart, it will teach us several valuable lessons:

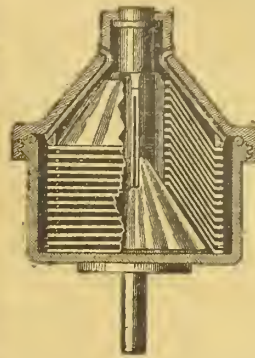

First, it will show us the enormous circulation of blood that is required to produce milk in a good cow. Second, it will teach us that we must take good care of the udder, for with such a heavy influx and outpour of blood the organ is very sensitive to abrupt changes of heat and cold. This is the reason that cows are very apt to have garget by lying on cold ground late in the fall; also by lying on stone or cement floors. Third, it will teach us the folly of tying cows in the common stanchion whereby it is easy for a standing cow to step onto the teats or udder of the cow that is lying down next to her. We should wisely provide a system of tying cows

in the stable that will prevent such serious injuries. Fourth, a knowledge of the true physiology of the udder will teach us the importance of careful and gentle usage of it in milking and the great importance of attending to any derangements at once, which may take place.

There is no reason on earth why every farmer who keeps cows should not be a well-informed man on the physiology and function of the dairy cow. Such knowledge would prove a very profitable guide to the wisest and best methods of handling the cow. We should always remember that the highest profit from

THE "DISC" SYSTEM OF CREAM SEPARATION

Judging outward appearances alone, it might be reasonably assumed that one cream separator is as good as another. However, as the outside of the machine does not do the separating, we must look deeper for the real merits of the separator. Upon the construction of the gearing depends durability and operating ease which, of course, should be carefully examined, but the really important feature is the construction of the bowl. This is what does the work, be it good or bad. Exhaustive tests have

proven that the best results can only be obtained when the separator bowl contains a series of conical shaped, imperforated discs, dividing the milk into strata or thin layers. Bowls which do not contain discs of this particular kind do fairly good work with warm milk and by running a thin cream, but where a heavy cream is desired, or cold or thick milk is to be separated, as frequently happens in farm use, these separators lose a big percentage of the butter fat and consequently the profits. The original "disc" system as today used exclusively in building the DE LAVAL cream separators, is just as important to the separator as the guards are to the sickle bar of a mowing machine. The DE LAVAL "disc" system assisted by the "split-wing" device, both of which are patented and used only by the DE LAVAL Company, has in thousands of tests proven far superior to any other style of bowl construction. Other manufacturers have tried to imitate the DE LAVAL bowl, but have never anywhere near equalled its efficiency. That is why over 98 per cent of the world's creameries today use nothing but DE LAVAL machines. Creamerymen know that the DE LAVAL bowl is the only one which will secure all the milk-profits. This fact should mean much to every dairy farmer who intends buying a separator. A De Laval catalog which explains separator bowl construction in detail is sent free on request. Write today.

No matter how you handle your milk,
No matter what separator you may be using,
No matter what separator you may be thinking of buying, for your own convenience sake, and your pocket-book's sake, don't fail to see and examine

The Improved Frictionless

EMPIRE Cream Separator

Without doubt or chance of question, it is as far ahead of the old style cream separators as the cream separator itself is ahead of the deep-setting system.

It is the simplest in construction, has the lightest bowl, turns more easily and is more easily cleaned than any other cream separator made.

Its improved bearings make it as nearly absolutely frictionless, as it is possible for a machine of any kind to be built—it almost "runs itself."

Why put up with a machine of the heavy, hard-to-turn type, when you can get the Improved Frictionless EMPIRE?

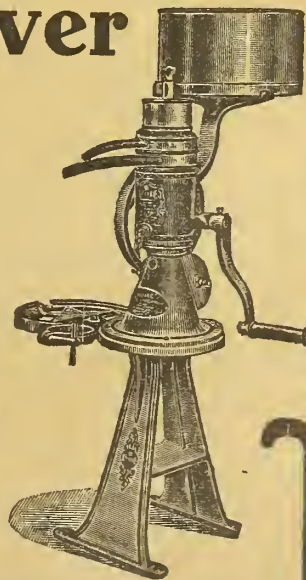

At any rate why not examine it?

That is all we ask:—You certainly want the best separator you can find; the EMPIRE, always the leader, is now better than ever.

We know, for experience has proven, it is to your advantage to put our claims to the test.

The great present army of Empire users made up their minds that way.

Send for our catalog and our valuable free dairy books. You will be interested in learning how the EMPIRE is made—why it does such good work, and how it will make dollars for you.

cows can only come through the use of the best judgment and the best methods. To have good judgment we must have sound knowledge, for as said the ancient proverb:

"Woe unto him who believeth a lie."
—(Hoard's Dairyman.)

Keeping The Churn Sweet.

The best method of keeping churns in good condition is to rinse them in two sets of scalding water at the end of each churning, then rinse in cold water and drain. Some prefer to turn the churn over with mouth down. Others prefer to allow the coverhole to turn up. Neither of these methods is considered the most desirable. When it is turned with the coverhole down, the remaining steam on the inside of the churn will not escape. It will condense inside of the churn, and cause it to remain in a damp condition over night, or even longer. By turning the churn with the coverhole up the dust and other impurities from the atmosphere are likely to fall into it. The best method is to turn it over so that the coverhole points to one side.

The churn should be thoroughly drained first, otherwise some water will remain in the bottom. Some makers do not rinse the churn with cold water. They simply scald it, or steam it, and then let it stand and dry. If this method is followed for any length of time the churn is likely to be short-lived. The wood will, in a comparatively short time, get spongy. Such conditions will cause it to rot in a shorter time, and it will also allow the cream to enter the cracks and pores of the wood, making it more difficult to keep the churn in a sweet condition.

If the churn is rinsed with cold water the major portion of the heat has been removed and still enough left to effectively dry it on the inside.

Some makers prefer to keep the churn in a good condition by sprinkling salt on the inside after washing. This is not to be recommended, as all churns contain more or less iron ware on the inside. Salt, while a good germicide, causes the formation of rust on all iron with which it comes in contact. After a time this rust will scale off to a certain extent and become incorporated in the butter.

If the churn is treated daily in the manner described above and then at the

EMPIRE CREAM SEPARATOR COMPANY,
Chicago, Illinois,

Bloomfield, N. J.

end of the week treated with slacked lime, it can be kept in a good, sweet condition. The lime should be freshly slacked and in a liquid condition when put in the churn. A pailful or two of this fluid will be sufficient for each churn. By rotating the churn a few times the lime will be spread all over the inside. Let the churn remain in this condition until ready for use again. When ready for use, put in some warm water and the lime will readily come off. But if it has been allowed to remain in the churn too long it will form a lime carbonate, and will be more difficult to remove.

Lime is one of the best disinfectants and deodorizers that can be used in a creamery. Some of the best butter-makers use it every day on all the wooden utensils, such as on butter workers, churns, etc. Many creameries would be in a much sweeter and purer condition if they were given a good coat of whitewash on the inside once a month. Refrigerators, wooden utensils, and rooms of any kind can be kept in a good, sweet and pure condition by whitewashing or sprinkling a little lime on them.—(McKay and Larsen's Manual.)

The Rood-Fessenmeyer Poland China Sale.

The annual sale of Fred M. Rood, of Clearfield, Iowa, and H. Fessenmeyer, Clarinda, Iowa, has become one of the great events in Poland China circles, but never before have their sales attracted as many buyers from a distance as this year. It was one of the most representative breeders sales that has been held in the state in many a day, and every man that came was there to buy. The offering was a most excellent one, especially to those who were wanting a little scale combined with finish. It was a better offering than they sold last year and that was then considered one of the best that was ever sold in the state. Their sale this year

was again held at Clarinda, Iowa, on the 27th of September and when Colonel Duncan opened the sale he looked into the faces of some of the very best breeders from the state of Iowa Missouri and Nebraska, and the bids on hand came from as many as fourteen different states. It was a foregone conclusion that it would be a record breaker and the offering merited the prices that were paid. It was one of those very even, well balanced sales, there being no very high prices nor any very low ones. The highest price was \$146 for the yearling sow, Longfellow Mald, a daughter of Longfellow Jr., and she was purchased by Mr. J. H. Wintermute, Blockton, Iowa. The highest priced spring boar was a son of P. W. Perfection and he went to Mr. F. W. McIntyre, of Red Oak, Iowa, at \$126. Another spring boar of March farrow, a son of Rood's Tecumseh and out of the famous old sow, Giantess, sold for \$105, and was purchased by Mr. P. P. Smith, Chariton, Iowa. The entire sixty head averaged \$55.40. The thirty head belonging to Fred Rood sold for \$1,805, or an average of \$60.28. Eleven boars averaged \$59.28, and nineteen sows averaged \$60.89. Mr. Fessenmeyer's thirty head averaged \$50.53. His eighteen sows averaged \$49 and twelve head of boars averaged \$52.83. All in all it was one of the great sales held so far this year, and the beauty of it is that every man bought because he wanted the stuff. Mr. Harvey Duncan cried the sale, assisted by his brother, Jim, and the boys deserve great credit for the success of the sale. Below we give a complete list of the entire offering:

Pfander's Poland China Sale.

The sale of Messrs. J. W. Pfander & Son, Gravity, Iowa, brought out a good crowd of breeders, mostly from southern Iowa, and an average of \$28 was made on forty-three head. It was a good offering, mostly of the famous Giantess strain, and should have brought more money. The high price was \$105, for their noted brood sow, Model Giantess, and she was purchased by Messrs. Chilcote Bros., of Conway, Iowa. She is one of the cheapest sows sold this season. As a brood sow she ranks among the very first, and she has been a gold mine to her former owners. Below we list those selling for \$25 and above:

No.	Name	Price.
1	Model Giantess, Chilcote Bros., Conway, Iowa.....	\$105.00
2	J. O. James, Braddyville, Iowa.....	30.00
4	J. M. Hipsley, New Market, Iowa.....	25.00

Cut off that cough with

Jayne's Expectorant

and prevent pneumonia, bronchitis and consumption.

The world's Standard Throat and Lung Medicine for 75 years.

Get it of your druggist and keep it always ready in the house.

PAID FOR ITSELF IN 30 DAYS

"COHOES, N. Y., Sept. 14, 1906.

"About three years ago I was selling my milk at 2 1-2 cents per quart to a creamery, but I thought that I could do better by selling the cream and keeping the skim milk on the farm for feeding pigs and calves. I set the milk in coolers and skimmed with dippers. The best I could do was about 20 quarts of cream per day from 20 cows. I sold the cream for 12 1-2 cents per quart.

I made up my mind to get a No. 6 U. S. Separator and try it.

By keeping an accurate record I found that with the U. S. I was getting about 40 quarts of cream per day from 20 cows, a difference of \$2.50 in favor of the

U. S. CREAM SEPARATOR

making a gain of \$75.00 in 30 days. Then I value the skim milk at 33 1-3 cents per hundred quarts for feeding purposes on the farm, amounting to \$15.00 for 30 days at 150 quarts per day. As the total amount gained by the U. S. paid for it in 30 days, I will say that it is the best investment I ever made.

If those who may read my experience with the U. S. Separator have any questions to ask or want any information other than what I have given, if they will write me, I will answer and do it with pleasure.

R. A. SHUFELT, R. F. D. No. 1."

If you are keeping cows for profit, a United States Separator will help you "do better",—as it has Mr. Shufelt and many thousands of others. He has told you how. Let us tell you why. Mr. Shufelt's experience proves it is at least worth your investigation. A letter, or just a postal card with your address on it, and "Send new illustrated catalogue No. G 81," is sufficient. Will you write us?

The Peterson Short-horn Sale.

The dispersion sale of Messrs. Peterson Bros at Lamoni, Iowa, on the 27th, was a decided success, and the forty-eight head averaged \$92.50. A fair sized crowd of breeders and farmers from the surrounding country were on hand, together with Mr. D. J. Cronin, of O'Neill, Neb., who was the most active buyer in the sale. Imp. Crescent 6th sold for \$260 and was purchased by Mr. Cronin, and the herd bull, Gay Hampton, a son of Hampton's Best, also went to the same party at \$200. Imp. Crescent Fame and cow calf went to Mr. Asa Terrill, of Blockton, Iowa, at \$200, and Mr. A. C. Merritt, of Kellerton, Iowa, purchased the Bates bull, Fairholm Jewel, at \$200. The cattle were sold right off grass and it was one of the best sales held in that section of the state this year. Below we print list of those selling for \$100 and over:

COWS.

Spicy of Oak Grove, eight years, A. J. Knott, Hatfield, Mo.....	\$185

You Want All The Cream

Therefore You Want the

Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time. A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

DAY BY DAY

Agricola

There seems to be a great demand for horses these times. They are shipped east. A good horse is a thing to love, but a balky, good-for-nothing nag is a very large nuisance.

Digging potatoes and cutting up corn is now the common industry on the farm. It is a comfortable feeling to know that we have an abundance of feed for the approaching winter.

Yet there are farmers who get tired before they have enough, and spring finds them running about the country buying feed.

Such farmers have missed their vocation. They were doubtless created to work the roads as they seem to be at it all the time.

A good way to catch rats is to fill a barrel full of corn and then set a couple of spring traps on it. It is our practice and the most successful we ever tried.

We are tinning the cribs to keep the wretched vermin out. To have bushels of shelled corn to feed with the germs eaten out, would provoke a saint, of which we are not one.

Pumpkins are a good cow feed this time of year. Some say they dry the cows up. But we have not found it the case with ours. They are increasing the flow of milk.

Men are selling hay and corn down town. We do not remember ever having sold a fork full of hay.

We always aimed, too, to have enough stock to consume the corn.

Sparrows are now gathering in flocks. When they rise all at once, it sounds like mimic thunder. They consume lots of farm stuff.

We husked a load of corn yesterday. The shucks are dry as ever they will be, but we wouldn't care about piling up very much.

Never had better corn. It is the second crop on a piece of sod. The season has been exceptionally favorable and the yield promises seventy bushels per acre.

Stock should fare well this winter. However, we knew a man who, it mattered not how plentiful feed was, had cattle on the lift towards spring, and invariably some died.

He saved at the spigot and spent at the bunghole.

Took some old roosters to town this morning and received four cents a pound for them. It strikes us a man will need sound teeth to chew them.

Eggs are nineteen cents. The biddies are paying for their keep; that is, the hens which are laying.

There are laying strains of poultry, as well as milk strains of Short-horns.

Pumpkin pie is strictly an American pie. We are told that in England they cannot grow pumpkins worth a cent.

A nation is much to be pitied that

cannot have pumpkin pie in the fall of the year.

They are having trouble in Cuba, it seems. Why don't this country at once annex it? That would put an end to insurrections there.

We, as a people, have large enterprises there and would soon have more had we possession of it.

For us to take possession might cause talk among other nations, but it would end in talk. The result would be of immense benefit to its common people.

Lincoln said, "The Lord must love the common people, He made so many of them."

This being so, the common people should love the Lord.

Agricola receives many letters from his readers. Received one this morning. It was from a gentleman who was raised four miles from the town where we were raised.

We try to keep our eyes and ears open to everything of a public nature going on in the world. This world is doubtless the second best that ever we shall be acquainted with.

Humming birds and turtle doves are yet with us, Oct. 1st. The little bird examines the tuberous flowers, such as cannas, running their long bills down in them for what insects they contain.

Another year we will plant more flowers which are tuberous and thereby have more humming birds.

This little bird soon learns its friends. Those who frequent our place have nested in our trees. They know us also, for they feed so near that we could lay our hands on them. But we never disturb them and they seem to know it.

FOUR YEARS OF AGONY.

Whole Foot Nothing But Proud Flesh—Had to Use Cuticura Remedies the Best on Earth."

"In the year 1899 the side of my right foot was cut off from the little toe down to the heel, and the physician who had charge of me was trying to sew up the side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suffered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Ointment often during the day and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day, after five years of suffering. The cost of Cuticura Ointment and Soap was only \$6; but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Alliance, Ohio, June 27, 1905."

HIGHLAND PARK COLLEGE, DES MOINES, IOWA.

We have frequently called the attention of the patrons of this paper to the advantages offered at Highland Park College, Des Moines, Iowa, for gaining a thorough, up-to-date and practical education. We have done so in the belief that it was one of the most reliable institutions in the country, and that it furnished practical courses of study not

We Pay the Freight.

SAVE ALL the DEALERS' 70% PROFIT

Each horn is 30 inches long with a 17 inch bell.

An Entirely New Principle in Phonographs

- Two vibrating diaphragms to reproduce the sound.
- Two horns to amplify and multiply all the sound from both sides of both diaphragms.
- No tension spring, and no swing arm to cause harsh, discordant mechanical sounds.
- Consequently, the Duplex produces a sweeter tone and greater volume of music than any other phonograph and is absolutely free from all metallic sounds.

Size of cabinet, 18 inches by 14 by 10 inches high

Double Volume of Sound.

THE Duplex is the first and the only phonograph to collect the vibrations and get all the sound from both sides of the diaphragm.

Because the reproducer or sound box of the Duplex has two vibrating diaphragms and two horns (as you see) to amplify the sound from both sides of both diaphragms.

The Duplex, therefore, gives you all the music produced—with any other you lose one-half.

Compare the volume of sound produced by it with the volume of any other—no matter what its price—and judge for yourself.

Purer, Sweeter Tone.

BUT that is not all, by any means. For the Duplex Phonograph not only produces more music—a greater volume—but the tone is clearer, sweeter, purer and more nearly like the original than is produced by any other mechanical means.

By using two diaphragms in the Duplex we are able to dispense entirely with all springs in the reproducer.

The tension spring used in the old style reproducers to jerk the diaphragm back into position each time it vibrates, by its jerking pull roughens the fine wave groove in the record, and that causes the squeaking, squawking, harsh, metallic sound that sets your teeth on edge when you hear the old style phonograph.

In the Duplex the wave grooves of the record remain perfectly smooth—there is nothing to roughen them—and the result is an exact reproduction of the original sound.

Direct From the Factory.

WE ask the privilege of proving to you that the Duplex gives a double volume of music, of purer, sweeter tone than any other phonograph made. We want to prove it at our expense. We ask you to let us send you one at our expense—under an arrangement mutually satisfactory—for use in your home one week.

You'll never regret it. Please address

The Duplex Phonograph Co., 179 Patterson St., Kalamazoo, Mich.

found in other institutions of learning. Many of our patrons have sent their children to this school and have invariably been pleased with the education that their children have received there. We feel that in bringing the advantages of Highland Park College before our patrons that we are doing both patrons and school a favor, for it is often very difficult for parents to know just where they ought to send their children to fit them for the obligations and duties of life. No school in the country, probably, has spent more time and money in adapting itself to the needs of the people, and for that reason we feel that we are justified in bringing this school prominently before our patrons. The school was organized sixteen years ago and almost \$700,000 have been invested in buildings and equipments. The merits of the school have been recognized in all parts of the country and students have flocked to it from almost every state and territory in the union. President Longwell, the founder and president of the institution through all these years, in a personal letter states that the new school year has opened with almost 1,000 students in attendance. The first week of the school there were twenty-one states and Canada represented. They were distributed as follows: Illinois, 41; Nebraska, 40; Minnesota, 35; Kansas, 28; South Dakota, 26; North Dakota, 22; Missouri, 21; Wisconsin, 8; Colorado, 6; Montana, 5; Indian Territory, 4; Washington, 4; Wyoming, 3; Michigan, 3; New York, 3; Indiana, 3; Tennessee, 2; South Carolina, 2; North Carolina, 2; Oklahoma, 2; Canada, 1. The balance, of course, are from Iowa. Besides the regular college course there are special associate colleges of pharmacy, engineering, business, stenography, telegraphy, penmanship and drawing, music and oratory. These associate colleges are not simply departments of a literary college, but they are thoroughly equipped schools and maintain entirely separate faculties. The college of pharmacy, for instance, is the largest college of pharmacy in the United States, and graduated 109 students from this one department last year. The college of engineering is complete in every detail, having the most complete machine shops west of Chicago. Besides the regular engineering courses usually offered in engineering schools, the college maintains a trade school to prepare machinists for their work. The business college, including a commercial course, shorthand and typewriting and telegraphy, is known to be the most completely equipped business college in the West. The business exchange room is the finest business exchange room in the United States, and is presided over by one of the most competent superintendents of business college work found in this country, while the college of music and oratory is not equaled by any other school of its kind west of Chicago. The normal training course prepares teachers for all grades of public school work, and has a special department for preparing primary teachers. The course

is equal to that found in any of our state normals. The expenses have all been reduced to the minimum. The accommodations are first-class in every particular, and the faculty, which is composed of about sixty specialists, is probably not excelled in any other college or university in the West. We take special pride in calling the attention of our patrons to this school, feeling that we do them a favor as well as the college, in letting them know of the excellent advantages offered at Highland Park College. The calendar shows that special terms open October 15th, November 27th and January 2d. Our readers may obtain any special information they may wish with regard to the school by addressing the president for a free catalog.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points in Indian Territory, Arkansas and Missouri, and \$25 from Chicago to Pueblo, Colorado Springs and Denver, with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory, which are limited to thirty days, stopovers going and returning.

Mexico: Less than one fare on the first and third Tuesdays, with stopovers.

California: Low round-trip rates on sale daily to September 1st.

Hot Springs, Ark.: Commencing June 1st to September 30th, one fare plus \$2, good thirty days, on sale daily.

Remember the Missouri Pacific Railway and Iron Mountain Route reach the principal points in the above-named states without change of cars.

For descriptive literature and other information address, Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

REUNION ARMY OF CUMBERLAND, CHATTANOOGA, TENN.

The Chicago Great Western Railway will on October 14th, 15th and 16th sell tickets to the above point at rate of one fare plus \$2.00 for the round trip. Tickets will be limited to October 30th to return, with privilege of extension to November 30th on payment of fifty cents additional. For full information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

VERY LOW RATES TO NEW ORLEANS, LOUISIANA.

Via the North-Western Line. Excursion tickets will be sold October 11th to 14th, inclusive, with favorable return limits, on account of K. P. Supreme Lodge. Apply to agents Chicago & North-Western Ry.

What's Wanted Here?

A good reliable tonic that will keep this litter free from worms, keep them healthy, increase the appetite, increase the digestion, increase the power of the assimilate and appropriate more food, keep them in a growing condition, get them to market forty days sooner and get bigger hogs. You can do all this with

PRUSSIAN STOCK FOOD.

The gain will cost less than a tenth of the feed you save or what you make in extra weight. Prevents cholera and other disease. "A Wonderful Flesh Producer." Hogs gain 3 lbs. a day each. John Herbers, one of my customers, fed Prussian Stock Food to his hogs that he was fattening and weighed them several times while feeding it, and they made an average gain of three pounds per day to each hog.

25 lb. Pail, Over 1200 Feeds, at Dealers or Prepaid.

Hogs safe from Cholera if Prussian Stock Food is fed regularly and pens disinfected with Prussian Knapo-Curo. IF YOU LOSE ANY HOGS AND have been using Prussian Stock Food for thirty days as directed and disinfected with Knapo-Curo, WE WILL REFUND for all the Prussian Stock Food used. Knapo-Curo kills hog lice and all germs. Send for our book and direction, they are Free. Mention this paper when writing.

PRUSSIAN REMEDY CO., St. Paul, Minn.

Manufacturers of Prussian Hog Worm Powders, Heave Powders, Etc.

ADVERTISING NOTES.

Mr. Lewis Hogue, of Weiner, Ark., has 20,000 acres of desirable prairie and timber land for sale in tracts to suit purchaser. His advertisement will be found on this page.

Messrs. White & Shroot, of Palmyra, Mo., are offering good corn, wheat, clover and blue grass for sale on easy terms in their advertisement which appears on page 23 of this issue.

Any of our readers who are interested in the great Panhandle country of Texas should write to Mr. Thos. J. Pugh, Omaha, Neb., who will furnish them full particulars of lands he has for sale there.

Messrs. J. M. and Carl Stingily, of Pelahatchee, Miss., have 480 acres of land which they are offering for sale in an advertisement found on this page of this issue. For particulars and terms address the owners.

The Gilson Gasoline and Alcohol Engine, an illustration of which appears in the advertisement of the Gilson Manufacturing Company, of Ft. Washington, Wis., can be run by a boy or girl. The company states that it goes like "60," sells like "60" and sells for "60." It is sent on trial and can be used for such purposes as pumping water, running a cream separator, churning, etc. In writing the company please mention The Homestead.

The Big Bend Land Company, of Wilbur, Wash., make the statement on page 23 of this issue that opportunities to secure a home in the wonderful Big Bend land country of eastern Washington are passing away, and Homestead readers should not delay. The Big Bend land country is a section free from electrical and other destructive storms, cinch bugs and other pests, and failure of crops are unknown. The above company are making special low prices to those who wish to buy this fall. Write them for illustrated booklet and map.

Mr. H. J. Davis, dealer in farm lands and ranches, of Burns, Kan., has a number of improved farms located on the south line of Butler county of that state which he is giving descriptions and prices on in his advertisement which will be found on this page of this issue. He has also a 2,800-acre ranch located within six miles of a good town, for sale. Four hundred and sixty acres of this ranch are under cultivation. Homestead readers contemplating making investments in Kansas farms should write Mr. Davis, or go and inspect his farms.

We desire to call the attention of our readers to an advertisement by Messrs. Smith & Davis, of Ames, Iowa, that appears on page 23 of this issue. They have a number of good farms located in Story and Worth counties on which they are quoting prices. The Story county farms are located within two to four miles of the Ames Agricultural College and are all special bargains, well located and good tiled land. The two farms which they have for sale in Worth county belong to an estate and must be sold soon. They are considered by the advertisers very cheap at the price asked.

Why pay high prices for merchandise when the Chicago House Wrecking Company will sell you equally good goods for 30 to 50 per cent lower prices? The large advertisement of this reliable house should be read from beginning to end by every reader of The Homestead. Don't miss any part of it, for all the bargains are remarkable. You should also by all means write for their 500-page catalog No. 500 and study it thoroughly, as it will save you a lot of money in a year. This firm buy out exposition buildings and furniture, merchandise at sheriffs' sales, etc., and give the farmer the benefit. Be sure and mention The Homestead when writing.

In the construction of poultry houses no material can be found that will be so well adapted to the wants as the Rex Flincote Roofing. It will be found advantageous for lining, as well as for roofing. This roofing is durable, economical and easily put on. It is suitable for almost all kinds of buildings. If you are interested in obtaining a good roofing material it will pay you to get their little booklet, which can be had free, giving much information that will be found valuable. Send for their booklet, enclosing four cents in stamps, entitled "Making Poultry Pay." Address J. A. & W. Bird & Co., 86 India St., Boston, Mass., or 222 Lake St., Chicago. Their advertisement appears on page 12.

A fine farm in Buffalo county, Neb., is offered for sale by the owner, Mr. W. H. Grassmeyer, of Riverdale, Neb., in his advertisement which appears on page 23 of this issue. Three hundred and fifty acres of this land is under cultivation, the balance being in pasture and wild hay meadow, with eighty acres in alfalfa. There are 10,000 worth of improvements on the land, consisting of a fine, large, new house, two large barns, two granaries, corn cribs, scales, feed yards, etc. He also has for sale twenty acres of which there are good improvements. This last mentioned tract is located near Kearney, Neb. For further particulars read the advertisement and write the owner as above.

The head of every household is interested in cutting down the cost of fuel. Much of the heat supplied by the combustion of high-priced coal goes up the chimney, which is due to a wrong construction of the stove. The joints of an ordinary stove are closed up with stove putty and in a short time they become open and a waste begins by allowing the heat to escape up the chimney. On page 16 will be found the advertisement of the Cole Manufacturing Company, 3234-3244 S. Western Ave., Chicago, Ill., who manufacture a hot blast stove, the virtues of which should be known by every reader. A nice little booklet will be sent to any reader interested in good stoves, giving a good deal of information on scientific combustion. It can be had by sending a postal. Write them.

A choice 160-acre farm, situated nine miles northwest of McCook, Neb., a town of 4,000 population, and six miles north of Perry, Neb., is offered for sale on page 8 of this issue by Mr. E. T. Severns, the owner, of Fairmont, Neb. Mr. Severns, in writing in regard to this farm, says: "This is one of the best farms in Red Willow county and must be seen to be appreciated. There were over 2,000 bushels of wheat raised on it last year, besides other crops. Both spring and winter wheat do well here, as well as corn, for those who have tried to raise it.

One man had over 1,500 bushels of peaches this year which he is marketing at from \$1.50 to \$3 per bushel on the McCook market. Another man raised 4,500 bushels of wheat. One man can farm 320 acres here easier than he can 160 in an older country. This land is advancing very rapidly." For further information read the advertisement and write Mr. Severns, mentioning this paper.

An illustrated advertisement of Lyon's Perfect Hog Trough appears on page 32 of this issue of The Homestead. Mr. M. M. Bay, of Albia, Iowa, proposes, for introductory purposes, to send this trough on two weeks' trial. A careful perusal of the advertisement will give the reader sufficient information, which if acted upon will save him probably many times the cost of this trough.

The Theo. F. Koch Land Company, of St. Paul, Minn., have a large tract of land located in the clover and tame grass belt of Minnesota near two railroads and less than 100 miles from the Twin Cities on which they quote a very low price in their advertisement which appears on page 23 of this issue. They are the owners of these lands and Homestead readers interested should write them for particulars.

A GOOD FENCE TO BUY.

A fence that has stood the test of service for years and always gives satisfaction is the kind to buy. A fence that is even "cheaper than a wood fence" in the end. A fence that looks fine, stands the wear and tear, and one that is worth the price is the kind that the Up-To-Date Manufacturing Company, of Terre Haute, Ind., make. Any reader of The Homestead in need of fence should write to this concern and get their prices before buying. "Money saved is money made." See advertisement on page 14.

SPLENDID POULTRY REMEDY.

On page 12 of this issue of The Homestead appears the advertisement of Morris' Antiseptic Amalgamation, a comparatively new remedy for poultry diseases—especially roup, canker, etc. This preparation is manufactured by Messrs. Joseph Morris & Son, of Montezuma, Iowa. Messrs. Morris are successful breeders of Wyandottes and Mr. Joseph Morris is president of the Powsheik County Poultry Association. They have tried this remedy thoroughly and it has also been tested by dozens of practical poultrymen. It is guaranteed.

THE ONLY HOG WATERER.

One of the devices for watering hogs that has met with a good reception at the fairs this fall is the Only Hog Waterer, manufactured by the Only Manufacturing Company, of Hawarden, Iowa. It is one of those waterers that will not freeze if properly cared for, and it is one that regulates itself when the trough is full. A great many of the Iowa swine breeders placed their orders at the fairs and they all speak highly of it since using it. If any of The Homestead readers are interested in a good hog waterer they should write the Only Manufacturing Company, Hawarden, Iowa, for particulars and prices.

A GOOD PLACE FOR GOOD MEN.

On page 14 will be found the advertisement of the Des Moines Nursery Company, of Des Moines, Iowa, which is anxious to make some good contracts with some good men to work for them the coming year. This is one of the oldest and best nurseries in the country, and their business is always conducted in the most straightforward manner. They do an immense business in nursery stock all over the West, and the trees they put out are the best that can be grown. All their deals are lived up to to the letter and anyone making a contract to work for them will find his position both a pleasant and profitable one. Write them for their terms of employment.

A DIP ON TRIAL.

The Marshall Oil Company, of Marshalltown, Iowa, in order to educate stockmen concerning the great value of Dipolene, will give a thirty days' trial of their product, Dipolene, without cost to the purchaser. In other words, the company will send any quantity of Dipolene over two gallons to any farmer and stockman who will agree to use it according to directions and if it falls short in any way of what is claimed for it the purchase price will be refunded. A booklet has been prepared by this company which states concisely just what Dipolene is good for and how it is used to best advantage. It will be sent on application to the Marshall Oil Company, Marshalltown, Iowa. Read the advertisement on page 7 of this issue.

INFORMATION ON TELEPHONES.

The Stromberg-Carlson Telephone Company, of Chicago, Ill., is the largest independent telephone house in the world. This company have been instrumental in scattering the blessings of rural telephones throughout the length and breadth of this land. A fifty-two-page booklet has been prepared by this company entitled, "How the Telephone Helps the Farmer," and this will be sent free upon application. It will be found to be full of interest from cover to cover, giving as it does a great many scientific facts relating to telephones in particular and electricity in general. It also imparts much practical information relating to the subject of telephone construction, etc. The advertisement will be found on page 14 of this issue. Write for the booklet referred to, addressing your request to Stromberg-Carlson Telephone Company, Chicago, Ill.

A RELIABLE TONIC.

Farm animals are more difficult to handle now than in an early day when they lived largely on grass. Their confinement today and the necessarily heavy grain feeding has weakened the respiratory and digestive systems. In many cases a tonic is needed because of this. Prussian Stock Food, manufactured by the Prussian Remedy Company, of St. Paul, Minn., is an exceedingly well-known tonic. It is not a food in the correct sense of the word, as only a small quantity is needed in the ration. A twenty-five-pound pail contains over 1,200 feeds. Its use increases the ability of an animal to digest its feed, consequently a small ration fed in conjunction with Prussian Stock Food will give better results than a larger ration fed alone. It contains nothing injurious to the animal's system, but, as said before, simply increases the power of assimilation. It is not the food that the animal eats that determines how much it will gain, but what it

Windows 62¢

138 inches thick, glass 10x20, four lights. All sizes equally low. Less than half what you usually pay. Regular Price \$1.50

If you have any use for glazed windows, don't buy elsewhere at any price or under any circumstances until you cut this advertisement out and mail it to us.

You will then receive by mail, postpaid, FREE, Our Grand Millwork Catalogue, a book of the latest and best styles of doors, windows, storm sash, moulding, porch brackets, columns, stair rails, ladders, art glass, etc.

We will explain why we can sell at prices so much lower than were ever before known.

Our prices are next to nothing compared with what you have been in the habit of paying.

ON the best 480-acre highly improved farm in southwest Oklahoma, write L. A. Briggs & Co., 206 Hall Bldg., Kansas City, Mo

assimilates, and it is this that Prussian Stock Food assists. Send for book and directions how to use the food to Prussian Remedy Company, St. Paul, Minn.

HIDES DIRECT FROM FARM TO TANNERY.

The people throughout this section will be interested in learning that a large leather tanning concern have decided to buy direct from farmers, butchers and merchants hides, pelts, furs, wool and tallow. There is a decided disposition these days on the part of manufacturers to buy direct from the producer and sell direct to the consumer, a step in the right direction and one of course that is mutually beneficial. The firm referred to is Messrs. J. S. Smith & Co., of Chicago, who have been in business since 1865 and have branches at Minneapolis, Kansas City, Omaha, Sioux City, Iowa; Detroit, Grand Rapids, Mich.; Indianapolis, Ind.; Springfield, Mo.; Denver, Colo.; Portland, Ore.; Boise, Idaho; Pocatello, Idaho; Nashville, Tenn.; Grand Island, Neb.; Hastings, Neb., and Los Angeles, Cal. See advertisement on page 17.

A GOOD STOVE AT SMALL COST.

Messrs. W. & H. Walker, of Pittsburg, Pa., make an exceedingly liberal offer in their advertisement on page 17 of this issue. For \$6.50 they will ship a cook stove twenty-four and one-half inches wide and forty inches long, with a fourteen-inch grate and an eighteen-inch oven, weighing 24 pounds. The regular price of this stove is \$16.50, but it is reduced to the price mentioned in order to introduce the Walker stoves into the best country homes of the great central West. The firm manufacture and import over 200 household necessities which they sell directly from factory to consumer, thereby cutting out the middleman's profits. A postal card application for the stove catalog and other literature will bring you full information concerning the character of the goods being sent out by this firm, and also the price of same. Address Messrs. W. & H. Walker, Stove Dept. 90, Pittsburg, Pa.

CUTTING DOWN THE FUEL BILL.

Garland stoves and ranges are fuel savers. They are constructed on scientific principles so that just the right amount of air fans the flame. No gases can escape because combustion is perfect in the Garland stoves and ranges. It will pay to cast aside an old stove or range, even if not worn out, and buy a new Garland. The saving in fuel will soon pay for the new stove, saying nothing of the additional comfort experienced in its use. The advertisement of the Garland stoves and ranges will be found on page 17 of this issue. The reader is requested to turn there at once. Notice the place for your name and address. If you are interested in the purchase of a new stove or range, sign your name, as well as that of your stove dealer, and also give your address, enclose in an envelope and address to the Michigan Stove Company, Detroit, Mich., and you will receive free of charge the most interesting book on stoves you have ever examined.

Do you want to buy land in the best part of Kansas?

Come to Burns or So. line of Butler Co., where you can raise all kinds of crops; especially alfalfa. The best alfalfa land in the state. Here are a few bargains that it will pay well to buy. Read them: No. 54-160 A., 110 A. in cultivation, 6 A. orchard, 45 A. pasture, 6 room house, barn, chicken house; all on houses on an improved place. Well and wind-mill. Price \$5,000. No. 133-180 A., 120 A. in cultivation, 6 room house, orchard, well; cave; 40 A. in pasture and meadow. Well and windmill at barn. Price \$5,800. No. 20-2,800 A. Fine ranch 6 mi. from good town. 460 A. in cultivation. House of 6 rooms, all in repair. Well at house. Burn 42x60. Well built; other out buildings, tenant house of 3 rooms. Well and windmill at barn. Springs and plenty of running water. Land is deep black lime-stone soil. Unimproved land can nearly all be cultivated; just rolling enough to drain well, no waste land; one of best ranches in Kansas. For prices and terms write us. H. J. Davis, Burns, Kan.

When writing please mention this paper.

....LANDS AND HOMES FOR SALE....

You can make Money in the Southwest

The light shaded portions represent very fertile sections in the Southwest.

Opportunities for making money abound in the Southwest. One of the surest sources of profit lies in the certain increase in land values, within the next five years. Good rich farm land, capable of raising 30 bushels of wheat to the acre, can now be bought in the Southwest for from \$3 to \$10 an acre. The same land 5 years hence will bring \$25 to \$50 an acre. Settlers are going into the Southwest by the thousands and it is only a matter of a few months when the actual demand for this rich land will force the price much nearer to what it is really worth.

Now is Your Opportunity!

You can sell your present farm—pay off the mortgage and have enough left to buy a big farm in the Southwest that will make you independent in a few short years.

The "Coming Country" Free!

This "Coming Country" is a very interesting paper published monthly and devoted to the Southwest. It will post you on conditions in the Southwest better than anything that you could read. I'll be glad to have the publisher place your name on the mailing list and send you a free copy of the paper regularly for one year. Write now to

S. G. LANGSTON, Sec'y., M. K. & T. Land Bureau, 306 Wainwright Bldg., St. Louis, Mo.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 600 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. A good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$90 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, chicken in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

HOMESEEKERS' EXCURSION To Jasper county, southwest Missouri, every two weeks. Write for our free list of lands for sale. M. F. Davison Realty Co., Carthage, Mo.

TEXAS LANDS IN THE PANHANDLE, CHEAP. Thos. J. Pugh, - - Omaha, Neb

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

FEEDING SILAGE TO SHEEP.

Sheep breeders will be very much interested in experience of breeders who have fed silage to sheep. A sheep breeder of Indiana has the following to say on this subject in the Indiana Farmer: "Some sheep growers are enthusiastic in their praises of corn silage as a food for sheep; on the other hand, a large number do not think so well of it. All those who have tried it have agreed with reference to the wisdom of feeding a moderate quantity to the flock when the silage has been properly cured. On the other hand, quite a number have found trouble when feeding it in large quantities. On the whole, it is not to be considered as satisfactory food for sheep as field roots, since, more especially when there is much corn in the silage, it has a tendency to produce a heated condition of the system, which with breeding ewes is not desirable. It is not well, perhaps, to feed corn silage to a breeding flock more than once a day, and when so fed the aim should be to give them clover hay or alfalfa at least once a day in order to produce a proper balance in the ration. In cold weather it is probably wiser to feed the silage at noon than morning or night. When exposed to such weather for only a few minutes the temperature as cool as is frequently found in sheep sheds will freeze more or less, or if it does not freeze it becomes very cold. For this reason it is better to feed it in the middle of the day in cold weather, for at that time the temperature is usually many degrees warmer than in the morning or evening. It is not common to feed more than two to four pounds of silage per head per day to sheep, but some farmers who grow winter lambs feed as much as

that twice a day, more especially after the lambs have been born. A great advantage of silage as a food for sheep consists in its cheapness. It furnishes the cheapest food that may be fed to them, and when properly fed there should be no fear of hurtful results from feeding silage well made."

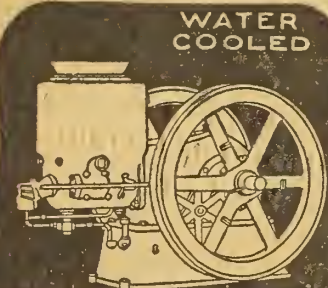

HANDLING WESTERN SHEEP.

Many farmers will this fall for the first time handle western sheep, and a little knowledge of the methods will not be out of place. The following from the Farm, Stock and Home gives some valuable points on this line: "About the first thing a farmer should do upon receiving a consignment of western sheep is to dip them. It costs a little money, but in the end it may save hundreds of dollars. The average farmer cannot tell upon examination of the sheep whether they are infected with scab, unless the disease is quite pronounced; so even if the sheep are said to have been dipped earlier in the season, the safest plan is to dip them again. If they have scab, many of them will die, and those that do not, will fail to fatten well, and hence not be readily salable. So give them all a bath and be on the safe side. Upon arriving, the sheep should be given plenty of water and salt, but should not at once be turned out onto the very succulent green pasture, for this may cause scours. They should be partly filled on rather dry grass or hay. When they are satisfied then they may safely be turned on green grass, or the corn field. With such treatment they may subsequently be turned on rape or clover pasture from time to time without injury. When once used to these crops, little trouble will be experienced in dry weather. Those who start feeding early, or whose sheep have the run of the corn field and learn to eat the corn, will have little trouble in fattening their flock and preparing them for market. If, on the other hand, the pasture is not of the best or the sheep should happen to be slow to eat corn in the corn field, one should not be a bit backward in feeding a small quantity of grain daily. The gains resulting will more than pay for the trouble and the sheep will also steady down to better grazing. Above all supply plenty of salt and water in addition to feed. Western sheep should never be allowed to remain at a standstill, but should be kept constantly on the gain. The feeding season is not long, and if money is to be coined, the most must be made of every minute."

A MARKET FOR GOATS.

Is there a market for goats for meat, or are goats used for meat? I have never seen any market reports giving prices of goats, and I have been in Chicago with stock a good many times. I never saw any goats while there. J. F. V. Marcola, Oregon.

Goats are shipped to all of the principal live stock markets and are sold readily at prices agreed upon without quotation. Although many goats are sold to packers but little, if any, goat meat is placed upon sale as such. It is usually sold as mutton. The flesh of kids is said to be quite palatable

FULLER & JOHNSON'S Frost Proof Gasoline Engine

Is the Engine for the Farm.

Because it can't freeze—you can operate outside with the thermometer 30 degrees below zero. No frozen, bursted pipes to stop you in the midst of some important work.

You do your work where and when you want to, not when the engine wants to.

Besides, it is the easiest engine to understand and operate. This is true because Fuller & Johnson have worked and experimented for 25 years to develop this simple engine for the farmer.

The FULLER & JOHNSON Guaranty back of this engine means absolute protection to you against loss or disappointment.

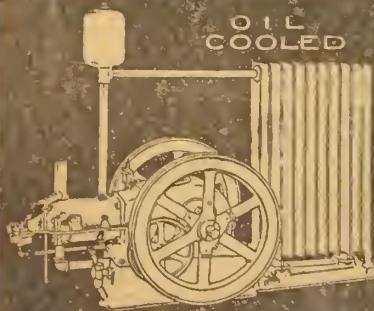

But, before you buy any engine, send a postal asking for our valuable free booklet, "Helpful Hints on Farm Power." It handles the farm power problem from the farmer's standpoint and will prove a valuable guide no matter what engine you buy.

Investigate Fuller and Johnson's Line of Farm Implements

if you want the highest standard of quality in materials, workmanship and design. Various styles of riding and walking Plows, Harrows and Cultivators, Corn Planters, Transplanters and Manure Loaders.

The Fuller & Johnson name plate has meant satisfaction to farmers for the past 45 years. We know the farmers' needs—we can supply your requirements.

Fuller & Johnson Mfg. Co.,
115 Washington St., Madison, Wisconsin.

FREE FOR YOU TO TEST

¶ We are so sure that Amatite is better than any other roofing that we want to send a Free Sample to every one who will mail us their name and address. We know Amatite is a great improvement on the ordinary ready roofings.

¶ It doesn't require painting or coating every year or two to keep it tight.

It has a non-conductive mineral surface, which gives it long life and offers absolute protection against rain, snow, hot weather, cold weather, frost and ice. You can depend upon it under the most difficult conditions.

¶ Any one can lay it. No

skilled labor required. Nails and Cement free with every roll.

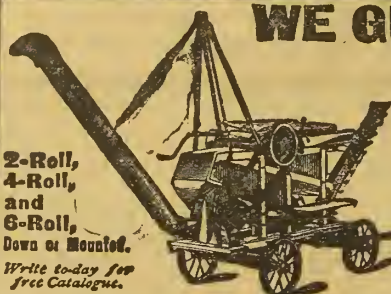

¶ It is a fire retardant. And of importance, its price is very low.

¶ Do not omit this chance to get a Free Sample and Booklet about it.

Echoes From a Kansas Farm

By Henry Hatch

Anyone who can rapidly peel bark off logs can get work of a similar nature husking Kansas corn this fall.

There is one drawback to farming by machinery, and that is the mud. None of the heavy machines can be used in mud. And this is an era of mud.

Some inventive genius has at last made a manure loader. We never have seen one at work, but if it works at all, the man with several hundred loads of manure to haul in a year cannot afford to hire it loaded by hand, at present wages paid hired hands.

The price paid ordinary day help on the farm has never been higher than now, and never scarcer to get. Thousands of men could get work until winter, right here in eastern Kansas; still, when you go to town, there are about the usual number of loafers on the street corners.

So far this fall the weather has been favorable to the man who has sown seed broadcast. Usually, when broadcasting fails, it is in the fall of the year, but these wet fall months, such as we have been given for the last half-dozen years, only call for getting the seed to touch the ground.

Different localities have their favorite varieties of grain. While living in Nebraska, in the spring wheat section of the state, the favorite for a number of years was the "Blue Helm" variety. Here, where nothing but winter wheat is raised, which yields on an average of double what the spring wheat used to, the favorite is getting to be the Iron Clad.

It depends a good deal on the man, whether or not there is anything in the \$60-a-month job of supplying the mail to patrons of a rural route. Some around here have taken the job for a few months, then given it up as profitless; others have been carrying ever since the start, and say they can lay up \$1 a day above the necessary expenses. One thing is assured, carrying mail six days in the week is no snap.

Some of the high-class stock papers give advice that is too high-class for the ordinary farmer and breeder to follow. For instance, sifting all the hulls out of ground oats before feeding to colts, is the latest from a stock journal. This kind of stuff is eagerly devoured by the man of money, who does his farming by proxy, but the man who farms for profit, not pleasure wholly, cannot afford to be too particular, especially when it means a big bill for hired help.

A farmer can make money by buying all the labor-saving machinery after he has the money to pay for it, when he would lose out by buying on time. This fact calls for taking all advice on buying machinery with a few grains of salt—taking into consideration your own situation. It is the interest that grinds a person down, when everything has been bought on time. A man who has been in a position to closely observe these things for the past twenty years, tells us that the man who has only the farm mortgaged always gets out all right, but when the farm, the stock and about all else is represented by interest, it is grind, grind, without making much impression.

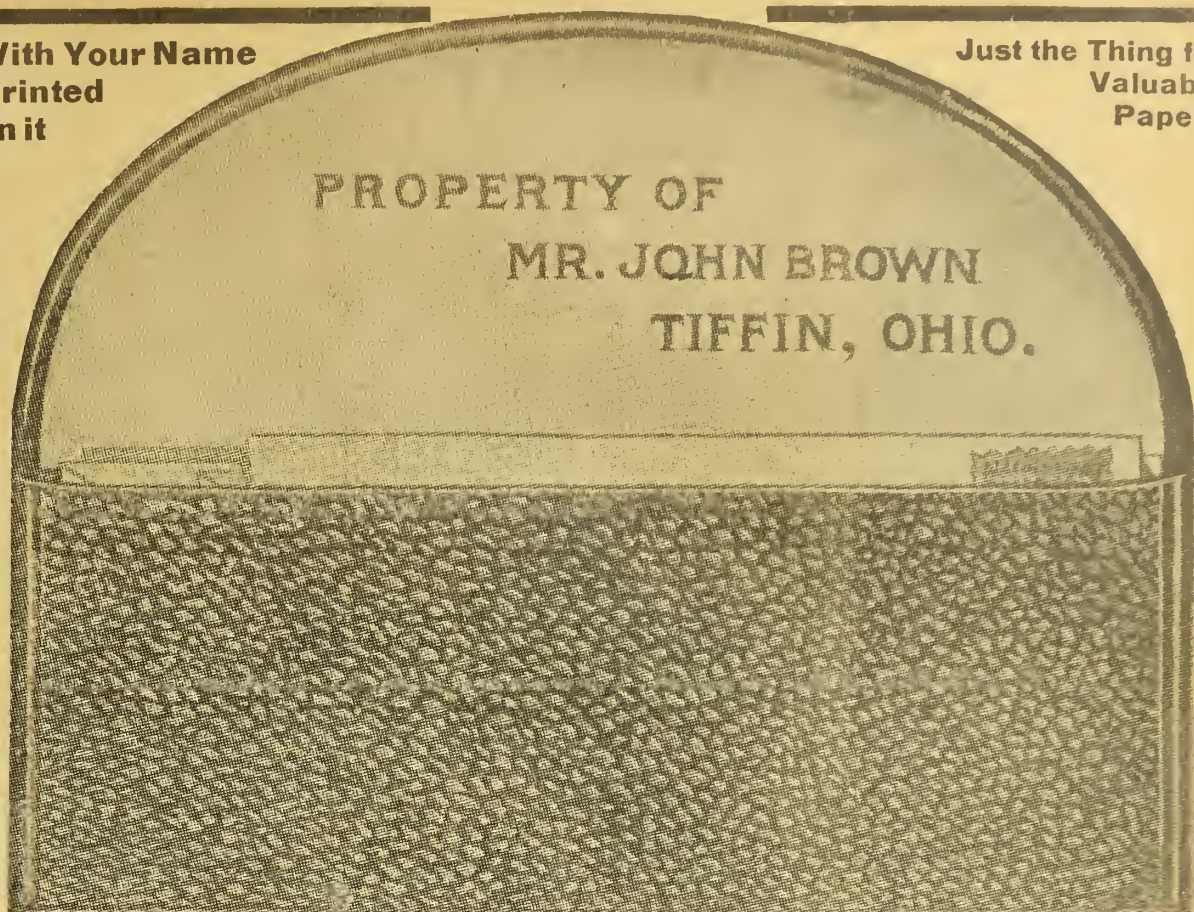

Never before has there been the hunting out of the public lands open for settlement that there is now. A large portion of those who sell their farms here go further west in the state, many clear to the Colorado line, where there is still some public land. In a very few months there will be no public land within the state, either worth having or worthless. The population continues pushing westward at a rapid rate.

A. J. CHILD & SONS.

One of the oldest mail order houses in America is that of Messrs. A. J. Child & Sons, of St. Louis, Mo., which was established in 1874. This firm have built up a splendid business by honest and straightforward dealings and by always giving the customer just what he paid for and at prices that were always reasonable. We have known this firm for a great many years and all the time they have carried an advertisement with us we have never had any complaints of their methods of doing business. They have just issued their new catalog of farm and household supplies and it is one of the most complete books of the kind that has appeared on our desk this fall. One

Just the Thing for
Valuable
Papers

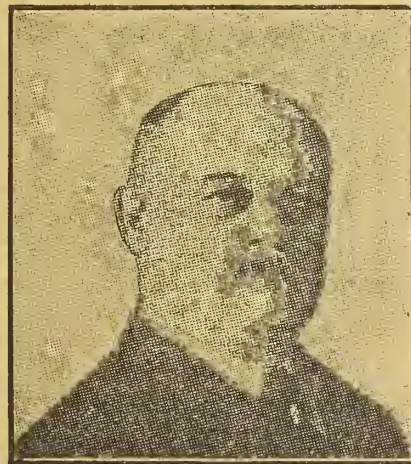

FREE FIVE THOUSAND POCKET BOOKS

I Am Going to Give Them Away

I PUBLISH the greatest Farm Paper in the world—"THE METROPOLITAN AND RURAL HOME." Before I was a publisher, I was a farmer. Now I am intensely interested in both. I believe farming and publishing are the greatest and best businesses going. Sometimes I even think farming beats publishing.

And now—just to show you how I feel toward farmers, I want to give five thousand of them each one of these Pocket Books. If you are a farmer, I want to give you one. I want to give you one of these Pocket Books so you can show it to your friends and say, "My friend Ellis, publisher of the greatest Farm Paper in the world, gave me this." Then you and your friends will think of me and my paper—The Metropolitan and Rural Home—that goes to half a million farmers every month—and you will say among yourselves, "That Ellis must be all right. I want to read his paper and see what he says in it." These Pocket Books I am going to give you are made from genuine Rubber Covered Cloth. They are just the thing to carry valuable papers—such as notes, contracts, Fire Insurance Policies, weight receipts, etc., as well as money. They fold up flat and fit your inside coat-pocket—just the kind of Pocket Book every man likes to own.

Now you don't pay anything for the Pocket Book. It's FREE. I send it to you postpaid and don't ask you a cent. But to show that you are willing to be just as liberal with me as I am with you, I want you to send me 20 cents for The Metropolitan and Rural Home for a year. Now don't say, "that's what I expected." Wait a minute and read the rest. You haven't got the most liberal part of my offer yet. Read this announcement all through. I would do as much for you, if you were me and I were you. If you will do as I ask, I will HAVE YOUR NAME AND ADDRESS PRINTED ON THE INSIDE OF YOUR POCKET BOOK, so if it gets lost, it will be returned to you at once. When I send it to you, I will also send you some sample copies of The Metropolitan and Rural Home and I will continue to send the paper to you for Three Months. Then, if you don't like it, just say so and I'll SEND YOU BACK YOUR 20 CENTS and stop your subscription and you may keep the Pocket Book for your trouble. That gives you the paper three months FREE—to say nothing of the fine Pocket Book. Now—what do you think of that for an offer?

CHARLES E. ELLIS

at once. When I send it to you, I will also send you some sample copies of The Metropolitan and Rural Home and I will continue to send the paper to you for Three Months. Then, if you don't like it, just say so and I'll SEND YOU BACK YOUR 20 CENTS and stop your subscription and you may keep the Pocket Book for your trouble. That gives you the paper three months FREE—to say nothing of the fine Pocket Book. Now—what do you think of that for an offer?

A GREAT BIG ILLUSTRATED MAGAZINE FREE

mind you, The Metropolitan and Rural Home is a great big Magazine Paper. It is printed in clean, plain type on nice paper and there are lots of pictures every month. I just mention these things because they are extras—it's the stock, dairy and farms news, and good stories, that make my paper the best farm paper in the world.

If you don't tell me at the end of three months to stop the paper, of course, I'll keep your subscription—enter your name as a regular subscriber and send you The Metropolitan and Rural Home for a full year.

Now I'm sorry I haven't got more of these Pocket Books, but there are only 5,000 to give away, so you'll have to hurry a little if you want one. They are such good Pocket Books that they'll go like wildfire and you ought to stop right here, fill in the order blank AND MAIL IT TO ME AT ONCE, so as to be sure to get one of these Pocket Books. I put that blank in here so you needn't hunt for paper and ink unless you want to. Use a lead pencil, fill out the blank, inclose twenty cents (stamps or silver) and mail it to me just as quickly as you can. Do it right away, so the Pocket Books won't be gone when I get your subscription.
